"As teeth are often the first part of the body to show signs of the effects of malnutrition, the removal of all parts of the wheat-germs from the roller-flour used to make the higher priced bread must have largely helped to cause much dental caries and atrophy of the jaws amongst the rich.

The Wheat Germs

which the roller-miller has removed in making the flour for his higher-class customers are mixed with low-grade flour and made into cheap bread for the poor. The stone-made flour largely used to make the lower-priced bread contain particles of husk and the lime salts and diastase of the wheat-germ, and, therefore, is well adapted to help in the development of strong jaws and sound teeth. Bread made from roller flour from which the wheat germs have been removed being deficient in nutritive qualities appears to have considerably helped to cause atrophy of the jaw and the resulting defective teeth.—I am, Sirs, yours faithfully,

"THOMAS G. READ,
"D.M.D. Harvard, L.D.S.R.C.S. Eng.
"Cavendish Square, W., September 3rd, 1900."

THE WEATHER.

MONDAY (September 24th).—Cloudy weather prevailed over a large part of our islands, with rain in several places. A large cyclonic disturbance was situated to the north of Scotland, and a shallow subsidiary disturbance was travelling across England. The winds were mostly south-westerly in the eastern districts, with a high temperature for the time of year. In Ireland and the West of England the wind had become north-westerly, with a rising barometer, and the temperature had fallen considerably. Rain was measured in the morning as the result of the fall since the previous day at most places in the north and west, and the fall was very heavy in the extreme north and north-west. The day was mostly dull in London, with slight rain at times, and the mid-day temperature rose to seventy-one degrees.

TUESDAY (September 25th).—Fine weather prevailed in nearly all parts of the British Islands, but the air was distinctly cooler than it had been for some time past. Rain was measured in the morning, as the result of the fall in the preceding twenty-four hours, in most parts of the kingdom, and slight rain was reported again during the day at a few places in the west. Monday night was cool in the northern and midland districts, the sheltered thermometer falling below forty degrees in several places. The midday temperatures touched sixty degrees in the South of England, but elsewhere the highest readings were generally several degrees lower. The day was very fine and bright in London, and the thermometer rose to sixty-five degrees.

WEDNESDAY (September 26th).—The high barometer, which has continued with such persistence over our islands, was completely giving way, and a storm area of some importance was approaching our coasts from the Atlantic. The outlook was sufficiently threatening for the storm signals to be hoisted on all coasts, and in the afternoon the wind was already blowing with the strength of a gale in parts of Ireland. Rain was measured in the morning at all the northern and western stations, and the rain continued during the day in places. Tuesday night was cold in Scotland, the thermometer falling to within one or two degrees of the freezing point at several of the coast stations. The day was fairly warm in the southern districts, but the temperature was low in the north. In London the weather was dull and gloomy, but the thermometer rose to sixty-seven degrees.

THURSDAY (September 27th).—Rainy and unsettled weather prevailed over a large part of our islands, and the winds were mostly strong and squally from the south-west. Large amounts of rain were measured in the morning, as the result of the fall since the previous day in the northern and western districts, and smaller amounts fell in other parts. Temperature had risen briskly over the northern portions of the kingdom, but the midday temperatures were nowhere high. Rain fell again during the greater part of the day in London, and the highest temperature was sixty degrees.

FRIDAY (September 8th).—The weather continued showery in many parts of England, and the sky was generally cloudy. Rain was measured in the morning, as the result of the fall since the preceding day, over the entire Kingdom, and the rain was heavy in several parts of the country. A westerly wind was blowing in the south of our islands, where the temperature was fairly high; but in the north the wind was easterly, and the weather was cold for the time of year. Showers were experienced at times in London, and the clouds were heavy and threatening; the mid-day temperature was sixty-five degrees.

SATURDAY AND SUNDAY (September 29th and 30th).—Unsettled weather prevailed in many parts of our islands during the two days, and in the northern and western districts the rainfall was heavy. The winds freshened considerably from the south-west and west, and the sea was rough in the English Channel. The day temperatures rose to about sixty-five degrees in most parts of England, and the nights continued warm for the time of year. Both the days and nights were rather cool in the north. In London, Saturday was fine, and the temperature rose to sixty-six degrees, but rain fell for some hours on Sunday, and the highest midday temperature was sixty-four degrees.

FARM PROSPECTS.

Hunts.

Save for a shower on Monday and Wednesday, the severe drought continues. The grass lands are brown and scorched up, the meadows have no feed on them, and the kohl rabi and swedes are suffering from want of moisture. The mangolds make but slight increase of weight. Manure carting has been done with a minimum of horse power, and where it was possible to plough the seeds and the stubbles the result has been grand. On the sharp gravel lands ploughing has been impossible. Wheat drilling should commence next week, but rain must come first.—S. P. (September 29th).

Somerset.

A shower or two of rain has fallen this week, which was badly wanted in the Cheddar district, as in many instances the pastures have become brown, and grass and water scarce. The little corn grown in this district was secured in good condition, but the crops rather light in straw and grain. Mangolds are a good crop, but few turnips grown. Disease has made its appearance, and many tubers are affected, but the crop of potatoes is good. Many apples were blown down during the storm that prevailed a short time since, and the fruit is smaller than usual, so the crop will not be a good one.

The Flow of Milk

at the dairy herds is not good, which no doubt in great measure is due to the brown pasturage. Cattle and sheep are generally healthy, but are rather low in condition.—A. L. O. (September 28th).

North Somerset.

We have been taking advantage of this long spell of dry weather for getting out our potatoes and doing what threshing we could, and regret to find that the yield is very disappointing. For instance, three acres of square wheat, a good crop, but which had been served out cruel by the sparrows as well as by that windstorm on Bank Holiday, turned out only

Twenty Bushels an Acre.

Oats also are short in yield, and the sample thin and of a bad colour. If this dry weather continues (the rain of yesterday is all gone) it will be serious, for already we have to cart water to the cattle, the pools and ditches being nearly dry. The swedes are mildewed, and therefore spoiled, while the mangolds are checked in growth at what is usually their best growing time. Kohl rabi seems to hold out best of any, doubtless from their habit of rooting deeper, thus enabling them to revive the flagging leaves of the day in the course of the night. There is

No Surplus of Grass

in the pastures, as is usual at this season, and it is too late to expect much growth now, so that an early application to the hay mows will be necessary. Fortunately good hay is fairly plentiful, and this, we think, is the reason that stock of all kinds is selling so well. The election fever is on again, and Codlin and Short are with us doing their best to blame each other for the shortcomings of the past, but very little is said about the future. The remarks of your "Lobbyist" do seem very severe on the poor cultivator trying to see his way through this political haze, but the more he hears the more he gets befogged, so he turns to co-operation in buying and selling as a means of self-help, and leaves the agricultural position to drift.—R. B. (September 28).

Foreign Prospects.

GERMANY.—Weather has been very fine and favourable to the lifting of potatoes, which, in general, are turning out a good crop; but rain would be welcome to make the land fit for ploughing.

SWEDEN.—Weather of late has been warm and dry, and the cereal crops have been harvested in the best condition, only potatoes are now in the fields. Home-grown supplies have been very small, but of good quality.

SPAIN.—Ploughing and sowing have begun in many parts of the Peninsula under favourable auspices.

UNITED STATES.—The *Cincinnati Price Current* says a considerable portion of the wheat crop is belated, but on the whole the new month is favourable, and a full average wheat area is indicated. Green fly rings are reported. The previous indication concerning maize are maintained, promising early marketings of good quality.—*Dornbusch.*

German Crop Reports.

The following report concerning the condition of potatoes, clover, lucerne, and hay, and the probable yield of the same was issued in the middle of September by the Imperial Bureau of Statistics. No. 1 represents a very good crop; 2, good; 3, an average; 4, below an average; 5, a very small crop.

	Potatoes.	Clover.	Lucerne.	Hay.
Prussia	2 8	3 4	3 0	3 0
Oldenburg	2 8	2 7	2 9	2 5
Saxony	2 2	2 9	2 8	2 7
Hesse	2 3	2 5	2 7	2 5
Bavaria	1 8	2 6	2 1	2 5
Wirtemberg	2 1	3 0	2 8	3 1
Baden	2 0	—	—	—

1895	2 6	2 9		2 7
1894	2 9	2 4		2 0
1893	2 5	3 7		3 2

The fine weather has been most favourable for carrying all cereal crops. Fodder crops and potatoes suffered from the drought, especially in Posen, Silesia, and Alsace-Lorraine. Autumn work is made heavier by the drought. The potato crop was good, and sometimes very good in South Germany, Brunswick, Mecklenburg Schwerin, Anhalt, and some parts of Thuringia. The crop was unfavourable in Posen, Oldenburg, Schaumburg Lippe, and Hesse, where tubers are not well developed in consequence of the drought; in some places they are rotting or diseased owing to frequent rainfalls. Clover and lucerne are backward in growth, owing to the drought. The crop was carried dry, but the yield was small. The yield was satisfactory as to quality and quantity in some parts of South Germany, and near the Elbe. Young clover is in good condition, except in places where the drought still prevails. The second crop of hay is cut, and is satisfactory in low lying and well-watered meadows. High-lying meadows suffered from the drought, and the aftermath is not good. There is a dearth of fodder in Posen, Upper Plausitz, and Swabia.

Contagious Diseases of Animals.

Summary of Returns issued by the Board of Agriculture for the week ending Sept. 22nd, 1900:—

CORN MARKETS.

LONDON.

Mark Lane, Monday.—Malt : Only a limited trade. Barley : Grinding was 3d per qr cheaper. Wheat : Advanced 6d per qr on the week. Oats : Declined about 3d per qr. Maize : Firm. Flour : Made 6d per sack more money.—NIXON, GOWER, AND CO.

Mark Lane, Wednesday.—New English wheat continues in scanty supply, and the little submitted is mainly on the country exchanges. Fine white ranges up to about 34s, and red to 33s 6d, 63lb, delivered. American descriptions unaltered. The tendency of the flour market showed no alteration to-day respecting either English or American. The London Millers' Association made no alteration in prices since last Monday afternoon. Town households, 26s ; and whites, 29s per sack. American first patents quoted at 27s to 28s ; second ditto, 25s to 26s. First bakers, 22s to 23s : second ditto, 20s to 21s. Hungarian up to 30s 6d per sack. Grinding barley unaltered, and in fair supply. Persian, 18s 6d ex ship, 18s 6d ex quay ; Azof, 19s 6d ship just due ; Black Sea, 20s ex quay. Oats in plentiful supply and against sellers, but quotations were not reduced to-day, although remaining nominal. American mixed clipped, about 14s 6d ex ship, 15s ex quay ; and white clipped in these positions, 15s 6d and 15s 9d respectively. Maize firm and unchanged.

Mark Lane, Friday.—Home-grown wheat continues in scanty supply, and commands full rates, most of what little business transpires being on the country exchanges. Fine white up to 33s 6d, and red of similar sample 33s per qr, 63lb, delivered. American descriptions well maintained, in spite of heavy stocks. The London Millers' Association made no alteration at this afternoon's meeting. Town households, 26s; white, 29s per sack, being last Monday's advance. American first patents quoted at 27s to 28s ; second ditto, 25s to 26s. First bakers, 22s to 23s ; and second, 20s to 21s. Hungarian up to 30s 6d per sack. Grinding barley unaltered. Persian being in fair supply at 18s ex ship, 18s 6d ex quay. Oats neglected and depressed by recent heavy supplies, and in buyers' favour. American mixed clipped, 14s 3d ex ship, 14s 6d to 14s 9d ex quay. Mixed American maize held for 21s 1½d ex ship, and 21s 6d ex quay, and round corn unchanged. Odessa, ex ship, distant, 25s, and ex quay 25s 3d. The market for beans and peas retains firmness, and there is still little on hand.

COUNTRY.

Ashford, Tuesday.—Surplies moderate, with firm trade. Flour advanced 1s per sack for all qualities. Wheat firm, with short supply.

Aylesbury, Saturday.—Wheat in fair supply, but a quiet feeling pervaded the trade, and the parcels disposed of were at late rates, viz., 28s to 31s per imperial quarter. Barley, oats, and beans without change.

Banbury, Thursday.—Wheat, red (new), 28s 6d to 30s per qr ; ditto (old), 32s to 33s per qr ; beans (old), 33s to 34s per qr ; oats (new), 19s to 21s per qr ; oats (old), 26s to 18s per qr. Wheat in fair supply, at the full rates of last week to 1s dearer.

Boston, Wednesday.—There was a fair attendance, and a moderate trade. Wheat, 29s to 29s 6d ; grinding barley, 25s ; malting barley, 26s to 39s ; oats, 16s to 18s ; new beans, 30s ; maize, 23s 6d to 25s 6d ; peas, 50s to 63s.

Braintree, Wednesday.—Good attendance and firm trade, reds making from 30s to 32s, and white 31s to 33s per qr.

Brighton, Thursday.—Wheat in good supply. Fair trade at late rates. Small attendance. New white wheat, 30s to 31s 6d ; new red ditto, 29s to 31s ; old white ditto, 31s to 32s ; old red ditto, 30s to 31s ; grinding barley, 22s to 23s ; oats, English, 17s to 19s.

Bristol, Thursday.—There has been a moderate trade since our last. At to-day's market English wheat was in moderate supply and 6d higher. Foreign, 3d to 6d dearer. Grinding barley, maize, and oats, about late rates. Flour was 6d to 1s per sack dearer.—GRACE BROTHERS.

Cambridge, Saturday.—During the week the wheat trade has been very steady, without change in value. Supplies continue small, and buyers experience some little difficulty in getting their requirements. A fair supply of old offering. At the market to-day there was a rather better supply, and a good demand existing, farmers made full prices of last week. Wheat, red, 29s to 31s ; and white up to 31s per 504lb. Barley was in fair supply, but common sorts predominated, good quality being very scarce. Beans steadier, at 30s ; old up to 34s. Barley, common runs from 24s to 30s ; fine up to 34s.

Canterbury, Saturday.—A steady demand for wheat at firm prices. A little doing now in malting barley. Ruling prices :—White wheat, 31s to 33s ; red ditto, 30s to 32s ; malting barley, 28s to 35s ; grinding ditto, 21s to 24s ; white oats, 18s to 21s ; ditto black, 16s to 20s ; peas, 30s to 32s ; tick beans, 30s to 32s ; mazagans, 28s to 29s per quarter.

Carlisle, Saturday.—Larger supply of oats in our market to-day. Slow sale at fully last week's prices. New oats, 16s 6d to 18s 6d 336lb ; old oats, 23s to 24s 6d 336lb ; wheat, new, 29s 504lb.—THOMAS ROBINSON.

Chester, Saturday. — The samples of English grain offered were few, and wheat, generally speaking, was of poor quality ; no change in values, except that in consequence of good demand. Better prices was asked for old oats. Quotations : Wheat, new, 4s 1d to 4s 3d ; old, 4s 5d to 4s 6d per 75lb. Grinding barley, 3s to 3s 6d per 64lb. Oats new, 2s 2d to 2s 4d ; old, 3s to 3s 6d per 46lb. Indian corn, 11s 3d to 11s 9d per 240lb.

Colchester, Saturday.—Wheat better supply, dull trade at barely last week's prices. Barley, more offering ; there is some demand for the better qualities, but the lower qualities are neglected. Beans, peas, and oats firm.—FRANCIS AND CO.

Dorchester, Saturday.—A fair quantity of English wheat offered, but the demand was quiet, and last week's rates were barely maintained. Foreign dull. Grinding barley firm, at late rates. Malting barley was plentifully offered, but the samples varied a good deal in quality and prices had a wide range. Feeding stuffs, quiet trade.

Glasgow, Wednesday.—To-day there was a small attendance at our corn exchange. Wheat quiet, but steady, at an advance of 3d per boll on the week. Flour steady, at an advance of 6d per sack. Indian corn very scarce on spot, and firm at an advance of 6d to 7½d per boll. Canadian and Indian pease steady at late rates. Grinding beans scarce on spot and slightly firmer. Foreign oats quiet but steady. Home oats offering less freely, and are held for 3d to 6d per boll advance. Barley firm. Oatmeal quiet. Bran and thirds firm but unchanged. —GIBSON AND CLARK.

Glasgow, Wednesday.—Market firm for wheat and flour, and prices 3d to 6d dearer on the week, but buyers respond slowly. Indian corn extremely scarce on spot, and 7½d per 280lb dearer on the week ; price 13s to arrive. An advance of 3l on the week is conceded with demand. Good peas still scarce and firm. New home oats easy and irregular ; foreign steady. Beans and barley unchanged.

Hereford, Wednesday.—A very active market, supplies of English grain being large. Wheats moved off at last week's prices, specially fine samples making a fraction more money. Old wheats firm without quotable change. Malting barleys very disappointing in quality, and business was difficult to do except at low figures. Oats quietly steady. Beans freely offered without change. Wholesale prices :—Wheat, white, 3s 6d to 3s 8d per bushel ; red, 3s 5d to 3s 7d ; barley, 3s to 3s 9d ; oats, 2s 3d to 3s ; beans, 3s 8d to 4s ; maize, 2s 8d to 3s 2d ; vetches, winter, 4s to 6s ; and spring, 3s 6d to 5s.

Hull, Tuesday.—Wheat and maize firm, with good consumptive demand. A fair supply of English wheat, which sold more freely at 29s to 30s. Prices :—Wheat (Californian), 31s 3d ; Walla, 29s 6d ; Russian (red), 30s 6d ; River Plate, 31s; Danubian, 30s ; maize (mixed American), 21s 3d; ditto (to arrive), 21s 3d ; Odessa (to arrive), 25s 6d ; Galatz-Fox, 24s 6d beans (washed Saffe), 29s ; oats (Russian), 15s 6d ; barley (Azov and Black Sea spot), 22s ; to arrive, 21s 6d.

Ipswich, Tuesday.—A much better attendance to-day. Small supply of wheat ; trade steady at fully last week's rates. Red, 30s to 33s ; white, 34s. Good supply of barley, for which there was a fair demand at from 28s to 34s. Oats quiet. Maize steady. Beans and peas unaltered.

Leeds, Tuesday.—We do not note any material change in the trade since this day week. Holders occasionally ask 3d to 6d more money, but millers resist any advance, and the demand for all descriptions of wheat is limited to actual requirements. Best samples of barley make slightly more money ; many maltsters are not yet in the market. Maize 3d dearer. Beans and oats unchanged.—DUNNS AND CO.

Leeds, Friday.—There is a very limited demand for either English or foreign wheat, and Tuesday's advanced prices are barely maintained, except for the finest descriptions, which are firmly held. Maize fully realises the late advances. Beans, peas, oats, barley, and flour show no perceptible change.

Leicester, Saturday.— Fair attendance of buyers and dealers, with moderate supplies of wheats, which sold more freely at 29s to 33s per 36 stones. Barley, a slightly better trade.

Lincoln, Friday.—Fair supply of new wheats. Trade steady at full rates, viz., 28s to 29s. Foreign slightly dearer on the week. Good show of barley, which made 27s to 30s. Oats a trifle easier. Maize, beans, and peas firm.

Liverpool, Friday.—Wheat quiet, with a moderate extent of business at Tuesday's prices. Flour a quiet trade at Tuesday's prices. Maize moves more slowly into consumption, and ½d per cental decline was accepted for Mixed. European, owing to scarcity, is steadily held with a moderate trade. Prime Plate steady at quotations. Barley for malting is firm with a good demand for Chevalier and Californian, and full prices are obtainable. Feeding steady unchanged. Beans are slow, at about unchanged prices. Peas steady, but quiet, at ½d decline for Canadians ; other sorts unchanged. Oats.— English are firm, with a good demand ; foreign sorts are quiet, and the turn in buyers' favour. Oatmeal firm, with a moderate trade at 6d advance. Oilcake firm, but high prices check business.—SEGAR AND TUNNICLIFFE.

Louth, Wednesday.—Good attendance. The wheat trade was firm, and prices were slightly in advance of last week. Oats met with a slow trade. Peas were in good demand, and beans were a steady trade at prices unchanged from last week.

Maidstone, Thursday.—The first wet day we have had for a while, and attendance in consequence not so large as usual. Wheat firm, but larger supplies being anticipated, 6d per qr rise is the most. Barley moves off well at fair prices. Oats are slightly easier. Beans and peas no change. Winter tares are reduced in cost, and maize droops rather late'y. We do not make any alteration in rye, brank, hemp, sergo, or millet.

Malton, Tuesday.—The official return gives these details : —Wheat (60lb per bushel), 394 qr 6 bushels, at £1 8s 3d ; barley (50lb per bushel), 380qr 3 bushels, at £1 2s 7d ; and oats (39lb per bushel), 119qr 4 bushels, at 19s per Imperial quarter average.

Manchester, Thursday.—The general tone here is very firm, English wheat being held at the rates of last Thursday. Foreign slightly dearer for prompt delivery. Flour is reported to be 6d per sack dearer on the week. English oats in moderate demand at steady rates. Foreign dull. Indian corn is ½d per cental dearer. No change is noticeable in peas, beans, or barley.

Newark, Wednesday.—Wheat a firm trade, at last week's prices. Barley a large show of inferior quality, which met with a difficult sale at less money. Oats and beans quiet, at previous prices.

Newcastle, Tuesday.—There was only a moderate attendance, with a limited demand for wheat. Saturday's full prices were, however, firmly maintained. Maize scarce and in sellers' favour. Oats, beans, and peas were steady. Flour slow at full prices.

Newcastle-on-Tyne, Saturday.—Wheat at our to-day's market changed hands at last week's prices. Maize advanced 9d per 480lb since our last market day. Scotch oats quiet for new, a fair demand for old at late rates. Foreign slow trade and easier to sell. Peas and beans firm. Barley steady. Flour no change.—JOSEPH POLLARD AND CO.

Newcastle-on-Tyne, Saturday.—This day's market closed steady for wheat and flour, the former being anything but active ; the latter shows signs of improvement. Malting barley is in better request, and inclined to harden as to values. Oats weak, and favouring buyers. Beans and peas no change. Maize, as previously reported, holds its own marvellously well, and prices look like holding up. Weather fine.

Newport (Mon), Wednesday.—Good business in wheat, which was rather dearer on the week ; maize very firm and dearer ; barley rather cheaper ; oats and beans about the same ; fines, 25s ; offals dearer.

Norwich, Saturday.—There was more wheat offering at our market to-day, with no appreciable alteration in the trade. Barley trade about the same as last week. The weather of the past week has been cooler, with occasional showers of rain. Wheat, red, 30s 6d to 31s 6d per qr, weight 63lbs. per bushel imperial. Corn Inspector's return for the week ending September 24th, 1900 :—Wheat, 3,642, 29s 3½d. Barley, 2,718-7, 26s 4½d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat in fair supply, but millers acted cautiously, and trade ruled slow at last week's prices. Supply of barley not large ; inferior lots were slightly easier. Best parcels commanded full rates. Oats.—Finest samples sold readily at full prices ; inferior slow sale. Old beans scarce, and maintained their value ; new dry made from 32s to 33s 6d per 532lb.—ROBERT HUBBLE.

Oxford, Saturday.—Quiet market. Wheat barely as good as last week, but farmers reluctant to meet the decline. Barley firm for good qualities ; secondary more showing, and rather easier to buy.

Penrith, Tuesday.—About average supplies of grain, without material change in prices. Old oats, 25s to 27s ; new ditto, 18s to 20s per qr.

Peterborough, Saturday.—There has been only a slow trade for wheat to-day. Middling qualities could be bought on easier terms. The demand for barley still hangs fire, and to force sales rather less money must be taken. Oats quiet at late rates.—THOMAS HILL AND SON.

Plymouth, Thursday.—There was an average attendance at our Corn Exchange to-day. Business is still in favour of the buyers. Barley and oats are 3d cheaper. English wheat is about the same as last week ; while foreign has advanced 6d ; and maize 3d during the week.—ORLANDO DAVIS AND CO

Reading, Saturday. — We had an excellent attendance to-day, and business was fairly good. The supply of wheat was good, and with a steady inquiry recent quotations were well upheld. Old wheat realised up to 35s per qr, and new sorts from 28s to 32s per qr. In the trade for other sorts of corn, including barley and oats, there was practically no alteration of prices from those prevailing at recent markets.

Ripon, Thursday.—There is a good show of samples of new wheat and barley, which vary in condition. A moderate attendance. Wheat, English (new), 28s to 30s per qr, according to condition ; ditto (old), 31s 6d to 32s 6d ; ditto foreign, 31s to 35s ; barley, malting, 24s to 28s ; barley, grinding, 23s to 24s ; oats (old), 25s to 26s : ditto (new), 17s to 19s ; round maize, 27s to 27s 6d ; flat maize, 23s 3d per qr ; beans (old), 1s per stone.

Romford, Wednesday.—Red wheat made 30s to 32s, and white wheat 31s to 33s per qr.

Sheffield, Tuesday. — Moderate attendance to-day. Wheat 3d to 6d dearer on the week ; beans 3d per qr dearer, and maize in fair demand at late rates. Oats and barley unchanged. Quotations :—Wheat, white, 33s to 33s 6d ; red, 32s to 33s ; new, 31s to 32s per 504lb ; oats, old white, 26s ; ditto old black, 22s ; new, 18s 6d to 20s per 336lb ; peas, grinding, 28s to 29s ; ditto blue, 53s to 70s per 504lb ; beans, Egyptian, 33s ; ditto, English (new), 31s 6d to 32s per 532lb ; barley, grinding, 23s 6d to 24s 6d ; ditto malting, 27s to 35s per 448lb ; Indian corn, small old, 28s to 29s ; ditto American mixed, 23s to 23s 6d per 480lb.

Spalding, Tuesday.—At the Corn Exchange there was an improvement in the wheat trade, which was firm at late rates. Barley was inquired after, but there were not many especially good samples. Good trade for oats, also for peas and beans, prices for which were unaltered.

Stockton, Wednesday.—There were a few samples of English wheat showing, which realised about 30s per qr. The foreign wheat trade keeps firm, with a fair demand from millers, but it was difficult to obtain any advance over last week's prices. Oats and maize were unaltered. There were a good few samples of malting barley shown, but they were only of moderate quality, for which 25s to 28s per qr was realised.

Sunderland, Saturday.—Few samples of new wheat offering yet, which sold at about late rates. Spring corn steady. Arrivals coastwise :—Wheat, 78 qrs ; oats, 270 ; foreign nil.—E. AND F. RICHARDSON.

Taunton, Saturday.—Wheat, a firm trade at last week's prices. Good supply of malting barley, which sold freely at 26s to 34s. Oats and beans firm.

Wakefield, Friday.—We have no change to report in the wheat trade to-day. American advices are a shade weaker, but with advancing rates of freight the cost of imports is, if anything, raised, and millers are compelled to pay full prices; the demand, however, rules quiet. Good stout Yorkshire barleys sells at 26s on rails, inferior is bad to sell. Maize, beans, and oats slow.—DUNNS AND CO.

Wakefield, Friday.—English and foreign wheats are quoted firm at late rates on our to-day's market, but the business doing is small. The trade, however has been very fair during the past week. No alteration in feeding stuffs. New Yorkshire barley continues to come to market in good supply, but maltsters show little inclination to operate as yet.—MICHAEL SANDERSON AND SON, LIMITED.

Winchester, Saturday.—Wheat in moderate supply on our market to-day, which met a firm but slow trade at fully last week's prices. Best barley in fair demand at prices ranging from 28s to 34s. Inferior sorts, quiet trade at late rates. Oats and maize unaltered. Flour, 24s to 26s.—FEAR, COLEBROOK AND CO., LD.

Wisbech, Saturday.—A very short supply of grain. Wheat in demand at full prices, red 30s, white up to 31s 6d. Oats, slow trade, new 17s to 18s ; old up to 24s. Barley, 25s to 28s.—JAMES FLETCHER.

Wolverhampton, Wednesday.—Small attendance and little business passing. English wheat, old, 13s to 13s 6d per 216lb ; oats, old, 14s 6d to 15s 6d ; oats, new, 10s to 11s 6d : beans, old, 14s to 15s ; oats new, 12s 6d to 13s 6d per 196lb ; maize, 24s to 25s per 480lb.

Worcester, Saturday.—The market remains quiet, with very little change in prices. English wheat held for last week's full rates. Foreign rather firmer. Maize and oats steady. Barley favoured buyers. White wheats, 30s. to 32s. ; red, 28s to 30s per quarter.

Worksop, Wednesday.— Very good attendance. Fair supply of grain, and a fairly brisk market. White wheat (new), 29s to 29s 6d ; red wheat (new), 28s to 28s 6d ; old wheats up to 33s ; best barleys, 30s to 33s ; secondary, 26s to 28s ; grinding, 25s ; new beans, 32s ; old ditto, 34s to 37s ; white oats (new), 17s to 19s ; black ditto (new), 15s to 16s 6d ; white oats (old), very scarce, 24s to 25s ; flat maize, 24s per qr.

York, Saturday.—The wheat trade was slow at last week's prices, and the qualities generally were poor. The averages of the week, according to the official corn return, based on imperial measure, have been :—Wheat, 27s 6d ; barley, 23s 11d ; and oats, 16s 11d per qr.

FOREIGN.

Antwerp wheat market has been pretty well maintained, but the amount of business passing has been somewhat restricted. The latest estimate as to the French wheat crop places it at 107,533,000 hectolitres, as compared with 129,005,500 hectolitres in 1899. The estimated falling off in this year's crop as compared with that of 1899 is accordingly 21,472,500 hectolitres. The cause of this deficit was the less favourable atmospheric conditions which prevailed in the early part of the year ; some of the winter wheat was frozen, and had to be replaced with other cereals. The annual consumption of wheat in France, including wheat required for seeding, is estimated at 123,000,000 hectolitres, so that the deficiency for the year is about 15,500,000 hectolitres. It is calculated that the stock of wheat in farmers' hands at the commencement of August amounted to 20,800 000 hectolitres. Of course, however, wheat will have to be imported into France, to some extent, in 1900-1, and, upon the whole, some advance in prices is not improbable. The milling trade has shown, however, a disposition at present to resist any upward movement, and transactions have been carried through with some difficulty. Last week's sales of wheat at Marseilles amounted to 9,500 quintals. The wheat trade has shown no improvement at Paris. Flour for consumption has remained without change in the French capital. The Konigsberg and Dantzic wheat markets have also remained unaltered. The Odessa wheat market has ruled firm, but the demand on foreign account has, at the same time, not been active. At Ibrail business on export account has shown a fair amount of activity. The quantity of wheat now on route for Europe is returned at 960 000qr. as compared with 1,260,000qr at the corresponding date of 1899. The total of 960,000qr is made up as follows :—France, 80,000 ; Belgium, 310,000qr ; Holland, 265,000qr ; Germany and the North, 115,000qr ; and Italy, Spain, &c., 190,000qr.

Hamburg, Saturday.—Weather seasonable. In the interior rain is wanted, shallow water in the rivers impeding traffic. The imports during the week amounted to :— Wheat, 3,367 tons ; rye, 3,490 tons ; barley, 9,782 tons ; maize, 6,660 tons. There is a fair demand for wheat hereby Holstein and Saale selling at 28s 6d to 29s 3d ; common Holstein at 27s 6d to 28s per 504lb f.o.b. For Hard Winter 2 29s 6d, and for River Plate 29s to 30s per 480lb is being paid. Rye quiet, 9 to 15. South Russian is offering at 22s 3d to 22s 9d per 448lb. c.i.f. Good to fine Saale barley is selling at 32s to 34s, finest at 36s to 38s, and the few choice lots offering are held at 38s to 40s 6d per 448lb. f.o.b. Fine Bohemian is held at 36s to 40s. Oderbruch at 31s 6d to 34s ; Moravian and Hungarian at 31s to 33s per 448lb f.o.b. Feeding barley quiet, 60-61 Ko. South Russian is offering at 18s 3d to 18s 6d per 400lb c.i.f. Hamburg. There is but little consumptive demand for maize ; most of the business done is for covering purposes. Mixed prompt is selling at 20s 9d to 21s, November-December at 21s, February at 19s 9d per 480lb c.i.f. JOHN PARISIUS.

Hamburg, Saturday.—Barley rules quiet, and prices are hardly maintained. Holders cannot get on and have to name limits. There is certainly some business after finest prices but when limits are named buyers are withdrawing. The selection is rather good and some lots of Saale and Bohemian of choice quality are obtainable at reasonable figures but Moravians are generally held at absurd prices.—FRANCIS M. TH. DUHNE.

POULTRY AND PROVISIONS.

Smithfield, Saturday.—Trade slow, prices firm. Quotations. Fowls: Yorkshire, 2s 3d to 2s 9d; Essex, 2s 3d to 2s 9d; Surrey, 2s 3d to 3s 6d; Sussex, 2s 6d to 3s; Welsh 1s 9d to 2s; Boston, 2s 3d to 2s 6d; Irish, 1s 6d; geese, 4s 6d to 6s 6d; Aylesbury ducks, 2s 6d to 3s; country 2s 3d to 2s 9d. Bordeaux pigeons, 7d to 9d; wild rabbits, 8d to 10d; tame, 1s to 1s 3d each; Australian, 7s 9d to 9s 6d per dozen; hares, 2s 9d to 3s 3d; leverets, 1s 9d to 2s 6d each; young guinea-fowls, 6s 7s; old, 3s 6d to 4s; young partridges, 4s to 4s 6d; old, 1s 10d to 2s per brace; venison, haunches, 15s to 18s each; forequarters, 3d per lb.

Liverpool, Saturday.—Bacon: With strong cables for vices, and steady country consumptive demand, there was a firm market, especially for Irish cuts, which are in light supply, and there is an advance in quotations with higher tendency for next week. We quote, to-day, choice Cumberland cut, 20lb to 22lb, 46s to 51s; 26lb to 30lb, 46s to 50s; 34lb to 38lb, 43s to 49s; long middles, rib-in, 18lb to 22lb, 49s to 52s; clear bellies 14lb to 16lb, 47s 6d to 51s 6d; 18lb to 20lb, 47s to 51s; Staffordshire cut (lean on), 35lb to 40lb, and Birmingham cut, 33lb to 31lb, 44s to 46 6d; clear Staffords (lean off), 40lb to 44lb, and Yorkshire cut, 40lb to 45lb, 43s 6d to 45s 6d; singed Wiltshire, Canadian, 45lb to 55lb, 58s to 61s; American, 44lb to 56lb, 48s to 50s; short clear backs, 12lb to 16lb, 44s 6d to 48s; 16lb to 20lb, 43s to 43s 6d; fat backs (export), 39s 6d to 41s 6d; long clear middles, 35lb to 40lb, 44s to 45s; 40lb to 45lb, 43s to 44s; short clear middles, 45lb to 50lb, 42s to 42s 6d; short middles (rib in), 18lb to 23lb, 48s 6d to 51s. Shoulders steady, square cut, 12lb to 14lb, 36s to 41s; 14lb to 16lb, 35s to 39s; New York cut, 11lb to 13lb, 32s 6d to 34s per cwt. Hams are in better request and a shade dearer in value. We quote choice long cut, 8lb to 12lb, 48s to 53s; 14lb to 16lb, 47s 6d to 52s; short cut and A.C., 10lb to 12lb, 47s 6d to 51s 6d; 12lb to 14lb, 46s to 50s; 14lb to 16lb, 44s to 48s per wt. Lard is very firmly held, but there is no advance in quotations. We quote pails and kegs, 39s 6d to 40s; prime Western (in tierces), 37s 9d to 38s per cwt. Beef quiet but steady. We quote extra India mess, 70s to 75s; plate and packet, 65s to 67s 6d per 304lbs. Pork, with light supplies, has advanced in price. We quote finest prime mess, 70s to 75s per 200lbs. Cheese.—The demand has ruled moderate, but with steady cables holders have been firm in their ideas of value of strictly finest qualities, and the market is about unchanged on the week. We quote finest Canadian, coloured, 54s to 55s; white, 53s 6d to 54s 6d; States coloured, 53s 6d to 54s 6d; white, 52s 6d to 53s 6d. Second grades in light supply sell readily from 46s to 51s per cwt. Butter quiet and easier, quotations for Continental and Irish being lower. We quote, to-day, finest Canadian creamery, in boxes, 100s to 102s; States, 92s to 98s; finest ladles, imitation creamery, 80s to 85s; finest Danish, 106s to 112s; Irish creamery, 100s to 105s; Cork firsts, 90s; seconds, 82s; thirds, 79s per cwt. — HODGSON BROTHERS.

Newport, Wednesday.—The supply was good, and there was a fair attendance. Quotations:—Caerphillies, 54s to 56s per cwt; fancy dairies, 58s to 62s; singles, 50s to 54s; Cheddars, 58s to 60s; doubles, 58s to 60s.

Preston, Tuesday.—The monthly cheese fair was largely attended. The market opened firm, sellers asking the extreme price. A slow trade was done at higher rates than at the last fair, Common 48s to 55s 6d; medium 58s to 63s; best 65s 6d to 71s; one or two lots fetching 74s per cwt.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—A good supply of vegetables ruled slow. Potatoes met a better demand. Good supplies of fruit were in fair demand. Cauliflowers, Cabbages, 3s 6d to 4s; beetroots, 3s per tally; cucumbers, 6d to 2d per dozen; carrots, 2s 6d; turnips, 2s 3d to 3s 6d; parsley, 1s 6d; leeks, 2s to 3s per dozen bunches; celery, 9s to 12s per dozen bundles; horseradish 1s to 1s 3d per bundle; Valencia onions, 5s 6d per case; Dutch, 3s 6d per bag. Potatoes:—Beauty of Hebron, 70s. Snowdens, 90s to 100s; Early Regents, 60s; Early Puritans, 70s to 80s per ton. Fruit:—English grapes, 6d to 1s 3d per lb; Denia, 3s to 6s per barrel; English apples, 1s to 5s. [illegible] per bushel; ditto Williams, 1s 6d to 2s per half-sieve; Californian, 4s to 7s per case; French Williams, 3s to 5s per crate; plums, 1s to 1s 6d; damsons, 1s to 1s 6d per half-sieve; English peaches, 2s to 3s 6d per dozen; Valencia melons, 3s to 6s per case; pine-apples, 1s 6d to 3s 6d each; bananas, 5s to 9s per bunch; lemons, 8s to 12s per case.

POTATOES.

Borough and Spitalfields, Saturday.—At this morning's [illegible] were in [illegible] and [illegible] steady, with prices from [illegible] to 4s; Early Puritans, 3s 6d to 4s; Scotch, 3s 6d to 4s; Reading Giants, 2s 6d to 3s 6d; Dunbars, 3s 6d to 3s 6d; Up-to-Dates, 3s to 4s per cwt.

Worcester, Saturday.—[illegible] week's very quiet trading [illegible] The [illegible] steadily [illegible] is the [illegible] pleasing [illegible] pockets have [illegible] this week [illegible] AND CO.

HOPS.

Canterbury, Saturday.—[illegible] over, and [illegible] some, however, [illegible] until after the [illegible] at 2s 10s. per cwt. [illegible] and [illegible]

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

September had, up to the close of Michaelmas Day, a total rainfall of less than one inch in the Home Counties, and of less than two inches even in Cornwall and Wales. The crops have been secured with ease and comfort, and the losses through unripened grain are the smallest that the North has known for years. The root crop promises to be very heavy of swedes and mangolds, but potatoes run small and the turnips would have preferred another two inches of September rainfall.

The French Government report on the crops gives the wheat yield in that country at 37,500,000 qrs., so that 1900 will rank with the medium years. Following are French crop yields, in millions of qrs.:

Good years.	Medium years.	Bad years.
1890 : 41	1892 : 39	1891 : 28
1894 : 44½	1900 : 37½	1893 : 33
1895 : 41	.....	1897 : 30½
1896 : 42		
1898 : 45		
1899 : 44		

France has had six good crops out of eleven, and only three bad ones. The stock of old wheat is reckoned at fully 3,000,000 qrs., which brings up the total of the farmers' holdings to 40½ millions, leaving only 2½ millions to be imported. We question, however, if the prudent and prosperous French farmer will sell much of the three millions, and the imports of France in the new cereal year may easily reach five million qrs.

The eagerness of Indian merchants to secure British gold payments is evidenced in attempts already making to sell the April harvest. The English merchants are bidding 31s. to 32s. for white Calcutta wheat, and as 32s. 6d. is the price asked by Calcutta firms business will to some extent probably be done. The Indian Government should, in our opinion, prohibit grain exports from India until it is known that there is an export surplus. It is strange but true that several Indian grain ships have in the past been on their way to England with bought cargoes, passing coasts where natives were dying by thousands for want of grain. The promise of the growing wheat in India is excellent, but a drought from January to harvest would alter this prospect completely. No contract in English law is valid if it be contrary to public policy, but contracts to ship grain from India are legally enforceable there, even if the time for shipment finds a province starving.

The wheat markets of the United Kingdom for the last six days of September were slow, with imported produce only saleable at a slight decline. The demand for London and country flour is up to an average, but American flour is rather neglected.

The quantity of wheat on passage to the United Kingdom on 1st October is estimated as follows:—

	Qrs.
Russian	120,000
Californian	875,000
North American	460,000
South ,, ...	245,000
Australasian	230,000
All other countries	10,000
1st Oct., 1900	1,940,000
1st Oct., 1899.....	1,535,000
1898.....	1,130,000
1897.....	1,215,000
1896.....	1,585,000

The present quantity is below the ten years' average of 2,000,000, but it exceeds that of any year since 1895. The comparatively small totals on 1st October are due of recent years to slower shipments of the American new crop, by which we mean not that the shipments come more slowly when once started (for steamers are coming more and more into use), but that the former rush to sell has been replaced by a more conservative feeling. American farmers are better off than they were five years ago, and can afford a more leisurely placing of their grain.

Of spring corn the following quantities are estimated as being afloat, the comparison, as in the case of wheat, being with the 1st October in the four preceding years:—

	Maize.	Barley.
	Qrs.	Qrs.
1st Oct., 1900.....	765,000 ..	570,000
,, 1899.....	965,000 ..	510,000
,, 1898.....	570,000 ..	460,000
,, 1897.....	835,000 ..	580,000
,, 1896.....	1,130,000 ..	570,000

The maize now afloat includes 420,000 qrs. of flat and 300,000 qrs. of yellow corn, while of the barley 245,000 qrs. are coming from California, and 240,000 qrs. from Russia. There are 11,000 qrs. of beans on passage; 5,000 qrs. from Egypt.

The imports of wheat of late have been fair, and the supplies of English show some increase. Last week's figures are;—

	Qrs.
Foreign wheat sales	262,000
,, flour sales	160,000
Total.....	422,000
English wheat sales	138,000
Total.....	560,000

Stocks are estimated at 2,378,000 qrs. of foreign wheat. Imports of spring corn are as follows:—

	Qrs.
Barley	90,245
Oats	205,725
Maize	173,700
Beans	25,250
Peas	7,000

There is a good sale of seeds at very irregular prices. Quality always varies greatly in the offerings on the seed market, but it is the common remark that scarcely ever has it done so to the extent observable this autumn. Trefoil is in good request, but foreign sorts are of poor quality for the most part. New Dutch mustard seed moves off briskly. Good winter tares continue to sell well and to command 8s. to 10s. per qr. more money than at the end of September last year. The heavy showers of the 27th and 28th were very welcome to farmers waiting to sow. New American red clover-seed was on offer at Mark Lane on Friday last; 55s. was asked for choice and 48s. for ordinary, prices which buyers resisted. The price of Canadian clover-seed makes 64s. for red and 80s. for white, while Canadian Alsyke has buyers at 74s. to 76s., German at 50s. to 64s. French lucerne commands 58s. for finest, with very fair quality on offer at 54s. to 55s. per cwt.

The market for miscellaneous feeding stuffs is fairly good, and the choice is wide. There is a certain sale of ground rice at 10s. per cwt., of rice flour at 24s. per sack, and of rough uncleaned rice at 6s. per cwt. It is said to be a fair equipoise in a ration to the effect of maize meal, which is a trifle laxative. There is a good demand for buckwheat, mainly for pheasants, and Germany is shipping small parcels of fifty to 100 tons at 27s. to 27s 6d. per qr. The action of brewers in raising the price of "brewers' grains" 5s. to 7s. 6d. per ton is likely to turn buyers' attention in other directions. Malt cooms are difficult to obtain. Rye flour has a certain sale at 21s. for best. Some fine American middlings are reaching our ports, and 117s. 6d. per ton landed is asked.

The oilseed trade continues to be in a special position. Of linseed only 60,000 quarters are on passage against 235,000 quarters a year ago. This difference is not to be denied, and in face of it to call the present state of the oilseed market "a corner" is a misnomer. The prices asked for linseed, however, are extremely high, and with neither India or Argentina able to respond to buyers' requests it is hard to say how any fall is to be looked for. The Indian new crops are being freely speculated in, but not a sack of Indian linseed is likely to be sold on Mark Lane before May day, and between now and then the crushers and makers of linseed cake have to meet the winter demand. The Egyptian cottonseed crop is now being secured, and shipments of new cottonseed will begin from November 1 next. How far this will meet the demand for oilseeds remains to be seen, but old cottonseed of the 1899 crop has touched £8 per ton, the highest price for many years.

THE BALTIC.

The speculative trade in grain to-day took up rooms (while the new premises in St. Mary Axe are being completed) at the Great Eastern Hotel, 190, Bishopsgate-street. The quarter is somewhat inconveniently east for the majority of frequenters, but of course the difficulties of finding temporary accommodation were very great. The hotel moreover offers exceptional facilities for all sorts of refreshments, and the rooms are on the ground floor.

Wheat cargoes have been rather difficult to place of late, but the following sales have been effected:—

	Arrived.	On Passage.	Futures.
Californian.....	32s. 6d.	32s. 6d.	32s. 6d.
Walla Walla	—	31s. 0d.	—
Argentine	—	—	31s. 0d.
Australian.....	32s. 3d.	31s. 6d.	—
Duluth	32s. 3d.	32s. 6d.	—
Odessa Ghurka ..	—	31s. 6d.	—
No. 1 Northern ..	32s. 6d.	31s. 3d.	—

A cargo of Indian new crop was sold on Saturday for April shipment at 32s. 3d. per qr.—a price arguing a strong confidence in the course of trade after 1901 is once reached.

Other cargo sales of the week embrace American maize at 20s. 3d. on passage, clipped American oats at 14s. on passage and 14s. 3d. arrived, barley at 26s. 6d. for Californian prompt shipment, and 30s. 6d. for Saida beans, also prompt shipment.

The arrivals of grain and seed-laden vessels at ports-of-call for the week were 2 wheat from California, 1 fenugreek seed (Saffi)—total, 3.

The sailings of grain and seed-laden vessels from ports-of-call for the week were 3 wheat (1 Cardiff, 1 Cork, 1 North Shields), 1 barley (Mistley), 1 beans (Girvan), 2 fenugreek seed (Hull) total, 7.

The cargo trade may be reminded that at the end of this week the premises of Dornbusch will be removed to No. 11, Tokenhouse Yard, facing the north side of the Bank of England.

THIS DAY'S MARKETS.

MARK LANE, MONDAY.

[FIRST REPORT.]

The market to-day was steady for new English wheat, of which the supply was by no means large. Foreign was very dull. New Zealand long berried was held for 32s. 3d., short berried for 31s. 3d. per qr. American sorts were generally above the ideas of buyers. The Russian shipments are in fair request, but then the total supply thereof is short. Persian barley was 3d. lower, 17s. 9d. offered, 18s. taken; for English less money was not accepted, but sales were poor for the first market of October. The best Canadian oats were offered at 15s. 6d. per qr., and the best Scotch and New Zealand made 24s. Between these prices ordinary English sorts were slow. Russian sorts, at 14s. upwards, were hard to place. Some peas from Morocco found buyers at 28s. per qr. Lentils had a certain sale at 13s. per cental for split Egyptian. The trade in maize was against holders, but for immediate delivery a tolerably good price continued to be obtainable. The trade in oilseed showed excellent prices still ruling.

(*For Close of Market see foot of Column.*)

CLOSE OF THE MARKET.

By Telephone, 2 p.m.

THE MARKET CLOSED THREEPENCE PER QUARTER LOWER FOR FEEDING STUFFS. WHEAT AS PREVIOUSLY REPORTED.

THE FLOUR TRADE.

MARK LANE, Oct. 1st.

The flour market to-day was 6d. lower for some sorts, but not as a rule cheaper. The strength of the American market, which upholds spot values here, is felt to be very uncertain. Town Households were quoted 25s. 6d., with sellers' cash ex-mill at 25s. For country patents 25s. was seldom refused; ordinary roller-made was 3d. to 6d. down on the week. Of the finest American sorts those of Pillsbury, Washburn, and Morrison tie at 27s. to 27s. 6d. per sack, while "Star," the top-price North-Western type, is at 28s. 3d. to 28s. 6d. per sack. The good secondary grades come at 26s. for Briggs's Patent, down to 21s. 6d. for Iron Duke. Kansas "Dazzle" may be quoted at 25s., while "Phœnix" and other sorts of high-class feeding flour are at 15s. to 15s. 6d. per sack. These are not sorts intended for human consumption, but for mixture in rations for live stock. Hungarian flour to-day made 31s. per "Six Anchors," 30s. 6d. for "Five Roses," 28s. for E. O. P. "Three Stars," and 27s. 9d. for "Two Anchors." All other Hungarian sorts were unchanged.

LONDON TERM MARKET.

This market is held twice a day at South Sea House, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made:—

WHEAT.—	Sept.	Oct.	Dec.	March.
	s. d.	s. d.	s. d.	s. d.
Sept. 24 noon	6 10	6 11	7 0	7 2
4 p.m.	6 10	6 10	7 0	7 1
Sept. 25 noon	6 10	6 10	7 0	7 1
4 p.m.	6 10	6 10	7 0	7 2
Sept. 26 noon	6 10	6 10	7 0	7 2
4 p.m.	6 11	6 10	7 0	7 1
Sept. 27 noon	6 11	6 10	6 11	7 2
4 p.m.	6 11	6 10	6 11	7 2
Sept. 28 noon	—	6 10	6 11	7 1
4 p.m.	—	6 10	6 11	7 2
Sept. 29 noon	—	6 10	6 11	7 2
To-day noon	—	6 9	6 10	7 0

Maize cargoes made to-day 3s. 10d. for June delivery, and 4s. 4d. for October. Dates between show 4s. as the price expected to prevail at Christmas.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States.

SEEDS.

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., write that, although red clover-seed has of late been less active, full prices are asked by holders. Alsyke white and trefoil show this week no quotable alteration. As regards the ryegrass market holders exhibit extreme firmness. Seed rye and winter tares, owing to the recent meagre demand, have favoured buyers; whilst for blue peas and haricot beans the tendency of values is still upwards. Canary-seed is quiet, but hempseed is dearer. More money is asked for rapeseed; meantime mustard remains steady. The Board of Trade Returns give the imports of clover and grass seeds into the United Kingdom for the month of August as 6,162 cwt., value £11,467, as against 14,361 cwt., value £32,605, for August, 1899.

GRAIN AND FLOUR FACTORS' REPORTS.

Wheat and flour arrivals are large. Trade is quiet, and prices of both articles are unchanged. Maize, barley, and oats are all 3d. and 6d. per qr. lower.—COVENTRY, Mark Lane.

Flour: A quiet trade at 3d. to 6d. under last Monday's prices.—T. S. MEDILL, Mark Lane.

There is no great change to record in the market for town-made milling offals. Fine and coarse middlings continue to be delivered slowly to previous purchasers, but fresh buyers are scarce. Bran is firm at last week's prices.—RICHARD DOUGETT, Mark Lane.

The arrivals of wheat and flour into London have again been liberal. Although there is little variation in quotations, the trend of prices is certainly in buyers' favour. Oats, with heavy supplies, are 3d. lower. Barley 6d. and maize 3d. cheaper. Flour held generally at last week's values. W. P. WOOD AND CO., Mark Lane.

Offals.—The inquiry for bran at the moment is dull; consumptive demand very poor, prices unchanged. Pollard in moderate request, without alteration in value. Weather showery.—GREENHILL BROTHERS, Belfast, September 29.

Flour: Prices are unchanged on the week; buyers appear to have filled their wants meantime. Grain: Indian corn still extremely scarce and for delivery to-day 13s. per 280lb. is paid. Oats dull and Canadians are 1½d. per boll cheaper. Canadian peas and grinding beans are in sellers' favour. Mill stuffs: Thirds are unchanged, but bran for immediate delivery is rather easier.—MCKINNON AND MCDONALD, Glasgow, September 29.

Wheat quiet with a moderate extent of business at Tuesday's prices. Flour a quiet trade at Tuesday's prices. Maize moves more slowly into consumption, and ½d. per cental decline was accepted for mixed. European, owing to scarcity, is steadily held with a moderate trade. Prime Plate steady at quotations. Barley for malting is firm, with a good demand for Chevalier and Californian, and full prices are obtainable. Feeding steady, unchanged. Beans are slow at about unchanged prices. Peas steady but quiet at ½d. decline for Canadians; other sorts unchanged. Oats—English are firm with a good demand. Foreign sorts are quiet and the turn in buyers' favour. Oatmeal firm, with a moderate trade at 6d. advance. Oilcake firm, but high prices check business.—ROSS T. SMYTH, Liverpool, Sept. 29.

THE BALTIC, MONDAY, 1 p.m.

STATE OF TRADE.

The cargo market is occasionally 3d. lower for wheat on passage and for October shipment. Maize cargoes, on the other hand, are a better trade from Saturday. Barley cargoes favour buyers. Oats are lower for both Russian and American cargoes for October shipment.

BUSINESS DONE.

WHEAT.—Californian, 32s, on passage; Walla Walla, 30s 6d, on passage; Argentine, 30s 3d, on passage; Australian, 31s, on passage; best Manitoba, 33s, Oct. shipment; No 1 Northern, 32s 3d, Oct. shipment; best Duluth, 33s 3d, Oct. shipment; Calcutta white, 32s 1½d, April shipment.

MAIZE.—Galatz, 22s 9d, Oct. shipment; Argentine, 21s 6d, Oct. shipment; American, old crop, 20s 6d, Oct. shipment; American, new crop, 18s 6d, Feb. shipment.

BARLEY.—Californian, 26s 3d, October shipment; Persian, 17s 3d, October shipment; Odessa, 19s 6d, on passage.

OATS.—White Canadian, 15s, on passage.

BEANS.—Saida, 30s, October shipment; Smyrna, 27s 6d, October shipment; Chilian haricots, 45s, October shipment.

DARI.—American, 21s 6d, October shipment.

BUCKWHEAT.—French, 26s 6d, October shipment.

LINSEED.—Calcutta, 57s 6d, arrived; 46s 6d, May shipment.

RAPESEED.—Guzerat, 50s, October shipment.

COTTONSEED.—Egyptian, £8, due; £7, October shipment.

All firms customarily addressed "South Sea House" may, whilst the Baltic is rebuilding, be addressed Great Eastern Hotel, 190, Bishopsgate-street Without, E.C.

PROVISIONS.

London, Monday.—The arrivals from Ireland last week were 2,805 bales bacon, and from foreign ports 8,160 bales bacon. Owing to a shortness of supply from both Denmark and Canada there was a very strong market for bacon last week, and on Friday prices were advanced on Irish and Danish some 2s to 4s. Canadian remained unchanged. The killings are still reported light, so the prospect is for continued firmness. Irish, 56s. 6s. to 64s; Danish, 58s. 6s. to 65s; Canadian, 56s to 60s. The butter trade continued very quiet. Danish was again somewhat easier, trade generally being slow. Danish, 108s to 110s; Irish, 92s to 106s; Colonial, 102s to 106s; Canadian, 98s to 102s. Lard very firm at unchanged rates.

HOPS.

London (Borough), Monday.—Messrs. W. H and H. Le May, hop factors, 67, Borough High-street, London, S.E., report: The trade doing is limited to what the growers will allow factors to offer. More business might be done if the growers would listen to current rates, but the crop coming down so exceedingly light makes them very conservative in their offerings. Now that the picking is finished it is ascertained that 6½ cwts per acre is the utmost that England has produced this year.

CATTLE.

Metropolitan Market, Islington.

Monday, Oct. 1st, 1900.

	British.	Total Oct. 2nd 1899.
Beasts	1,[illegible]	1,[illegible]
Sheep and lambs	[illegible]	[illegible]
Calves	30	10
Pigs	70	1
Milch cows	20	70

Quotations per stone (sinking the offal).

ENGLISH.	Inferior. s. d.		Second. s. d.		First. s. d.
Beasts	3 4	—	4 [illegible]	—	4 [illegible]
Sheep	3 2	—	5 0	—	5 10
Lambs	[illegible]		[illegible]		[illegible]

Milch cows, per head, £[illegible] to £[illegible]

British arrivals include as follows:—Scotland, —; Eastern Counties 10; Midland Home and Western Counties 1,[illegible]; Devon, 30; Ireland —.

There was to-day a fair average supply of [illegible] on offer, the majority of which [illegible] second quality, and [illegible] trade at lower rates. Amongst the best [illegible] were two three-year-old steers [illegible] [illegible] of 1[illegible] to £[illegible] 10s. per head. [illegible] Hereford and [illegible] rates. For [illegible] were [illegible] prices, and met with a little inquiry.

The following are top quotations per stone (sinking the offal):—

	To-day.	Oct. 2, 1899.
Devons	4s [illegible] to 4s 0d	[illegible]
Herefords	4s [illegible] to 4s [illegible]	4s [illegible] to 4s [illegible]
Runts	4s [illegible] to 4s 0d	4s [illegible] to 4s [illegible]
Lincolns	4s 0d to 4s 4d	3s 10d to 4s 2d
Irish	4s [illegible] to 4s [illegible]	4s [illegible] to 4s [illegible]
Fat cows	3s [illegible] to 4s 2d	3s [illegible] to 4s [illegible]

There was a decrease of one-third in the number present in the sheep market, this being due to a scarcity of really best quality were soon disposed of at [illegible] rates. Foreign sheep trade ruled firm, with an [illegible] demand; [illegible] were short in number rates were easier. There were [illegible] 210 Scotch, 1,200 Irish and [illegible] from the Eastern Counties.

Undermentioned quotations are at per [illegible] (including the offal), and are for the best of each class [illegible]:

	To-day.	Oct. 2nd, 1899.
7½ to 8 stone Downs	5s [illegible] to 5s [illegible]	5s [illegible] to 5s [illegible]
9-stone ditto	5s 0d to 5s 8d	5s 4d to 5s 6d
10-stone half-breds	5s 4d to 5s 6d	5s 2d to 5s 4d
12-stone half-breds	5s 0d to 5s 2d	— to —
12-stone Lincoln	— to —	4s 10d to 5s 0d
10-stone Irish	5s 0d to 5s 2d	4s 10d to 5s 0d

Arrivals of Grain.

Since January 1, 1900, the total arrivals have been 256 wheat, 13 wheat and barley, 1 wheat and pease, 6 flour, 10 maize, 1 maize and oats, 21 barley, 18 beans, 7 beans and oats, 1 linseed, 3 canary seed, 2 fenugreek seed, [illegible] cloves; total, 347.

Last year during the same time the arrivals were 240 wheat, 10 flour, 3 maize, 6 barley, 1 barley and beans, 1 rye, barley, and oats, 8 beans, 1 beans and oats, 6 linseed, 5 canary seed, and 7 various; total, 288.

A farm [illegible] named Robert Gosken, aged seventy-three years, [illegible] on Sunday week from injuries received [illegible] being gored by a bull on a farm at Banham, Norfolk.

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

So far as British beasts were concerned, the supply fell 365 short of last week's numbers, owing to small arrivals from the Midland Counties and also Ireland included in the latter being a few yearling stores, for which there was but little request, the prices asked ranging from £6 10s. to £7 per head. For fat beasts of both prime and second quality trade was of a very slow nature, with a slight downward tendency in value, though not sufficiently so to alter late quotations. On the chief market day a clearance was found to be impossible. Though there was a lighter supply of both butchering cows and bulls, they were more difficult to cash, the former meeting with less country demand; rates for both were consequently easier. At the foreign cattle market on neither of the three market days were the total arrivals shown, no less than 752 being held back and 1,755 shown. Trade on all days ruled extremely dull, rates being fully 2d. per 8lbs. lower than during the preceding week; even at this reduction sales were more or less forced. Amongst the arrivals from Canada was one of a large proportion of plain ranche cattle. The total number of beasts offered for sale on both markets was 6,067, consisting of 1,540 British and 4,527 foreign, these latter comprising 3,367 from the United States (decrease 103) and 1,160 from Canada (decrease 249). The following were the top prices paid per 8lbs. (sinking the offal):—90-stone Herefords, 4s. 10d.; 80-stone Devons, 4s. 9d.; 90-stone Runts, 4s. 9d.; 100-stone ditto, 4s. 7d.; 100-stone Lincolns, 4s. 4d.; 110-stone ditto, 4s. to 4s. 2d.; 90-stone Irish (Dublins), 4s. 6d.; 95-stone Waterfords, 4s. 2d. to 4s. 4d.; 90-stone States, 4s. 1d. to 4s. 2d.; 85-stone Canadians, 3s. 7d. to 3s. 8d.; 90-stone fat cows, 3s. 8d.; 100-stone fat bulls, 3s. 6d. The sheep trade at Islington, so far as wethers were concerned, showed an entire absence of life, but in regard to value no alteration can be noted. The majority of the supply consisted of Downs, half-breds, and Irish arrivals from the Midland counties being much shorter. Ewes were more difficult to dispose of even at a reduction of 2d. per 8lbs. There is still inquiry for best quality lambs, even at higher rates, but any below this class were slower of sale. At Deptford trade ruled dull, but rates were steady. The total number penned at both markets was 9,679 (decrease 1,231), consisting of 8,350 British (decrease 2,070) and 1,329 Canadian (increase 839). Best pens made per 8lbs. as follows:—7½ to 8-stone Downs, 5s. 10d.; 8-stone Scotch, 5s. 8d. to 5s. 10d.; 9-stone Downs, 5s. 8d.; 10-stone ditto, 5s. 6d. to 5s. 8d.; 10-stone half-breds, 5s. 4d. to 5s. 6d.; 10-stone Irish, 5s. 2d.; 12-stone half-breds, 5s.; 10-stone Down ewes, 4s. 2d.; 11-stone half-bred ditto, 3s. 8d. to 3s. 10d.; 8½-stone Canadians, 4s.; 5-stone fat Down lambs, 6s. 4d.; 6-stone half-bred ditto, 5s. 10d. Calves numbered sixty, being a slight increase on last week's numbers, and met a slower trade at less money, being quoted at 5s. 4d. per 8lbs., or 4d. lower than last week. Pigs were in fuller supply, and sold readily at an advance of 4d., best small breeds, 8 to 9-stone, making 4s. 10d. per 8lbs., sinking the offal.

Trade in the West.

The much-wanted rain has come at last, though we fear too late to have any very material effect on prices of store stock. Therefore the rain, if not beneficial in one way has been in another, and transactions have been entered into during the last few days at some of the latest fairs—notably that of Poundbury, Dorset. With a good delivery of the now famous Dorset Horns, to say nothing of the Downs penned, prices were well maintained here for the most serviceable drafts of flock ewes, which sold from 43s. up to 53s. apiece, lambs selling equally well. Store cattle are again in more request now there is a prospect of keep, and both barreners and dairy cows are already showing a little more buoyancy than of late; but fat bullocks and sheep have declined quite ½d. per lb. if not more, with a much quieter trade at the price. Veal keeps as does pork; but the fat stocks are made slower all round than they were, though it must be said that most of the stock now brought out is of a very ordinary stamp as a rule.

Trade in Ireland.

Though there was a good attendance of butchers and exporters at Dublin Market on Thursday last business was of a very dull nature, and cattle must be quoted from 10s. to 15s. per head down, and sheep 2s. to 3s. per head worse. With 1,276 beasts in market, an increase of 233 on previous week, this fall was so much to be wondered at, but in the case of sheep, with 7,949, a decrease of very close on 1,000, such a heavy fall was hardly to be expected. Really prime bullocks were scarce and brought full prices of last week, but choice heifers were not in the same demand. The fall was most noticeable in coarse, rough cattle, which moved very slowly, but towards the close of the market a good number of useful shipping beasts were picked up by exporters. Quotations may be given as follows: Prime ox and heifer beef, 55s. to 58s., and in a few cases 60s. per cwt.; second quality, 52s. to 54s.; and inferior, 44s. to 51s. per cwt. A clearance was effected with difficulty. In the sheep department, the trade for best wethers was fairly good, at about last week's rates, but all other classes met with a very slow dragging sale. The reasons advanced for the dulness in mutton are that the Transatlantic arrivals have been very heavy of late, and that large consignments of Iceland sheep are being imported at present; the latter are said to be of very inferior quality, but still their presence has a bad effect on the market. Prime wethers made from 6d. to 7d. per lb.; prime ewe, 5d. to 6d., and coarse, inferior sheep from 4½d. to 5d. per lb. Hoggets sold at from 30s. for light to 52s. for best heavy. Lamb season practically over, but a few nice fat ones made up to 30s. per head, choice milk-fed veal more in demand, owing to the close of the lamb season, and best calves made from 7½d. to 8d. per lb., but coarse descriptions were slow and cheap at from 4½d. to 6½d. per lb. All sorts of milch cattle continue to sell well, particularly best springers and newly-calved cows, which brought from £18 to £21 per head. Few store cattle in market, but at some large auctions held during the week prices were very satisfactory and demand good. The pig market fairly supplied, and buyers in good attendance. Trade steady, with prices about the same as last week, and an early clearance effected. Choice lightweight hogs made from 44s. to 46s. per cwt.; coarse, 35s. to 38s.; and inferior, 30s. to 34s. per cwt.

Trade in Scotland.

John Swan and Sons, Ltd., give the following as their report on above for the current week:—The supplies of fat cattle on offer this week have been rather larger, and the general quality fair. The trade has been fairly steady, at prices much similar to those of last week, though secondary descriptions have sold slightly in buyers' favour. Fat cows have made more money. The supplies of fat sheep and lambs have been lighter. The best class of shop sheep have met a good demand, and prices have been maintained throughout for all classes. A good show of fat calves have met a dear trade, and a larger number of fat pigs continue to make high prices. In the store market there have been again large supplies of sheep and lambs. There has been a good inquiry, and everything has been easily sold at good prices. A considerably larger number of store cattle have been offered, and the most of them of a good description. There has been plenty of demand, and the majority have been sold at satisfactory prices to the seller. Milch cows were a small show, and met a trade similar to last week, the best class making a fairly good trade. Quotations:—Beef, from 8s. to 8s. 6d. per stone; mutton, from 7½d. to 8½d. per lb.

LONDON.

London Central, Wednesday.—Fair supplies and steady sale. Arrivals include 40 tons Scotch, 820 Liverpool sides, 1,600 hindquarters, and 650 forequarters American refrigerated. Quotations: Beef: Scotch, short sides, 4s 4d to 4s 8d; long, 4s 2d to 4s 6d; English, 4s to 4s 2d; American Deptford-killed, 3s 10d to 4s; Liverpool, 3s 8d to 3s 11d. Mutton: Scotch, 4s 8d to 5s; English wethers, 4s 2d to 4s 6d; ewes, 3s 4d, Dutch, 4s to 4s 4d. Veal: English and Dutch, 3s 8d to 4s 4d. Pork, English, 4s 4d to 4s 8d; and Dutch, 3s 10d to 4s per 8lb.

London Central, Friday.—Good supplies, but trade slow. Arrivals of beef included 60 tons Scotch, 800 Liverpool sides, 3,600 hindquarters, and 2,200 forequarters American refrigerated. Quotations: Beef, Scotch, short sides, 4s 6d to 4s 8d; long, 4s 2d to 4s 4d; English, 4s to 4s 2d; American Deptford-killed, 3s 9d to 3s 11d; Liverpool, 3s 9d to 3s 10d; American refrigerated hindquarters, best, 3s 8d to 3s 11d; seconds, 3s 6d to 3s 9d; forequarters, best, 2s 5d to 2s 8d; seconds, 2s 2d to 2s 4d. Mutton: Scotch, 4s 8d to 5s; English wethers, 4s 2d to 4s 6d; ewes, 3s 4d; Wellington, 2s 2d to 2s 4d; Canterbury, 2s 3d to 2s 5d; Sydney and River Plate, 2s to 2s 1d. Veal: English and Dutch, 3s 8d to 4s 4d. Pork: English, 4s to 4s 4d; and Dutch, 3s 10d to 4s per 8lb.

Islington, Thursday.—Beast entries fair, and chiefly fat bulls and rough cattle; trade slow. Sheep entries light, but inquiry very slack, late rates, however, being unaltered. 7½st to 8st Down wethers, 5s 8d to 5s 10d; 9st. 5s 6d to 5s 8d; 10st half-breds, 5s¾d; 10st Down ewes, 4s to 4s 2d; 11st half-bred, 3s 8d to 3s 10d. Calves, in fair supply, were about steady, the best making 5s 6d per stone to sink the offal. Pig trade quiet. Total supplies:—70 beasts, 1,880 sheep, 50 calves, 140 pigs, and 5 milch cows.

COUNTRY.

Ashford, Tuesday.—Beef, good supply, with slow trade, making, prime 11s to 12s; medium, 9s 8d to 10s 6d; cows, 7s 6d to 8s per score. Mutton, 4d per stone cheaper all round. Pork: Roasters, 9s 6d to 11s per score; medium hogs, 9s to 10s; large hogs, 8s to 9s; little pigs (about six weeks), 10s 6d to 17s 6d.

Basingstoke, Wednesday.—At Raynbird and Sons sale yard there was a fair attendance of buyers to meet a supply of 31 fat beasts, 68 calves, 560 fat sheep and lambs, 267 pigs, and 58 head of dairy and store cattle, which realised the following prices:—Fat beasts, £12 10s to £22 5s; fat calves, 80s to £5 10s; small, 15s to 30s; fat wethers, 10s 6d to 50s 0d; fat ewes, 20s to 3 8s; fat lambs, 26s to 46s; fat hogs, 60s to 95s; fat porkers, 42s to 56s; small, 26s to 38s; store pigs, up to 15s; dairy cows, up to £21. The show of fat beasts included some prime quality Galloways from Wolverton Park and young Devons from Norsebury, which were cleared at very full prices, Galloway steers realising £18 10s; young heifers, £16 5s; young Devon steers, £15 15s; heifers, £14 5s; shorthorn steers, £16 10s; heifers, £15; and cows, £15 15s. For best quality fat sheep and lambs there is a good demand, but at rather low prices. Lean sheep are a dull trade, and prices lower. Hants down wethers and young ewes made 48s, 35s 6d, 46s 50s 6d, 45s, 50s, 44s 45s 6d, 44s 6d, 42s, 52s, 48s; 9 months old ditto, 32s, 43s 6d, 36s 6d, 40s 6d, 45s, 43s 6d, 41s 6d, 42s, 34s 6d, 46s, 37s, 37s 6d; southdowns, 33s 6d, 30s; 3 months old sucking lambs, 26s 6d, 37s, 20s 6d; old ewes, 39s, 38s 6d, 39s, 28s, 30s, 35s, 36s 6d; rams, 40s, 37s 6d; black face Scotch wethers, 29s; Dorset ewes, 34s 6d, 35s; southdown ewes, 31s, etc., etc. With an average entry of dairy cows on offer, prices throughout ruled better. Store cattle continues a slow business. Fat calves met a clearance with a brisk trade. Fat porkers are in demand, meeting a ready sale at an advance. Fat hogs made more money. Store pigs found a better inquiry. Ruling values: Prime Devon and Galloway beasts, 7d to 7½d per lb; ditto Shorthorn, 6d to 6¾d; bulls, cows, and inferior beasts, 5d to 5½d; best quality sheep, 8¼d to 8¾d; second ditto, 7½d to 8d; old ewes, rams, and inferior, 6d to 6½d; choice fat sucking lambs, 8d to 9d per lb; fat calves, 6½d to 9d per lb; fat hogs, to 8s 6d; and porkers up to 11s per score.

Boston, Wednesday.—Best beef, 7s 6d to 8s; cow beef, 6s 6d and 7s 6d per stone; stores, £14 to £16 10s; in-calvers, £18 to £21; heifers, £15 to £17 10s; calves, 55s to 60s; wether mutton, 7½d to 8d; ewe mutton, 5½d and 6d per lb; gimmers, 40s to 45s; Hampshire rams, £4 10s to £5 10s.

Calne.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne:—

Prime stores.	Thickness of fat in any part of the back.	Price per sc.
6 sc 10 lbs to 9 sc 10 lbs ..	2½ in. and under.. ..	8s 6d
Under 10 sc 10 lbs	Not exceeding 2½ in. ..	8s 0d
Under 11 sc 10 lbs	Not exceeding 2¾ in. ..	7s 3d
Under 12 sc	Not exceeding 3 in.	—

Any pigs outside these limits at their value. Half truck, 12 pigs. Whole truck, 25.—CHARLES AND THOMAS HARRIS AND CO., Limited, Calne, Wilts.

Cambridge, Monday.—The stock exhibited for sale at this market and the prices obtained were as follows:—Beasts, 863; sheep, 728; pigs, 510; horses, 3. Beef, 7s to 8s per stone; mutton, 4s 4d to 5s 8d; pork, 6s to 7s. A larger show of store beasts, but trade rather slow. Fat beasts, a fairly good trade for all classes. Fat sheep a good show and late rates maintained. Stores only a few lots to hand. Fat pigs a good brisk trade. Stores not quite so good as last week.

Canterbury, Saturday.—Large supplies of stock, but the shortness of keep is affecting the sheep trade very considerably. Sales were difficult to negotiate. Working lambs ranged from 13s to 17s, and better quality from 20s to 24s 6d. Ewe tegs, 27s 6d to 33s; good wethers, 34s to 37s; and old sheep averaged about 20s per head, with better class from 22s to 32s. One especially good lot of ewe tegs made from 35s to 41s. No demand for horned stock.

Carlisle, Saturday.—The supply of Irish cattle was similar to last week's, there being about 400 wintering heifers on offer. Fair attendance of buyers, and trade steady at from £7 10s to £10 10s for the smallest specimens, and up to £16 10s for the best. Good show of young pigs and quiet sale at 20s to 26s.

Doncaster, Tuesday.—Quite an average supply of cattle, and fair inquiry. Beef made 7s to 8s, and up to 8s 3d for best lots. Plenty of sheep, and though trade was not very brisk, many lots changed hands at fully late rates. Ewes 5½d to 6½d; shearlings, 7d to 7¾d; and small cross-bred sheep, 8d to 8¼d. Veal, 7d to 8d per lb.

Dorchester, Saturday.—A good supply of stock, including beef and mutton. Trade ruled firm for best fat beasts. Milch beasts met a good demand for the best, at £15 to £21 10s; barreners, £24 to £29 per pair; fat bulls, £17 10s; best fat heifers, £16 to £22; steers—to £19. Horned ewes, 38s to 43s; wethers 48s to 53s; lambs, 28s to 33s.

Dublin, Thursday.—Larger supplies of cattle, and demand slow for all classes. Best qualities barely maintained last week's prices; other descriptions lower, and a clearance difficult to effect. Cattle (best), 31s to 33s per cwt; other descriptions, 27s to 29s per cwt. Mutton—No alteration.—GANLY, SONS, AND CO.

Glasgow, Wednesday.—Larger supplies to-day, but mostly of secondary descriptions; good cattle scarce and dear. Top Scotch, 69s to 70s per cwt; secondary, 62s to 68s; Irish, 69s; top mutton, 8¼d per lb; secondary, 7d to 7¼d; top lambs, 8¼d; secondary, 7¼d. Dead meat sharper owing to colder weather Best Scotch beef, 6¼d to 6¾d; States, 6d; cows, 5¼d to 5¾d.

Hereford, Wednesday.—Return of stock brought to the cattle market this day:—Bullocks and cows 548, calves 96, sheep and lambs 4,453, pigs (fat and sows) 16, sucking pigs 62, pigs (stores, not more than ten) 207, pigs (stores, more than ten) 115, horses 1. Prices of stock: Best beef, 6d to 7d per lb; wether sheep, 6½d to 8d per lb; ewes, 5½d to 6d per lb; veal, 9d per lb; lamb, 9½d per lb; pork, 4½d to 5d per lb; bacon, 4d to 5d per lb.

Leeds, Tuesday.—To-day's supply of cattle compared with last Tuesday shows an increase of 73, and comprised some excellent animals from the home district and the North of England, together with a good assortment from Scotland and Ireland. There was again a falling off in the number of buyers present, and competition ruled very slow throughout the market, dealers having to concede about ¼d per lb all round to do business. The choicest heifers and bullocks realised 6¼d, good useful beef made 6d to 6¼d, and inferior and cow beef 5d to 6d per lb. Sheep totalled 1,970, a decrease of 60 compared with last week. No improvement can be reported on the last week or two, buyers being fewer and business more difficult to transact. The demand was chiefly for the best quality of shearlings, and here the business was anything but active. For ewes and rough sheep there was scarcely any inquiry, and a very unsatisfactory market resulted. The choicest shearlings sold at 8d, large and heavy sheep 7d to 7½d, ewes and tups 5d to 6d per lb. Veal calves were about an average number, the best making 7d to 7½d per lb. There was a small supply of dairy cattle, which were more than equal to the demand, business ruling slow. The best milkers realised from £15 to £20. Numbers at market:—Cattle 607; sheep 1,970; calves 13.

Leicester, Saturday.—Heavy supplies of stock in good condition. Trade rather sluggish, sellers demanding high prices. Milch cows, £17 to £24 per head. Bullocks, £12 to £16. Young stock flat; sheep large supply. Trade slow at easier rates.

Lincoln, Tuesday.—Beasts were only fairly numerous, and trade was good. Prime beef, 7s 6d to 8s; inferior, 6s 6d to 7s 6d per stone. Supply of sheep not large, and trade better. Ewe mutton, 5½d to 6½d; wether ditto 8d to 8½d; lamb 8d to 8½d per lb.

Lincoln, Friday.—Only small show of cattle; fair demand. Milch beasts fetched up to £22. Best bullocks, £14 to £17; two year-olds, £8 to £12; and young stock, £6 to £8. Of sheep large supply, but business slack. Best grammers ranged up to 54s. Lambs sold at from 18s to 35s. Poor demand for pigs; stores, 28s to 45s; and young pigs, 13s to 18s.

Newcastle, Tuesday.—Excellent market all round; prices in favour of sellers. Numbers:—Cattle, 2,015; sheep and lambs, 7,830; calves, 101; pigs, 457. Prices (sinking offal):—Beef, 5s to 8s 3d, and 5s 6d to 7s 9d per stone; mutton, 5½d to 8d; lamb, 6d to 8¾d; veal, 5d to 9d per lb.

Newport (Mon.), Wednesday.—Large supply of stock, but best quality cattle and lambs were scarce. Good all round demand. Best beef made 6¼d per lb; secondary quality, 6d to 6¼d; wether mutton, 7½d to 8d; ewes, 6½d to 6¾d; lambs, 8d; veal, 7d to 7½d; porker pigs, 10s to 10s 6d per score.

Norwich, Saturday.—The supply of store cattle was considerable here to-day. Trade was dull, at about late rates. Fat beasts which were in large supply, made 7s 6d to 8s per 14lb. Store sheep were in average supply, late rates were generally maintained. Lambs making 28s to 38s and keeping shearlings, 25s to 30s per head. Fat sheep brought 8s 6d to 9s and 9s 6d per 14lb. Keep prospects appear to be pretty good in Norfolk.

Romford, Wednesday.—Best fat beasts made 4s 4d to 4s 6d,

and middlings 4s to 4s 2d per stone. Calves, 4s 10d to 5s per stone. Best sheep, 5s 6d to 5s 8d, and middlings 5s to 5s 2d per stone. A fair demand for store beasts. Pig trade about the same.

Salford, Tuesday.—The supply of cattle was again smaller, but owing to lower prices for beef at Birkenhead rade rule l slow, and sellers had to accept less money. There was a smaller supply of sheep and lambs. Trade was slow but firm for both, last market day's quotations again ruling. Fewer calves on offer, and a better trade at higher prices. Quotations:—Cattle, 5d to 6½d; sheep, 6d to 8¼d; lambs, 7d to 8½d; calves, 5½d to 7¾d per lb. At market Cattle, 2,346; sheep and lambs, 9,843; calves, 136; pigs, 93.

Sheffield, Tuesday.—The show of milch beasts was about the average, and a fair trade was done with the best lot, which made £19 to £23; secondary, £13 to £14.

Spalding, Tuesday.—A fair trade for beef; best, 8s per stone; cow beef, about 7s. Store beasts did not sell well, owing to the large supply. A large show of sheep, but trade slow. Lincolns, 7¼d; half-breeds, 7½d per lb. Not much demand for stores.

Stockton, Wednesday.—There were on offer 188 cattle, 610 sheep, 220 lambs, and 150 pigs. The general quality of cattle was not so high. Trade was firm for the best at 8s to 8s 8d per stone; rougher kinds, 7s to 7s 6d per stone; sheep, 8½d; lambs, 8½d; ewes, 6d to 7d per lb.

Taunton, Saturday.—Very short supply. Fairly good attendance. Dull trade.

Thame, Tuesday.—There was a good supply of stock at market, and with a large attendance of buyers trade ruled firm, and a clearance was effected with few exceptions. Mr. Bond's sale comprised 101 fat beasts, 5 down calving heifers, 200 fat sheep, 127 fat and weaning calves, and 183 pigs. Fat bullocks made £16 to £23 10s; fat heifers, £14 to £19 10s; down calving heifers, £14 2s 6d each; fat wethers, 46s to 55s 6d; fat ewes, 39s to 51s; fat lambs, 28s to 35s; fat calves, £3 to £4 13s; cow calves, 23s to 61s; bull calves, 16s to 58s; fat pigs, 9s per score. Porkets a good trade. Stores made late prices.

Wakefield, Wednesday.—There was a good show of beef, 1,484 fat beasts being penned, as against 1,432 at the previous market. Irish animals were freely offered, and constituted the bulk of the supply, which included a goodly number of Scotch cows. The beef trade ruled very heavy, and prices were about 1½d per lb lower than last week. Choice beef made 6½d per lb, useful animals 6¼d, and inferior lots 5d to 6d. There was a light show of lambs and sheep, only 2,857 being offered, against 3,137 last week. Although the supply was light it was fully equal to the demand, which was very limited, many butchers securing foreign meat from Birkenhead. Lambs and choice and small young sheep met with a moderate demand at 8d to 8¼d per lb, but other sorts moved off slowly. Good strong sheep 7d to 7¼d, ewes and tups 5d to 6d. A good supply of fat calves, which made 5d to 7¼d per lb. Milch cows were freely offered, and met with a steady sale. The best were disposed of at £20 to £22 10s each, and inferior £13 to £18.

Wakefield, Wednesday.—Very small supply of all kinds of stock, particularly in mutton, but the demand was so slow that these were quite sufficient, even at a slight reduction on last week's rates. Best beef 6¼d per lb; other kinds, 5d to 6d; small sheep, 8d; heavy and strong qualities, 5d to 7¼d. Numbers at market:—Beasts, 1,484; sheep, 2,857.

Wolverhampton, Wednesday.—Beasts and sheep a fair supply; trade slow. Calves a small supply; moderate demand. Beef, 5½d to 7d per lb; mutton, 6½d to 8¼d per lb; lamb, 8d to 8½d per lb; veal, 6d to 8d per lb. Milch cows a short supply: prices lower. Bacon pigs, 9s 3d to 9s 6d per score; porkets, 9s 6d to 10s per score; sows, 7s to 7s 6d per score.

Worcester, Saturday.—There were large supplies at this market in all departments, but trade was rather quiet. Values were maintained for best beef and mutton, but inferior qualities were easier. Best beef, 6¼d to 7d; inferior, 5d to 6d; wether mutton, 8d; ewes, 7d; lamb 8d; and veal, 7½d per lb. Pork pigs, 10s; bacons, 8s 6d per score.

York, Thursday.—This was the off weekly market. A few English store cattle and also a fair supply of Irish were on offer, but there was no trade. Calving and milch cows, £15 to £22 10s. Fair show of all classes of sheep, for which there was poor trade at less money. North country ewes, 42s to 48s; ditto lambs, to 30s; South country lambs, 25s to 30s; Masham shearlings, 38s to 44s; ditto ewes, 36s to 44s; ditto lambs, 18s to 23s; twice crossed shearlings, 42s to 48s; ditto lambs, 26s to 34s each.

York, Friday.—Calves, 8d per lb; small sheep, 8½d ditto; large sheep, 8d ditto; ewes, 6d ditto; lamb, 9d ditto; small pork pigs, 7s per stone; large pork pigs, 6s 6d to 6s 9d ditto.

FOREIGN.

Deptford, Wednesday.—Beast supplies 2,465, being 1,060 more than shown on Wednesday last, and comprised 1,563 United States and 902 Canadian. Trade slow at 3s 10d to 4s 1d for the former, and 3s 6d to 3s 8d for the latter, with ranch 3s 4d to 3s 6d; 1,329 Canadian sheep sold steadily at 4s to 4s 2d per 81b to sink the offal.

Yorkhill, Tuesday.—A sale of United States and Canadian cattle was held in the afternoon, when there were penned in the sheds 362 cattle landed by the Amarynthia, from Montreal. Bullocks formed the greater proportion of the total number. Although the cattle were only landed an hour or two before the sale, they showed remarkably well while being presented. There was a large attendance of buyers, and trade was of a very satisfactory character, the demand being very keen throughout, and the values all round showed an increase of from 25s to 30s a head on last week's prices. Bullocks of the best class met a very strong trade, and they sold dear. Secondary and heavier animals were in request, and they made more money than a week ago. Bulls were scarce, and they realised high prices.

BUTTER.

Tuesday.—Bedale: 1s 6d to 1s 8d per roll of 24oz. Leeds: Danish, 116s to 121s per 112lb; Irish creameries, 110s to 114s; York lump, 14s 6d to 15s 6d per stone; ditto long rolls, 1½lb, 1s 9d to 2s; fresh butter in 1lb prints, 1s 3d per lb. Settle: 1s to 1s 1d per lb. Sheffield: 1s 3d to 1s 4d per lb. Spalding: 1s to 1s 1d per lb. Stone: 1s 3d to 1s 4d per lb.

Wednesday.—Barnsley: 1s 3d to 1s 4d per lb. Boston: 1s 2d to 1s 3d per lb. Colne: 1s 2d per lb. Goole: 1s 3d per lb. Keighley: 1s 3d per lb. Kirbymoorside: 11d to 1s per lb. Knaresborough: (wholesale), 1s 6d to 1s 8d; (retail), 1s 7d to 1s 9d per roll of 24oz. Louth: 1s 1d per lb. Market Weighton: 1s per lb. Northallerton: 1s 6d to 1s 7d per roll of 24oz. Stockton: 1s 1d to 1s 3d per lb. Worksop: 1s 4d per lb.

Thursday.—Birmingham: 1s 3d to 1s 4d per lb. Brigg: 1s 1d to 1s 2d per lb. Devizes (wholesale): 1s 1d to 1s 2d per lb, retail 1s 2d to 1s 3d per lb. Driffield: 1s per lb. Kidderminster: 1s 2d per lb. Penistone: 1s 3d per lb. Ripon: 1s 7d to 1s 9d per roll of 24oz. Scarborough: 1s 2d to 1s 3d per lb. Wetherby: 1s 1d to 1s 3d per lb.

Friday.—Derby: 1s to 1s 3d per lb. Easingwold: 1s 2d to 1s 3d per lb. Grimsby: Choice Danish, 116s to 118s; Dutch, 100s to 106s; Canadian, 100s to 103s per cwt. Helmsley: 11d to 1s per lb. Leeds: Danish, 112s to 118s per 112lb; Irish creameries, 106s to 110s; York lump, 14s 6d to 15s 6d per stone; ditto long rolls 1½lb, 1s 9d to 2s; fresh butter in 1lb prints, 1s 3d per lb. Leyburn: 1s 6d to 1s 8d per roll of 24oz. Lincoln: 1s 1d to 1s 2d per lb. Otley: 1s 5d to 7d per roll of 24oz. Stratford-on-Avon: 11d to 1s 2d per lb Whitchurch: 1s 1d to 1s 2d per lb.

EGGS.

Tuesday.—Bedale: 11 for 1s. Leeds: Yorkshire, 11s to 12s per 120; Irish, 9s 3d to 9s 9d; Danish, 8s to 9s 6d; Austrian blues, 6s 8d to 7s; ditto reds, 8s 9d to 9s 6d. Settle: 11 or 12 for 1s. Sheffield: 9 or 10 for 1s. Spalding: 13 or 14 for 1s. Stone: 11 for 1s.

Wednesday.—Barnsley: 9 or 10 for 1s. Boston: 12 or 13 for 1s. Colne: 1s 10d per score. Goole: 13 for 1s. Keighley: 9 for 1s. Kirbymoorside: 13 or 14 for 1s. Knaresborough: 10 or 12 for 1s. Louth (wholesale): 14 for 1s. Market Weighton: 13 for 1s. Northallerton: 10 or 11 for 1s. Stockton: 9 or 10 for 1s. Worksop: 1s 10d to 2s per score.

Thursday.—Birmingham: 9 or 10 for 1s. Brigg: 13 to 16 for 1s. Devizes: 12 or 14 for 1s. Driffield: 15 for 1s. Kidderminster: 11 for 1s. Penistone: 10 for 1s. Ripon: 10 for 1s. Scarborough: 10 or 11 for 1s. Wetherby: 9 or 11 for 1s.

Friday.—Derby: 9 and 10 for 1s. Easingwold: 12 or 13 for 1s. Grimsby: Austrian, 6s to 7s. Russian, 5s 11d to 6s 11d; Danish, 8s 6d to 9s 11d; Canadian, 6s 6d to 7s 6d per 120. Helmsley: 11 or 12 for 1s. Leeds: Yorkshire, 11s to 12s per 120; Irish, 9s 3d to 9s 9d; Danish, 8s to 9s 6d; Austrian blues, 6s 8d to 7s; ditto reds, 8s 9d to 9s 6d. Leyburn: 10 or 11 for 1s. Lincoln: 12 or 13 for 1s. Stratford-on-Avon, 1s 8d to 1s. 11d per score. Whitchurch: 10 or 11 for 1s.

WOOL.

London, Friday.—Wool, English, per packet of 240 lb—Fleeces, Southdown hoggs, £8 to £11 10s; half-bred hoggs, £7 to £8 10s; ditto wethers, £6 10s to £8; Kent fleeces, £6 to £7; Southdown ewes and wethers, £8 to £11 10s; Leicester ditto, £6 to £7. Colonial, per lb: Victorian, fleece, superior, 1s 6d to 1s 7d; scoured good, 1s 7d to 1s 7½d; scoured average, 1s 5d to 1s 6d; greasy average to fair, 10½d to 11½d; New South Wales, scoured average, 1s 3d to 1s 4d; greasy average, 8¾d to 9½d; South Australian, greasy average, 6¾d to 7d; New Zealand, scoured average, 1s 4½d to 1s 5½d; greasy average, 8¾d to 9¾d; Cape, scoured superior, 1s 6d to 1s 8d; fleece average, 8d to 9d; greasy average, 6½d to 7d; Natal, scoured, 1s 2d to 1s 3d; greasy average, 7½d to 7¾d. Crossbreds, greasy, Victorian, good to superior, 10d to 1s; New Zealand, fine, 9d to 10d; ditto medium, 7¾d to 8½d; ditto coarse, 6d to 7d.

Bradford, Thursday.—Quiet market to-day in wool. Top makers are decidedly firm, and business which could be done at the merest fraction below present demands is stopped. In merinos things are, perhaps, easier for the buyer. English half-breds and lustres are steady. Mohair is firm. Yarn trades unchanged. Piece trade badly hit by dearness of cotton.

Canterbury, Saturday.—Prices are without improvement, but a fair amount of business is being transacted. Best Kent fleeces are quoted up to 6d, lamb-wool is making from 4d to 5d, and Downs from 8d to 10d per lb.

Leicester, Saturday.—There is still an improved feeling in the local wool trade, but the elections have interfered with business to some extent.

FEEDING STUFFS.

London, Thursday.—Linseed.—The total absence of shipments from India last week caused prices to harden early in the week, but has since given way. Calcutta spot London, 57s 9d, near 57s 9d; August-September and September-October, and October-November, 57s 9d; April-June, 46s 6d. Hull firm. Calcutta April-June, 47s 6d. Azov, Black Sea, September-October, 56s 3d; October-November, 55s. La Plata, December-January, 50s 6d; January-February, 49s 6d. To the Continent—Bombay is quoted March-May, sellers 51s. Calcutta April-June, new crop 47s 6d. La Plata December-January, 50s 6d; January-February, 49s 6d. The imports into London for the week have been 10,136 qrs; and since 1st January, 558,165 against 542,540 qrs corresponding time last year. Linseed oil is flat and prices have somewhat given way. We quote spot pipes, £33 10s, barrels £33 12s 6d; October-December, £33; January-April, £30. Hull spot naked, £33 5s; October-December, £32; January-April, £29 10s. Linseed cakes continue firm. London made, £8 10s. Russian, £7 17s 6d ex dock. American Westerns at £7 17s 6d to £8. Cotton cakes are firm. London made, £5; Egyptian, £4 17s 6d. Rapeseed continues firm. To the Continent we quote, Yellow Guzerat, October-November, 50s; March-May, 45s 9d. Yellow Cawnpore, October-November, 49s. March-May, 44s 9d. Brown Cawnpore October-November, 46s; March-May, 41s 9d. Brown Calcutta, October-November, sold at 44s 9d, April-June, 40s 6d. Ravison to Hull, September, 34s. November-December, 33s 6d. Cottonseed continues firm with little doing. Warehouse seed is held for £7 15s. September quoted £7 12s 6d; October, £7 5s; November-January, £6 15s. Hull closes quiet. Spot and passage, £7 7s 6d; September, £7 12s 6d; October, £7; November-January, £6 12s 6d. Cargoes November, £7 2s 6d wanted.—THE PRODUCE BROKERS COMPANY, LIMITED.

Mark Lane, Monday.—Linseed Cakes.—Supplies of foreign continue to come along in limited quantity, but with very little country demand values although firm are not quotably dearer. Russians may still be bought at last week's prices; Americans move off quietly and are relatively best value. English are only in small production, and crushers ask full prices of last week. Cotton Cakes.—There is a fair trade passing, and stocks being small sellers are inclined to raise their limits. Decorticated are scarce and dear, with meal unchanged. Maize germ meal.—Parcels of American to London are more freely offered at slightly easier terms, while some quantity of English has again changed hands. Rice meal is without change for landed lots of Rangood, while a fair trade has been done in parcels afloat.

—PINSENT BROS., Mark Lane.

Hull, Tuesday.—To-day there is a fair supply of English wheat, which meets a fair demand at fully last week's prices. Foreign held for 3d to 6d per qr advance, at which a limited business is doing. Oats maintain late rates. Barley unaltered from last week. Beans 10s to 20s dearer. Maize rather slow sale at last week's prices for all sorts. Linseed.—During the early part of the week the market was firm, but towards the close there was an inclination to ease, with again no immediate sales on the information of the arrival of any cheap cargoes from the River Plate, Bombay or Calcutta. The latest is only steady Calcutta, nothing offering on spot, September-October to London 58s 9d per qrter. Black sea to Hull was asked by the vessel, 57s 9d offd., was to arrive September-October, and 58s to [illegible]

LIVE STOCK.

OUR ILLUSTRATIONS.

The Shorthorn heifer Cicely is the property of, and was bred by, Her Majesty the Queen, Prince Consort's Shaw Farm Windsor. Cicely is a roan, calved February 21st, 1898, her sire being Prince Victor 73320, and her dam Cristobell, by Crœsus 58706. At the Royal Counties Agricultural Society's Show at Winchester this year she won first prize in her class, that for heifers in 1898.

The polo mare Girton Girl is the property of Mr. Dunbar Kelly, for whom she won a first prize and gold medal at the Tunbridge Wells Show last July.

Sir Gilbert Greenall, Bart. Walton Hall, Warrington, is the owner and also breeder of the Large White boar Walton Turk 5341, by Senator 5305, out of Walton Magneta 6790. At the Peterborough Agricultural Society's Summer Show Walton Turk came out top of his class, but at the Royal Lancashire Show at Rochdale he did not get a money award.

STOCK AND SHOW NOTES

By Herdsman.

The entire herd of pure-bred black-polled Aberdeen-Angus cattle belonging to Colonel Brocklehurst, of Ranksborough, Oakham, is to be sold by auction at Peterborough Horse Repository on the 12th of this month by Messrs. John Thornton and Co. The reason of the sale is that the herd having been so prolific, together with the large amount of other stock, it has outgrown the limited accommodation of the farm during the prolonged absence of the owner with the forces in South Africa. The foundation of the herd was laid by the purchase of seven good cows and heifers from Captain the Hon. A. Greville, of Burghley Paddocks, near Stamford, which had come from the herds of Sir R. J. Abercromby, Bart., and Mr. Adam Todd, of Crathes, in Scotland. Heiress of Wildrington 2nd was afterwards purchased from Colonel Lambert, and Lady Carbiston 2nd from the exors. of the Hon. T. W. Fitzwilliam, Alwalton. The bull Fair Actor 15444 was first used; he was a son of King of Paris 6869, bred by Mr. George Wilkin, and who was by Paris 1473, winner of both the champion prizes at the French International Exhibition in 1878. He was followed by Vandyke of Glamis 12165, a bull of fine quality and a good sire, still in service and for sale. Russophil, a handsome young bull purchased from Mr. J. H. Bridges, of Horley, Surrey, has also been recently used, and many of the heifers are in calf to him. He is by Rover of Craibstone 1294, the first prize yearling bull at Perth in 1899, sold at a big figure to Mr. Greenfield, Haynes Park, Beds.

Speaking at the luncheon held in connection with the Kington Horse Show, Lord Coventry had something to say about docking, a subject on which he said he felt very strongly. So many men, so many minds, and all tastes, we were told, said his lordship, were respected; but at the same time he could not see how anyone could admire a very short tail pulled and drawn so as to resemble a shaving brush. He could not see how they could possibly call such an adornment beautiful; the mane and the tail were two of the most perfect attributes of its nature. From what he had seen in the course of his peregrinations about the country he thought the docking of the horses' tails was a passing fancy, and seemed to be dying out, particularly amongst young horses. Very few of the latter were now shown with docked tails, and it was not only an improvement as regarded their appearance, but it was also an advantage to the farmer and the breeder to allow the tail to grow long, because the animals were then available for carriage horses and chargers, which they would not otherwise be. He thought it was a mistake to dock them, and he trusted that in future years they would see longer tails, and then those who bought the horses could use their own judgment as to whether they would have them cut or not.

On Saturday, the 22nd ult., Messrs. Alfred Mansell and Co., the well-known live stock exporters of Shrewsbury, shipped from Hull for Riga, per ss. Thomas Wilson, of the Wilson Line, the following high-class stock, viz., fourteen Clydesdale stallions and mares, twenty red and roan Shorthorn heifers, five red Shorthorn bulls, one white bull, four Jersey heifers, twenty-five Shropshire rams, one Oxford ram, ten Shropshire ewes, and twenty Large White and Berkshire boars and sows. The animals had all been specially selected from high-class breeders, and should be the means of securing further orders. All the animals were carefully put on board under the personal superintendence of Mr. Alfred Mansell. We hope to give further particulars in our next issue.

The champion R.A.S.E. Shropshire ram of this season, bred by Mr. A. E. Mansell, was shipped to Melbourne per the ss. Afric (White Star Line) on Saturday last, September 22, by Messrs. Alfred Mansell and Co., live stock importers, Shrewsbury. The same boat also took two high-class Shropshire rams to Adelaide, selected by the same firm, for Mr. A. J. Simpson. Full particulars will appear in a later issue.

On the 15th ult., Messrs. Alfred Mansell and Co., of Shrewsbury, shipped by the Wilson Line two high-class Shropshire rams to Stettin on account of Herr Rechholtz, of Germany.

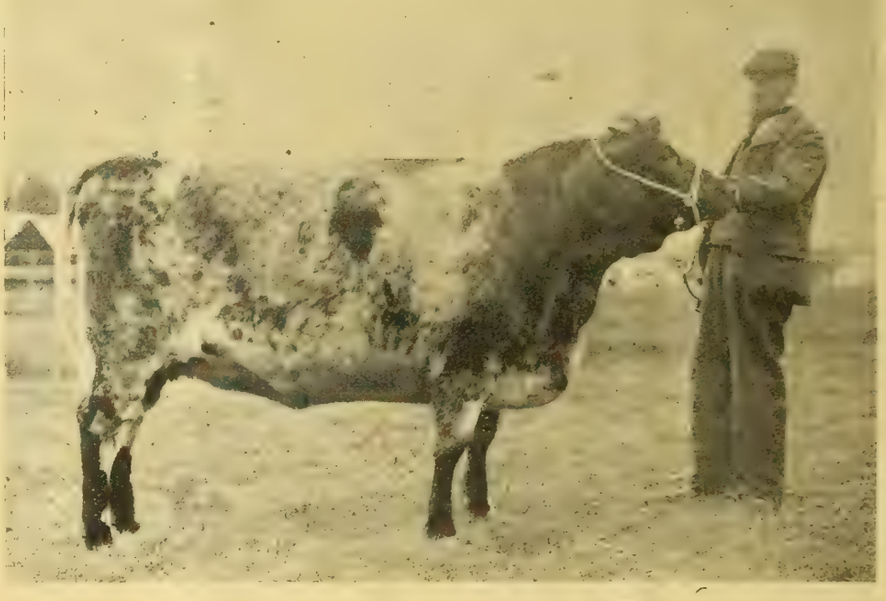
The Leeds Smithfield Club's Show will be held on December 4th, 5th, and 6th in the Engineers' Drill Ground, Camp Road, Leeds. A copy of the prize list has come to hand, and I see that in addition to very good class prizes, there is a large number of specials spread over all the sections, which include cattle, sheep, pigs, poultry, pigeons, rabbits, and dairy produce. The last day for entries is Friday, November 24th. The secretary is Mr. J. H. Clark, Hirsts Yard, Duncan Street, Leeds.

Holywell Manor, near St. Ives, Hunts, so long and honourably known for its largest of all herds of pigs, is likely to become renowned for its Shorthorns. A grand young bull was recently exported to one of the Government experiment stations in the United States. The bull was selected by Professor C. T. Plumb, after visiting several English and Scotch herds; its breeding is equally as good as its points, being by Count Valiant, a son of that great bull Count Lavender, and out of a first-rate milking cow bred at Holywell from one of its best strains of pure Shorthorns.

The export trade in Yorkshire pigs goes steadily on. A pair of choice Large White pigs and a pair of very promising Middle Whites have recently left the Holywell Manor herd, the property of the veteran breeder, Mr. Sanders Spencer, for the largest stock-breeding farm in Holland. Another pair of Large Whites were shipped by Mr. Spencer to the Purdue University, La Fayette, Indiana, United States. The boar pig was out of the noted sow Holywell Kathleen, one of whose sons, Holywell Royalty II., has proved himself the best boar of his age at the various shows this season. The young sow is descended from a long line of winning ancestors, and is herself a prize winner.

The Board of Agriculture have received telegraphic information through the Foreign Office that the Government of the Argentine Republic have prohibited the importation of cattle, sheep, and swine from the United Kingdom.

Sir Oswald Mosley, Bart., invited the tenants of his twelve largest farms to Rolleston Hall, on the 22nd ult., to consider a scheme for placing pedigree Shorthorn bulls within reach of the whole of his tenantry. In an interesting address by the genial baronet upon the advantages of using pedigree sires, he explained his scheme which, after questions from several tenants relating to various details, was cordially adopted. By this scheme twelve pedigree Shorthorn bulls will be lent to as many tenants for two years, the smaller tenants having the use of the bulls at a nominal fee. Four of the bulls will be located in the parish of Rolleston, five in the parish of Tutbury, and three in the township of Anslow. They were paraded for selection in a paddock adjoining the Home Farm, and formed, in the opinion of those present, an excellent collection. They had been carefully chosen for their breeding, size, and quality, from several noted herds besides the landlord's own. Should the experiment succeed, it may lead to a little friendly rivalry in the exhibition of their female progeny a couple of years hence.



H.M. THE QUEEN'S SHORTHORN HEIFER "CICELY."

During the present week Messrs. Sexton, Grimwade, and Beck will hold two special horse sales. On Wednesday at the Peterborough Repository they will dispose of about twenty-five harness and heavy town horses, the property of various breeders; whilst on Thursday Tuxford, Newark, will be the scene of the sale, the catalogue comprising thirty pedigree Shire horses, belonging to exhibitors at the Tuxford Shire Horse Show, which is held on that day.

Space is being well taken up for the Brewers' etc., Exhibition and Market, which opens at the Agricultural Hall, London, on the 20th prox. All the bays will this year be occupied by engineering firms, and several houses that have not been represented for some years in the Hall will this year be in evidence. The entries for the mineral water, etc., competition are very satisfactory, and the alterations in the schedule are evidently appreciated.

Bourne Fair. — The September cattle fair at Bourne was held on Thursday, and was well attended. There was a large show of beasts, particularly stores. Fat bullocks sold well at improving rates. Trade was not brisk for grazing beasts, and only the best changed hands. The sheep trade was slow, at about 2s. per head lower on the week. A few rams were on offer, but no fancy prices were realised. Two-year-old grazing cattle £11 to £14. year-and-a-half-old ditto to £11. There was a demand for in-calvers; cows to £20, heifers to £18 10s. each.

CATTLE.

Sale of Garth Hall Shorthorns.

The reputation of Captain D. H. Mytton as a successful breeder of Shorthorns attracted a numerous company to Garth on Tuesday, on the occasion of the sale, by Messrs. Lythall and Walters, of Birmingham, of some of his stock. Established some thirty years ago, the herd has been so extremely prolific that it has quite outstripped the accommodation of the farms, and a sale had become absolutely necessary. At the luncheon a large company sat down, Mr. W. Forrester Addie presiding. In reply to the toast of "The Health of Captain Mytton, and Success to the Sale," Captain Mytton said so far as he knew there was not an animal which had a distinct fault or drawback. Any animal he had found that was not fit for sale he had withdrawn. They must not think for one moment that he was relaxing his efforts to produce the best Shorthorns in the world; he would go on as long as he lived trying his very best to be a credit to Shorthorn breeding, for he did not believe there was any breed that could compete with it. With regard to auctions, he considered auctions had been spoiled throughout the country by gentlemen bidding for their own stock. He had seen that repeatedly in the auction marts, and he did not think it was fair either to the auctioneer or the buyer. All his lots would be offered perfectly free, and without competition on his part.

Mr. Lythall occupied the rostrum. There was keen competition for all the lots, but the greatest interest was, of course, centred in Silene, which is considered to be the best cow in England of her age. She was started at £50, and the price was gradually run up by bids of £10 to 340gs., at which figure she was knocked down to Mr. Kellock, of Adderley. This is the highest price realised by any Shorthorn this year. There was also a spirited competition for Silene's bull calf Sheriff, a beautifully-shaped youngster of great promise. This also went to Mr. Kellock for the handsome figure of 100gs. The prices of the other principal lots are given below. The average of the fifty-four females, some with calves at foot, was £36 11s., and the bulls £23 11s. After the cattle had been disposed of a number of Shropshire sheep were offered, and they realised satisfactory prices. Five pens of five shearling ewes sold at 45s. 44s., 44s. 6d., and 44s. per animal; four pens of five fat wethers sold at 48s., 49s. 6d., 49s., and 47s.; five ewe lambs fetched 34s. each, and five ram lambs went as follows:—67s., 44s., 56s., 50s., and 51s.

Sale of the late Mr. Henry Wyatt's Shorthorns.

On Thursday Messrs. John Thornton and Co sold the entire herd of pure-bred Shorthorn cattle kept by the late Mr. Henry Wyatt, at Walton Grange, Aylesbury. The weather was fine, and there was a large attendance of well-known breeders and others. The top price of the sale was realised for Ada, a fine red heifer calved in 1895, which was purchased by Mr. G. A. Sims for Miss Alice de Rothschild for 100gs. Mr. Walter Hazell purchased the second highest-priced heifer, Pomegranate, a splendid animal, calved in 1897, giving 97gs. for her, and he also bought the highest-priced bull, Spartan 3rd, for 58gs. Mr. Hazell has become the tenant of Walton Grange Farm, in succession to the late Mr. Wyatt, and he will carry on the breeding of pedigree Shorthorn stock on the famous Broughton pastures on the same lines as those followed by his lamented predecessor. Naturally he was a large purchaser, and he took no fewer than thirty-one lots, totalling in all £1,025 15s. The eighty-nine cows and heifers totalled £2,938 19s., or an average of £33 0s. 6d. each; fifteen bulls made £416 6s. 6d., or £29 15s. 4d. each; the 104 head of cows and bulls realised together £3,355 5s. 6d., and average of £32 5s. 3d. each; whilst the five steers offered made £71 12s., this bringing the total of the sale to £3,430 17s. 6d.

Below we give a list of the lots which realised 20gs. and over:—

	Gs.
COWS AND CALVES.	
Duchess 3rd, red, c Jan., 1890, s Vale Duke 58245 ..... Mr. Watkins	21

Sale of Mr. R. Dewhurst's Shorthorns

The herd of pure-bred Shorthorn cattle, bred by the late Mr. Robinson Dewhurst, was sold by auction the day after the Birmingham Shorthorn sale, by Messrs. John Thornton and Co., at Shelford House, Nuneaton. For the best of the lots there was good competition, some of the cattle being good milkers, mostly roans in colour. As at other recent sales, there was scarcely any demand except for the best bulls, but the thirty head sold for nearly £700, or an average price of £22 17s. each.

We give a sale list of the principal lots:—

Mr. J. G. Davis's Sale of Devon Cattle and Sheep.

An important sale of pure Devon cattle and long-woolled sheep, the property of Mr. J. G. Davis, of Bidwell Barton, near Thorverton, was held on the farm on Wednesday, the auctioneers being Messrs. Hawkes, Bisdon, and Andrew, in conjunction with Messrs. Cook and Birmingham, of Thorverton. The herd, which is a well-known one, comes into the market in consequence of the retirement of Mr Davis, who is known to a wide circle as a breeder of Devon cattle of more than ordinary success. The

estate is one of high repute, having been farmed by that eminently practical agriculturist, Lord John Somerville, somewhat over a century ago, and has since lost none of the reputation which accrued to it. In spite of the threatening weather, the sale was attended by large numbers of the agricultural community of Devon and Somerset, and those breeders elsewhere who have turned their attention to Devon stock breeding. Among the purchasers was Her Majesty the Queen, who gave 53gs. for Lovely 5th, born May, 1893; 20gs. for Cowslip 7th, born in the same year; and 17½gs. for Dorothy, calved September, 1894, and 18gs. for Nellie 10th. The cows and heifers, which numbered twenty five, averaged a little under £27 3s. each, the two bulls going to Mr. Dennis for 20gs. and 10gs. Sir W. H. Walrond bought the two-year-old steers at £33 10s., £30, and £30 per pair, and the yearling steers made from £16 5s. to £25 10s. per pair.

The sheep comprised some thirty-three lots, and were bought up readily. Breeding ewes made from 30s. top price to 37s., ewe lambs 17s. to 32s., wether lambs 32s. to 33s., and rams from 2½gs. to 3½gs. About a dozen horses were submitted, but did not appear to be wanted. Smart, however, a roan mare, 16 h.h., and five years old, fetched 29½gs., given by Mr. Crook, of Brampford Speke; Madam, a fine brown mare, 16.3 h.h., five years, sold at 35gs., these being the only prices of note.

The following were the principal prices realised for the cows and heifers: —

		Gs.
Nellie 5th 13325, c March, 1891	Mr. Leverton	14½
Her cow calf	Mr Shrimpton	4

Sale of Aberdeen-Angus at Tedfold.

Acting upon instructions received from Mr. Charles W. Schroeter, Messrs. Macdona'd, Fraser, and Co., Ltd., of Perth, submitted for auction at Tedfold, Billingshurst, Sussex, on Thursday, a number of very choice pure-bred Aberdeen-Angus cattle. Unfortunately for the comfort of those attending the sale, the weather was most inclement, but despite this bidding ruled fairly brisk, and satisfactory prices were obtained. The herd, for which Mr. Schroeter has become so famous, was established some twenty years since. The principal families of the breed represented in the catalogue were the Ericas, Prides of Aberdeen, Kinochtry Favourites, Victorias of Kelly, Sybils, etc., the Sparks (a very prolific family of good milking, well-fleshed cattle out of Spark 12916, by Icon 2158, own brother to Iliad 2843), and the Alices, which have bred a number of good fat show cattle in the South of England. The herd has achieved a great reputation at the Smithfield, the Royal, and other shows, and has won upwards of £1,200 in prizes. The prices realised were as follows: —

		Gs.

Sale of Aberdeen-Angus at Craibstone Mains.

The herd of Aberdeen-Angus cattle belonging to Mr. Pirie, of Duneeht, and a draft from Mr. Walker's herd, at Portlethen, were sold by auction at Craibstone Mains, Aberdeenshire, on the 10th ult., Messrs. Macdonald, Fraser, and Co. being the auctioneers. There was a large and representative gathering of breeders, and the cattle exposed found their way into all three divisions of the kingdom. The cattle were of a thoroughly useful type, and met a ready demand, the number of the autumn sales of the breed this year being fewer than has frequently been the case. The highest price of the day was 81gs., which was given by Mr. Kennedy, Dunure, Ayr, for the thick, straight, handsome two-year-old heifer Isla 3rd of Craibstone, tracing to Japonica 864, the ancestress also of the Portlethen Jacobinas. Mr. Walker put into the ring a number of the old family of Japonicas, which have been for long bred at Portlethen. One of the best was the ten-year-old Jacobina 10th, a massive, sweetly fleshed, and nicely ribbed cow which was first at Laurencekirk this year. Mr. Stevenson, Blairshinnoch, was after her from the beginning, and it was to him that she was knocked out at 60gs. The eight-year-old Pride cow, Pride of Powrie 4th, was also in demand, for this cow has a good showyard record, including a premier place at the Highland. Colonel Grant, Auchorachan, offered for her, and although he did not get her the cow goes to the same district, being taken out by Mr. Grant, Cromdale, at 41gs. Colonel Grant was fortunate, however, in getting at 40gs. the big, handsome, good cow Annuity of Craibstone, of the well-known Aldbar family. Mr. Smith, Powrie, got back, at 34gs., one of his own Witches in the eight-year-old Witch of Endor 22nd. Mr. Schroeter took with him to Sussex a few very pretty things, one of the best being Arabella 12th, from Portlethen, for which he paid 25gs. The calves sold cheaply, and pulled down the average considerably. Below we give a list of the principal prices realised: —

Aberdeen-Angus Sale at Grantown-on-Spey.

A sale of Aberdeen-Angus cattle from the herds of various breeders in the Strathspey district was held at Grantown-on-Spey on the 20th ult., but was rather poorly attended, and trade was not very brisk. A noticeable feature was, however, that, though there was practically no bidding for animals without quality, classes of all ages where there was shown anything like breeding, and with plenty of flesh, found a market, which, considering the company, must be set down as fairly good. There was little demand for cows, the highest price being 27gs., given by Mr. Anderson, Ballachraggan, for the West Lethendry three-year-old cow Lady Lucy of Advie, by the Balliol College Farm bull Rustler, which has bred so many good things for the Advie herd, and of the Lucy of Portlethen family. Mr. Macpherson, Mains of Mulben, had forward a fine draft of two-year-old heifers. For Pride of Aberdeen 131st, by the Auchorachan bull Larch, he received 39gs., the purchaser being Mr. Grant, Carr-Bridge; while for a nicely-topped member of the same family, also by Larch, Mr. Grant, Boat of Garten, gave 46gs. For another Pride of Aberdeen, by the Erica bull Eridale, Mr. Macpherson received from Mr. Grant, Cromdale, 29gs. The top price for yearling heifers was 19gs., given by Mr. Beaton, Cullen House, for the Inverallan heifer Hairbell 4th, by the third prize Highland Society winner, Quintus M., bred at Auchorachan. Several of the heifer calves sold well, the highest price being 28gs., given by Mr. M'Kessack, Aseisk, for the prize-winning calf Patroness 3rd, of the Nancy of Tillyfour family, out of the noted prize cow Quality of Kinloss, and by the Blairmore bull Interdict. For bulls the highest price was 20gs., given by Mr. M'Intosh, Balquharn, for the Vine of Tillyfour two-year-old Vinet, from Mains of Curr, and by the Powrie bull Melville Castle. Of the seventy-three animals catalogued forty-nine were sold, and the following is a list of the principal lots: —

Sale of Jerseys near Lewes.

A number of Jersey cattle and Southdown ewes, belonging to Mr. S. Austen Leigh, and a few Jersey heifers from Mr. T. Barchard's herd at Hopsted Place, were sold by auction by Messrs. J. Thornton and Co., at Frog Firle, Lewes, on the 20th ult. There was a fairly good attendance of buyers, but as will be seen from the following list of the chief lots of cattle sold the prices obtained were very low. The Southdown yearling ewes averaged 47s. each, the prices ranging from 43s. to 50s.

Transactions in Store Stock.

[From the Irish Department of Agriculture and Technical Instruction.]

At Kilbeagh, co. Cork, on Monday, there was an average-sized fair, and bullocks in good condition sold well. Calves, second class, £4 2s. 6d. to £4 10s. Yearlings, first class, £7 4s. to £7 12s. 6d.; second class, £5 15s. to £6 15s.; third class, £4 17s. 6d. to £5 10s. Two-year-olds, first class, £10 15s. to £12; second class, £8 10s. to £9 10s.; third class, £6 10s. to £8. Three-year-olds, first class, £13 15s.; second class, £11 to £11 15s. Springers, first class, £15; third class, £10 5s. to £11.

At the fair at Elphin, co. Roscommon, on Monday, a very good demand prevailed for cattle in fair condition and also for lambs. Prices: Calves, first class, £3 2s. 6d. to £6; second class, £2 12s. 6d. to £4 10s. Yearlings, first class, £9 to £10 10s.; second class, £6 to £8. Two-year-olds, first class, £12 15s. to £15 10s.; second class, £9 10s. to £10 10s. Three-year-olds, first class, £14 5s. to £16 5s.; second class, £12 10s. Springers, first class, £18 10s. to £21; second class, £13 10s. to £16. Lambs, first class, £1 8s. to £1 11s.; second class, £1 2s. to £1 6s. Hoggets, first class, £2 to £2 4s.; second class, £1 11s. to £1 16s. Young pigs, eight to ten weeks old, first class, 22s. to 24s.; second class, 16s. to 18s. each.

The fair at Westport, co. Mayo, on the 22nd ult., was a large one, and a good demand prevailed. There was a particularly large supply of aged horned ewes, for which a good demand was experienced. Prices: Calves, third class, £1 15s. to £2 10s. Yearlings, second class, £6 5s. to £8 17s. 6d.; third class, £4 10s. to £5 10s. Two-year-olds, second class, £8 15s. to £10 15s.; third class, £6 to £7. Three-year-olds, second class, £10 10s. to £13; third class, £7 to £9. Springers, second class, £12 10s. to £14 5s.; third class, £8 10s. to £10. Horned ewes, two-year-olds and upwards, third class, 13s. to 16s.

Oughterard Fair (co. Galway), held on Wednesday, was an average-sized one, composed almost exclusively of third class cattle of indifferent quality. A brisk demand prevailed for forward pollies, which were bought up early, but other sorts were difficult to sell. There was only a small supply of sheep, but quite sufficient for the demand, which was by no means brisk. Prices:—Calves, third class, £1 17s. 6d. to £3. Yearlings, second class, £6 to £7 2s. 6d.; third class, £3 15s. to £5. Two-year-olds, second class, £7 15s. to £9 5s.; third class, £5 5s. to £6 17s. 6d. Three-year-olds, third class, £7 5s. to £8 15s. Springers, third class, £6 15s. to £8 17s. 6d. Lambs, second class, 18s. to £1 1s.; third class, 10s. 6d. to 14s. 6d. Two-year-olds and over, second class, £1 13s. 6d. to £1 16s.; third class, 15s. to £1 7s.

At Kenmare Fair (co. Kerry), held on Wednesday there was a large supply of stock, which met a good demand, and a fair clearance was effected. Prices:—Yearlings, second class, £5 15s. to £6 5s.; third class, £3 10s. to £5 16s. 3d. Two-year-olds, second class, £8 5s. to £9 10s.; third class, £4 15s. to £7 18s. 6d. Springers, third class, £6 17s. 6d. to £8 10s.

Mr. Dunbar Kelly's Polo Pony "Girton Girl."

HORSES.

Sale of Shire Horses.

Messrs. Sexton, Turner, and Beck held their annual sale of Shire horses, the property of Mr. George Wolfe, at the Monks Horse Hall Stud, Carlton-on-Trent, on Wednesday, the 12th ult. There was a good attendance, and the animals were all in good form and condition. The prices realised were excellent, the total amount realised being £2,240 1s. The highest price given was for the yearling colt Monks Peter (Vol. xxii.), bred by Mr. Bryars, and sold for 210gs.

Prices and purchasers were:—

Mr. A. Pudifoot	23
Mr. Bryars	41
Mr. Bryars	210
Mr. Norbury	41
Mr. J. Wainwright	115
Mr. J. Wainwright	60
Mr. Hill	145
Mr. Jeffs	32
Mr. Goodson	36
Mr. J. Forshaw	36
Mr. Neil	39
Mr. Hawley	44

Sale of the Hatfield Hackney Stud.

Mr. W. Bainbridge, of Lancaster, sold by auction in the Glasgow Paddocks, at Doncaster, on Tuesday, the Hatfield Stud of Hackneys and ponies, belonging to Mr. A. H. Greatbatch, and twenty-seven lots belonging to other breeders. There was a good attendance, and a few high prices were made. Mr. Greatbatch's stud realised 1,505gs., the following being the principal lots:—

Lady May, bay, s Gordon Pasha	Mr. Batchelor 150

Sale at Gainsborough.

The annual autumn sale of horses at Gainsborough Cattle Market was held on Tuesday, the [illegible] being Mr. H. Hanson. Some of the best stock found ready buyers, [illegible] for the trade. [illegible] ring, [illegible] won prizes [illegible] foal by Cashier 5th was bought by Mr. Campbell, of Redcastle, for 20½gs.; [illegible] 20½gs. by Mr. G. Brown, of Sturton; a Midville Squire colt foal for 18gs. by Mr. W. B. Sleightholme, of Grayingham, who also gave 25gs. for another colt foal by the same sire. Mr. J. Reedy, of Hilltop,

bought an Ashwell Duke filly foal for 19gs.; Mr. Neal, of Northorpe, a Midville Squire filly for 16½gs.; Mr. C. E. Duckering, of Kirton, a two-year-old filly for 30gs.; Mr. Foster, West Burton, a Midville Squire colt foal for 16½gs.; Mr. W. B. Sleightholme, a Midville Squire cart gelding for 29gs.; Mr. Sutton, of Scampton, a Midville Squire cart colt, one year old, for 22½gs.; Mr. Eyre, of Ulceby, a seven-year-old cart mare for 23gs.; Mr. Staniland, of Knaith, two yearling cart fillies for 26½gs. and 26gs. respectively; Mr. John Byron, of Gringley, a cart foal for 19gs.: Mr. J. Oxley, of Bole, bought a carting filly for 38gs. Among those selling horses were Mr. A. Oglesby, Hamswell; Mr. J. Oxley, Bole; Mr. W. Wareing, Blyton; Mr. Pye, Blyton, etc.

Crewe Horse Sales.

Messrs. Frank Lloyd, Nuttall, and Co. held their three days' great quarterly prize sales in the Cheshire Horse Repository, Crewe, on the 19th, 20th, and 21st ult. Buyers attended in large numbers, and a clearance was effected throughout. The first day's sale contained 150 hunters, match pairs, and single harness horses. The awards and prices realised were:—Hunter mare or gelding 15.2 or over, Mr. J. R. Freme, 64gs.; harness mare or gelding 15.2 or over, Mr. A. Illingworth, 72gs.; match pair, realising 100gs. or over, Lord Delemare, with a pair of grey mares sold for 150gs. Thursday's sale included 250 small harness horses, show cobs, and ponies. Thi day's awards were:—Mare or gelding 15.1 and over, Mr. R. J. C. Mitchell, 55gs.; mare or gelding over 14.2 and not exceeding 15 hands, Mr. H. West, 55gs., r. Mr. E. Powell, 82gs.; mare or gelding over 14 hands and not exceeding 14.2, Mr. D. Donellon; pony mare or gelding under 14 hands, Mr. J. Hepherd, 29gs. The principal prices on the two first days (obtained for a considerable number of horses) ranged from 40gs. to 61gs., and many other animals found purchasers at prices ranging from 25gs. to 40gs. The last day of the sales was set apart for heavy horses of all classes, and the prizes were:—Cheshire Champion Cup, value 10gs., for best mare or gelding in the sale, Mr. T. Simpson, 85gs.; mare or gelding under 16.1, Mrs. Parton, 51gs.; parcel cart mare or gelding under 15.3, Mr. Simpson, 35gs.; gelding or filly, foaled in 1897, Messrs. Turner Bros., 47gs.; gelding or filly foaled 1898, Messrs. Turner Bros., 43gs. The top prices for heavy horses were 85gs., 80gs., 75gs., and 74gs., and others sold at from 43gs. to 64gs. Many active light lurry and van horses sold at prices ranging from 30gs. to 70gs.

Horse Sale at Glasgow.

Messrs. Dixon and Wallace held a sale of horses at Glasgow on Wednesday, the catalogue containing 100 animals. They consisted principally of carriage and coaching horses, while there were also a number suitable for van and cart purposes. There were also a few cobs and ponies included. There was an extra large attendance of buyers, farmers and contractors being well represented. Horses of good class met a fairly good trade. Bids came readily for them, and they realised good prices. Other lots met a very stiff trade, and they were very hard to cash. Carriage horses of the best class realised up to 40gs.; secondary, from 10gs. to 23gs.; and inferior made down to 6gs. Cart horses of the best sort realised from 20gs. to 35gs.; secondary and inferior, from 4gs. to 14gs. Vanners of the best class made up to 26gs.; secondary and inferior, from 4gs. to 10gs. Ponies, from 5gs. to 18gs., according to style, substance, and action. Cobs of the best class realised up to 23gs.; secondary and inferior, from 4gs. to 14gs. Mr. Dixon also sold a few sets of harness, polo carts, and carriages. They met a satisfactory trade, and they realised the standard prices.

Serious Farm Fire.—One of the most serious fires that has occurred on the Duke of Westminster's Eaton estate took place on the 22nd ult., at the Stonege Farm, Churton, near Farndon, in the occupation of Mr. Edwin Lewis. A smell of fire attracted the attention of some of the farm employees, who, on visiting a large building which was full of hay, clover, and grain, and articles used in connection yith the farm, discovered a fire raging. The alarm was quickly spread, and every effort was made by the men and willing helpers from the adjoining farms to remove some of the produce in the building. The fire, however, had not been discovered very long before flames shot out of the building, and very soon several parts of the structure were enveloped in flames. The local fire brigade were unable to subdue the fire, and late in the day the Chester brigade was summoned. They arrived in good time, and after raging for close upon twenty-four hours the fire was practically extinguished. The building, which was about forty yards long and eleven yards wide, was utterly destroyed, and not a particle of the produce in the building was left fit for use. This is to be regretted, as the upper room contained a quantity of hay and clover to supply forty cows with provender for the whole of the winter. Mr. Lewis will also have a difficulty now in finding a place to accommodate his stock. The damage is estimated at about £1,200, and is covered by insurance. The cause of the fire is unknown.

Sale of Shropshires at Coventry.

Messrs. Whittindale and Watson's annual sale of pedigree Shropshire sheep on the Butts Sale Ground, Coventry, took place on the 21st ult., when upwards of 200 rams, ram lambs, ewes, and theaves, and ewe lambs were penned. There was a very large attendance of purchasers from all parts of the country, and excellent competition, the whole of the lots being disposed of at prices highly satisfactory to the vendors. The rams and ram lambs, which numbered up to 150, went as follows:—Rams, Mr. E. L. Driver, Elmsthorpe, 8½gs., 7gs., 6½gs.; Mr. J. Hollick, Stivichall, 6½gs., 6gs., 5½gs.; J. S. Dugdale, Esq., Q.C., 5½gs.; Mr. A. S. Berry, Great Barr, 5½gs. Ram lambs: Dr. B. Wall, Blythe, 5½gs., 4½gs.; Mr. T. S. Neale, Exhall, 3½gs., 4½gs.; Mr. E. L. Driver, 5½gs., 4½gs.; Mr. T. Pearman, Ryton, 3¼gs.; Mr. J. H. Greves, Corley, 3½gs., 2¾gs.; Mr. S. W. Greves, Mercote, 3½gs., 2¾gs.; Mr. W. Pridmore, Wyken, 2¼gs.

The highest price in the 300 pens of ewes and theaves was 65s. for a pen of choice theaves from Mr. J. Tomlinson, Stechford, his other pens making 60s., 59s., 54s. 6d. Mr. C. Blythe, Balsall, theaves 56s., ewes 44s.; Mr. G. L. Hammerton, Fletchamstead, theaves 52s. 6d., ewes 47s.; Mr. J. King, Sedgmoor, ewes 53s.; Mr. R. S. Potter, Coleshill, theaves 47s., ewes 46s.; Mr. C. Mills, Wroxall, theaves 48s., ewes 49s.; Mr. J. Hollick, Stivichal, theaves 49s., ewes 49s.; Dr. B. Wall (Clun ewes), 36s.; Coventry Corporation theaves, 46s., ewes 48s.; Sir F. Peel, theaves 43s., ewes 44s.; Mr. T. Pearman, Ryton, theaves 48s., ewes 43s.; Mr. W. L. Riley, Wyken, ewes 45s.; Mr. J. S. Neale, Exhall, ewes 43s.; Mr. J. Blundell, Wolston, theaves 45s.; Mr. A. Redfern, Packington, ewes 47s.; Mr. C. Walker, Coleshill, ewes and theaves 44s.; Miss M. E. Swinnerton, Cryfield, ewes and theaves 46s.; Mr. A. Silk, Flechamstead, ewes 47s., theaves 44s.; Mr. P. J. Whittem, Mount Nod, ewes 46s.; Mr. John Skelton, Binley, theaves 47s.; Mr. E. Bostock, Baginton, ewes 45s.; Mr. John Townsend, Fillongley, ewes 45s. The 200 ewe lambs made up to 33s.

Sale of the Swanborough Southdowns.

The well-known Swanborough flock of Southdown sheep, the property of Mr. R. R. Verrall, was dispersed at Swanborough Farm, near Lewes, on Wednseday, on account of Mr. Verrall being about to leave the farm. The catalogue embraced 712 ewes, 200 stock ewe lambs, and 26 rams. The flock, which bears the registered number 94 S.F.B., was descended from that established early in the present century by the late Mr. Richard Verrall, father of the present owner. In 1833 it was purchased in its entirety by the late Mr. John Verrall, brother of Mr. R. R. Verrall, and at its dispersal by auction in 1877 the present owner was the purchaser. Since that period the high character of the flock has been maintained. There was a good attendance of buyers on Wednesday, and after a capital luncheon had been partaken of the sale was commenced. Mr. Frank Gorringe (Laughton) gave the highest price for over-age ewes, viz., 38s.; Mr. Hobgen, the top figure for full-mouth ewes, namely, 60s.; and also for six-tooth ewes, namely, 62s.; while Mr. H. Willett gave 67s. for four-tooth ewes. Mr. H. Willett gave the highest price for yearling ewes, viz., 70s., and also the highest price for lambs, 50s. Mr. M. R. Holman gave 5gs. for a full-mouthed ram. Mr. Wallis gave 12gs. for a three-year-old animal, Mr. Allan 7gs. for a two-year-old, and Mr. Hodson 6½gs. for a yearling ram. The average prices obtained were: Full-mouthed ewes, 45s. 6d.; six-tooth ewes, 48s. 4d.; four-tooth ewes, 60s.; two-tooth ewes, 60s. 6d.; lambs, 40s. 8d.; and rams, £5 5s. Details follow:—

OVER-AGE EWES (sires, sons of rams bred by Colonel Western out of Palmer flock ewes): Mr. Frank Gorringe (Laughton) bought ten at 38s., and Mr. Scrase nine at 35s.

FULL-MOUTHED EWES (sires, sons of rams bred by Mr. H. Penfold out of Palmer flock ewes): Mr. Hobgen bought five at 60s., five at 52s., and ten at 43s.; Mr. R. Combe bought five at 55s., and ten at 45s.; Mr. W. Brown bought ten at 50s., and ten at 42s.; Mr. Peckham bought ten at 38s., and ten at 43s.; Mr. A. Cook bought ten at 45s., and ten at 43s.; Mr. Matthews (Essex) bought ten at 43s., ten at 42s., and ten at 40s.; Mr. Sandford (for Count Munster) bought ten at 42s.; Mr. F. Gorringe bought ten at 42s.; and Mr. Holman seven at 41s.

SIX-TOOTH EWES (sires, sons of rams bred by Mr. H. Penfold out of Palmer flock ewes): Mr. Hobgen bought five at 62s., ten at 51s., ten at 48s., and ten at 44s.; Mr. E. J. Gorringe bought five at 60s.; Mr. Spencer Leigh bought five at 58s., and ten at 50s.; Mr. Matthews, ten at 48s., and ten at 44s.; Mr. H. Stacey, ten at 44s.; Mr. A. Cook, ten at 48s.; Mr. Hodson, ten at 54s., and ten at 49s.; Count Munster, ten at 47s.; Mr. Holman, eleven at 46s.; Mr. W. Brown, ten at 45s.; Mr. Ford, ten at 43s.

FOUR-TOOTH EWES (sirts, sons of Duke of Richmond's "Royal Warwick" out of Palmer flock ewes, and sons of rams bred by Mr. H. Penfold out of Palmer flock ewes): Mr. H. Willett bought ten at 67s.; Mr. E. J. Gorringe bought five at 66s., and ten at 56s.; Mr. Wallis, ten at 65s.; Mr. Scrase, ten at 63s.; Mr. J. Jenner, ten at 55s., and ten at 52s.; Mr. Taylor, ten at 62s., twenty at 58s., and ten at 54s.; Mr. Cook, eleven at 62s.; Mr. Lloyd (Mayfield), ten at 61s., ten at 60s., and ten at 58s.; Mr. Matthews, ten at 60s., and ten at 59s.; Mr. Webb, ten at 60s., and ten at 52s.

YEARLING EWES (sires, sons of Mr. Penfold's "Selsey Boy," out of Palmer flock ewes): Mr. H. Willett bought five at 70s., five at 67s., ten at 66s., and ten at 63s.; Mr. Taylor, ten at 68s., ten at 62s., ten at 60s., eleven at 58s., and ten at 57s.; Mr. Lloyd, five at 63s., and five at 62s.; Mr. Jenner, ten at 62s., ten at 58s., and ten at 57s.; Mr. Hobgen, ten at 61s., ten at 59s., ten at 58s., and seven at 50s.; Mr. Matthews, ten at 60s.

LAMBS (sires, five sons and one grandson of "Chirkhall," Mr. Henry Webb's No. I., Vol. 1 A.D., out of Palmer ewes): Mr. Willett bought ten at 50s.; the Hon. Ralph Nevill twenty at 45s., and ten at 43s.; Mr. Levett, ten at 42s., and ten at 38s.; Mr. Matthews, ten at 42s., and ten at 40s.; Mr. Jenner, ten at 42s.; Mr. Beard, ten at 41s.; Mr. Hobgen, ten at 41s.; Mr. W. Brown, ten at 41s.; Mr. Martin, ten at 40s.; Mr. J. Kenward, ten at 39s.; Mr. Cooper, ten at 38s.; Mr. J. Stacey, ten at 37s.

RAMS (Full-mouthed): Mr. M. R. Holman bought one at 5gs.; Mr. A. Wadman, one at 4gs., one at 3½gs., and one at 2½gs.; Mr. Willett, one at 2gs.; Mr. Ford, one at 2gs.

THREE-YEAR-OLD RAMS: Mr. Wallis bought one at 12gs.; Mr. M. R. Holman, one at 7gs; Mr. H. Willett, one at 4½gs; Mr. Cowley (Ovingdean), one at 4gs.; Mr. Taylor, one at 3½gs.; Mr. Matthews, one at 2½gs.

TWO-YEAR-OLD RAMS: Mr. Allen Cooper bought one at 7gs.; Mr. J. Lade, one at 6½gs., and one at 5½gs.; Mr. Hodson, one at 6½gs., one at 6gs., and one at 5gs.; Mr. A. Wadman, one at 6½gs.; Mr. Matthews, one at 5½gs.; Mr. Huggett, one at 4gs.

YEARLING RAMS: Mr Hodson bought one at 6½gs., one at 5gs., and one at 4½gs.

Lamb Sales at Hawick.

Messrs. Andrew Oliver and Son concluded another two days' sale on Thursday, when they sold 130 lots of lambs of all classes, numbering 5,500, making a total for the two days of 17,000. There was a good attendance of customers, and a ready sale. Three-parts bred lambs made 18s. to 25s.; half breds, 15s. 3d. to 22s.; crosses, 15s. 9d. to 21s.; Cheviot wedders, 9s. 9d. to 17s. 6d.; Cheviot ewe lambs, 7s. 6d. to 12s. 3d.; blackfaces, 6s. 3d. to 8s. 9d. each.

Scunthorpe Ram and Lamb Fair.

Scunthorpe September Ram and Lamb Fair was held on Monday, and attracted a large attendance of farmers and dealers. There was a large show of Lincoln rams, breeding ewes, and lambs. Messrs. Spilman and Glasier sold nineteen of Mr. C. S. Holgate's rams for 3½gs. to 5gs. each, the average being 3½gs. Fourteen of Mr. Marris's Kirmington flock made from 5¼gs. to 12½gs., the average being 6¾gs. The top price was paid by Mr. J. Beaulah, of Ravensthorpe. Six rams sent by Mr. E. Dore, Bonby, were sold at from 4¼gs. to 5½gs., the average being 4½gs. Six rams belonging to Mr. C. Spilman averaged 5gs., 4½gs., to 7gs., being the prices made. Six of Mr. J. Benson's rams (Somerby) made from 6½gs. to 10gs., averaging 7¼gs. each. Mr. J. Spilman, of Clixby, averaged 4¼gs. for nine rams. At the fair ewes made 5½d. to 6d. per lb., wethers 7½d. to 8½d. per lb., lambs made 24s. to 32s. each, and breeding ewes 35s. to 48s. each.

Aberdeen Leicester Club's Sale.

The annual sale of sheep under the auspices of the Aberdeen Leicester Club took place on Wednesday at Belmont Auction Mart, Aberdeen. The entries numbered 581, compared with 545 last year. There was a rather meagre attendance of buyers, and while the better lots were readily picked up at moderately good prices, many others were withdrawn from the ring. The highest average was made by Mr. Hume, Barrelwell, Brechin, who obtained £7 2s. 8d. for eleven head of shearling tups—some of them being the third prize animal at the show which was held the previous day, and which went to Mr. Cooper, Dunnydeer, at £12. The highest priced animal, however, was a shearling tup belonging to Mr. Barron, Meikle Endovie, Alford,

which went to Mr. Brebner, Balquhindochy, at £13 5s. The second best average was realised by the well-known Scottish breeder and exhibitor, Mr. Taylor, Pitlivie, Carnoustie, who had £6 18s. 6d. for twenty shearling tups. A lot of five Shropshire tups belonging to Mr. Buttar, Corston, Cupar-Angus, made an average of £4 7s.

Dorchester Poundbury Fair.

About 11,000 sheep were penned at Dorchester Poundbury Prize Sheep Fair, which was held on the old Roman Encampment at Dorchester on Thursday. Rain fell heavily during the morning, but the welcome showers came too late to greatly affect the trade. Still an active demand prevailed, and prices were better than expected. Prizes were offered as usual, the judges being Mr. E. C. Legg (Combe Down), and Mr. P. Pitfield (Eype). Mr. Elworthy (Alton) won first of £5 5s. in one class, and the executors of the late Mr. Mayo (Waddon) second, £2 2s. Mr. C. Mayo (Waddon) secured premier honours in another class. Sheep were in good order, and were bought largely for Somerset, Devon, and adjacent counties, and extensive purchases were also made for the Midlands. Horn ewes made 45s. to 53s.; wethers, 35s. to 38s.; chilver lambs, 27s. 6d. to 33s.; horn couples, 47s. to 55s. Down sheep also sold well. A prime lot of Mr. Horner's Down ewes made up to 49s. Down wethers up to 43s.; wether lambs,, 27s. to 38s.; chilvers, 29s. to 36s.

Lewes Fair.

The annual sheep fair at Lewes was held on the Downs near the Civil Prison, on the 21st ult., and there was a large attendance of agriculturists from all parts of the county. The number of sheep penned was nearly 17,000, and sales generally were good. The top prices realised were obtained by Mr. J. Burder Powell, of Mayfield, who sold tegs at 51s., and Mr. Allan Cooper, of Norton, who obtained 47s. for ewes. Mr. T. W. Pickard, for Admiral Brand, sold seventy ewes at 34s., fifty at 33s. Mr. Allan Cooper secured the top price in the fair, viz., 100 ewes at 47s. He also sold nineteen at 36s. Mr. W. T. Wallis (Southeram) sold 100 ewes at 45s., and thirty-six ewes at 39s. Mr. E. J. Gorringe (Chyngton) sold 100 ewes at 44s. 6d., 100 at 42s., 100 at 38s. 6d., fifty ewes at 36s., and a number of cull lambs at 28s. 6d. Mr. Harry Willett sold seventy mixed tegs at 46s., 100 lambs at 32s. 6d., and fifty cull lambs at 27s. Mr. W. A. Cowley (Ovingdean) sold 120 ewes at 40s. Mr. J. Bannister, for Count Münster, sold six rams at 5gs. each. Mr. Covell sold seven at 6gs. and a number at 4gs. Mr. J. Kenward sold thirty-two lambs at 30s. Mr. R. R. Verrall sold 100 ewes at 44s. Mr. R. Lambe sold fifty ewes at 44s. Mr. F. Stanford (Middleton) sold ram lambs at 3½gs. and 4½gs. Mr. J. Hodson (Kingston) sold 100 lambs at 36s. Mr. R. Brown (Landport) sold ewes at 47s. and 42s., cull lambs 23s. Mr. R. Brown, jun., sold cull lambs at 28s., and cull ewes at 37s. Mr. J. B. Powell (Mayfield) sold tegs at 51s. Mr. Ingram, for the Countess of Chichester, sold 100 ewes at 41s. and 100 lambs at 32s. 6d. Mr. Heasman (Wick, Littlehampton) sold ram lambs at 4gs. to 6gs. Mr. J. Brown (Patching) sold a number of ewes at 44s., 40s. 6d., and 38s., and lambs at 32s., 29s., 27s., and 26s.

Ram Sale at Hawick.

Messrs. Andrew Oliver and Son's annual sale at Hawick took place on the 21st ult., when they offered 656 Cheviot rams and 219 Leicesters, a decrease of about 40 Cheviots, but just about the same number of Leicesters. All the crack lots usually presented were forward, besides a large number of medium class sheep. The quality of these was somewhat similar to last year, and there were a number of very superior sheep, which had taken prizes at many of the leading shows in England and Scotland, and the show on the whole was quite up to the usual standard. The day was favourable, and there was a large attendance of flockmasters and others; but, contrary to most of other years, no buyers were forward from Ireland, the present restrictions preventing sheep going from that country to the Emerald Isle. The demand was rather irregular, as the variation of ups and downs in the average show, and while better class sheep generally met a ready sale, and made a good price, a large number only sold indifferently, and in many cases consigners were rather disappointed. On the whole, however, medium class sheep sold fairly well, and most of the averages for this class show an advance from last year. The highest-priced Cheviot tup of the day was £61, given by Mr. Hall, Larriston, for a very choice two-year-old in the Hindhope lot; but the average of the whole shows a decline of £3 2s. 8d. from last year, when £100 was got for one of the same flock. In Cheviots, out of the Hartside lot, Mr. Dodd, Riccarton, purchased the highest-priced ram at £22 10s. From Laidlawsteel, Mr. Smith, Mowhaugh, purchased a nice animal at £31. From the Skelfhill consignment, Mr. Menzies, Blairech, bought Stormproof, sire Newcastleton, for £24; Mr. Murray, Parkhall, gave £21 for Tom Elliot, sire Lord Percy. Out of Newton, Bellingham, Mr. Elliot, Attonburn, secured Bonnie Scotland (1121), sire Bonnie Davie (993), for £23; Mr. Hedley, Howpasley, gave £20 for another; Mr. A. Douglas, Riccarton, gave £21 for Pride of the Lammermoors. There was a fine lot from Attonburn, the highest price being given by Mr. Willins, Hartside, viz., £37. Mr. Elliot, Hindhope, purchased one at £22; Mr. Dunn, Laidlawsteel, one at £20. Out of Mowhaugh, Mr. Bertram, Hartside, chose one at £23 10s. Out of the well-known Hindhope lot, Mr. D. Hall, Larriston, had the highest price ram of the sale, Jedforest, sire Newcastle Champion, a two-year-old, for which he gave £61. For John Clay, another two-year-old, sire Glencrosh, Mr. Stavert, Thorlieshope, paid £52; Mr. Hamilton, Caplegill, gave £48 for a dinmont, Jimmy Telfer, and another dinmont, Mosspaul, brought £36 from Mr. Paton, Glencaple. Mr. Tress, Saughill, gave £34 for a two-year-old, Sir Lancelot, and Mr. Haddow, Castle Crawford, £27 for another.

Market Rasen September Fair.

The supply of sheep at the September Fair at Market Rasen on Tuesday was not so large as usual. There was a brisk trade, and good prices were realised. Lambs made 24s. to 35s.; ewes, 30s. to 45s.; gimmers, 40s. to 50s. Mr. Topliss, Market Rasen, disposed of 107 gimmers at 48s. 6d. each to Mr. Lear, of Hull. Mr. Shaw, Peterborough, had a consignment of Hampshire Down rams from the flock of Carycoles, Winterbourne Stoke, Wiltshire. They found ready purchasers at 4½gs. to 5½gs. The Bleasby rams, disposed of by Messrs. Dickinson and Riggall, realised an average of £4 17s. 10d., the highest price, 8gs., being given by Mr. Odling, of Torrington. The best price obtained for the North Kilney rams was 8½gs., given by Mr. J. M. Pilley, of Tealby.

Lamb Sales in Teesdale.

Wednesday was an unusually busy day at the Barnard Castle and Teesdale Farmers' Auction Mart, when a very large number of keeping lambs were sold. 250 halfbred lambs from Messrs. Bell, of Langleydale, reached 29s. a head; 130 halfbred lambs, Mr. Peacock, Washton, 26s. 3d.; 40 halfbred lambs, Mr. Sutherland, Lonton, 29s.; 40 halfbred lambs, Mr. S. Bayles, 29s. 6d.; 70 twice-crossed lambs, Mr. Ireland, Doe Park, 33s. 9d.; 20 halfbred lambs, Mr. Thompson, Stotley, and a number of similarly bred lambs from Mr. Cooper, reached 34s. 6d. per head. Gimmer lambs were most eagerly sought after, the late advanced rates being fully maintained.

Sale of Kentish Rams at Rochester.

The tenth annual sale of Kentish rams, the property of Mr. C. J. G. Hulkes, of Pettings House, Ash, Sevenoaks, took place on Tuesday at Rochester Cattle Market. There was a fair demand for them, but at a lower range of prices than was expected would be the case, for they were very well bred, and of a good character. Ten were, however, purchased for export to Chili by Messrs. J. Howe and Co., at £9 15s., £8 15s., £7, £6. £5 10s., £5 5s., £4 10s., and three at £3 5s. Mr. E. B. Gascoigne purchased at £7 5s.; Mr. F. Wright at £4 10s. and £3 5s.; Mr. J. Hales at £4 and £3 10s.; Mr. A. Whitebread at £4 10s.; Mr. W. Batchelor, two at £3 5s. and one at £3 10s.; whilst two stud rams went to Mr. E. B. Gascoigne at £5 15s., and Mr. F. Wright at £4 15s.

Ayr Ram Show and Sale

The Ayr Ram Society's annual sale of blackface and Border Leicester rams and tup lambs was held in the Cattle Market, Ayr, on Wednesday, when there were catalogued 445 blackface shearlings and 602 lambs, 111 Border Leicester shearlings, and 46 lambs. The show was held on the previous evening, the following being the awards:—Blackface shearlings: First, James Murray, Low Ploughland; second, William Dunlop, Dunure Mains; third, Colonel Blair, of Blair; fourth, John Craig, Southhalls. Pen of five blackface shearlings: First, Carzow Bros., Borland; second, Messrs. M'Millan, Glencrosh; third, Robert Cadzow, Weston. Blackface tup lamb: First, W. and A. Wardrop, Fernhaugh; second, William Riddell, Crosswoodhill; third, Thomas Carsewell, Chirmorrie. Pen of five blackface tub lambs: First, G. and R. Richmond, Drumshang; second, R. Sinclair Scott, Flatt Farm; third, William Clark, Auchenlongford. Two-shear blackface rams: First, William Anderson, Witshaw; second, John Craig; third, J. and A. Sloan, Alton Albany; fourth, Q. Dunlop, Morriston. Border Leicester shearlings: First, James Calderwood, Windyhill; second, James Dunlop, Midlands; third, Q. Dunlop. Border Leicester tup lamb: First and second, Robert Picken, Langside. Rain fell heavily during the greater part of the day of the sale, and made matters disagreeable. The fact of the Irish ports being closed and the restrictions in force in Perthshire caused the attendance of buyers from these quarters to be less numerous than usual. The quality of stock was equal to that of former shows, but trade was by no means brisk, and prices, especially for shearlings, rather disappointing for exposers. The following are the prices the prize-winners sold at:—Single blackface shearlings: First prize, £20; second prize, £27; third prize, £12. Ram lambs: First prize, £15 5s.; second, £7 5s.; third, £5 10s. One of Messrs. Cadzow's prize pen of five brought £51, the highest figure of the sale. For Border Leicesters there was a brisk demand. The first prize shearling sold at £7, the second at £7 10s; and the third at £10 10s. The first and second prize lambs sold at £5 10s. each, and the third at £5 2s. 6d.

Kent and Romney Marsh Sheep Breeders' Association Sale.

The [illegible] and sale of ram tegs in connection with the Kent and Romney Marsh Sheep Breeders' Association was held in Ashford Cattle Market on Friday. The rams, which numbered 445, or nearly 100 more than last year, were a magnificent lot, stronger than those of last year, and probably the finest collection of Kent ram tegs ever seen. At the same time they were most kindly, and the levelling up in type was particularly noticeable. Under these circumstances competition was very keen for the challenge cup given by Mr. Laurence Hardy, vice-president, held during the past year by Mr. A. Amos, of Wye, and to which is added a five guinea prize given by the Right Hon. A. Akers-Douglas, presented for the year, and a second prize of three guineas given by Messrs. Battle, Maltby and Battle, Sheep-dip Manufacturers, London. The challenge-cup is perhaps the most difficult prize to capture for ram tegs during the year, and is therefore the more largely sought after by the breeders. Altogether thirty-eight ram tegs competed. The judges: Mr. Julius Finn Kelsey, of Old Romney; Mr. C. J. G. Hulkes, of Ash, Sevenoaks; and Mr. T. G. Pearson, of Appledore—had a long and difficult task to accomplish before making their final decision. The first prize fell to a wonderfully strong teg to Mr. Geo. Buley's, who was closely followed by Mr. J. E. Quested with both second and third prizes, Mr. A. Amos being reserve and Mr. C. File commended. Mr. Geo. Buley's teg was purchased at 26gs. by Mr. Hulkes, one of the judges, who thus substantially backed his opinion. Last year Mr. Millen's champion ram fetched 21gs., but the second prize-taker of Mr. Amos's sold at 50gs.

Messrs. W. and B. Hobbs disposed of Mr. A. Amos's consignment, and the following were the prices obtained and purchasers:—Mr. H. Rigden, 20gs., 16gs., and 13gs.; Messrs. Waldron and Co., 16gs., 12½gs., 12gs. (four times), 11gs., 10½gs. 10gs. (three times), 9½gs. (twice), 9gs. (twice), 8½gs. (four times), 8gs. (three times), [illegible] (twice); Mr. H. Meeson, 9gs., 7½gs., 5gs.; Mr. J. Powell, 16gs., 15gs.; Mr. F. Baker, 11½gs., 9gs.; Mr. G. Farmer, 18gs.; Mr. H. Buss, 12gs., 8½gs.; Mr. E. Wacher, 10gs., 9½gs.; Mr. Rayfield, 9gs., 8½gs., 8gs.; Mr. Solley, 9½gs.; Mr. W. Millen, 23gs.; Mr. Birch, 16gs.; and Mr. L. Hardy, 12gs. The total for the fifty ram tegs was 539½gs., or an average of £11 4s. 7d., as against £10 10s. 2d. last year.

Mr. G. Bulley's ram tegs were disposed of by Messrs. W. and C. Petley, who obtained the following prices for them:—Mr. Elgar, 8gs.; Mr. Harvey, 4½gs.; Messrs. Waldron and Co., 12½gs. (twice), 9gs. (twice), 5gs., 7½gs., 4gs.; Mr. Hulkes, 26gs.; Mr. Miskin, 11½gs., 8½gs., 7gs.; Mr. Rayfield, 4gs.; Mr. Stone, 9gs. (twice); Mr. H. Rigden, 13gs., 11gs.; Messrs. Hallett and Collard, 6gs.; Mr. Bushell, 5gs. Altogether twenty were sold for 182gs., giving an average per head of £9 11s. 1d. Last year the same number only averaged £6 5s. 5d.

For Mr. H. Rigden's lot, which was sold by Messrs. Reeve and Finn, the following were the prices and purchasers:—Messrs. Waldron and Co., 7gs., 8gs. (twice), 7½gs. (twice), 7gs. (twice), 6½gs. (twice), 5½gs. (twice), 5gs. (twice), 4½gs. (three times). Mr. G. Neve, 10gs.; Mr. R. Kenward, 10gs. (twice), 7½gs., 7gs., 6½gs.; Mr. Meeson, 7gs., 6½gs. (twice), 6gs. (twice), 4½gs. (three times), 4gs.; Mr. T. Hilder, 5gs., 4gs.; Mr. Hambrook, 7gs., 6gs.; Mr. Dowls, 5gs., 4gs. (twice); Mr. H. Pye, jun., 5½gs., 5gs., 4½gs. (five times), 4gs.; Mr. Colman, 5gs., 4gs.; Mr. Long, 8gs., 7½gs., 7gs.; Mr. Brice, 4gs. (three times); Mr. Hardy, 5½gs. (twice), 4gs.; Mrs. Deedes, 4gs. (twice), Mr. Arthur Finn, 9gs., 8gs.; Mr. A. Collard, 7½gs., 6gs.; Mr. Petley, 5gs., 4gs.; Mr. Collick, 4gs. The total realised for the 74 rams was 420gs., an average of £5 19s. 2d. At the last sale 47 animals were sold at an average of £5 4s. 4d. per head.

Nottingham Races and Goose Fair.—In connection with these important events the Great Northern Railway Company are making special arrangements for the convenience of persons from London. On October 1st and 2nd special trains will leave King's Cross (Great Northern) at 10.15 a.m., and arrive at Nottingham (Victoria) at 1.0 p.m. Returning they will leave Nottingham at 4.50 p.m. for King's Cross (G.N.) at 7.39 p.m. On October 1st, 2nd, 3rd, and 4th cheap excursions will leave King's Cross (G.N.) at 8.45 a.m. for one, two, three, or four days, and on October 6th from King's Cross (G.N.) at 8.45 a.m., Finsbury Park 8.50 a.m., for one day. A special cheap half-day excursion will leave [illegible] at 1.0 p.m. on Saturday, October 6th, arriving Nottingham at 4.10 p.m., and returning same night from Nottingham at 11.5 p.m. For [illegible] the [illegible] and [illegible] fare [illegible]

SHOWS.

Wembley Park Horse Show.

It will be remembered that in June last year a most successful two-day horse show, under the management of Mr. Vero Shaw, was held at Wembley Park. This was well advertised, and brought an entry of considerably over three hundred. The second show, which was limited to one day—Wednesday last—was not made so widely known, so that an entry of over two hundred animals, the quality of which was first class, must be considered very satisfactory. The Hackney and pony classes were so good that the judges had great difficulty in making their awards, and it was late in the day before their task was completed. The hunters and jumping classes were judged by Mr. Walter Buckmaster and Mr. C. B. E. Wright, harness horses by Mr. W. Foster and Mr. W. J. Mitchell, and saddle horses by Captain Burt and Mr. Forestier Walker.

Hunters were first on the list, the novice class, in which there was an entry of a round dozen, being headed by Messrs. Mason and Brown's Kilrush, a capital stamp of weight carrier, with fair action and good middle. Harlequin, a bay gelding, owned by Mr. Arthur Balding, was second; and Messrs. J. A. Preece and Sons' Gold Edge, a useful-looking chestnut, third. Hunters in saddle up to and under 14st. proved a gift for Mr. J. H. Stokes, the well-known Midland breeder, who was first and second with a brown and a bay gelding respectively; and in another saddle class, up to 14st. and over, honours went to the same stud, the winner here, a bay gelding, afterwards gaining the sectional championship. Mr. Panmure Gordon was second, and Messrs. Mason and Brown third with Kilrush, seen out in an earlier class. There was a very fair turn out of saddle horses, Graceful, owned by Mr. F. Vivian Gooch, being rather an easy winner from Mr. E. Kirke's Ruby and Mr. J. H. Stokes's brown gelding in a novice class. In under 14 hands, the very stylish Berkeley Bobs, a beautiful mount, was the winner from Mr. G. E. Franklin's Lord Go Bang and Mr. Ernest W. Headington's Snowball, a nice grey gelding not quite so stylish in appearance as those placed above him; whilst Mr. Arthur Balding's Frivolity, a bay mare by Launcelot, was very close up in reserve position. The winning cob, Mr. A. S. Day's Sunshine, had not much to spare from Lord Go Bang, whilst in a class for saddle hacks, 15 hands and over, Ruby, second in novices, had a lot in hand from an unnamed gelding exhibited by Mr. J. H. Stokes.

As usual, the harness section proved very interesting. Mr. Franklin's Lady Go Bang, very clean in action and well driven, being winner in the novice class. Somerton, the property of Mrs. Hartley Batt, was second, and Mr. Edwin Kirke's Brandy, a stylish chestnut gelding, a capital third. In the under 13.3 class Mr. Franklin's pair, Lord and Lady Go Bang, were divided by Mr. Day's Berkeley Bob, and the only new one in the under 14.2 class was a local horse, Mr. Buchanan's Viroflay, a very nice-mannered brown gelding, not stylish enough in action. The two extremes were seen in the remaining classes, Mr. C. J. Wertheimer's Jubilee King, a grand-looking and powerful animal over 15.1 in height, and Mrs. Young's very charming pony, Pretty Good, well under 10.2, being among the winners of special prizes; while in a small single harness class, for horses 14.2 and over, in which price and action were the points judged, Princell and Governor Roosvelt, owned by Mr. Walter and Mr. Louis W. Winans, were easy winners.

There were several jumping competitions which were watched with keen interest, but the most popular feature of the day was the attempt of Mr. Walter and Mr. Louis W. Winans to beat the world and European trotting records, which they now hold. Mr. Walter Winans's Lake Erie and Princell attempted to beat the English two-mile pair-horse record of 5min. 37½sec., which they succeeded in doing by 10sec., the pair being driven by Armstrong. Mr. W. Winans, himself driving his Barney S, failed by 2sec. to beat the European mile waggon record and the European mile amateur record of 2min. 52 2-5sec., now held by his Fides Stanton. Mr. Louis Winans was not so fortunate as his brother, his horses Passing Belle and Rhoda Ferrand frequently breaking away in the attempt to beat the one-mile pair-horse English record of 2min. 35 1-5sec., which they now hold. His horse Tamerlane also failed by 4sec. to beat the English quarter mile record of 38 2-5sec., now held by Mr. Winan's Moxie.

Prize List.

HUNTERS.

Novices in saddle who have never won a first prize: 1, Messrs. Mason and Brown (Kilrush); 2, Mr. Arthur Balding (Harlequin).

In saddle up to under 14 stone: 1 and 2, Mr. J. H. Stokes.

In saddle up to 14 stone and over: 1, Mr. J. H. Stokes; 2, Mr. Panmure Gordon (Forrester).

SADDLE HORSES.

Novices, any height, which have never won a first prize: 1, Mr. F. Vivian Gooch (Graceful); 2, Mr. Edwin Kirke (Ruby); 3, Mr. J. H. Stokes.

SADDLE PONIES.

Under 14 hands: 1, Mr. Alfred S. Day (Berkeley Bobs); 2, Mr. G. E. Franklin (Lord Go Bang).

SADDLE COBS.

Under 15 hands: 1, Mr. Alfred S. Day (Sunshine); 2, Mr. George E. Franklin (Lord Go Bang); 3, Major W. Duncan (Enchantress).

SADDLE HACKS.

Fifteen hands and over: 1, Mr. Edwin Kirke (Ruby); 2, Mr. J. H. Stokes.

JUMPING CLASSES.

Novices, any height, who have never won a first prize: 1, Mr. Joseph Wheeler; 2, Mr. Wheeler (Sir Peter); 3, Mr. Charles Young (Rattler).

Under 15 hands: 1, Mr. J. Holloway (Humming Bird); 2, Dr. Wadds (Billy the Grey); 3, Mr. C. Hawkins, jun. (Flirt).

Fifteen hands and over: 1, Mr. J. Holloway (Ben Bolt); 2, Mr. Charles Young (Gamecock); 3, Mr. Joseph Wheeler.

SINGLE HARNESS.

Novices, any height, which have never won a first prize: 1, Mr. G. E. Franklin (Lady Go Bang); 2, Mr. H. F. Batt (Somerton); 3, Mr. Edwin Kirke (Brandy).

Under 13.3 hands: 1, Mr. G. E. Franklin (Lord Go Bang); 2, Mr. A. S. Day (Berkeley Bobs); 3, Mr. G. E. Franklin (Lady Go Bang).

Under 14.2 hands: 1, Mr. G. E. Franklin (Lord Go Bang); 2, Mr. A. S. Day (Sunshine); 3, Mr. G. E. Franklin (Lady Go Bang).

Under 15.1 hands: 1, Mr. G. E. Franklin (Lord Go Bang); 2, Mr. A. S. Day (Sunshine).

15.1 hands and over: 1, Mr. C. J. Wertheimer (Jubilee King); 2, Mr. Mark Pearson (Lord Lofty); 3, Mr. C. J. Wertheimer (Hopwood Squire).

Pace and action, under 14.2 hands: 1, Mr. Tom Bumstead (Benedictine); 2, Mr. Stockton (Silver Bell).

14.2 hands and over: 1, Mr. Walter Winans (Princell); 2, Mr. L. W. Winans (Governor Roosevelt); 3, Mr. Walter Winans (Barney F.); r, Mr. Will Bishop (Jack Robinson).

PAIRS OR TANDEMS.

Any height: 1, Mr. C. J. Wertheimer (Hopwood Squire and Jubilee King); 2, Mrs. Hartley F. Batt (Somerton and Winterton).

Show and Sale of Dairy Cattle at Bingley Hall.

The fourteenth exhibition and sale of Jersey and other dairy cattle took place on Thursday at Bingley Hall, Birmingham. The entries, seventy-six in number, were somewhat fewer than last year, and testified to the drain that has of late been made upon this class of stock. The quality of the animals shown, however, was fairly well maintained, and average prices were afterwards realised at the sale conducted by Mr. Lythall. A well-built silver grey cow, Speedy, bred in the Channel Islands, and the property of Mr. Edward Smith, King's Norton, was the winner of the first prize in her class, and when offered for sale was bought at the highest figure given during the sale, namely, 22gs., at which price she became the property of Mr. Turnell. She had a close competitor, however, in Mr. A. E. MacMullen's Baroness 2nd, for which Mr. G. Wright gave 20gs., a sum which was also paid by Mr. Ames for the highly-commended heifer Storm, belonging to Messrs. Fowler and De la Perrelle. The winner of the third prize was Mr. Edgar Flower's Lady Templar, whilst the reserve place was filled by Patineuse, exhibited by Mr. Edward Smith. The first and second awards for Channel Island-bred heifers were taken by Mr. E. Smith's Brownie's Dandy and Mr. A. E. McMullen's Keepsake, both of which were knocked down for 19gs. to Mr. Turner and Lord Burton respectively. Two guineas less were given for Messrs. Fowler and De la Perrelle's Coral, which had been awarded third place. The premier award for cows not bred in the Channel Islands was very deservedly secured by Mr. J. Spencer-Evan's Moriani, for which 20gs. was paid by Mr. W. C. B. Cave; whilst the reserve animal, belonging to Captain A. B. S. Frazer, changed hands at 19gs. Mr. A. E. McMullen's Privet carried off the first prize in the class for Jersey heifers not bred in the Channel Islands, and she passed to Mr. Everard for 19½gs. Dairy Wonder, a handsome animal exhibited by Mr. Edgar Flower, was given the reserve card. In the class for Kerry or Dexter heifers, the first place was secured by Framfield Dusky, belonging to Mr. Ernest P. Peyton, but another exhibit standing in this gentleman's name, although having to be content with the reserve card, was more successful when facing the buyers, Colonel Makins becoming her owner at 10gs. A silver medal offered for the best Jersey bull of any age, was won by Mr. H. S. Leon's Bletchley Starling, a yearling that bids fair to do great credit to a successful ancestry. The reservist in a class that was noteworthy for its strength was Mr. John Bamford's Oldfield Pride.

Frome.

The Frome District Agricultural Society's thirtieth annual show was held on Wednesday, and though the weather was threatening, it fortunately remained dry, and the attendance of visitors was about an average one. The show was originally established as a cheese and butter exhibition, but cattle and horses were subsequently added, and the combination has since been continued, with good results. On Wednesday, however, for the first time since the introduction of cattle in the schedule, they were unrepresented in the showyard, as the result of the Board of Agriculture restrictions checking the movement of cattle from one part of the district to another, the order following upon an outbreak of foot-and-mouth disease. An unfortunate feature in respect of this Order was that it was promulgated after the date of entry, when an increase in the cattle classes had already been secured. In other departments of the exhibition the entries were fairly maintained, although there was a falling off noticeable in the cheese tent, the figures reading 316 for 1899, against 277. Butter and horses were both above last year's returns. The cheese at Frome is a great sight, for there is no other place in the kingdom where so much excellent Cheddar can be seen got together for the purposes of exhibition. Practically side by side with this, in the adjoining Market Hall, is also held the annual great cheese fair, an account of which appears in another column. There were twenty entries secured for the cheese fair competition. This is open for the best pitch by a farmer, dairyman, or factory, the lot to be not less than a half-hundredweight for each cow in the dairy. There were five prizes in all, varying from £15 to £2, and a £5 gold medal for the first prize. The first fell to A. Osborne, of Blandford. In the working dairy within the exhibition there were two butter-making contests, the first for experienced makers, and the other for competitors who had not previously taken a first prize at Frome. In the first event the prize-takers and those winning honourable mention were all outside the neighbourhood of Frome. Speaking of the cheese within the show ground, it cannot be said that the all-round quality was up to the standard of last year. Mr. Walter W. Keel, of Stanton Drew, was successful, and on merit compared with the other entries he quite deserved the first prizes which came his way. The butter classes were conspicuous for the marked success of the Williams family, not only the whole of the prizes going to members of it in the open classes, but Mrs. T. Emery, of Elm Tree, Portbury, who has not been showing for some time, signalised her re-appearance by carrying off the champion prize. The horses generally were exceedingly good in quality, and the jumping events were very closely competed for.

Prize List.

CHEESE.

Four cheeses of not less than 70lb. each, of any system or make (open): 1 and gold medal, W. W. Osborne, Spillman's, Hilmarton; 2, T. C. Candy, Woolcombe Farm, Cattistock; 3, H. White, Allar Anstey, Puddletown; 4, H. G. Ashman, Beacon Farm, Shepton Mallet; 5, J. Day, Huxham; 6, A. Osborne, Mappowder, Blandford; 7, H. J. Weeden, Marsh Farm, Ibberton; 8, S. Burch, Styles Dairy, Mappowder, Sturminster Newton; r, H. E. Tucker, Church Farm, Steeple Ashton; vhc, S. H. Perry, Charlton Musgrove; hc, H. W. Watts, Stourton; B. J. Bush, Laverton; W. A. H. White, Beckington, and F. and M. Portch, Blackford, North Cadbury; c, J. Hoddinott, Chesterblade; T. L. Jackson, Wincanton; Mrs. M. A. Burfit, Bayford, and F. Osborne, Sandford Orcas.

Four cheeses of not less than 56lb. each (open): 1, W. W Keel, Stanton Drew; 2, F. W. J. Crocker, Batcombe, Cattistock; 3, T. C. Candy, Cattistock; 4, E. C. Sims, Mere; 5, E. T. Green, Frome; 6, E. T. Green, Steeple Ashton; r, R and C. Tucker, Steeple Ashton; vhc, H. G. Ashman, Shepton Mallet; hc, Herbert W. Watts, Stourton, and W. A. H. White.

Ten loaf cheeses of not less than 10lb. or more than 16lb. each, Cheddar make (open): 1, W. W. Keel; 2, A. E. Crocker, Oucklington; 3, T. C. Candy; r, H. White, Allar Anstey, Puddletown; vhc, H. E. Tucker.

Four cheeses, loaf excepted (subscribers only): 1, J. D. Armstrong, Frome; 2, R. Hoddinott; 3, J. C. Horsey, Bayciffe, Maiden Bradley; 4, J. Cary, Buckland Dinham; hc, J. H. Bush, Laverton.

Two cheeses, loaf excepted: 1, H. H. Pickford, Stanton St. Bernard; 2, R. and C. Tucker; hc, W. W. Keel, S. H. Perry.

Four cheeses of not less than 28lb. each, loaf excepted (county of Somerset only): 1, W. W. Keel; 2, R. Hoddinott; 3, Miss L. Butler, Evercreech; 4, E. Pearce, East Chinnock; r, J. Day; hc, J. Hoddinott and F. and M. Portch; c, S. H. Perry and W. Farthing, Tintinhull; C. Candy and I. Cox, Egford.

Four cheeses of not less than 56lb. each, of any make except Stilton (open): 1, W. H. Keel; 2, Mrs. R. Court, Kingston Deverill; 3, W. O. Long, Horningsham; r, M. Perry, Laverton; hc, E. Pearce, East Chinnock.

Two cwt. of cheese, any make or size, Stilton excepted: 1 A. White, South Petherton; 2, A. E. Crocker; hc, O. G. Apsley.

Six Caerphilly cheeses of not less than 6lb. or more than 8lb. each (open): 1, Miss A. Thomas, Pembury; 2, J. E. Hawkings, Burnham; 3, W. Board, Edingworth; r, J. D. Champion, Burnham; vhc, L. C. Tibbotts, Marksbury and E. Dibble, Brean; hc, A. J. Westover, Witham Friary.

Four cheeses of any make or size, loaf excepted (open): 1, T. C. Candy; 2, J. C. Horsey.

Two cheeses (1899) of not less than 56lb. each (open): 1, H. White; 2, J. H. Bush; 3, H. Cannon

CHEESE FAIR COMPETITION.

Lot of cheese pitched for sale by a farmer, dairyman, or factory: 1, A. Osborne; 2, W. W. Osborne; 3, W. Mackay; 4, W. A. H. White; 5, I. Cox; r, W. S. Green; hc, H. E. Tucker, B. J. Bush.

BUTTER.

Fresh butter, not less than 3lb. weight (open): 1, Mrs. J. Williams, Winford; 2, Mrs. T. Emery, Portburr; 3, M. J. Williams, Winford; r, Mrs. J. E. Shepherd, Butcombe; hc, C. Hayes, Frome.

Fresh butter, not less than 3lb. weight, in 1lb. rolls (open): 1 and c, Mrs. T. Emery; 2, Mrs. J. Williams; 3, M. J. Williams; r, R. Lawrence, Dinder; vhc, A. Gibbs, Tyntesfield; hc, Mrs. J. W. Steeds, Nunney; c, C. Hayes, Frome; Mrs. J. E. Shepherd

Fresh butter, not less than 3lb. weight, in 1lb. rolls (open): 1, R. Lawrence; 2, G. Appleby; 3, Mrs. J. T. Dibsdall; r, M. J. Williams; vhc, Mrs. J. W. Steeds and Miss G. Prideaux, Motcombe; hc, Miss Hughes D'Aeth, Wincanton; c, C. Hayes, A. Gibbs, Mrs. R. Newton, and Mrs. J. E. Shepherd.

Fresh butter, not less than 3lb. in weight, in 1lb. rolls: 1, Mrs. J. W. Steeds; 2, R. Lawrence; 3, Mrs. J. Weavre; r, Mrs. J. T. Dibsdall; hc, Miss Evans; c, B. Read and Miss H. Shepherd

Fancy butter, not less than six designs, for table use: 1, Mrs. F. C. Lexton, Bath; 2, Miss H. M. Trenchard, Axminster; vhc, Miss M. Bush; hc, Miss E. Follett, Pewsey; c, C. Hayes, and Miss Edith Fry, Chippenham

WORKING DAIRY.

Butter-making contests (open to both sexes): 1, Mrs. H. Shepherd; 2, Miss Evans; r, Miss G. Lawrence, Dinder; hc, Miss H. M. Trenchard; c, Miss K. Cosp and Miss L. Northeast.

Butter-making contests, for those who have never taken a first prize at Frome: 1, Miss M. G. Prideaux; 2, Miss E. Fry; 3, Miss E. K. Weaver; r, Miss G. Lawrence.

HORSES.

Nag mare and foal: 1, O. N. Holt-Needham, Castle Cary; 2, C. Wakely, Kilmington; 3, L. H. Taylor, Chippenham; r, H. Clark, Shepton Mallet

Nag gelding or filly, foaled in 1898: 1, L. H. Taylor; 2, O. N. Holt-Needham; r, R. Hoddinott, Gillingham; hc, T. H. Miller, Sherborne.

Nag colt or filly, foaled in 1899: 1, C. Wakely; 2, R. Hoddinott; r, F. Arnold, Road.

Two-year-old cart gelding or filly: 1, J. Webber, Puxton; 2, H. Chambers, Othery; 3, F. W. Parsons, Ilchester; r, T. H. Vallis, Maiden Bradley.

Cart mare or gelding, not over seven years old: 1, R. Pocock, North Petherton; 2, S. A. Hiscock, Motcombe; 3, C. M. Moody, Evercreech; r, J. W. Slute, Shaftesbury.

Cart mare and foal: 1, J. G. Williams, Winford; 2, J. Chick, Compton Valence; 3, C. M. Moody; r, Haydon and Paget, Kilmersdon.

Foal by Nyn Admiral or Brown Champion, the property of Major Sherston: 1, W. H. Rugg, Shepton Mallet; 2, G. S. Cox, Whatley; r, F. Rouse, Frome.

Hunter, under six years old: 1, F. H. Vinnicombe, Weymouth; 2, H. P. Woolcott, Swindon; r, J. Baldwin, Bath.

Light-weight hunter, the bona-fide property of a tenant farmer residing in either Somerset, Wilts, or Dorset: 1, H. P. Woolcott; 2, T. H. Pearce, Long Ashton; 3, E. H. Pope, Horningsham; r, Flower and Mattick, Stoke Easton.

Jumper (local): 1, J. Coles, Frome; 2, Glencross Bros., Frome; 3, A. Hill, Shepton Mallet.

Mare or gelding, exceeding 15 hands (harness): 1, Mrs. E. M. Hinde, Westbury; 2, the Right Hon. Lord Ludlow, Westbury; r, W. Hill, Shepton Mallet.

Mare or gelding, not exceeding 15.2 hands: 1, G. S. Cox; 2, Mrs. Hinde; r, F. C. Penny, Kilmersdon

Pony, not exceeding 13.2 hands, to be driven: 1, Mrs. A. M. Budd, Bradford-on-Avon; 2, J. Stone, Bath; r, R. Monk, Kingswood.

Altrincham.

Thursday's show of the Altrincham Agricultural Society, held at Devisdale, Bowdon, will undoubtedly rank as one of the best one-day agricultural fixture held this year. There was a slight fall of rain during the afternoon, and the forenoon was dull and threatening, but even these drawbacks did not deter some thousands of visitors from patronising the exhibition. The list of entries numbered 4,641, as compared with 3,520, and the prize money was also increased by something like £200, the total amount being £1,450. This is, surely, abundant evidence of the vigour and vitality of the society. Although in many of the departments of the show the quality of the exhibits would do credit to any other similar exhibition, some of the young stock showed a backward movement, and was considered by judges to be not worthy of the farmers of Cheshire. There was a good show of cattle, the open classes being well filled. Among the prominent exhibitors were Mr. G. Harrison, of Darlington; Messrs. Rawes and Sons, Newcastle, Staffordshire; Mr. S. W. Gould, of Lymm; and Mr. C. W. Kellock, of Audlam. It was noteworthy that Mr. Harrison's representatives were defeated in both the bull classes, Messrs. Rawes's Royal Seal taking the first prize in the aged bull class, and Mr. Adamson's well-known Dunottar's Style receiving the first award in the class for bulls under two years old. The prizes for Channel Islands cattle were divided between Earl Egerton of Tatton and Mrs. Cyril Greenall, of Warrington. Earl Egerton was also successful in the district competition for Jersey cattle. A feature of the local dairy classes was the success of Warburton farmers. In the department for heavy horses the entries were numerous, and the quality was excellent, being quite up to the average of previous shows. In the class for draught stallions, Mr. T. Hardy, of Mere Hall, with his Mere Duke, beat Earl Egerton's well-known Tatton Victor, which was younger by two years than the winner. Earl Egerton showed some good animals in the gelding and filly classes, and won easily among the yearlings with Lockinge Athena, a very promising youngster. The foals shown by local breeders were very good throughout, and were a feature. Competition was also very keen in the light horse section, many of the winners at north-country shows being present. The brood mare classes were particularly good. The sheep were few in number, and the awards were practically divided between Mr. O. R. Ward, of Great Warford, Mr. J. E. Ward, of Middlewich, and Mr. J. W. Kenworthy, of Kelsall. The agricultural produce made a good show, and butter and cheese were excellent. In the butter class, Lord Rosebery showed for the first time, and won the first prize, beating Earl Egerton. The judges described the butter exhibited by Lord Rosebery as a perfect quality.

The chief awards were as follows:—

Prize List.

CATTLE

Bull, over two years (open). 1, Messrs. T. Rawes and Sons, Newcastle, Staff.; 2, Mr. G. Harrison, Darlington.

Bull, under two years: 1, Mr. T. Adamson, Lostock; 2, Mr G. Harrison.

Heifer, under two years: 1, Mr. S. W. Gould, Lymm; 2, Mr. S. S. Raingill, Ringway.

Heifer, under three years: 1 and 2, Mr. C. W. Kellock, Audlem.

Cow, in milk or in calf: 1, Mr. J. Evens, Burton; 2 and 3, Mr. S. S. Raingill, Ringway

CHANNEL ISLANDS.

Bull (open): 1 and 2, Mrs. C. Greenall, Warrington.

Cow or heifer, in milk or in calf: 1 and 2, Mrs. C. Greenall, Warrington; 3, Earl Egerton of Tatton.

JERSEYS.

Cow, in milk or in calf (district competition): 1, Earl Egerton; 2, Mr. H. Fildes, Mobberley.

Heifer, over two years: 1, Mr. J. Wilkinson; Mere.

Heifer, under two years: 1, Earl Egerton; 2, Mr. N. Pennington.

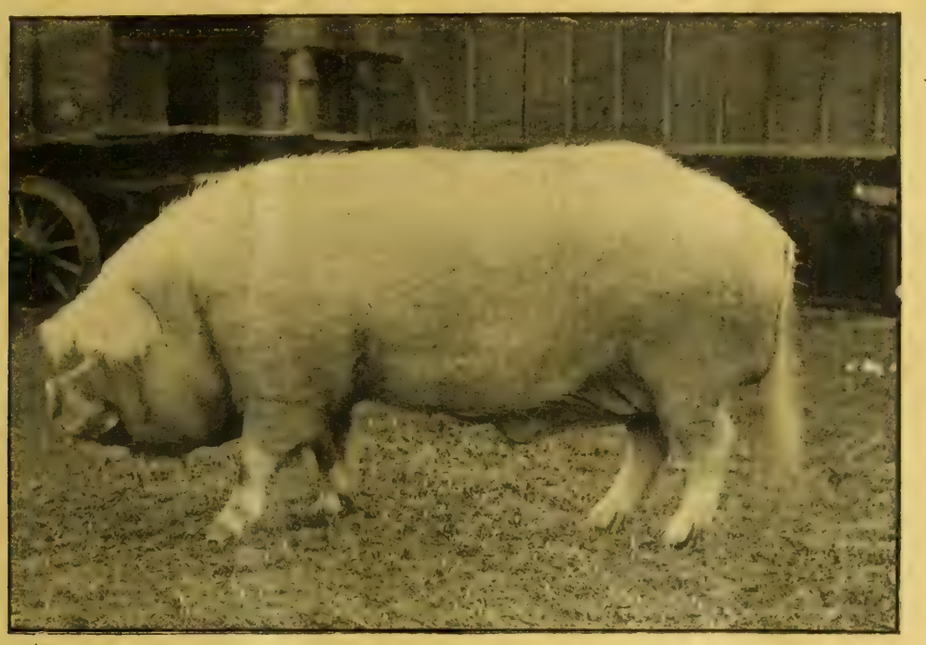
SHORTHORNS.

Bull, under two years (district competition) 1, Mr. C. Schwabe, Ashley; 2, Mr. S. S. Raingill.

Bull calf, under one year: 1, Mr. J. R. Newton, Warburton; 2, Mr. R. Clarke, Warburton

Cow or heifer, in milk or in calf: 1, Mr. S. S. Raingill; 2, Mr. J. R. Newton.

Heifer, under two years: 1, Mr. J. R. Newton; 2, Mr. S. W. Gould.



SIR GILBERT GREENALL'S LARGE WHITE BOAR, "WALTON TURK."

Heifer calf, under one year: 1, Lieut.-Colonel H. Cornwall Legh; 2, Mr. S. W. Gould.

DAIRY CATTLE.

Bull, under four years (district competition): 1 and cup, Mr. P. Mee and Co., Peover.

Bull, under two years: 1, Mr H. Bayley, Mobberley; 2, Mr. R. Clarke.

Bull calf, under one year: 1, Mr. S. W. Gould; 2, Mr. S. S. Raingill.

Pair of dairy cows, in milk or in calf: 1, Mr. R. Clarke; 2, Mr. S. S. Raingill.

Dairy cow, in milk: 1, Mr. S. S. Raingill; 2, Mr. R. Clarke.

Dairy cow, in calf: 1 and 2, Mr. S. S. Raingill.

Cottager's cow (rental not to exceed £15 per annum): 1 and 2, Mr. W. Jackson, Dunham Town.

Heifer, under three years: 1, Mr. A. Barff, Warburton; 2, Earl Egerton.

Heifer, under two years: 1, Mr. S. W. Gould; 2, Earl Egerton; 3, Mr. G. H. Newton, Carrington.

Heifer calf, under one year: 1, Mr. S. W. Gould; 2 and 3, Earl Egerton.

Cow, heifer, or bullock, showing the best symmetry, fat, and weight: 1, Mr. S. S. Raingill; 2, Earl Egerton

HEAVY HORSES.

Draught stallion under three years: 1, Mr. J. Gould; 2, Mr N. Pennington.

Pair of draught horses, mares or geldings: 1, Mr. O. R. Ward, Great Warford; 2, Mr. J. W. Kenworthy, Kelsall

Draught horse, mare or gelding: 1, Mr. A. McIntyre, Lymm; 2, Mr. S. S. Raingill.

Brood mare, with foal at foot: 1, Mr. O. R. Ward; 2, Mr. A McIntyre.

Weaning foal: 1, Mr. N. Pennington; 2, Mr. W. Blackburn, Rostherne.

One-year-old gelding or filly: 1, Earl Egerton; 2, Mr J. Gould, Lymm.

Two-year-old gelding or filly: 1, Earl Egerton; 2, Mr. J. Gould.

Three-year-old gelding or filly: 1, Earl Egerton; 2, Mr. O. R Ward.

Draught stallion, under three years: 1, Mr J. Gould, 2, Mr. N. Pennington.

Pair of draught horses, mares or geldings: 1 and 2, Mr Peter Davies, Warburton

Draught horse, mare: 1, Mr J. Gould; 2, Mr S. S. Raingill; 3, Mr. A. C. Sparkes, Altrincham.

LIGHT HORSES.

Brood mare for road purposes, with foal at foot, or shall have had one during the season of 1899 (open): 1, Mr W. Fergusson, Butley; 2, Mr. Lees Knowles; 3, Mr J. W. Hewitt, Lymm

Brood mare for road purposes, with foal at foot, or shall have had one during the season of 1900: 1 and 3, Mr. C. Schwabe; 2, Mr. C. Greenall, Broken Cross

Weaning foal for road purposes (district): 1, Mr. Lees Knowles; 2, Mr. A. L. Goodson, Knutsford; 3, Mr E. J. Sidebotham, Bowdon

Weaning foal for road purposes (district): 1 and 3, Mr. C. Schwabe; 2, Earl Egerton.

Year-old gelding or filly for field purposes (open): 1, Mr. A. Haslewood, Buxton; 2, Mr. H. Thackeray Schwabe, Macclesfield; 3, Mr. R. Prescott, Aston-by-Budworth.

Two-year-old gelding or filly for field purposes (open): 1, Mr. T. C. Fitton, Macclesfield; 2 and 3, Mr. A. Haslewood

Three-year-old gelding or filly for field purposes (open): 1, Mr. A. N. Clegg, Mobberley; 2, Mr. R. Whitehead, Buxton; 3, Mr. R. Leech, Lettwych

Thoroughbred stallion (open): 1 and 2, Mr. A. Haslewood.

Roadster stallion (open): 1 and 2, Mr. Lees Knowles

One-year-old gelding or filly for road purposes (open): 1, Mr A. C. Sparkes; 2, Mr. Lees Knowles

One-year-old gelding or filly for road purposes (district): 1, Mr. A. C. Sparkes; 2, Mr. Lees Knowles

Two-year-old gelding or filly for road purposes (open): 1, Mr. Lees Knowles; 2, Mr. J. W. Hewitt.

Two-year-old gelding or filly for road purposes (district): 1, Mr. Lees Knowles; 2, Mr J. W. Hewitt

Three-year-old gelding for filly for road purposes (open): 1, Mr. N. Read, Blackburn; 2, Mr. H. Hardy.

Three-year-old gelding or filly for road purposes (district): 1, Mr. H. Hardy; 2, Mr. Lees Knowles.

Roadster, mare or gelding (open): 1, Mr A. C. Sparkes; 2, Mr. F. Hardy.

Roadster, mare or gelding (district): 1, Mr. A. C. Sparkes; 2, Mr. F. Hardy

Cob, exceeding 13.2, but under 14.2 (open): 1, Mr R. Whitefield, Liverpool; 2, Mr. J. Wrigley, Oldham

Cob, exceeding 13.2, but under 14.2 (district): 1, Mr S. Leiward, Hale; 2, Mrs. Joule, Northenden

Pony, exceeding 12.2, but under 13.2 (open): 1, Mr J. Garnett, Liverpool; 2, Mr. A. P. Robinson, Wakefield

POLO PONIES.

Polo pony, mare, not exceeding 14.2 (open): 1, Mr. G. N. Midwood, Tabley; 2, Mr. A. B. Midwood, Knutsford.

Polo pony, entire, not exceeding 14.2: Mr. G. N. Midwood.

SHEEP.

Ram, long-wool breed (open): 1, Mr. J. E. Ward; 2, Mr. O. R. Ward

Pen of three ewes, long-wool breed: 1, Mr. J. E. Ward; 2, Mr. O. R. Ward.

Pen of three yearling ewes, long-wool breed: 1, Mr O. R. Ward; 2, Mr. J. E. Ward.

Pen of three lambs, long-wool breed: 1, Mr. J. E. Ward; 2, Mr. O. R. Ward.

Ram, short-wool breed: 1, Mr. J. W. Kenworthy; 2, Mr. T. Rigby, High Legh.

Pen of three ewes, short-wool breed: Mr. J. W. Kenworthy.

Pen of three yearling ewes, short-wool breed: Mr. J. W. Kenworthy.

Pen of three lambs, short-wool breed: 1 and special, Mr J. W. Kenworthy; 2, Mr. J. J. Brewin, Birkenhead.

PIGS

Boar, Large breed (district): Mr. H. May, Altrincham.

Sow, Large breed: Mr. A. Perkin, Lymm

Boar, Small or Middle breed: Mr. R. W. Platt, Plumbley

Sow, Small or Middle breed: Earl Egerton.

Boar, any age, Berkshire: Earl Egerton.

Sow, any age, Berkshire: Mr. G. N. Midwood.

Pair of fat pigs: Mr. H. J. Hampson

Pair of gilts, under nine months old, any distinct breed: Mr. D. Oldfield.

Fat pig for cottagers, rental not to exceed £15 per annum: Mr. D. Oldfield.

Hitchin Foal Show.

The annual foal show and sale at Hitchin was held on the 18th ult., and proved an average success. The district classes were very good indeed; yearlings, though less in number, were fair in quality. The open classes contained some good animals, and by experts the show as a whole was pronounced an excellent one. There were only fourteen foal classes, as against nineteen last year, but the number of entries exceeded those of 1899 by one. The open championship was won by Lord Rothschild, of Tring Park, with a six months roan, sired by Blythwood Spark out of Hendre Sunlight, and the same animal was chosen for the silver medal as being the best colt in the show, the reserve to this animal in each case being a five months filly by Mr. Cole Ambrose, of Ely, and Lockinge Favourite, a yearling colt exhibited by Sir J. Blyth, of Blythwood. The district championship was won by Sir J. Blundell Maple with his six months bay filly, sired by Childwick Majestic, out of Juno of Worsley 9th. Mr A. Ransom's five months chestnut colt by Tarnacre Crown Prince, out of Flower, was reserve. The silver medal for the best filly in the show went to Sir J. Blundell Maple for his yearling filly Kathleen, by Harold out of Wykeham Mabel, the reserve being Sir J. Blyth's Victorine of Wimpole.

Prize List.

SHIRES.

Shire colt (open): 1, Lord Rothschild; 2 and 3, A. Ransom; r and hc, C. Marsh, Little Offley; hc, Cole Ambrose, Stuntney Hall, Ely; A. P. McMullen, Hertingfordbury Park; c, T. Priest, Ickleford, and J. Lloyd, Astwick Manor

Shire filly (open): 1, Cole Ambrose; 2, Sir J. B. Maple, Childwick; 3, Lord Rothschild; r and hc, C. S. Marsh; hc, C. S. Marsh and Messrs. J. King and Sons, Bourn; c, C. S. Marsh

Shire colt (district): 1 and 2, A. Ransom; 3, E. S. Fordham, Ashwell; r and hc, A. Ransom; hc, A. Ransom (2), A. P. McMullen, and C. S. Marsh; c, A. Ransom and J. Lloyd.

Shire filly (district): 1, Sir J. B. Maple; 2, C. S. Marsh; 3, Messrs. J. King and Sons; r and hc, A. Ransom; hc, E. S. Fordham, and A. Ransom; c, E. S. Fordham, A. Ransom, and J. Lloyd.

Cart colt or filly, the property of [illegible] whose principal business is [illegible] likely: 1, H. F. Woollatt, Wheathampstead; 2, G. D. and W. J. Pigg; 3, A. W. Edwards; r and hc, F. Bevington; hc, J. H. Marsh; c, J. F. Hall, [illegible]

Cart filly or [illegible] the property of [illegible]

whose principal business is breeding for the purpose of a livelihood: 1, G. Muirhead, Knebworth; 2, J. King and Sons; 3, E. Abbott, Pulloxhill; r and hc, W. W. Low, Meppershall.

Foal by either of the Hitchin stud horses: 1, G. Muirhead; 2, T. Priest; 3, A. W. Edwards; 4, E. Abbott; r and hc, J. F. Hedley; hc, T. Priest.

Yearling Shire colt (district): 1, Sir J. Blyth, Blythwood (Lockinge Favourite); 2, E. S. Fordham (Ashwell V.C.); r and hc, R. Long, Upper Standon.

Yearling Shire filly (district): 1, Sir J. B. Maple (Kathleen); 2, Sir J. Blyth (Victorine of Waresley); 3, G. Street, Maulden (Maulden Lady Bedford 3rd); r and hc, G. M. Hunter, Stevenage Rose); c, J. J. Maulden, Stratton (Sunderland Duchess)

Two-year-old cart gelding (district): 1, R. Long, Upper Standon; 2, C. S. Marsh; r and hc, Sir J. Blyth (Blythwood Gilt); hc, G. M. Hunter (Prince).

HUNTERS AND HACKNEYS.

Hunter colt (district): 1, W. Mills, Cardington; 2, E. Logsdon, Hitchin; 3, H. C. Coggin, Watton-at-Stone; r and hc, T. F. Harrison, Kingswalden (Maxima).

Hunter filly foal (district): 1, R. Long; 2, M. McMullen; 3, R. Kingsley, Hitchin; r and hc, S. S. Berger, Bragbury, Knebworth (Peahen)

Hackney foal (district): 1, S. S. Berger (Fizzle); 2, G. T. Palmer, Shillington; 3, Rev. H. Izod Rogers, Cottered Rectory; r and hc, C. F. Ansell, Hitchin; c, C. Careless, Buldock; c, Rev. H. Izod Rogers.

Yearling hunter: 1, R. Long; 2, W. B. Moss, Hitchin (Lorne); r and hc, S. S. Berger (Peacock).

The Sale.

After the show the usual auction sale was held by Messrs. Sexton, Grimwade, and Beck, auctioneers. There was a fairly good attendance of buyers round the ring, and some satisfactory prices were realised, as the following list will show:—

Vendor.	Purchaser.	£	s.	d.
T. Priest	Mr. Foster	23	2	0
T. Priest	Mr. Whiteworth	21	0	0
J. Lloyd	Mr. Coleman	25	4	0
Earl Cowper	Mr. Ambrose Cole	18	18	0
J. Lloyd	Colonel Blake	26	5	0
A. Ransom	Mr. Robinson	63	0	0
A. Ransom	Mr. Rouse	21	0	0
A. Ransom	Mr. Howkins	22	1	0
T. Priest	Mr. Sherriff	15	15	0
T. Priest	Mr. Kedwin	16	16	0
A. Ransom	Mr. Cross	28	7	0
T. Priest	Mr. Purvis	22	1	0
H. J. Marsh	Mr. Sherriff	11	11	0
J. Day	Mr Purvis	28	7	0
E. Abbott	Mr. Purvis	21	0	0
W. W. Low	Mr. M'Neil	18	18	0

Northallerton.

The show of the Northallerton Agricultural Society, held on the 21st ult., was a satisfactory one in every respect. The weather, though threatening in the morning, turned out favourable to the occasion, and there was a good attendance of visitors. The entries numbered 1,317 as against 1,278 last year, the main increase being in the cattle section, which attracted 110 entries as against sixty-three. Horses, which numbered 320, were about a score fewer than last year, but this fact was speedily lost sight of in view of the capital quality of the animals shown. Agriculturists in the Northallerton district are generally breeders of capital horses for heavy work, and there were many excellent specimens of this stamp of animal exhibited. But the cattle undoubtedly provided the strongest section. One man assisted largely to bring about this distinguishing feature. Mr. George Harrison brought the best of his Gainford Hall stock, and, as usual, he carried everything before him. The classes for agricultural horses were well fil'ed, and the quality can be gauged from the fact that many animals which received honours at recent shows were now altogether out of the hunt. Mr. J. H. Snowden, of Clifton, York, was a successful exhibitor in this section, and on the whole the work of the judges was regarded as satisfactory to all concerned. There were some some good coaching horses, although competition was limited. One feature was the triumph of Mr. T. Knagg's yearling bay over Mr. E. Connell's youngster by Mischief. At the Yorkshire Show the latter was placed first, but the decision was reversed in the present instance. Roadsters and hunters both repaid attention. Mr. J. S. Darrell's West Ayton stud was again prominent, though, as on the previous day at Stokesley, Mr. George Marton's chestnut, Actor, took precedence over the three-year-old Silverdale.

Prize List.

HORSES.

AGRICULTURAL PURPOSES

Mare for breeding agricultural horses, with a foal or stinted: 1, J. H. Snowden, Clifton, York; 2, F. Pinkney, Northallerton; 3, R. P. Petch, Priestcroits, Skelton-in-Cleveland.

Colt foal, for agricultural purposes: 1, J. H. Snowden; 2, S. Barker, Osmby Wiske; 3, R. J. Dennis, Thirsk.

Filly foal: 1, Exors. R. Allison, Thornton Watlass; 2, J. Ingledew, Fencote, Bedale; 3, R. Dale, Hornby.

Yearling colt: 1, W. Loftnouse, Bishopthorpe; 2, J. Greaves, Snape Castle; 3, Capt. Duncombe, Jefferson, York.

Yearling filly: 1, T. Petch, Little Ayton; 2, G. Chapman, Hornby.

Two-year-old gelding: 1, W. Beaton, Rockbaurgh, Kirby-moorside; 2, T. O. I. Pick, Thirsk.

Two-year-old filly: 1, A. S. Benton, Cowldyke, Kirbymoorside; 2, R. and J. Davison, Lund Court, Nawton.

Three-year-old gelding: 1, R. and J. Davison; 2, G. Kendrew, Scruton; c, [illegible].

[illegible]: 1, W. Webster, Stockton-on-Forest; 2, H. Newbould, Sexton.

[illegible] mare: 1, J. Strother, Stonebyr; 2, J. H. Snowden.

Mare for breeding agricultural horses, with a foal or stinted: 1, F. Pinkney; 2, T. O. I. Pick.

COACHING.

Mare for breeding coach horses, with a foal or stinted: 1, R. Dutton, Tockwith; 2, I. Duell, Hinderwell.

Colt foal for coaching: 1, R. Dutton; 2, Mrs. Petch, Little Broughton, Northallerton.

Filly foal: J. Henrici, Northallerton.

Yearling colt: 1, T. Knaggs, Marske-by-the-Sea; 2, E. Connell, Heslington.

Yearling filly: J. Henrici.

Two-year-old gelding: 1, M. Wilson, Whitby; 2, J. Turner, Newton-le-Willows.

Two-year-old filly: 1, W. Wood, Bilsdale West; 2, G. T. Petch.

Three-year-old gelding: 1, E. Connell; 2, G. H. Chapman, Guisborough

Three-year-old filly: 1, I. Duell; 2, W. Cooper, South Otterington

Challenge bowl, with £2 added by the society, for best Cleveland mare or filly not exceeding four years, entered in Cleveland Stud Book, and exhibited in above class: 1, T. Petch; 2, W. Wood.

ROADSTERS, HACKNEYS, AND PONIES

Mare for breeding roadsters, with a foal or stinted: 1, H. Brown, Strensall; 2, J. Taylor, Stamford Bridge.

Colt foal for a roadster: 1, H. Stephenson, Snainton; 2, T. Binnington, North Dalton, Driffield.

Filly foal for a roadster: 1, C. Moore, Upper Helmsley; 2, H. Creaser, Pickering.

Yearling colt or filly for a roadster: 1, H. Creaser; 2, C. Moore.

Two-year-old gelding or filly for a roadster: 1, J. W. Kirby; 2, D. Nicholson, Hutton Cranswick.

Three-year-old gelding or filly for a roadster: 1, W. Laking, Burgate, Pickering; 2, J. Palliser, Helmsley.

Hackney mare or gelding, under six years old, to be ridden in the ring: 1, J. Taylor, Stamford Bridge; 2, J. T. Hansell, Spital Hill, Thirsk

Pony, not exceeding 14 hands, to be ridden in the ring: 1, W. Lancaster, Kilton Hall, Brotton; 2, W. Tinckler, Hilton, Yarm

HUNTERS.

Mare for breeding hunters, with a foal or stinted: 1, J. Ingledew; 2, J. S. Darrell, West Ayton.

Colt foal: 1, J. Benson and Son, Huby, Easingwold; 2, J. Ingledew.

Filly foal: 1, J. S. Darrell; 2, J. Dent.

Yearling colt: 1, E. L. Pease, Hurworth Moor; 2, J. S. Darrell.

Yearling filly: 1, G. Marton; 2, J. Pickard, Salton, Nunnington.

Two-year-old gelding: 1, A. G. Ramshay, East Appleton, Catterick; 2, T. and H. Ward, Pinchingthorpe.

Two-year-old filly: 1, T. Newton, Easington; 2, J. R. Hague, Stockton.

Three-year-old gelding: 1, G. Marton; 2, J. S. Darrell.

Three-year-old filly: 1, J. S. Darrell; 2, J. R. Raley, Clayton

Four-year-old gelding or mare, ridden in the ring: 1, F. J. and H. Grainger, Burton Agnes; 2, G. Marton; 3, T. and H. Ward.

Hunter, gelding or mare, under seven years, by a thoroughbred horse, capable of carrying 13½ stones with hounds: 1, W. Jordison, Thirsk; 2, F. J. and H. Grainger; 3 and 4, T. and H. Ward.

DRIVING CLASSES.

Geldings or mares, 14 hands and upwards, any age, in single harness: 1, M. Pearson, Harrogate; 2, R. J. Dennis, Thirsk; 3, E. G. Ayre, Northallerton.

Geldings or mares, under 14 hands, any age, in single harness: 1, D. Rodger, Darlington; 2, W. Lancaster, Brotton.

Gelding or mare, any age, in single harness, for tradesmen and tenant farmers: 1, W. Bulmer, West Rounton, Northallerton; 2, R. Wallace, Northallerton; 3, G. Kendrew, Northallerton.

Best jumper: 1 and 2, T. and H. Ward; 3, D. Smallwood, Whitby.

CATTLE.

SHORTHORNS.

Bull, above two years old: 1, G. Harrison, Darlington.

Bull, above one and under two years old: 1, G. Harrison; 2, B. J. Hodgson, Spennithorne, Leyburn.

Bull calf, under twelve months old: 1, G. Harrison.

Cow or heifer, two years old and upwards, in calf or milk: 1 and 2, G. Harrison.

Heifer, under two years old: 1, G. Harrison.

Heifer, under twelve months old: 1, G. Harrison; 2, J. Kirby, Barstow, Northallerton.

DISTRICT PRIZES.

(For animals of Shorthorn character, not eligible for Herd Book.)

Bull, having not more than two broad teeth: 1, F. Penrose, Maunby, Thirsk; 2, J. Johnson, Bank Close.

Bull calf, having no broad teeth: 1, R. P. Sowerby, Kilvington, Thirsk; 2, J. Ratson, Newby Wiske.

Cow, above three years old, in calf or milk: 1, G. Kendrew; 2, Miss Severs, Deighton.

Heifer, having not more than four broad teeth, in calf or milk: 1, Miss Severs; 2, J. Cowton.

Heifer, having not more than two broad teeth: 1, A. Gibson, Brompton Lodge; 2, J. Johnson.

Heifer, having no broad teeth: 1, F. Penrose; 2, J. Rutson Newby Wiske.

DAIRY COWS OF ANY BREED

Cow for dairy purposes, in calf or milk: 1 and 2, Mrs. Wilson and Son, Northallerton; 3, T. Bloomian, Jeckelow.

Cow for dairy purposes, the property of a cottager, being a householder, whose total rental does not exceed £30 per annum: 1, J. Wetherill, Northallerton; 2, J. Harrison, Malt Shovel House; 3, Mrs. Dickens, Romanby.

Pair of grazing bullocks, with not more than two broad teeth, owned by tenant farmers, and bred in the district: 1, Mrs. J. Pearson, North Otterington; 2, T. O. I. Pick, Newsham.

SHEEP.

LEICESTER OR LONG-WOOL.

(Open to all.)

Shearling ram: 1, W. Cleasby, Islebeck, Thirsk; 2, G. Harrison, Gainford

Pen of three gimmer shearlings: Equal 1st, G. Harrison and W. Cleasby.

DISTRICT PRIZES.

Ram, any age: 1, J. and D. Linton, Bedale; 2, W. Wood, West Harlsey.

Shearling ram: 1, J. and D. Linton; 2, R. Carter, Borrowby, Thirsk

Pen of three ewes, having suckled lambs in 1900: 1, R. Taylor, Ladybield; 2, J. and D. Linton.

Pen of three gimmer shearlings: 1, J. and D. Linton; 2, H. Blenkin.

Pen of three gimmer lambs: 1 and 2, J. and D. Linton (Open to all.)

Pen of three ewes, first cross from Black-faced Scotch ewes having suckled lambs in 1900: 1, W. Hutchinson, Ferryhill; 2, W. Chapman, Northallerton.

Pen of three gimmers, first cross from Black-faced Scotch ewes: 1, W. Hutchinson, Ferryhill; 2, E. Horseman, Richmond.

PIGS.

Boar: 1, H. Clark, Thrintoft; 2, D. Ellis, Borrowby.

Sow, large breed, in pig or milk: 1, D. Ellis; 2, Hon. T. Dundas, Aislerby Hall.

Sow, Berkshire or small breed, in pig or milk: 1, Hon. T. Dundas; 2, W. Chapman, Northallerton.

Ashbourne Shire Horse Show.

The twentieth annual show of the Ashbourne Shire Horse Society was held in the Hall grounds on Thursday in favourable weather. There was a slight decrease in the number of entries, but the quality of the exhibits was never better, especially in the young classes. A large number of well-known winning animals were present, including exhibits belonging to Mr. Muntz, Sir Blundell Maple, Bart., Mr. Victor Cavendish, and other well-known exhibitors. The Ashbourne Foal Cup was won by Mr. Victor Cavendish with a very good-looking filly. The Ashbourne Tradesmen's Challenge Cup, for mares, went to Mr. Orme's Empress, and the Ashbourne Tradesmen's Filly Cup to Mr. Tipper's Broughton Diamond, whilst the local mare cup was awarded to Mr. Lowndes's well-known Rolleston Fuschit, who later in the day was awarded the Edward Coke Memorial prize—a beautiful silver cup. Mr. Sargeant's five-month-old filly, by the well-known Colwich veteran, Harold, carried off the local foal cup, and the Wainwright Challenge Cup fell to Sir J. Blundell Maple for his Dunsmore Gloaming, who further increased her record by taking the Shire Horse Society's gold medal. The judges were Messrs. Thomas Charnock, Hale, near Liverpool; F. W. Griffin, Bord Fen, Peterborough; J. Lewis Trwst, Llewelyn, Montgomery; and H. Smith, Cropwell Butler, Nottingham.

Prize List.

Mare, foaled in or previous to 1897, with foal at foot (open): 1, Mr. P. A. Muntz, Dunsmore, Rugby; 2, Mr. Victor C. W. Cavendish, Hulker Hall; 3, Lord Rothschild, Tring Park, Herts.

Mare, foaled in or prior to 1896, with foal at foot (local): 1, Mr. Thos. Appleby, Hixon, Staffs; 2, Mr. Egerton Orme, Etwall, Derby; 3, Mr. John Orme, Sutton-on-the-Hill, Derby.

Mare, without a foal, foaled in or prior to 1896 (open): 1, Sir J. B. Maple, St. Albans; 2, Mr. Fred. Crisp, Girton Stud Farm, Cambridge; 3, Lord Rothschild.

Mare, without foal, foaled in or prior to 1896 (local): 1, Mr F. W. Lowndes, Burton-on-Trent; 2, Mr. Thos. Appleby; 3, Mr. John Blunt.

Fillies, three years old, foaled in 1897 (open): 1, Lord Rothschild; 2, Mr. J. H. Allen, Grindley Cottage, Blythe Bridge; 3, Mr. James Tipper, Church Broughton.

Fillies, three years, foaled in 1897 (local): 1, Mr. James Tipper; 2, Mr. Chas. Etches, Ashbourne; 3, Mr. John Sargeant, Leek.

Fillies, two years old, foaled in 1898 (open): 1, Mr. P. A. Muntz; 2, Sir J. B. Maple; 3, Mr. Joseph Grimes, Chesterfield.

Fillies, two years old, foaled in 1898 (local): 1, Mr. J. Grimes; 2, Mr. John Brandon, Stone, Staffs; 3, Mr. Stephen Rains, Burton-on-Trent.

Fillies, yearlings, foaled in 1899 (open): 1, Mr. Walter Done, Rugeley; 2, Sir J. B. Maple; 3, Mr. John Spalton, Mackworth, Derby.

Fillies, foaled in 1899 (local): 1, Mr. Walter Done; 2, Mr. John Spatton; 3, Mr. John Bailey, Uttoxeter.

Filly foals (local): 1, Mr. William Sargeant, Churnet Grange, Leek; 2, Mr. Thomas Appleby; 3, Mr. Chris. Gibson, Ashbourne.

Colt foals (local): 1, Mr. Samuel Walley, Stoke-on-Trent; 2, Mr. Egerton Orme; 3, Mr. James Birch, Leek.

Mr. A. C. Duncombe's prize—Foals or colts: 1, Mr R. G. Hanson, Kimberley, Notts; 2, Mr. William Sargeant; 3, Mr. S. Walley.

Colt foals (open): 1, Lord Rothschild; 2, Mr. P. A. Muntz; 3, Mr. R. G. Hanson.

Filly foals: 1, Mr. Victor C. W. Cavendish; 2, Miss Alice de Rothschild, Aylesbury; 3, Colonel Ireland, Blackburne, Hale Hall, Liverpool.

Imperial Live Stock Insurance Company—Foals: 1, Mr. William Sargeant; 2, Mr. Thomas Appleby; 3, Mr. Arthur Done.

Newark Fair.—The annual fair at Newark took place on Wednesday, and was fairly well attended. Messrs. E. Bailey and Son penned 3,200 sheep, of which they sold 3,000. The trade in rams was very poor, only one making up to 10gs. Good gimmers realised from 45s. to 55s., but a good pen sent by Mr. S. H. Barratt, of Muskham, made 77s. Lambs sold at 28s. to 34s., the highest price realised being 38s. for a pen from Mr. W. E. Denison, of Ossington. There was a good supply of beast, the prices made being about the average. In cheese the trade was fairly brisk. Gorgonzola making 8d. to 9d. per lb., Stilton 10d. to 1s. 2d., Cheddar, 8d. to 10d., Derby 8d.

Birmingham Onion Fair.—On Thursday the Birmingham streets were crowded with visitors, mostly from the surrounding country districts, to the Michaelmas Onion Fair. There was a fairly large supply of onions in the market, and they were of good quality, for the present season has been a favourable one. Although trade was good, prices were rather low. Reeve onions fetched from 5s. 6d. to 6s. per dozen; Bedfords from 3s. 6d. to 4s. per cwt.; Dutch from 2s. 9d. to 3s. 3d. per cwt.; pickling from 4s. 6d. to 6s. 6d. per cwt.; and Spanish from 6s. to 8s. 6d. per case. The horses were paraded as usual in Bristol Street, but there was a small supply, and those that were exhibited did not seem to find much favour with the purchasers. In trade was slow. There were, however, a few good, useful animals. About 188 horses were offered for sale, and 170 colts. Wagon and cart horses were sold at from £30 to £80 each. Welsh colts from £20 to £25, and English cobs from £20 to £28.

SOCIETIES.

Hunters' Improvement Society.

In the unavoidable absence of the President, Mr. J. C. Straker, the Hon. Alexander E. Parker, chairman of the Horse Show Committee, occupied the chair at a general meeting recently held in Dublin. Amongst others present were:—Lord Ashtown, Mr. W. de Salis Filgate, Mr. W. T. Trench, Sir Douglas Brooke, Bart., Major C. K. O'Hara, Captain Bernard Daly, Colonel de Robeck, Mr. W. E. Ruttledge, Mr. John Barker, Mr. Tresham Gilbey, Mr. R. Airth Richardson, etc.

Hon. Alexander Parker, in opening the meeting, stated that its object was to present a short statement of the Society's operations in Ireland during the past year, and to invite suggestions for furthering and improving this work in the future. He therefore asked the Secretary (Mr. A. B. Charlton) to read the Council's report:—

The result of the conference of last year was to specially emphasise the desirability of encouraging the owners of colts out of registered mares to keep them entire, and this by joint action with the Royal Dublin Society and the shows of the associated Irish Societies. The Council at their October meeting fully considered the views put forward, and resolved to offer the Royal Dublin Society for competition at the present show two gold medals value 10gs. each for the best three-year-old colt, and for the best two-year-old colt got by a stallion on their Register out of mares registered in the Hunter Stud Book. The Royal Dublin Society accepted one of these medals for the best two-year-old colt, as no class was provided in their schedule for three year-old colts. In addition the Council offered them a gold medal for the best hunter filly not exceeding three years old, which was also accepted.

At the last London Spring Show a class was also established for colts, three years old and upwards (H.B.) calculated to make hunter sires, each colt to show three crosses of thoroughbred blood—sire, dam's sire, and granddam's sire. This class was favourably commented upon by the judges, and it must be gratifying to you to learn that the first prize and special premium for the best colt in the class was taken by an Irishman. The entries received from Irish exhibitors were also maintained, as ten horses were entered for the show by six members hailing from Ireland.

The Irish associated shows, numbering eleven, are this year offering eight gold and fifteen silver medals of the Society, and have been increased by the adhesion of the Queen's County Agricultural Society.

Since the meeting last year the Council have taken the important step of changing the title of the Record to that of Hunter Stud Book. As you are doubtless aware, the Society has been registering since Vol. V. hunter stallions whose pedigrees or performances complied with the conditions laid down by the Council. In last volume issued (VIII.) the prospective dams of several stallions under the pedigree qualification had been received for registration, and the Council felt the time had come when the Society's book should fall into line and title with the registers of other horse-breeding associations.

The Council look with confidence to the support of their Irish members in this departure, and trust that the breeders will register up the back pedigrees of their mares to entitle their hunter colts to registration. In connection with this it is gratifying to report that the Irish section in the last volume showed an increase upon Vol. VII., and as this section contains all the winners of gold and silver medals throughout Ireland the Council venture to think that a sure foundation stock is being laid to which the breeder of hunters requiring reliable data will be able to turn with confidence.

The Council have also drafted a scheme by which they hope something may be done towards ensuring the soundness of stallions serving outside the Government's schemes, and to which they would briefly refer. It will come into operation in 1901, as you have doubtless seen from the particulars enclosed in your notice papers. Owners are invited to enter their stallions by January 1st next, after which they will be jointly inspected by two members of the Council, and, if deemed suitable, will be examined by the qualified veterinary inspector appointed by the Society, who must certify that the stallion is free from unsound wind, ringbone, unsound feet, navicular disease, spavin, and cataract. Upon passing the vet. examination the stallion will be entered and classified in a special register, which will be issued to every member of the Society, thus giving publicity to sound animals, and increasing the number of horses to which a breeder may resort who is unfavourably situated as regards one of the Government stallions. Each year the application of the certificate must be renewed, and the original certificate returned before any application for re-examination can be entertained.

The Council are fully alive to the national importance of the horse supply of the country, and have already been in correspondence with the War Office. A special committee has drafted a series of suggestions as a basis of a conference, and they hope to meet the Inspector-General of Remounts early in the autumn, when some scheme beneficial alike to the breeder and to the country should be the outcome of these deliberations.

In conclusion the Council feel sure that the Society is doing good work in Ireland as well as in England and Scotland, but they are desirous of having the opinion and suggestions of its Irish members upon matters intimately affecting themselves. They would like to see their numbers increased, and perhaps the members present will be able to assist the Council in this direction by securing the support and co-operation of their friends.

The Chairman, in commenting upon this report, thought that their Irish membership, numbering sixty members out of 1,600, should be higher in view of the money which the Society gave in Ireland, and the privileges secured to the members of the associated Irish societies, and he therefore trusted that those present would do all they could to assist the Council as suggested in the last paragraph of the Report. He must remind them that the new class at the last London Show was only tentative, as horses entered in that class were not necessarily eligible for entry to be registered in the Stud Book. They no doubt shared his satisfaction with the change in the title of the Society's publication, especially as he hoped that they would in time have a recognised breed of hunters without going outside their Stud Book. Unfortunately it would take a long time. Another important step taken by the Council was their intention to give certificates of soundness to stallions serving outside the Government schemes. They had not sufficient stallions to meet their requirements, and their members had to send their mares very long distances to the premium stallions. It was hoped by this scheme to place at the disposal of the breeder a sound stallion, probably as good as the premium stallion, so that farmers would have the benefit of breeding from a sound sire. As regards the question of remounts, he hoped the Government would do something, though they were usually slow in adopting any innovation. Personally he would like to see the Government, instead of waiting till a horse was five years old, buy it at a fair price at three years old, and do the breaking-in themselves. He invited suggestions from the members present.

Mr. Trench desired to thank the Hunters' Improvement Society for the interest which they showed in promoting the horse-breeding industry in Ireland, especially as a supply of Irish horses was of such vast importance to the Empire; the more the Irish horse-breeding industry was upheld, the better it was for the country at large. The supply of suitable stallions to mate with their light mares was an all important matter. They could not put them to thoroughbred horses without increasing the number of the already numerous unsaleable light horses. With some people the thoroughbred was a fetish. They in Ireland wanted an animal with blood, but they wanted the substance too, and he was sure that if a proper stamp of hunter sire was forthcoming, it would have the effect of increasing and improving not only the thoroughbred horse, but also of producing the 14st. galloping hunter. There was a consensus of opinion in the country as to the necessity of some action in this matter, and the crux of this question was how to keep the colts entire. They must catch the colt when a year old and uncut; as a two-year-old it would be too late. He would like to suggest that a joint committee be appointed by the Council to consider this matter, with special reference to the requirements of Ireland. A conference between three representatives of the Irish members of the Hunters' Improvement Society and three members of the Council was desirable.

Mr. Trench then moved the adoption of the report, stating that the work done by the Hunters' Improvement Society in Ireland deserved their fullest praise.

Lord Ashtown seconded the report.

Sir Douglas Brooke said that he was personally in favour of the proposed hunter sire, as he thought it would be the means of bringing them back to where they were once before—the champion hunter-breeding country of the world.

Captain Daly was of opinion that the Government should deal direct with the farmer, as at present the dealers were alone benefited. They bought up misfits at £18 and sold them to the Government for £34. The Government should, therefore, deal direct with the farmer and start stud farms. In his opinion there were plenty of good stallions in the country.

Mr. Ruttledge said that Mr. Trench had alluded to one side of the question, while Captain Daly had touched upon another side. The former dealt with the article to be produced and the latter with the disposal of the article when produced, but Captain Daly's experience as to there being a good supply of stallions did not apply to his part of the country. Fillies by registered Irish stallions put in their turn to other registered stallions produced animals so light that it was impossible to sell them, and the farmers were getting tired of it. He would like to see the various counties encouraged to send up to the Dublin Show their young entire colts and a selection of the prize-winners purchased and sent for service into the local districts. As regards remount, why did not the Government utilise some of the waste barracks which were now empty, and which could be used for breaking in the young horses suitable for military purposes?

Major C. K. O'Hara did not agree with the previous speakers. He was a believer in strong thoroughbreds with bone and substance, and they could be got if owners would give a proper price for them.

The Chairman said that the desirability of breeding 14st. blood hunters was an engrossing question on both sides of the Channel. There was only one opinion as to its desirability, but the point was how to do it. It was impossible to hope to do it in a short time, and it would probably take years. As regards the selection of a suitable sire there seemed to be no golden rule. He knew of a small thoroughbred horse of 15 hands which had got many good hunters up to from 14st. to 15st. He thought that the conditions obtaining in Ireland were somewhat different to England. Very many of the Irish half-bred mares were to a great extent free from cart horse blood, and a hunter sire (not thoroughbred) might possibly, in such cases, prove beneficial, but in England many of the mares were not so well bred, and he considered that for such mares the thoroughbred was a necessity. He could assure the members present that their remarks would have the fullest consideration of the Council.

A cordial vote of thanks to the chairman closed the proceedings.

Darlington Farmers' Protection Association.

A meeting of the members of the South Durham and North Yorkshire Farmers' Protection Association was held at Darlington on the 12th ult. Mr. G. Smurthwaite presiding. The sale of corn, a subject which has been previously before the Association, was again discussed, and to protect the interests of farmers it was suggested that two samples of barley or other grain intended for sale should be taken, one to be handed to the purchaser in Darlington market, and the other to gentlemen appointed by the Association.

The regulations with regard to the movements of pigs were considered, and, on the proposition of Mr. J. P. Clark, seconded by Mr. T. Fenwick, it was decided that the Durham County Council be petitioned to allow pigs intended for immediate slaughter to pass from Durham into Yorkshire.

Mr. Kent, the hon. secretary, stated that arrangements were being made to visit the experimental farm of the East and West Ridings of Yorkshire at Garforth, and the 2nd of October was mentioned for the purpose.

New Agricultural Patents.

Specially compiled for The Mark Lane Express by Mr. C. D. Howard Hughes, Solicitor and C.E., Patent Agent, 56, Chancery Lane, London, W.C., of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

16042. William Benjamin Gray, Belfast, for an invention of "Improvements in machines for treating fibrous plants."

16076. Robert Edward Gardiner, London, for an invention of "Improvements in scissors, shears, and the like."

16099. John McDonald, Glasgow, for an invention of "A new or improved device for use when planting cabbages."

16101. Frederick Moore, Birmingham, for an invention of "Improvements in or relating to fruit gatherers."

16103.—John Shutt, Manchester, for an invention of "A double cut garden hedge or shrub trimmer."

16326. Gedeon von Rohonczy, Manchester, for an invention of "Frame for the transport of fruit."

16442. Franz Kmietowicz, Berlin, Germany, for an invention of "Garden shears."

16447. Edward William Parish and Jeffery William Eady, London, for an invention of "Improvements relating to apparatus for steaming chaff hay and other vegetable products."

Mr Herbert Close, a confidential clerk of Messrs. Marr and Loveridge, well known corn merchants, in High Street, Hull, has been arrested on a charge of alleged serious defalcations, said to total between £4,000 and £5,000. Mr. Close, who is well connected, had been in the firm's employ for nearly twenty years, and the defalcations are said to extend over a lengthy period. He was brought up at the City Police Court, and remanded on a charge of stealing £100 on August 20th last.

Three Boys Cause the Destruction of a Village

The village of Warboys, Hunts, was devastated by fire on Wednesday. It was caused by three boys playing with matches in a stackyard. The dry straw was quickly in a blaze, the stacks of new wheat and straw, the farmhouse, and the buildings soon became involved, and, fanned by a strong breeze, the conflagration spread to two other farmsteads. The horses on each farm were saved, but the young cattle and pigs and hundreds of poultry perished. The sparks ignited the thatch of some cottages in the High Street, and a whole row of them were burned down, the fire spreading to another row on the opposite side of the street. The firemen and police were quite unable to cope with the flames, and all the panic-stricken villagers could do was to secure what furniture they could. A brewery and cycle store were also burnt out, and great consternation was caused by the explosion of a large quantity of gunpowder in the store, several of the firemen being blown off their feet and having narrow escapes. The damage amounts to some thousands of pounds.

Spalding Cattle and Horse Fairs.—The September Cattle Fair took place at Spalding on Tuesday, when there was a very large show of both beasts and sheep. The best fed bullocks realised £24 apiece, or 8s. per stone. The pick of the grazing bullocks made £19 a head; two-year-old beasts, £12 to £14; a year and a half old, £8 to £10; and young beasts, £6 to £8. Trade was slow, and some lots were unsold. There was a good demand for milk cows, which ranged up to £21; whilst heifers commanded £18 to £20. Over a thousand sheep were penned, and trade was slow at 2s. a head lower on the week. The best fat Lincolns made 54s. apiece, and best Leicesters 50s. For store sheep there was only a poor trade, the price of gimmers being 44s. each. The horse and foal fair was also held, and was largely attended. There was a big show of horses, especially of mares and foals. Trade was brisk, prices having risen. Foals sold at £15 to £30; two-year-olds from £25 to £40; and aged agricultural horses realised £20 to £40 each. There was only a limited supply of nag horses, but the best sold readily at good prices.

LITERARY NOTICES.

The Lawes Agricultural Trust Committee have lately issued a memoranda of the origin, plan, and results of the field and other experiments conducted on the farm and in the laboratory of the late Sir John Bennet Lawes, Bart., at Rothamsted, Herts. This memoranda is written by Sir J. Henry Gilbert, F.R.S., who since 1843 has been associated with Sir John Lawes in the conduct of the experiments, and has had the direction of the laboratory. Accompanying it is a booklet containing plans and summary tables of the experiments, arranged for reference in the fields.

We have just received a copy of the prospectus of the Agricultural Department of the Durham College of Science for 1900-1901. The department provides courses of instruction suitable for all classes of students, at a moderate cost. The recent successes of its students have been very gratifying. At the last three public examinations of the Royal Agricultural Society of England, the first place and gold medal has been gained twice, and the second place once, by candidates from the Durham College of Science, and at last year's examinations of the Science and Art Department in Agriculture one student gained a bronze medal and first place, and another third place, in the honours list. The old students who have taken up teaching as a profession have been successful in obtaining work, five being now lecturers in agricultural colleges, and five science masters in secondary schools. The prospects of young men who combine a first-class university training and qualifications with a good practical knowledge of agriculture are considered at present to be very favourable.

In July last Professor Wallace read before the Cheshire Chamber of Agriculture an interesting paper on "Agricultural Education in Cheshire," and this has now been published in pamphlet form.

"Animal Painters of England," an important work by Sir Walter Gilbey, Bart., will be issued by Messrs. Vinton and Co., Ltd., early in October. The two handsome quarto volumes contain a brief history of the lives and works of fifty artists, from the year 1650, and the illustrations comprise fifty-eight specimens of their works and portraits. The same firm have in the press for early publication two other books by Sir Walter Gilbey: "Ponies Past and Present" and "Horses Past and Present," which will be ready about the same time. Messrs. Vinton and Co. will also issue a handsome work by William Royle, entitled "Dalmatia Illustrata," which contains thirty plates from original drawings by the author. "Baily's Hunting Directory" will, as usual, make its appearance early in November, and a sumptuous album bound in full morocco, "British Horses Illustrated," is now ready.

The New South Wales Sheepbreeders' Year-Book for 1900 has come to hand during the past week. A great part of it is taken up with an account of the Society's sixth annual show, a report of the annual meeting, and also of the Sydney stud sheep sales, but there are several interesting articles dealing with sheep which should prove of great service to breeders "down under." It is satisfactory to find that the Association, which is doing a large amount of useful work, although in debt in 1897 and 1898, has now the fine balance in hand of £650.

There has just come to hand a copy of the September number of the Journal of the Jamaica Agricultural Society. Among the many articles it contains are "Horses and Horse-Breeding in Jamaica," "The Modern Garden and Modern Gardening Tools," "About Queen Bees," "The Manufacture of Cocoa," etc.

The autumn number of "Bibby's Quarterly" is one of the biggest and the best that has appeared so far. The cover is beautifully printed in colours, the front leaf containing an excellent photograph of H.R.H. the Prince of Wales, whilst on the back is a coloured reproduction of a painting by Percy Bigland, entitled "Place à l'Enfant." Eight extra pages have been added to this number, the reading matter, as usual, being of a serviceable and interesting nature to those for whom it was written, whilst the illustrations are of the highest class. This is the last number, it is stated, that will be published at threepence, the Christmas issue appearing as a sixpenny magazine, at which price it will be good value for money if conducted on the same lines as now.

Messrs. Webb and Sons, Wordsley, Stourbridge, have now issued a catalogue of seed corn for the season 1900-1901. The new and improved varieties of cereals supplied by Messrs. Webb are well known, and in the publication named, which, like all the others sent out from Wordsley, is a most artistic one, ample proof of the general excellence of these cereals is given.

The eminent entomologist, Miss Eleanor A. Ormerod, LL.D., etc., has now published a work entitled "Flies Injurious to Stock," in which is given the life histories and the means of prevention of a few kinds of flies commonly injurious, whilst there are special observations on the ox warble or bot fly. Miss Ormerod states that, as the infestations referred to are for the most part very noticeable, both from their size and from the effects of their attacks, specimens have not infrequently been sent to her for many years back, together with inquiries and observations, sometimes embodying notes of such serviceable interest that it has seemed desirable to collect the observations (which are not very accessible as scattered notes in the original reports), and to use them to complete the histories of the pests for practical service, together with additions of some observations from published works of various leading Continental writers on cattle fly infestations, which give points that have not hitherto been studied in this country. It will thus be seen that this publication cannot fail to be of great value to stock breeders, and, as it is published at the low price of sixpence, it is within the reach of all. The publishers are Messrs. Simpkin, Marshall, Hamilton, Kent, and Co., Letd., Stationers' Hall Court, E.C.

We are in receipt of two catalogues from Messrs. Vilmorin, Andrieux et Cie, 4, Quai de la Mégisserie, Paris, one dealing with seeds for autumn sowing, and the other with bulbs and strawberry plants.

We have received a copy of a catalogue of bulbous roots for 1900 from Mr. W. Watt, of Cupar, Fife, and Perth. It is a rather small one, but is sufficiently extensive enough to allow of a good collection of roots at a moderate price being selected from it.

We have received from Mr. J. W. Beckwith, horticultural sundries merchant, 65, Columbia Road, Shoreditch, London, E., a copy of a price list (wholesale and export only) for 1900-1901. In order to avoid confusion with other firms of the same family name with whom he has no connection, Mr. Beckwith intends trading under the style of Holland Beckwith and Co.

Mr. John K. King, of Coggeshall, Essex, and Reading, Berks, has just issued his new catalogue of pedigree seed corn. It is a pamphlet which should be in the hands of every wheat grower. The value of sowing pedigree seed corn is now generally recognised, and Mr. John K. King emphasises the fact in a short article at the commencement of the catalogue. There are some splendid illustrations of Mr. King's well-known varieties, and special attention is called to two new kinds, "The Rent-payer" and "Imperator." The catalogue may be had post free.

The 1900 catalogue of Dutch flower roots issued by Messrs. Ben Reid and Co., Ltd., the well-known seedsmen, of Aberdeen, contains particulars of bulbs and collections of flowers which will suit the taste and also the pocket of all classes of gardeners.

Cattle and Pigs Burnt to Death at a Farm Fire.—A disastrous fire occurred at Grimston Hall Farm, Trimley, on Monday. Grimston Hall, an historic place, was at one time the home of the Cavendish family, and the present tenant, Mr. John Last, possesses relics of the past in the shape of oak chests, which indicate by inscriptions, dating back to the fifteenth century, that an historic interest attaches to Grimston Hall. Fortunately the wind was blowing in such a direction as to carry the flames, sparks, and burning débris away from the house. The outbreak occurred about noon in a substantial brick-built barn, with thatched roof, in which threshing operations were proceeding, and it is generally surmised that the fire, which was first noticed on the roof of the barn, was caused by a spark from the engine, standing just outside. The intervening space between this barn and another large one, containing many quarters of barley and wheat chaff, was covered with cattle sheds, containing a number of pigs and two sows, and cart lodges. These, together with the live stock, which it was impossible to liberate, were destroyed. Mr. Last, who was in the barn when threshing was in progress, says that after the fire was first noticed it spread, by the aid of a strong southerly wind, with such amazing rapidity that before they had any opportunity of attempting to limit the fire to the barn, his farmyard appeared all ablaze. Realising that those premises, which were ultimately razed to the ground, were doomed, attention was directed towards preventing the fire spreading to the numerous stacks of wheat, barley, oats, beans, and hay, which formed the bulk of this year's crops. A peastack adjacent to the cattle sheds was destroyed, and being in close proximity to a wheat-stack, containing the produce of some twenty acres, the latter was only saved by the application of wet blankets and a copious supply of water. The engine used in threshing was moved to a safe distance, but the dressing machine, which, together with the engine, was the property of Mr. W. Everett, was destroyed. The total damage is put at £3,000, and, although Mr. Last's loss is covered by insurance, he will nevertheless be a sufferer, as he is now without premises in which to prepare his wheat and barley for immediate sale upon the market.

THE GARDEN.

The autumnal equinox is now past, and the evenings are "drawing in" rapidly—too fast, indeed, for they herald the approach of chill autumn and dreary winter. The country side, however, shows very few signs of the near approach of the "fall" (the "back-end" they call it about here, which amuses the writer vastly), the foliage on most of the trees being still fresh and bright, the grass green, and even the bracken on the mountain sides has scarcely yet begun to don its autumn suit of russet. This is a result, of course, of the comparatively cool summer (we have had none of the intense heat complained of in other parts here) and the frequent showers.

It is some years since we experienced such a "growing" season, on the whole, as this has been, and as a consequence vegetables of nearly all kinds are unusually abundant. In some of the large markets there is quite a glut of such things as scarlet runners and vegetable marrows, and even here we have so many we do not know what to do with them. So, as we can neither sell nor use the half, we are having a quantity put down with salt in deep jars, in the manner I have frequently described in this column. French beans, if young and tender, also make excellent pickles, as also do the small, green tomatoes, of which plenty are to be found about now, both indoors and outside. Any spare cauliflowers, small cucumbers, etc., may also be profitably employed in the same way.

Tomatoes growing in the open air had better be watched carefully now, as a sudden night's frost will destroy the lot, fruit and all. Any that are showing the first signs of colouring had better be gathered and taken indoors to "finish" daily—they will ripen and colour all right in any warm but not necessarily light place—a greenhouse shelf, or even one in the kitchen, will do nicely. An admirable plan, which I have tested myself before now, is to grow a good batch of tomatoes in the open in large pots, plunging these in the ground to save watering, etc. Never mind if they root through a bit; they will be all the better for it, and with a little care and feeding any good, dwarf kind will set and carry a heavy crop—weather permitting. In the autumn, when the first frosts may be expected, lift the lot, and remove them to a moderately warm house, giving plenty of water for a time, and they will ripen off almost every fruit.

Continue planting out the young cabbage plants, and finish hoeing and thinning out turnips, spinach, etc. Brussels sprouts, broccoli, and other winter greens had better be moulded up moderately—this supports them to a great extent, and also protects them at a rather vulnerable point.

By the way, I see that that fine old potato, Beauty of Hebron, which I have so frequently "cracked" up in this and other magazines, has quite recently been given an award of merit by the authorities at Chiswick. There is a bit of a fuss about this in horticultural circles, as the variety is by no means a new one, having been introduced (from the U.S.) sixteen or more years ago, and though sent for trial, has never been favourably reported on or awarded any recognition before. Now they find it such a heavy cropper, so sound, and good in every way, as well of such excellent flavour, that it could not escape receiving one of the only four awards given to these out of a considerable number of kinds. The white form, however, is considered synonymous with both Duke of Albany and Puritan, but with this I cannot quite agree, at least, as I have grown them myself.

In spite of the heavy storms in August, the fruit crop has proved to be a really enormous one, especially as regards apples and plums, while pears also appear to be very plentiful and cheap, English "Williams" only realising about three shillings per bushel in London this week. Good apples are to be had at one shilling per bushel, or less, only a few of the finer, showy kinds, such as Worcester, Pearmain, Yellow Ingestre, etc., realising anything like a fair price. In some parts the apples are lying about under the trees by tons, not being worth even the picking up. Plums, too, are quite a drug, greengages selling retail in Worcestershire at a halfpenny per lb., and egg plums and Victorias going at any price—almost unsaleable.

If not already done, all the young lateral growths on (vertical) cordon trees (apple and pear) should be cut back to within one or two eyes of their bases, so as to form spurs.

All plants of at all a tender nature that it is desired to preserve had better be carefully lifted, potted, and housed now, affording them pots just large enough to hold the roots comfortably, with a little fresh soil round them. The requisite number of geranium cuttings should have been taken and inserted before this, but a good proportion may still be rooted, if necessary, in boxes placed on a shelf in a sunny greenhouse. Failing sufficient cuttings, the old stumps are often useful, and if lifted now and placed in as small pots as the roots will go into, they will afford a lot of useful cuttings in the spring.

Chrysanthemums in pots should be housed directly the colour of the flowers appears, and, indeed, in cold or windy districts they had better be all got under cover at once.

FOREIGN AND COLONIAL.

Natural History of Queensland.

As in other parts of Australia the marsupials (animals which carry their young in a pouch) abound throughout Queensland. Kangaroos and wallabies are the most common form of the larger marsupials. The platypus is one of the most interesting of all animals, owing to its possessing physical resemblance to many other creatures. It has fur like a seal and the bill of a duck; it lays eggs and yet it suckles its young. Another curious form of animal life found in the colony is the dugong, or sea cow, which grows to ten feet in length, living under the water in the bays upon sea grasses. The flesh when cured is very palatable. There are no noxious animals in Queensland, and the snakes of the colony are of a retiring disposition. The salt-water and river fish are very numerous, and three hundred known species are suitable for food. The giant groper, weighing a quarter of a ton, the schnapper, barramundi, gar-fish, are amongst the best known and liked. One Queensland fish, the Ceratodus, is something of an amphibian, for it is enabled, by having a lung capable of breathing atmospheric air, to take its walks abroad when it wants a change. Queensland is rich in insect life; one soon gets accustomed to the mosquito, and the ants perform excellent service as scavengers.

In bird life Queensland is well off; the cassowary and emu are still roaming through the ranges of the north; the parrot and cockatoo scream in the trees, and the laughing jackass, the friend of man, selects a convenient roof wherefrom to make his curious song. Queensland has birds which construct bowers to play in, and birds which build mounds in which to bury their eggs for the heat to hatch. The lagoons furnish good sport.

The trees and plants of Queensland are so numerous and so valuable for commercial and social purposes that the services of a gentleman have to be retained as a "Colonial Botanist," to classify the different kinds. First and foremost come the rich natural pastures of the colony, which have great fattening properties and astonishing vitality in resisting dry weather. A few showers of rain will convert a burnt-up plain to a prairie smiling with verdure.

The gum-tree is found all over Queensland, and its wood is used for many purposes. Plenty of timber for building and fencing purposes is available throughout the colony, and some of the most valuable sorts are exported to other countries. The wild flowers of Queensland very different to the prim blossom of an English hedgerow or meadow—are beautiful indeed. The lagoons are covered with immense lilies; the downs are in good seasons ablaze with many-hued flowers, and in the north, flower forms of curious shape and sparkling hue are met with. One of the commonest plants in the bush, the wattle (an acacia), has a delicate blossom, the perfume from which pervades whole districts. People who have lived in the bush and breathed the wattle scented air can never forget the perfume. Grape vines grow well in the colony, and in many districts are cultivated systematically to produce wine.

NEWS NOTES.

Milk Prosecutions.—The St. Ann's Farm Dairy Company, Limited, 62, Fenchurch Street, were on Tuesday, at the Thames Police Court, fined £4 for having sold milk adulterated with 12 per cent. of water. On the same day, at Bow Street, the Wilts United Dairy Company were fined £5 and ordered to pay two guineas costs for having sold milk from which 26 per cent. of fat had been abstracted. For the defendants it was stated that they had purchased the milk under a warranty, and had every reason to believe that it was pure and unadulterated. The magistrate, however, held that the fact of the churns being labelled "pure milk" was not sufficient warranty, the full warranty for the whole consignment having been lost, and he offered to state a case if the defendants desired it.

Obtaining Barley by False Pretences.—Before the Stradbroke Bench, on the 20th ult., Benjamin Cooper, of East Ham, was charged by Ernest Harry Reynolds, farmer, Hoxne, with obtaining five coombs of barley and five sacks by false pretences. The prosecutor deposed that early in the year he advertised some seed barley for sale, and received an application from Thomas Cooper, of East Ham, asking for samples, which were sent; the price was 15s. per coomb. An order for five coombs was received, and the barley was forwarded on the 24th February by the Great Eastern Railway, but no reply was received to several letters, none of which had been returned, until one was sent threatening to put the matter into other hands, if it was not attended to in a few days. This was returned, whereupon Superintendent Page was consulted. A railway carman deposed to delivering the barley at 14, Priory Road, East Ham, a private house, on the 26th February; he took Mrs. Barrett's receipt on the delivery sheet. Detective-Sergt. eLwis Liddle [illegible] the defendant on the 6th September. He said, "That's all right; I had the barley, and if they had been any according to sample I might have paid for them." He said he did not want the warrant read over to him. He was conveyed to Forest Gate Police Station, where he was detained, and subsequently handed over to Sergt. Page. In answer to the clerk, the witness said he had known the defendant for twenty or thirty years; he did not carry on any business excepting such as he was now charged with. For years he had obtained all kinds of goods by false pretences from all parts of the country under the names of Baker, Ward, Cooper, etc. Witness had several times cautioned him. Defendant pleaded guilty, and, wishing to be dealt with summarily, was sentenced to six months with hard labour.

Sale of Live and Dead Farming Stock.—Mr. J. Darton, of Hackwood Farm, Basingstoke, is going to bad health, retiring from farming and on Tuesday his live and dead stock was sold by auction, the sale attracting a very large company. The catalogue comprised about 400 lots, and with numerous buyers bent upon business, the whole was sold in great time. The dead stock, which was in good condition, was quickly disposed of at highly satisfactory prices. Amongst the principal items were: A set of four-horse harness, 10½gs.; self-binder, 20gs.; elevator and gear, £20; corn drill, £16 10s.; double thill waggans, £23, £24, and £30; Scotch carts, £13; spring carts, £16. For the thirteen ricks of hay there was a good competition, every rick being cleared. Then came the special attraction of the sale in twenty-eight cart horses, Shire mares and colts, which met a keen competition, the prices realised being: For cart horses, 75gs., 74gs., 62gs., 60gs., 58gs., 54gs., 46gs. (twice), 39gs., and 37gs.; Shire mares, selling at 60gs., 50gs. (twice); three-year-old colts, 46gs., 39gs.; two-year-old colts, 31gs. down to 28gs.; yearling colts, 33gs., 26gs.; sucking colt, 20gs.; and a seven-year bay colt realised 44gs. The registered Hampshire Down flock of ewes and ewe lambs were submitted to auction stock condition, the following prices being realised: 12 2-tooth ewes, 57s., 56s., 54s., 53s., 51s.; 110 4-tooth ewes, 58s., 57s., 55s., and 53s.; 100 6-tooth ewes, 55s., 54s., 52s., 51s.; 65 draft ewes, 45s. to 43s.; 140 ewe lambs, 47s., 45s., 43s., 40s., etc.; seven shearling rams and ram lambs, 61s., 58s., 56s. The horned cattle met a brisk inquiry, selling at £22 10s. down to £17 per head. The Berkshire sows and pigs sold at from £7 5s. to £9 5s. a lot. The sale concluded with the surplus furniture, for which there was much competition.

A STRAW BLOCKER AND

DR TIBBLES' Vi-Cocoa

"HIS MATES NOW USE VI-COCOA."

Mr. M. A. PEARCE, care of Mrs. Sygrove, Wheathampstead Road, Harpenden:

"I feel I must let you know that I have been taking Dr. Tibbles' Vi-Cocoa with excellent results

"I am a straw blocker at St. Albans, working in a very hot place, and used to be very easily knocked up. I used to drink a lot of beer while at work, but that did me no good. About two months ago I tried Vi-Cocoa, and after a week found I could work much better and longer, and I have used it ever since. I have also persuaded some of my mates to try it, and I think they are of the same opinion as myself. I feel a different man from what I used to when I have finished work.

"You can use this if you wish."

THE LEADING BRITISH AUTHORITY ON THE PRACTICE AND SCIENCE OF THE

Farm, Live Stock, Dairy, Milling, Malting, Hops, &c.

(REGISTERED AS A NEWSPAPER AT THE GENERAL POST OFFICE.)

VOL. LXXXIII. No. 3602. LONDON, MONDAY, OCTOBER 8, 1900. THIRTY-TWO PAGES PRICE—3D.

SOCIETIES.

THE NATIONAL ASSOCIATION of ENGLISH HOP GROWERS.
(Founded June, 1894.)

PRESIDENT.—COLONEL BROOKFIELD, M.P.

HON. TREASURER.—E. ALBERT WHITE, ESQ., Beltring, Kent.

SECRETARY.—THOMAS IRONMONGER.

CENTRAL OFFICE.—61, HOP EXCHANGE, BOROUGH, LONDON.

GENERAL OBJECTS.

To promote united action among English hop growers as a body for the improvement of the industry.

To promote, support, or oppose such legislative and other measures as may affect the industry.

To collect and publish, for the benefit of members, special statistical and other useful information relating to English and foreign hop culture.

To arrange for arbitrations in cases of dispute between sellers and buyers of hops, for the avoidance of litigation.

ANNUAL SUBSCRIPTIONS.

Ordinary members, 3d. per acre of hops under cultivation; honorary members, £1 1s.; hop factors, £1 1s.

CENTRAL AND ASSOCIATED CHAMBERS OF AGRICULTURE.

NOTICE OF MEETING.

A MEETING of the COUNCIL of the CENTRAL AND ASSOCIATED CHAMBERS OF AGRICULTURE will be held (by permission of the Society of Arts) at the House of the Society of Arts, John Street, Adelphi, on Tuesday, November 6, 1900, at 11 o'clock in the forenoon.

Members of Council representing either the Central Chamber or Associated Chambers are requested to attend.

Subscribing Members of the Central Chamber are invited to be present, and may speak by permission of the Chairman, but are not entitled to move resolutions or to vote.

AGENDA.

To transact General Business.
To receive Communications.
To consider Alterations in the Laws and Bye-Laws proposed by the Business Committee.
To receive Reports of Committees (if any).
To receive "Statement of Legislation required in the Agricultural Interest," prepared by the Business and Parliamentary Committees in pursuance of Council's resolution of May 29th last.
To consider the following subjects:—
(1) The Report of the Royal Commission on Local Taxation (if issued).
(2) Agricultural Insurance.

Associated Chambers and Clubs are requested to consider the above subjects, and to send up any resolutions which they may pass thereupon to the Secretary of the Central Chamber before the Meeting of the Business Committee, at 8 p.m. on Monday, November 5th, 1900. Suggestions of subjects for discussion at future Meetings of the Council should be forwarded at the same time.

ERNEST H. GODFREY, Secretary.

SMITHFIELD CLUB FAT STOCK SHOW, DECEMBER 10 to 14, 1900, at the ROYAL AGRICULTURAL HALL, ISLINGTON.

Entries close as follows:—Live Stock (Cattle, Sheep, Pigs, and Carcase Competition), Nov. 1; Post Entries, Nov. 5. The entries for Implements have already closed on Oct. 5.

Prize Lists, Entry Forms, and other information can be obtained on application to E. J. POWELL, Sec., 12, Hanover-square, London, W.

SOCIETIES. (*continued.*)

DAIRY SHOW.

AGRICULTURAL HALL, LONDON,

AGRICULTURAL EDUCATION.

UNIVERSITY COLLEGE OF NORTH WALES, BANGOR.
A constituent College of the University of Wales
AGRICULTURAL DEPARTMENT. IN-COLLEGE COURSES. 1. A complete course in theoretical and practical Agriculture extending over two years, and suitable for farmers and land agents. 2. Advanced course for a third year in Agricultural Chemistry. 3. Short course of eleven weeks, commencing in October and consisting of Agriculture, Chemistry, Book-keeping, and Land Surveying. The degree of B.Sc. in Agriculture of the University of Wales may be taken by students who pursue a three years' post matriculation course of study at the College. LLEDWIGAN FARM (360 acres) has been taken by the College for teaching and experimental purposes. Diploma (two years) and Degree (three years) students will in future follow courses for at least one year at the farm under the supervision of the Professor of Agriculture. Special arrangements will be made to take farm pupils for practical instruction only. The College is recognised by the Surveyors' Institution as a place of approved professional instruction for land agents. The cost of board and lodging, with tuition fees, varies from £30 to £40 for the College year. The Scholarship examination will commence on September 18.

Prospectus, with full particulars as to Scholarships and Diplomas, may be obtained from
JOHN EDWARD LLOYD, M.A.,
Secretary and Registrar.
July 17th, 1900.

THE YORKSHIRE COLLEGE, LEEDS, AND THE MANOR FARM, GARFORTH.

Complete Course of Agricultural Education. Lectures in College and at the Farm from October to March. Special provision for practical instruction. Fee, £10. Students are prepared for the N.D.A. Examination. There is also a special course for the B.Sc. Degree.—Prospectus from the REGISTRAR.

Country offices: Bromley, Kent; and at Beckenham.

KENT.—TO BE LET, a FARM of about 250 acres, within eighteen miles of London, and between two stations on the London, Chatham, and Dover Railway and the South-Eastern Railway, at one of which is a siding for manure.

The Farm comprises about 170 acres of good fruit-growing land, about eighty acres of pasture land, and two acres of orchard, together with an excellent farmhouse in good repair, situated about the centre of the farm and adjoining a good road, and ample new farm buildings in good condition, including bullock lodges, stables, barns, wagon lodge, granary, and oasthouse, and also cottage accommodation and new fruit pickers' houses.

Water is laid on to the farm and farm stables, and a perfect water supply provided.

An offer to take a portion of the farm would be entertained.

For particulars, apply to Messrs. MEYNELL and PEMBERTON, 30, Old Queen-street, Storey's Gate, Westminster, London, S.W.; or to Mr. WELLARD, Eynsford, Kent.

SITUATIONS, AGENCIES.

WANTED, AGENTS for the SALE of ICHABOE GUANO, the highest Ammoniacal Guano, also for high-class Chemical Manures. All analyses and dry condition guaranteed.—Apply to DANIEL DE PASS and CO., 1, Fenchurch Buildings, Fenchurch Street, London, E.C.

WANTED, SITUATION as Help or Farm Bailiff to a Gentleman or large Farmer; well up in farming; highest references given.—Address, C. G. MUNDEN, Silver Street, Ilminster, Somerset.

SEEDS, PLANTS, ETC.

200,000 AUTUMN SOWN CABBAGE PLANTS. Fidler's Early Eclipse, the earliest and best spring cabbage in cultivation, 3s. 1,000; Wheeler's Imperial and Early Offenham, 2s. 6d; spring sown Scotch Kale and Sprouting Broccoli, 3s.; white spring Broccoli, 4s.—W. HORNE and SONS, Cliffe, Rochester, Kent.

SEED POTATOES.—Early, mid-season, and main crop varieties: Challenge, Conquest, British Queen, and Up-to-Date. All of excellent quality and shape, and exceptionally heavy croppers, grown specially for seed from select stocks. Special quotation for autumn delivery. Illustrated descriptive catalogue and prices on application to "Manager," Earl of Rosebery's Home Farm, Dalmeny Park, Edinburgh.

SEED WHEAT.—Standard red and Squarehead. Heavy cropping varieties of fine quality, grown specially for seed from select stocks. Prices moderate. Samples, with illustrated descriptive catalogue of seed grain, on application to "Manager," Earl of Rosebery's Home Farm, Dalmeny Park, Edinburgh.

WINTER BARLEY.—New six-rowed variety, Jarman's Prolific. A customer writes:—"Your winter barley is my best paying crop. I have, after a corn crop, nearly 10 qrs. to the acre, with an imperial weight of 56lb. per bushel." Price 6s. 6d. per bushel, 50s. per qr., carriage paid. —E. J. JARMAN, Seed Grower and Merchant, Chard, Somersetshire.

GARTON'S WHITE MONARCH WHEAT.—A wonderful cropper, with splendid straw, on rail at Holmwood, 42s. per quarter in new sacks.—Apply, Bailiff, Antic Grange, Holmwood, Surrey.

MISCELLANEOUS.

RAILWAY ANNOUNCEMENT.

LONDON & NORTH-WESTERN RAILWAY.

DAIRY SHOW.

TO BE HELD AT THE

AGRICULTURAL HALL, LONDON,

OCTOBER 9th to 12th 1900.

For the convenience of Exhibitors at the above Show, the London and North-Western Railway Company have made arrangements for Through Vans for the conveyance of Exhibits to be run to London on Monday, October 8th, by the Trains leaving—

Carlisle	at	8.30 a.m.
Liverpool (Lime Street)	„	12. 0 noon.
Manchester (London Road)	„	12. 0 „
Shrewsbury	„	12.35 noon.
Wolverhampton	„	1.35 p.m.
Birmingham (New Street)	„	2.10 „
Northampton	„	3.37 „

These will be in addition to the Vans running regularly on the Through Trains to London.

Consignments from the Branch Lines, and from Nottingham, Peterboro', Oxford, Cambridge, &c., will be placed in these Vans at the various Junctions, thus ensuring direct transit to the Show.

Rates for the conveyance of Exhibits, which in no case exceed those charged by any other route, can be obtained at the various Stations on the Line.

Arrangements will also be made for the return of the traffic in Through Vans at the close of the Show, and Exhibitors wishing to avail themselves of these facilities are requested to order their consignments "Per London and North-Western Railway."

Exhibitors are requested to be careful to write their names and addresses distinctly on the backs of the direction labels issued by the Show Committee.

The Company's representatives will be at the Show to answer inquiries with regard to the arrangements for the return journey. All inquiries can be obtained of Mr. ROBERT TURNBULL, Superintendent of the Line, Euston Station, London; the Company's District Superintendents, Mr. J. GROOM, Euston Station, London; or Mr. R. F. CASTLEMAN, Broad Street Station, E.C.

FRED HARRISON, General Manager.

Under the Distinguished Patronage of H.R.H. the Prince of Wales, and the largest Wheat Growers in the Kingdom

D. CLARKE'S Carbolized WHEAT PROTECTOR.

WHEAT

WHEAT

BEST AND CHEAPEST DRESSING FOR SEEDS.

In use in England for OVER FIFTY YEARS, and is now being used extensively in the Colonies of Australia, New Zealand, and Central Africa.

A 9d. PACKET DRESSES 8 BUSHELS OF SEED.

This specific takes the place of Bluestone, and by its use the Seed is strongly carbolized and is protected both by the smell and taste from being eaten by birds and other pests. The seed also germinates quicker by its use.

Numerous Testimonials have been received, testifying that the "PROTECTOR"

Prevents Smut in Wheat, Oats, and Barley.
Prevents Destruction of Seed by Birds or Worms.
Seed germinates a fortnight earlier.
Saves a quarter bushel of Seed per acre.

SOWING

SOWING

SOLE MANUFACTURER:

H.R.H. THE PRINCE OF WALES,
And Patronised by the Principal Noblemen, Landowners, & Agriculturists in the Kingdom.

DOWN'S FARMERS' FRIEND
(CARBOLISED)

Has stood the test of upwards of **60** years, and is acknowledged to be the safest and most effectual preventive of

SMUT IN WHEAT,
BARLEY, OATS, &c.,

The Ravages of the Slug, Grub, and Wireworm, and the incursions of Rooks and Vermin.

It will also promote the Germination and Growth of Seed Wheat, and Increase the produce of the Crop equal to a change of Seed.

A Ninepenny Packet is sufficient for Six Bushels of Seed Wheat, which can be dressed and fit to sow in a quarter of an hour.

Manufactory: WOBURN SANDS, BEDS.

MACKINDER'S PORRIDGE MEAL FOR WEANING CALVES.

Price 11s. per cwt., free at all Stations.

See directions for use. Testimony from every county.

Wm. Joscelyn, Esq. (Suffolk), writes:—"I find my calves do better on your Porridge Meal than anything I have ever used."

Mr. Harry Fidler (Wilts) writes:—"Your Porridge Meal keeps calves remarkably clean, mastering the one great difficulty in calf-weaning."

Order through Merchants, Chemists, or direct from

MACKINDER'S LAMB FOOD MILLS, LINCOLN.

SILCOCK'S CALF REARING.

CALF MEAL

To rear Calves economically and profitably use SILCOCK'S SOLUBLE CALF MEAL. Thousands of Calves are reared on it annually; it is a true milk substitute, is very easily digested, dissolves at once in water, gives least trouble in preparing, does not scour, is very economical in use, as one pint makes one gallon of thick gruel, and it fits early for cake feeding. It contains about 80 per cent. of soluble feeding digestible ingredients, while in milk, butter-milk, and whey the figures stand at 12½, 9, and 6 per cent. respectively. With the minimum of cost and trouble SILCOCK'S CALF MEAL gives the maximum results. Use SILCOCK'S SOLUBLE CALF MEAL, feed regularly, in right quantity and at correct temperature and you will have little trouble in rearing paying calves.

Price, 12/6 *per cwt., carriage paid. 5 cwt. lots*, 12/-.

IMPORTANT SALE
OF
CLYDESDALES & PONIES

The SEAHAM HARBOUR STUD, Ltd.,

Having acquired from the MARQUIS OF LONDONDERRY his well-known and famous studs of CLYDESDALES and PONIES, have resolved to continue the Annual Sales, and have fixed the first to take place at SEAHAM HARBOUR, near SUNDERLAND,

On Tuesday, October 16,

At Twelve o'clock prompt, when the following high-class Stock will be offered without reserve:—

CLYDESDALES.

25 COLT AND FILLY FOALS,
11 FILLIES, One, Two, and Three Years,
6 ENTIRE COLTS, One and Two Years,
4 BROOD MARES,
15 GELDINGS, from Two to Five Years.

PONIES, COBS, &c.

27 SHETLAND HORSE PONIES,
5 HACKNEY PONY FOALS,
10 TRAINED COBS,
1 HARNESS HORSE, 16.1 h.h.,
2 PONIES, for Children.

The Clydesdales are a splendid lot, well worth the attention of all those who either wish to found or augment a Stud. Amongst them are some grand yearling and foals by Lord Stewart, which are always favourites, both in the show-yard and sale-ring.

The Geldings are big, powerful animals, fit for the heaviest class of town work, and several of them are noted prize-winners.

The Shetland Ponies are all bred by Lord Londonderry, which is sufficient guarantee of their excellence. The Pony Foals are all by the celebrated pony stallion Little Wonder II. 1610.

For Catalogues apply to R. BRYDON, Seaham Harbour, or the Auctioneers, Messrs. A. T. and E. A. CROW, Sunderland.

THE MOST SUCCESSFUL MILL OF THE CENTURY.

BIBBY'S
"CREAM EQUIVALENT" for CALVES.

An Ounce of Fact is worth a Ton Theory.

A STRIKING FACT.

In our Spring number of "Bibby's Quarterly" we reproduced the photographs of two groups of Calves which are now being reared at the Hornby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.

One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."

We asked our readers to tell us which of these groups were fed on New Milk, and 76 Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the "Cream Equivalent" fed Calves as having been fed on New Milk.

We think the above striking FACT speaks volumes for "Cream Equivalent."

The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.

SOLE MANUFACTURERS:—

J. BIBBY & SONS,
Exchange Chambers, Liverpool.

ALFRED MANSELL & CO.,
LIVE STOCK AGENTS AND EXPORTERS,
SHREWSBURY.

BREEDING & FEEDING SHEEP.—Shropshire Rams and Ewes (all classes) supplied at *lowest rates*, also rams and ewes of other breeds, Shropshire, Clun, Kerry, and Welsh Wethers and Lambs for feeding purposes, bought on Commission.

WINTERING CATTLE. — Hereford, Shorthorn, Polled Angus, Blue-Grey, and Welsh Bullocks and Heifers can be supplied on favourable terms.

PERSONAL BUYING.—All orders are executed by Mr. Alfred Mansell or Mr. G. G. Blantern, a guarantee in itself that selections will be made with *good judgment*.

Specialities: Shropshire and Clun Sheep, Hereford and Polled Angus Cross-bred Cattle.

ADDRESS:
ALFRED MANSELL & CO.,
Secretaries of the Shropshire Sheep Breeders' Association, Shrewsbury.

THE DAIRY INTEREST.

The British Dairy Farmers' Association holds a grand festival this week in the Royal Agricultural Hall, Islington, and there is every probability that the exhibition of cattle, cheese, butter, dairy utensils, and miscellaneous products will be equal, if not superior, to any former show. This association has progressed with the times, by recognising the fact that dairying is no longer a mere rural industry, but has become an art and a science. Thus it has from the first promoted increased knowledge and skill, studious application to all technicalities in the conversion of milk into dairy goods, established milking and butter trials to show how varied are the capabilities of different kinds of cows to respond to the demands made on them; and also caused its shows to have a leading feature in a working dairy to excite emulation in the acquirement of proficiency in butter-making. Nor is this all, for the association has a training college for students at Reading and a Journal issued quarterly, in which the fruits of observation and research are recorded. British dairy farmers may be congratulated on the season having proved tolerably favourable for their industry. If not an abundance, there has been a sufficiency of grass on all but the most arid and worst pastures. The only material drought of the summer did not manifest itself until September, and proved neither so lengthy nor severe as either of the disastrous periods of 1898 and 1899, when hay or some other dry food had to be given to the cows daily for several weeks, and even for a couple of months in some cases, there having been absolutely nothing to be cropped from the burnt-up grasslands.

In regard to prices for milk, butter, and cheese, we have perhaps little on which to congratulate dairy farmers. Still, if market rates have sometimes been higher, they have occasionally plunged lower, under worse circumstances for production than those of this year. At Frome Show and Cheese Fair, on the 26th ult., the general run for well-made Cheddars was from 55s. to 60s. per cwt. For very prime fully 5s. more could have been obtained, and, of course, there were fancy prices for prize lots. Pessimists will no doubt declare that cheese-making can never pay at such rates, and probably they are right to this extent, that it would be more profitable to send away the milk by rail for direct sale to town merchants, even at comparative low rates, than to make it into cheese. But to do this the cheese-maker must get a customer, and the direct milk sale trade seems to be already overdone.

The best resource for cheese-makers, we incline to think, therefore, will be found in studious application in the endeavour to master the technical details of manufacture so as to be able to turn out the primest possible article. If by this means an average gain of 5s. per cwt. more could be realised for the farmer's entire make, a profit would most likely be secured in cases where it seemed impossible to look for one previously. Experience has proved that to make good cheese, whether Cheddar, Cheshire, Stilton, or any other kind, almost everything depends on management. Scotch Cheddars have often been found richer and of better flavour than what has been produced in the very heart of the native district for this article, and at Frome Show the leading prizes are often won by Dorset exhibitors. Knowledge, experience, and skill have been able to conquer most of the difficulties which formerly stood in the way of making good cheese from indifferent soils and pastures.

Although technical skill in butter-making has proved equally successful in causing high quality wares to be produced, the British wholesale butter trade is not to be wrested from the grasp of foreigners without the general establishment of co-operative creameries or grading factories. Uniformity rules the trade, and such having been perfectly well known for many years past, it seems strange that the butter factory system should not have made more headway than it has done in this country. Mr. Rew, in a paper on co-operation, read to the Farmers' Club, four years since, attributed it to the British farmer, by habit and prejudice, being averse to the principle. But this appears scarcely to be a sufficient cause, inasmuch as British farmers have been accustomed to co-operate largely among themselves, for a great many years, in the establishment of horse clubs and stud farms for their mutual benefit.

Some of the larger dairy farmers have for many years past managed to make milk production a paying concern by combining it with another interest. For instance, both Mr. George Adams and Mr. John Treadwell, by the continual employment of pedigree bulls in their herds, impart to them so much grazing character that they systematically produce vast quantities of beef for the shambles, while fulfilling heavy milk contracts. Others, chiefly in Gloucestershire and the surrounding counties, by using the same means, get a nobler outcome for their surplus stock. An object-lesson fully proving this was presented to the public view last week at the Kelmscott Shorthorn sale, where the majority of the animals offered were of short pedigree, only just eligible for entry in the Herd Book. They were of new tribes, which Mr. Robert Hobbs has created from the heaviest milkers in a herd large enough to have 180 cows always in profit. Several of these cows yielded at the auction from 40gs. to 50gs. each. The demand

for deep-milking pedigree Shorthorns is getting to be so strong that they are preferred, although possessed of short lineage.

SAMPLES.

By a Man of Mark Lane.

I see with pleasure that Colonel W. G. Webb has been returned unopposed member of Parliament for the Kingswinford Division of Staffordshire. Colonel Webb is the senior partner in the firm of Webb and Sons, the Queen's Seedsmen, Wordsley, Stourbridge.

The Land Law Reform Association have issued a manifesto, signed by Sir Walter Foster, the President, in which they say the rating of ground values is needed, so that the increasing value of land in towns shall go into the pockets of the community through whose industry and enterprise the increased value arises, instead of into the pockets of those who have done nothing to earn it. Effective housing laws are essential, so that the State can cure the dearth of healthy houses which prevails both in town and in country. Small holdings are necessary to enable rural labourers to remain in the villages, and a reform in the laws dealing with the relations between landlord and farmer required in order that the farmer may obtain security of tenure and full compensation for all improvements he makes in his holding, that he may be induced to use the land to the best advantage, and that agriculture may prosper.

The "Baltic" is no longer located in the premises so familiar to dealers in corn. It is building itself entirely new premises in St. Mary Axe, and during the process of construction the business will be transacted in temporary premises obtained from the Great Eastern Railway Company, facing Bishopsgate Street, and adjoining the company's hotel. The room assigned to the trade is a very fine apartment, over a hundred feet in length, and half as wide. It is quite new, and will eventually form a portion of the new Great Eastern Hotel.

The Old Age Pension Act of the Belgian Parliament, which has come into operation this year, provides (1) for the addition of 60c. to every franc invested either through provident societies or directly in the "Caisse de Retraite," and (2) for the annual payment of 65f., as from January 1st, 1900, to every Belgian working man aged 65 and in want. The Act contains clauses limiting the amount invested to which the 60c. will be added per franc, prescribing the conditions which must be fulfilled, and defining the categories of persons entitled to profit by the provisions of the statute. A sum of 12,000,000f. (£480,000) will be voted annually to meet the anticipated expenditure, and if this sum should prove inadequate, Parliament will be asked to pass a supplementary vote.

I hear from the Greek Consul-General in London that further advices from Southern Greece and the Ionian Islands confirm the reports that the currant crop is almost entirely destroyed by the blight peronosperos. Instead of the yield being 160,000 tons it will not exceed 38,000 tons. Against this, consumers in the United Kingdom require for use on Christmas Day alone 17,500 tons, whilst between now and Yuletide we want some 35,000 tons in addition. Since the arrival of the first steamer the prices of currants have gone up very high. The Vostizza grades are fetching from 75s. to 80s., and even 110s. per cwt. Ordinarily they fetch from 22s. to 35s. per cwt. The outlook is gloomy, as there is reason to fear that currants will be hard to procure, even at famine prices. I am told that the cultivators and labourers in Greece are ruined, that subscriptions are already being asked for, and that some well-known firms have given considerable sums.

An Irish correspondent who disbelieves in the spraying of potatoes for the prevention of disease, puts forth another remedy. He says:—"I am glad to say what the Bordeaux Mixture has failed to accomplish when applied to the tops, I have succeeded in doing with common salt (chloride of sodium) applied to the roots, which not only checked the disease, but utterly annihilated it. I have placed the results of my experiments in the hands of the New Irish Agricultural Department, and it is to be hoped they will lose no time in making arrangements in the various districts throughout Ireland most subject to disease, and put my experiments to a practical test, the result of which, if properly carried out, I await with confidence."

I have received from the Punjab Department of Land Records and Agriculture four leaflets, all dated August 17th. They comprise the first forecast of the indigo, sugar cane, sesamum, and cotton crops of the Punjab for the present year. With regard to indigo the crop has only been reported from seven out of thirty-one districts, the same as in 1899, and the total sowings—97,100 acres—do not differ much from those of the last year. The crop is chiefly sown in canal irrigated lands. The district of Dera Gházi Khan shows an increase of 10·5 per cent. in the irrigated area, while Muzaffargarh shows an increase of only 1·8 per cent. In the other districts the area shows little change. The unirrigated area under the crop is not considerable. It is only 300 acres. The condition of the crop is said to be good, and the recent rains, it is expected, will much improve its prospects.

Estimates of first forecast of sugar cane crop were received from the sixteen selected districts. The total area has decreased from 366,700 to 339,900 acres, or 7·3 per cent. of the area finally returned last year. The total irrigated area is about normal—only 1·6 per cent. less than it was last year. Jhang reports an enormous increase of 122 per cent. owing to the inclusion in the present year's return of the figures of the two tahsíls of Toba Tek Singh and Samundri in the Chenab Colony, while in Tahsíl Shorkot the area under sugar cane is reported to be half of what it was last year owing to the lateness of rains and emigration of the tenants to the Chenab Canal.

The unirrigated sowings show a falling-off of 22,400 acres, or 26 per cent., and the decrease is visible in almost all districts except Amritsar. In several districts, especially Rohtak, Delhi, Jhang, Lahore, Gujrát, Gujránwála, Pesháwar and Bannu, the unirrigated area under sugar cane is insignificant. The decrease in the area under this crop is, of course, mainly attributable to the drought. In Gurdáspur the failure of last year's crop is said to have discouraged the zamíndárs from repeating the experiment, and in Siálkot loss or removal of their plough cattle has also caused a contraction in agricultural operations. In Pesháwar, however, the season has been favourable, and in Hoshiárpur, one of the largest cane-growing districts in the Punjab, the area under sugar-cane is only 4 per cent. below the normal. The condition of the crop on irrigated lands is said to be good, and on unirrigated lands fair or good.

The total estimated area sown with sesamum in sixteen out of thirty-one districts by the end of July, 1900, when compared with last year, has gone down from 216,400 to 174,500 acres, or 19·4 per cent. as finally returned. The falling off is chiefly in the unirrigated lands, the total irrigated area being about normal. In District Mooltan there is an increase of 4 per cent.; in the five districts of Gurgaon, Kángra, Siálkot, Gujrát and Muzaffargarh it is normal; and other districts show a considerable decrease, due mainly to insufficient rains at the time of sowings. The unirrigated area shows a total decrease of 39,900 acres, or 25 per cent. over last year's sowings, which is mainly attributable to the long-continued drought, and partly to the fact, as reported from Gurdáspur, that fodder crops have in some districts taken its place.

It is reported from Hissar that the sowings are yet going on, and from Siálkot that if there is more rain in August it is anticipated that further sowings will be possible. At present Siálkot and Gujrát are the only districts which show some increase in sowings on dry lands. Hissar, Gurgaon, Karnál, Lahore and Gujránwála have suffered the most for want of timely and sufficient showers. The total area in Hissar has greatly decreased, viz., from 13,400 to 4,500 acres. The crops, so far, are on the whole in a good condition, and if the rains continue at intervals larger sowings and a good crop are expected.

The total area sown with cotton in the Punjab this season is estimated at 997,300 acres as compared with 1,015,600 acres shown in the final return last year. The total area is 1·8 per cent. below last year's figures; but there is an increase of 8·5 per cent. on irrigated lands, while on unirrigated lands there is a decrease of 83,900 acres, or 34 per cent. Throughout the greater part of the Province cotton is sown between February and April, and on unirrigated lands the possibility of sowing at this period depends of course on the winter rains, which this year were notoriously late and deficient. In the Delhi Division, however, cotton is sown on unirrigated land between June and August, depending on the early advent of the monsoon. The late monsoon this year has therefore had the effect of contracting the area of báráni cotton in this Division.

As regards the increase in the area sown on irrigated lands it is explained in several of the District Reports that land which, owing to the failure of the winter rains, could not be sown with spring crops was subsequently sown with cotton. The high price obtainable for their cotton last year may also have induced zamíndárs to grow cotton on irrigated land. Against this must be placed the fact that, as a result of the famine owing to the want of seed and absence of cultivation, sowings in some districts were not so extensive as they would have been. This is especially noticed in the report from the Jhelum District. The monsoon rains have been very late, and there has been a great danger of the entire loss of the crop on unirrigated land. Fortunately the good rains lately received have, it is hoped, revived the crop, which is reported to be good on irrigated lands and fair or good on unirrigated lands.

The *Statist* this week treats its readers to a discussion on rising prices and trade, and how home business will be affected. It will appear at once, it says, that "the indebted classes generally will be relieved, the landed classes in particular. It may be that the competition of the newer countries with our own farmers will prevent any great improvement in the grain industry, though that remains to be seen. But in any case there is sure to be a rise in the prices generally of agricultural produce, and that will immediately benefit the land-owners. Moreover, the burden of debt will be reduced. As money will buy less commodities when prices rise, the quantity of commodities of all kinds which those who have mortgaged their lands will have to pay to the mortgagees will be lessened. The tenants will also benefit at first, for rents have now been reduced to the level of prices that has prevailed for several years; while, on the other hand, the produce of farms will obtain higher prices. Therefore in the beginning the tenant classes will reap an advantage. After a while, however, rents will be readjusted, and then the greater benefit will pass from the tenant to the land-owner."

Furthermore, continues our contemporary, all owners of tithe will benefit. For the tithe rentcharge is now arranged according to the prices of certain agricultural produce. "Thus there will be a gain to the landed classes in general and to the clergy. . . It is also to be borne in mind that a great benefit will accrue to the business classes while prices are rising. They will purchase materials at a lower price, and will sell the manufactured article at a higher. Beyond this manifest advantage there will be a feeling of greater hope and greater confidence, generated by the mere fact that prices are rising. This in its turn will enable larger numbers to be employed, will induce new capital to be invested in various industries, and thus will increase the purchasing power of the commercial classes, and thereby benefit the landed interest once more."

The receipts on account of revenue from the 1st of April, 1900, when there was a balance of £3,517,047, to the 30th September were £50,002,789, as against £49,427,508 in the corresponding period of the preceding financial year, which commenced with a balance of £8,919,173. The net expenditure was £87,916,757, as against £53,112,065 to the corresponding date in the previous year. The Treasury balances on Sept. 30th, 1900, amounted to £1,746,378, and at the corresponding date of 1899 to £2,415,336.

From October 1st the London address of the *Pastoralists' Review* will be 35, Queen Victoria Street, E.C.

AGRICULTURAL POLITICS.

By a Lobbyist.

There is, I am glad to say, one portion of England besides Cornwall which has secured for itself something like a defined agricultural ambition. This is East Anglia. Can this be due—it was thus I soliloquised to myself when in Mid-Norfolk on Thursday—to the influence of Mr. Clare Sewell Read? Can it be that the electors are now in these later days moved by the splendid zeal of the man who gave to agriculture so great a fidelity in the House of Commons? Well, let the cause be what it may, there is the fact that in East Anglia the electors have desired their candidates to speak of something else than the lurid issues of the war—that there is there a distinct desire to know what the candidate will do for agriculture, and what are the economic bases on which he has erected his desire for reform?

Of course, if any part of England should reveal this spirit it is East Anglia. It has not only had a Sewell Read associated with it, but it has listened to the intelligent teachings of that excellent man Robert Gurdon, and at this moment it possesses that advocate of pure beer Sir Cuthbert Quilter and that delightful champion of freed houses Frederick Wilson. However, it has, I am glad to repeat, risen to the realisation of its duty, and revealed an intelligence which admirably becomes it. It is not merely that the farmers have shown a proper anxiety as to whether the Rating Act will be—if the candidates have their way—renewed; but they have shown an equally practical desire to know what will be the attitude of the candidates towards the report of the Commission on Local Taxation. It is, of course, perfectly well known in agricultural circles that that report, without containing any drastic proposals, will yet include suggestions—I have already indicated them—which will seriously affect the incidence of taxation. "Have the candidates"—this question has actually been put to one—"a proper appreciation of the real nature of that incidence?"

It must not be assumed that the East Anglian farmers have adopted the disciplined method of the East Cornwall men. They have no Callington platform, with its definite proposals in regard to tenure, its firm pronouncement in regard to unexhausted improvements, and its rather Radical contention in regard to fair rents. The anxiety to establish land courts after the Irish fashion has not penetrated there. Still, the spirit shown is an eminently practical one, and is best illustrated in the care exhibited in the framing of the interrogations.

I am bound to say that one or two of the candidates have shown a rather unnecessary surprise at the exhibition of this rather revolutionary spirit. One of them in his astonishment asked permission of a public meeting to consider the attitude he should adopt towards the cogent question put him. He had expected, evidently, that if he played long enough and vigorously enough upon the khaki drum, the men whom he expects to make his constituents would be so fascinated that he need attend to naught else. They would, in a word, be dulled by the prevalent fever to their own interest. Is the aroused spirit of the farmers a portent? Are we at last going to see them acting something more than the part of pawns in the political game? Are they at last going to be wisely selfish of their own interest?

The return of the Hon. Robert Spencer recalls an interesting political memory. Mr. Spencer was once known to fame as "the masher who is not an agricultural labourer." If the word "masher" means a mere empty-headed noodle, then the title could never be justly applied to Mr. Spencer. If the word means a great swell it surely could be. Well, in a debate on, I think, the Parish Councils Bill, the honourable gentleman thought it wise to preface his speech with the assurance that "I am not an agricultural labourer." The idea of such a beautifully-groomed, splendidly-tailored, and daintily-perfumed elegant assuming that such a protestation was necessary was too much for the House; and it dissolved in a burst of inextinguishable laughter.

I have never discriminated in this column between parties. I have simply regarded each proposed policy and each candidate through the spectacles of agricultural sympathy. Hence the expression of my regret that the farmers of South Hunts have not returned Mr. Adeane to Parliament. Mr. Adeane is one of those few men built after the manner of the late Sir John Lawes. He has given a disciplined attention to the scientific side of agriculture, and he has not indulged in the worldly-wise selfishness of keeping the results of his investigations to himself. He is a Liberal, but does not follow that type of Radical politician who regards the farmer as the inevitable enemy of human progress. He would be a most desirable man to have in the House of Commons, and that—apart from his scientific attainments—because he would exercise a restraining influence on the more turgid side of Radicalism. Of course, I do not expostulate with the South Hunts farmers—they had upon them the duty of exercising their cherished convictions after the manner suggested by their conscience. Still, I am sorry Mr. Adeane will not be in the new Parliament.

The return of Mr. Macnamara for Camberwell is a matter of moment to the agrarian community. The doctor is the arch-reformer of village education. His attitude towards the present system is that of an iconoclast. So far as I understand him, he would reform it root and branch. He is now satisfied with naught that pertains to it. He believes the general curriculum to be ill-attuned to agricultural necessities. He believes that the schools are ludicrously under-staffed. He believes that the teachers are ludicrously under-paid. He avers that they are housed in a manner that casts a bad reflection upon our humanity. He is a stern and strenuous opponent of anything like parson control, and is a strong advocate of control by School Board.

The farmers cannot regard him and his purpose with indifference or serene complacence. His policy means a great expenditure in the Village Education Bill. Can their pockets bear it? Should not the Radicals themselves hesitate to place this new infliction on the shoulders of the farmers, whom they have told us with damnable reiteration have derived no benefit under the Rating Act? Mr. Macnamara will have to be keenly watched by those who think the price we pay for the education of the children of the villagers is sufficiently high.

PRACTICE WITH SCIENCE.

The Yorkshire College Farm

Between forty and fifty members of the South Durham and North Yorkshire Farmers' Protection Association paid a visit to the experimental farm of the Agricultural Department of the Yorkshire College at Garforth on Tuesday. The party first inspected the buildings, and showed special interest in an experiment in calf-rearing. Last year's experimental calves were looking exceedingly well, those reared on new milk weighing on the average 7cwt. 2qr. 8lb., those on separated milk and cod liver oil 7cwt. 3qr. 0lb., and those on separated milk and calf meal 7cwt. 1qr. 17lb. In the case of calves put under experiment this year those reared on new milk averaged 3cwt. 0qr. 15lb., whilst the calves getting separated milk and cod liver oil weighed 2cwt. 2qr. 4lb. The arrangements near the buildings for dipping sheep and preventing foot-rot received a good deal of praise. Cross-bred lambs obtained by the use of seven rams from different breeds with Lincoln and North-country ewes were closely examined. At present the heaviest lambs (113lb.) are those from Lincoln ewes crossed with the Wensleydale ram, the next heaviest being the Suffolk cross with the Lincoln ewe, and Leicester with North Country ewe. An inspection of the numerous plots on pasture and arable land concluded the visit.

The fair at Fermoy, co. Cork, on Monday, was an average-sized one. First and second class bullocks sold well, as did also lambs in condition. Prices: Calves, second class, £4 to £4 10s.; third class, £3 10s. to £3 15s. Yearlings, first class, £7 17s. 6d. to £9 10s.; second class, £6 to £6 17s. 6d.; third class, £5 2s. 6d. to £5 15s. 10d. Two-year-olds, first class, £10 5s. to £11 15s.; second class, £8 5s. to £9 15s.; third class, £7 to £8. Three-year-olds, first class, £13; third class, £8 7s 6d. to £10 10s. Springers, first class, £15 15s. to £16 10s.; second class, £12 10s. to £14; third class, £10 10s. to £10 15s. Lambs, first class, £1 6s. to £1 12s.; second class, £1 1s. to £1 5s.; third class, 19s. to £1. Hoggets, first class, £1 17s. 6d. to £2 2s.; second class, £1 12s. to £1 15s.

FARM.

Farm Labour.

Various opinions have been expressed as to the cause of the present dearth and inefficiency of farm labour. There are some who attribute it to the introduction of education of a higher standard; but whatever may be our individual desires upon the point, morally speaking such introduction was entirely on the right lines. If we were to discuss the question from the industrial point of view, omitting agriculture for the moment, we should find that we should arrive at the conclusion that our own position as a manufacturing and trading people is being endangered in the world in consequence of the advanced knowledge which has been acquired by the working classes of the United States, of Germany, and of other countries. Curiously, however, technical knowledge—and this is the whole crux of the question—which has been long within the reach of the town population, has practically passed over the heads of the countryman. He has not been technically instructed; he has received a smattering at the Board or parochial school, just sufficient to enable him to read the ever increasing cheap literature, and to induce him to become discontented with his lot. He mentally demands the society which town life affords, the means of enjoyment which he believes are there provided. He thinks nothing of the advantages of a country life, its health-giving power, and its economical value. It is possible that education has had something to do with the aspirations and feelings of the country workman, but it can scarcely be denied that these aspirations have been fostered materially by the increasing demand for men in our great cities, where labour is growing in a host of forms, and where wages have risen out of all proportion to the cost of the necessaries of life, or to the value of that labour itself. We may take it, indeed, that in proportion as pay is increased the cost of food and clothing has decreased, together with the efficiency of labour.

Having studied this question very carefully in practice, the contact of the writer with a multitude of agriculturists induces him to believe that so far from rents being to-day the bar to agricultural prosperity, that bar is to be found almost entirely in the labour question. The increasing demands of our population are so great that almost any man who is competent to perform the work can obtain a livelihood upon the land if he can successfully overcome the labour difficulty. We have just received a letter from Western Australia in which the writer tells us that he is personally assisting in the work of threshing corn, and that it is no uncommon thing to get through a hundred acres in a day. That same individual has been from day to day during the past summer reaping 15 acres of wheat by the aid of a self-binder. On an adjoining farm two young fellows, who are in partnership, last year, without any help, ploughed 150 acres of land, most of which they prepared for corn, cut and stacked 50 acres of hay and over 100 acres of wheat, milked their herd of cows which, with their pigs and poultry, they daily managed, did all their own cooking and house work, and in addition built a stable with timber which they were compelled to haul from a long distance to their land. It would be scarcely possible to put one's hand on a man in this country capable of doing such work as this if he were paid in wages a higher sum than these young men would receive in their pioneer life.

No doubt in some parts of the country there are, among the older men, hands who are trustworthy, and who can be depended upon to do good work; but 90 per cent. of the labourers of to-day in other parts of the country, especially the younger men, are not to be trusted out of the employer's sight; while the work they perform, under ordinary conditions, is utterly inadequate, far less than has been done in the past, less than they are capable of performing by steady application, and often more or less useless to the farmer. I call two cases to mind which are illustrative of what is going on. On a recent occasion I was present on a farm early in the morning; the duty of one employee was to milk a small herd of cows, and to take the produce to the station. His work was completed at seven o'clock, and he was off by ten minutes after the hour with a horse and cart, which he kept in excellent order. Almost the entire day was given to work upon the farm, and after six o'clock at night he is to be found looking round the premises almost as the master does himself to see that all is right. On the other farm, where similar work is performed, I understand that the stockman takes an hour and a quarter, or more, to get his cattle from the fields before he starts to milk, and that a large portion of the morning is passed away before he is free for another job. I was shown this man's day's work as an example of what he usually accomplishes, and I should place it at 5s. on piece work scale, this being the result of labour from breakfast time to four o'clock. But instances of the kind might be repeated by the score, and it is the very general complaint that a remark made to a man of this character is followed by a counter complaint of an untruthful, insulting, or vicious nature.

It is true that the severity of the labour question

is felt more generally in the south than in the north, for it is less a question of cost than of efficiency. That farmers continue to rest on their oars is most astonishing. If they continue in this attitude until the question is chronic, the difficulties, the anxiety, and the loss will be enormous. Parliament can practically do nothing, but we would point out that there are thousands of young Irishmen who might be induced to become permanent residents among us, and who would make excellent workmen if they were trained, and trained early. The older men occupy holdings in which they have a personal interest, and although these holdings in so many cases are mere hovels, surrounded by nearly barren land, they spell the word "home," and that to an Irishman is, perhaps, more sentimental than an Englishman; for which reason he declines to leave his native land. The young men and youths have no such attachment at present, and we are persuaded both from observation and experience that great help might be obtained in this direction, if it is obtained at once.—*Yorkshire Post.*

Not Fashionable.

When farmers meet, certain items of farming will most assuredly come under discussion. It was so the other day. An untidy hayrick was observed, and in the course of some criticisms one well-known local agriculturist said that it was not fashionable to have a tidy one nowadays. Apparently his words are only too true. Farmers nowadays have neither the time nor money nor labour to produce the tidy ricks and neat rickyards that their forefathers did. Who cannot remember the old time adage, "When making a hayrick tread it until you can see your nail points. Keep your corners up and your middle level." The old time rick maker had time to do this when the hay had to be pitched up by the brawny sinews of the farm labourer, and good was the man who could pitch off a load in half an hour. Now, by means of the elevators, a load is dumped on top of the rick in ten minutes, and the mow-maker's efforts are directed to keeping on the top with a semblance to shape. Consequently when the rick is cut in the winter, it comes out in lumps and curls.

Then, in the olden time the rick had to be pulled until its corners stood out in geometrical lines, and in cutting out a knife mark could scarcely be seen. Nowadays the rake does the pulling, and very often the knife is not used, yet it pays to cut a rick, as there is a lot of waste where the outside comes into contact with the land, and then the tapping up and thatching are conducted in a very perfunctory manner, the main idea being to hurry over it as quickly as possible, and to economise both spars and straw. Consequently, a really water-tight roof is seldom found, and the badly-made rick beneath also tends to make the thatcher's work really worse than it is. The rick, instead of settling down even, pitches into humps and hollows, and where the latter are, surely will the water penetrate, and then there is a pipe in the hay rick.

Where are the neat and tidy corn stacks of the days gone by, when one could scarcely see a single ear for the sparrows neatly balanced on their caps and pins? The latter may now be only too often seen lying disused in some odd corner of what used to be a fat and prosperous rickyard, crammed with the good things of harvest, and with not a few kept over from the previous harvest. Nowadays, seemingly, the quicker a farmer can thresh his corn the better, and thus there are no national reserves to fall back upon in time of scarcity. They managed it better in this respect half a century ago; but those days are gone, and the tidy rickyards with them.

There is no doubt that the average British farmer is entering upon a hasty period of negligent farming. He has in some respects more advantages, such as the purchase of foreign feeding stuffs, and cheaper artificial manures more easy of application. He now farms his best bits, and allows the odd corners and poorer ones to go. Yet one can truthfully state that better average crops are grown than when Mendip lime kilns were kept alight and the putt wheels, laden with rich manure, were seen more often on the land. Thus, in some respects it will be seen that we have advanced, whilst in others we have dropped back. Is the ploughman of to-day, with all the advantage of better implements, the equal of the farmer's carter of twenty years ago? The whistling ploughboy is gone. It is not fashionable to be a ploughboy now, and learn to guide the glittering ploughshare on the straight lines, as one's parents did in the days gone by.

How many farmers' wives bake their own bread as in the days of yore? This is another country item that has become unfashionable. And whoever sees a farm labourer gleaning in the fields in these days of the fivepenny loaf? To ride a bike or take a trip on the roundabouts is apparently very much more fashionable than to stay at home and do a little domestic needlework and put the barm "a-rising." But I forget. Good, honest old barm, grown on genuine malt wort, has likewise become unfashionable. When we come to consider the number of unfashionable items that have been weeded out of our country life it seems a marvel that there is anything fashionable left with work attached to it.—NORTH SOMERSET.

Wheat: New Breed against Old.

The threshing machine has now given the result of the crops of wheat grown by the Earl of Denbigh on the home farm at Newnham Paddox, in the county of Warwick, and, though it is not suggested that this one experiment can settle the superiority of one wheat over the other, yet it will not do to put on one side the good old Square Head until the new breeds of wheat can show a better return than was the case at Newnham Paddox this last season.

The two wheats tried were the White Monarch wheat, raised by Messrs. Garton, and the old Square Head wheat, grown on warp land by Mr. Scholey. Both wheats were grown on two adjoining fields, and the land is of very similar quality—namely, a fair loam on a clay subsoil, and the rental may be put at 25s. an acre.

The cultivation of the land has been the same in both cases, and for some years has been ploughed to a depth of from 8 to 10 inches, and the only difference to be mentioned is that the White Monarch wheat was grown after a clover ley, and the Square Head after a crop of beans. The clover ley was broken up early in September, 1899, and the bean stubble ploughed about the same time. The White Monarch wheat was sown on the 11th of October at the rate of 2½bus. to the acre, and the Square Head on the 17th of October, and also with 2½bus. to the acre. Before the wheat was sown both fields were harrowed three or four times, and afterwards the harrows were again used, the intention being to thoroughly break up the soil, but it was not rolled, and the ground was left fairly rough on the top. The only other cultivation was more harrowing, probably three times, in the spring, as soon as the land was dry enough to bear the horses. No manure of any sort was used for either crop. The Square Head wheat was always flourishing—it started well, and never lost either colour or plant; but this was not the case with the White Monarch, as it came up rather thin, and did not look well in the winter; but after the harrowing in the spring the crop stooled, and was soon a very good colour, and by May time was looking nearly as well as the Square Head.

Several gentlemen viewed the crops on the 25th of July, and at this time the appearance of both was as good as could be wished. They were standing well up, and the straw was nearly six feet high, but the White Monarch had a little the best in this respect. The storms at the end of July and early in August altered the appearance, but in neither case to any serious extent; and at the second view of the crops, on the 11th of August, one gentleman remarked he could grow as large crops as those on the Newnham Home Farm, but he could not get them to stand up in the same way. There would have been no difficulty in cutting the crops with a self-binder if it had not been for the great length of the straw. The Square Head was fit to cut on the 13th of August, and the White Monarch a few days later, and they were harvested in very good condition, and they have now been thrashed.

The exact area was carefully measured by an independent surveyor, and he gives 6 acres 3 roods for the Square Head, and 5 acres for the White Monarch. The wheat was weighed as taken from the machine, and again when it was delivered at the granary, and the result is that there are 47qr. 17st. 2lb. of the Square Head, and 24qr. 4bus. 12st. of the White Monarch, and this gives for the Square Head 56bus. 17lb., and for the White Monarch 39bus. 56.4lb. for each acre. The wheat was weighed at 63lb. net for each bushel.

On August 11th several tenants of the estate and some friends examined the crops, and it was arranged to have a guessing competition as to the probable yield, and the winners were Mr. J. Davy and Mr. J. Dunn for the White Monarch, who both put the crop at 40bus. to the acre, and for the Square Head, Mr. J. Brierley and Mr. T. W. Foster, who estimated the yield at 55bus. an acre. The highest guess was 46bus. for the White Monarch and 66bus. for the Square Head, and the lowest 34bus. 20lb. and 38bus. 40lb. respectively. It is a curious fact, but those gentlemen who estimated the highest yields occupy some most productive land, and they did not perhaps quite realise that the Home Farm is far from being the best yielding land on the estate.

As mentioned above, it is not contended that this experiment is in any way a proof that the Square Head is 2qr. an acre better than the White Monarch, and perhaps another season the result might be different; but there can be question that, considering the land and the season, the crops were very good, and show most unmistakably that deep cultivation will return good crops.

There is one other point that may be noted. It was found by careful examination that the average number of corns in one head of the White Monarch was 46.44, and for the Square Head 50.44, but the weight of 100 corns of the White Monarch was 88.3 grains and of the Square Head 71.5. This would show that 100 corns of the White Monarch weigh nearly as much as 124 of the Square Head, the respective weights of those quantities being 88.3 and 88.66 grains.

HENRY H. CAVE.
Agent to the Earl of Denbigh.

Estate Office, Rugby, October, 1900.

A New Cabbage Planter.

We have received from Mr. John Macdonald, of Burnbank, Lenzie, N.B., one of his cabbage planters. The operating of the machine is a very simple matter. The plants are laid on the drills, care being taken to have the root placed exactly on the spot where it is intended the plant should grow. The operator, without lifting the plant from the ground, catches the plant in the fork of the implement just a little way up the stem of the plant from the root, then the man presses the planter into the ground to the required depth, and the dibble being self-closing, the operation is completed. A thousand plants an hour can be put in, so the maker says, and so do persons who have tried it. The tool is inexpensive (2s. 3d. post free), and does its work well. A test on a piece of stiff ground for the special benefit of our representative showed that it worked satisfactorily and left all the plants alike straight. We can highly recommend it for the farm and garden.

THE DAIRY.

When is Butter not Butter?

The quality of butter imported into England from Holland is on its trial in London, a test action having been brought in the City Court by one of the largest butter merchants against one of the principal Dutch exporters for loss of profit on a contract.

The importers purchased over nine tons of butter that was, according to both parties, of very good quality, but not of the best. The price was about 9d. per lb.

Expert evidence was called on both sides, and, of course, the experts disagreed. Dr. Otto Hehner and Mr. Cassel said the butter contained 10 per cent. of margarine, and Mr. Leo Taylor said it was first-class butter without adulteration.

Dr. Hehner jokingly remarked that it was possible to make a cow give pure margarine—that is to say, that by improper feeding the butter made from the milk would not contain the 60 per cent. of volatile fatty acids that practically constitute the only difference between butter and margarine. Mr. Cassel also bewildered some of those present by complaining of the adulteration at the other end of the cow, stating that the butter was adulterated if the cow was improperly fed.

It came out in the course of evidence that at the present time butter was most scientifically adulterated in Holland, so that it was most difficult to tell whether the lowness in quality was due to a change in feeding the cow or poor pasturage, or to the addition of margarine.

Fortunately the foreman of the jury was himself an expert, and he intimated that the jury would not give a verdict until fresh samples of the butter had been chosen and tested in a special manner. The case was accordingly adjourned *sine die*.

When they give their decision the jury will, it was stated, give the tests butter would have to pass in order to be sold as pure butter.—*Daily Mail.*

Victoria Butter in London.

The report of the Butter Deterioration Board will state that the drop in the price of Victorian butter in London, as compared with Danish, is due to want of regularity in placing supplies on the market rather than to any serious decline in quality. It is also proposed that a board consisting of representatives of all the colonies exporting butter should be formed in London for the purpose of arranging for storage and regulating the market supplies, a practice which, it is believed, would lead to better prices. Where Victorian butter companies want financial assistance the Government will be advised to loan them money on the Credit Foncier system.

Cheese Fairs.

Lancaster October Cheese Fair, the most important of the year, was held on Wednesday, and attracted a large and representative attendance of cheese factors from the principal towns of the north-western district. The pitch being considerably larger than last year, trade dragged, farmers having big anticipations, which were not in every case realised. Prices:—Common, 55s. to 60s.; medium, 63s. to 68s.; best, 70s. to 73s. per cwt.

The supply at Nantwich Cheese Fair, which was held on Thursday, amounted to 55 tons, which is heavier than usual. The demand was hardly as keen, and prices fell 2s. to 3s. per cwt. below those current at the last fair. Fine Cheshire realised 60s. to 70s., and medium 48s. to 57s. per cwt.

FIRST-CLASS representatives and agents required throughout the United Kingdom for the sale of "MOLASSINE"—Write for particulars to the "MOLASSINE" Co., LTD., 36, Mark Lane, London, E.C.—[ADVT.]

By LUPULIN.

Home Notes.

The Borough.

In order to find some explanation for the otherwise inexplicable condition of the hop trade, we have all fallen back upon the General Election fever which is affecting the whole country, urban and rural districts alike. There is doubtless something in it, as it is well known that brewers, as a rule, are keenly interested in politics, and despite the probability of increased taxation which is sure to result from the prolongation of the South African war, our customers are sufficiently Imperialist to do their utmost to give a further lease of power to the Unionist Government. I am quite inclined to believe that these circumstances have had some influence in checking the progress of our business, and am looking for a better state of affairs now that the electoral excitement is passing away, especially as the Government has secured a large majority of supporters, whereby the confidence arising from a sense of stability will be restored to our people.

Indeed, there are already signs that the hop trade is settling down to a realisation of its true position, for within the past week there have certainly been more enquiries, and the manifestation of greater readiness on the part of buyers to accept hops at growers' valuation. Well-managed East Kents have been sold at £6 10s., and some parcels of good Sussex has changed hands at £6. Some Hereford Mathons, submitted for valuation, were appraised at 92s. to 94s., and these are but instances of the growing tendency towards higher values, which I am pretty confident will be developed within the next few days.

Growers may be Encouraged

to hold on firmly and to gradually but seasonably advance their demands. Leading factors, instructed by the down-coming of the crop, have publicly reduced their earlier estimates of 7cwts. to 6½cwts. per acre, and others whose ideas were not so extensive originally are firm in adhering to their first statement, and still declare that £160,000 old duty is the utmost figure that will be reached. But it is needless to debate about a few thousand cwts. more or less, as, if you accept the highest calculation that has been put forward, we shall find that even that will not suffice to provide for the requirements of the year, and I have yet to be convinced that the stocks held by brewers are so large as to make them independent of this year's growth, as I have been informed some of them boast they are.

We may be quite sure that every hop grown this year must pass into the hands of consumers before the season has expired. The present position is one of "bluff" by the buyers, who wish to make us believe that they can do without us, and that therefore we must throw ourselves upon their merciful consideration. If growers were but as staunch Unionists in their business as they are in their politics we should soon see a change in the tone adopted by consumers. Meanwhile I can only exhort them to be brave and firm.

**All official reports and notices of the National Association of English Hop Growers will be printed in the* MARK LANE EXPRESS, *which will also contain all current information likely to be of interst and benefit to the members of the society*

Foreign Notes.

Nuremberg.

The local business in hops is somewhat quieter during the past few days, although it appears that consumers have been buying freely. An agreement has been arranged between some of the principal brewers to send their agents to the chief centres of production for the purpose of negotiating direct with planters, thus trying to free themselves from the pressure exercised by the Nuremberg dealers, whose united action is considered to be frequently detrimental to the interests of brewers. This experiment will be noted carefully, not only in Nuremberg, which city has for a long period practically controlled the Continental hop trade, but also in other centres, as it is a step towards the establishment of more intimate relationship between producers and consumers, which has long been desired by the latter, and which I think must eventually result in benefit to both. In England, where a large number of the planters are men of substance, and produce very considerable quantities of hops, it is quite possible for them to take the initiative, and to make direct offers of their finished produce to brewers, but this is hardly practicable on the Continent, where the hops are generally raised by small farmers. Having no apparatus for drying and packing, they transfer their crops in a partially dried or green state to dealers, who complete the curing and baling, and thus prepare them for the brewer's use. It is therefore necessary, under these circumstances, for consumers to make the first advance towards direct trading, and the brewers will have to arrange for the completion of the process. Doubtless this has been considered and provided for, and I shall watch with interest the development of the scheme, which marks a new departure in the hop-growing industry.

Reports from Country Districts

do not indicate any want of activity in demand. In Upper Franconia, where the yield is not so large as last year, sales have been numerous at prices very satisfactory to growers. The area cultivated in this district is a little over 5,000 acres, and the present crop does not exceed 9,500 cwt.—a very poor result from our point of view. In East Prussia the crop averages somewhat over 6 cwt. per acre, the quality being excellent. The quality of the crop in Upper Austria is also generally good, but the quantity does not exceed an average, and some plantations have produced very little, having been damaged by hail-storms. It is estimated that the late hops will turn out better. Business is fairly active at full rates. The yield in Styria shows a full average, though, in consequence of the drought in July, the crop is comparatively small in the south-western district. The hops are generally rich in lupulin, and buyers are anxious to operate, but growers are holding out for better offers. The Moravian crop is not much less than that of last year. Demand is active, and values are well maintained. The Saaz growth totals 80,000 to 90,000 cwts., being much below last year, but the quality is quite satisfactory. Growers are holding out for 400 crowns per 100 kilos, but at present buyers are not offering more than 380 crowns for choice samples. In Galicia the crop is disappointing as to quantity, being from 30 to 40 per cent. below that of last year. Generally, quality and colour are good.

Burgundy.

The small crop is increasing the firmness of growers, and although offers have advanced to 115 francs, there is not much business. The quality being good and the yield so limited, higher values are expected.

Holland.

The quality of the new growth is generally satisfactory, but the available quantity does not exceed half the produce of last season. Prices are therefore very firm.

Belgium.

The picking being practically concluded has settled the question of shortage, which is now definitely accepted, but the tone of the speculative market has not yet been strengthened, and the comparative business which has recently characterised operations on the Bourse continues. The "bears" are still at work consistently, meeting lowered offers by reduced bids; thus business is almost at a standstill. In the country markets this influence is also felt, and although growers are making good resistance to the downward trend of prices, they have been compelled in many cases to submit to lower and more reasonable figures than they were justified in expecting. Quotations, but a. Alost and Poperinghe are nominally 75 to 85 francs, but they are hardly maintained, in the face of the weakness of the general trade, as during this period of suspense brewers are naturally slow to give orders.

America.

But little change is reported this week concerning the New York market. Values have not actually advanced, though there is a strong tendency in that direction. Dealers are freely offering 15 cents to growers, but the latter, being aware of the general deficiency of this year's crop, are steadily refusing to accept this figure, being convinced that higher prices will soon be realised. During the latter days of picking in Central New York severe wind storms have visited the plantations, reducing the quantity and damaging the quality of the crop. No further news has arrived from the Pacific Coast, but I hope to give next week details of the latest calculations of the total American production for 1900, which will, I believe, confirm previous estimates, and will show that practically the whole of the growth will be required by American brewers, and that the balance available for export will be exceptionally small.

(*For Hop Market Reports, see pages* 463, 465.)

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended September 29, 1900, together with the quantities imported in the corresponding week of the previous year :—

Destructive Farm Fire.—The quiet little village of Martham, near Yarmouth, was the scene of a destructive fire on Monday evening. Situated on the road from Martham to Damgate stands a compact farmhouse occupied by Mr. Henry Grimson, with numerous outbuildings, covering an area of upwards of a quarter of an acre. Adjoining the outbuildings were two stacks, the one being the produce of nineteen acres of marsh hay, and the other a [illegible] Between the stacks and the farmhouse stood a large corn barn, and at the back of these premises was a large stable, a cattle yard, and an engine shed. The outbreak apparently occurred in one of the stacks, and being dry and inflammable, the flames spread with remarkable rapidity, and the adjoining premises being so closely situated and the wind favouring the flames, they were very quickly all ablaze. The farm buildings were burnt to the ground and also the stable, the horse being [illegible] Several agricultural implements, too, in the engine-shed were also destroyed, and, worse than all, the haystack, which Mr. Grimson valued at £[illegible], was totally ruined. Situated immediately opposite the premises were several [illegible], and these [illegible] had marvellous escapes, and but for the plucky action of the neighbours, must have been destroyed. The supply of water was very limited, being confined to one well. The damage is estimated at at least £500. The house and outbuildings were insured.

BARLEY AND MALT.

By Hordeum.

Our Barley Area.

In the recently issued Journal of the Board of Agriculture the returns for the areas under the principal crops are given for Great Britain for the two years 1899-1900. In these the most noteworthy features are the relatively large decrease under wheat and the stationary position of barley. It is also not a little singular that although, on the whole, wheat and barley are curiously alike in area, wide differences occur in a number of counties.

There can be no doubt about this year's returns indicating a sad spirit of disheartenment on the part of barley growers, for although wheat has lost 156,000 acres in the year, barley has only gained 8,000 acres. Even if we add the gain of oats of 66,000 acres, it still leaves the total loss of land growing cereals for the year of over 81,000 acres.

What this means in actual loss to the country is too lamentable to define. Were it only understood, it is quite certain it would not be permitted to continue, but there seems very little prospect at present of

The Nation Awaking

to the stern realities involved. With those nominally at the head of the great industry of agriculture acting with entire disregard of arable farming, such a state of things is only reasonably to be expected. We cannot expect to see the question understood when the leaders of thought are at fault or too careless to pay attention.

The number of counties growing 200,000 acres or upwards of barley is only three, viz., Lincoln, York, and Norfolk, whilst two more only follow a long way after with over 60,000 acres—Suffolk and Essex. Of the total number of counties one-fourth (ten) grow under 10,000 acres of barley, each leaving three-fourths (30) to exceed that area, but of these again one-half (15) do not equal 30,000 acres.

Placing the counties in order of importance as to the area under barley for each of the two years, we see the distribution of gains and losses is fairly uniform.

In Scotland only a single county has 30,000 acres, and in Wales not one county has 20,000 acres. Scotland has only eleven counties with over 10,000 acres, and Wales has only four of the same size. The particulars of each county in Great Britain will be found in detail in page 477.

The Brewers' Exhibition.

Next Thursday (11th) is the last day for making entry of barley at this show. Enough has already been said to indicate the large increase shown over any former year in the number of prizes offered and classes open. It will be very desirable for a corresponding increase to be shown in the number of entries made.

A great lack of independent action is shown by many growers. They show their samples to sundry people, all of whom are not always disinterested advisers, and remain afraid to compete. Last year, for instance, not a man from so big a barley county as Cambridge had the courage to send. Yet there are sundry prizes open to men from that county, some of them even being exclusively confined to it. In these, however little chance they might have stood of getting the highest awards in the open classes, some of them would have had all their own way in their own county.

The Cost of Entry

is very small, and the whole expense of showing a mere trifle. Yet the smallest distinction or award possible wipes it all out several times over.

A good show of samples from a county means in many cases the presence of buyers in all the markets of the district who would otherwise not have felt disposed to attend. If a county is not represented it looks as if it has nothing to show, and big growers form their own conclusions. The benefit to growers of a few Burton buyers in a market is too well known for it to be necessary for me to waste ink in describing it.

On another subject I have a few words to say.

Prejudice Against Goldthorpes

is being stirred by some industrious busybodies who might readily find better employment. They are making the absurd assertion that it is useless to send a sample of Goldthorpes to the exhibition, as the judges have decided not to notice it, and are strongly prejudiced against it. Now this is entirely wrong. The judges when they act are admonished to put aside every personal feeling, predilection, or prejudice. They have one duty only to perform, and that is to find the best samples solely on their merits, and place them strictly in the order of merit.

The only information vouchsafed is the country or county the grain grew in, and the class in which it stands entered. Not only do they not know more, but special care is taken that they cannot get at it, even if they wished. But it is almost superfluous to add there is not one of them who wishes for more.

It must be borne in mind that only a few years ago these judges (or a very large majority of them) gave the champion prize and all the other highest awards to Goldthorpe samples, and it is absolutely certain that if the best sample in the show is a Goldthorpe or any other variety grown in Timbuctoo or Connemara it will get every honour it is entitled to without let or hindrance.

Grain Exhibition at Blandford.

The annual malting barley and other grain exhibition of the Dorset United Farmers' Clubs will be held at the Corn Exchange, Blandford, on Thursday next, the 11th inst., which is Blandford sheep sale day. This is the first year in which the show has been held at Blandford, and naturally it is expected that members of the clubs will make a special effort to ensure a success. As the entries only closed on Saturday it is impossible to say here the number of exhibits there will be, but it is estimated that about twelve thousand sacks of grain will be on offer. The entry is open only to members of the Dorchester Agricultural Society, and Blandford, Milborne St. Andrew, and Winfrith Farmers' Clubs.

There will be six classes, and three prizes are offered in each, providing that at least ten entries are received, otherwise no prize will be given. The first-class is for malting barley from bulk sample of 50 quarters, and the prizes here are £7, £4, and £2. In the second class, which is for malting barley from bulk sample of 30 quarters, the prizes are £6 £3, and £1 10s., whilst in the third class, for malting barley from bulk sample of 20 quarters, £5, £2, and £1 are the awards. The two following classes are for wheat from bulk sample of 25 quarters, the first for white and the second for red wheat, the awards in both cases being £6, £3, and £1. The last class is or spring oats, also from a bulk sample of 25 quarters, and here the prizes are £3, £2, and £1. There are two champion prizes, one of £15 for the best malting barley, and the other of £10 for the best wheat.

We may mention that it is possible for one sample to take prizes amounting to £22, and as samples securing notice from the judges are sure to sell at good figures it will be seen that the show is a most attractive one for farmers in the district, and does much to urge them to grow the best grain.

Experiments in Manuring Potatoes.

Experiments on the growth of different varieties of potatoes under various systems of manuring have been carried out during the past two years by the Agricultural Department of the University College, Nottingham, at Althorpe, Lincs., Hodsock, and Blidworth, Notts. The season in 1899 was not on the whole favourable for potatoes and did not afford a fair opportunity for the action of artificial manures, but the results are stated to have been fairly satisfactory, and owing to the absence of any considerable amount of disease the crop was lifted in good condition. The trials at Althorpe were carried out in connection with the Lindsey County Council, and were intended to ascertain the most suitable varieties for the class of land and climate, and the most efficient systems of manuring.

The artificial manure that gave the best result was a mixture of 1½cwt. nitrate of soda with an equal weight of sulphate of ammonia and 6cwt. of superphosphate, costing £2 1s. 6d.; this gave an average yield from eight varieties of 10tons 9cwt. 3qrs., as compared with a produce of 8tons from the unmanured plot. The increase, valued at 50s. per ton, gave a profit over the cost of the manure of £4 3s. This manure was also very efficient in 1898, and stood at the head of the list, but the other manures did not exhibit uniform results in the two years. Owing to the want of rain, the plots on which the manure or part of it was broad-casted did not succeed better than where it was put in with the sets. None of the new varieties of potatoes tried surpassed the three sorts that are generally considered the best in the locality, viz., Selected Giant, Up-to-date, and Scottish Triump.

Experiments were carried out at Hodsock in a field which had received a dressing of two tons of Crich lime per acre in the autumn of 1898. Only one variety of potato was planted, viz., Up-to-date. There were in all nineteen plots, two of which received no manure, four received varying quantities of farmyard manure, four farmyard manure and artificials, and nine plots received artificials alone.

With regard to the plots which received farmyard manure alone, it will be seen from the table below that a moderate dressing of dung gave an increase of 4tons 3cwt., and 4tons 8cwt. over the unmanured plots, but no profitable increase was obtained from the heavier applications of farmyard manure. The addition to dung of a complete dressing of artificials, consisting of 4cwt. superphosphate, 1½cwt. nitrate, and 2cwt. kainit per acre, did not result in any increase over the plots which received farmyard manure only, except in one case, and then only of about 11cwt. The table shows the results obtained both from the plots which received farmyard manure only, and from those which received in addition a complete dressing of artificials. It may be observed that the yields on the two unmanured plots were 7 tons 7cwt. 1qr., and 7 tons 2cwt. per acre respectively.

	Dung only. Tons. cwts. qrs.	Dung with complete dressing of artificials. Tons. cwts. qrs.
10 loads farmyard manure	11 10 0	11 10 0
15 " "	11 11 2	11 9 0
20 " "	11 12 0	12 3 1
25 " "	11 16 3	11 4 3

The plots treated with artificials alone yielded considerably less than those which received dung in conjunction with artificials, but satisfactory results were only obtained when all three ingredients, phosphorus, potash, and nitrogen, were present; the omission of any one of them caused the crop to fall almost to the level of the unmanured plots. As will be seen from the following figures nitrate of soda gave better results than sulphate of ammonia:

	Yield per acre. Tons cwts. qrs.
4 cwts. super., 1½ cwts. nitrate, and 2 cwts. kainit	9 17 1
1½ cwts. nitrate	8 0 2
2 cwts. kainit	7 15 2
4 cwts. super.	7 14 2
1½ cwts. nitrate and 2 cwts. kainit	8 12 3
2 cwts. kainit and 4 cwts. super.	7 13 3
1½ cwts. nitrate and 4 cwts. super.	7 10 2
2 cwts. kainit, 4 cwts. super., and 1½ cwt. ammonia	7 12 0
2 cwts. kainit, 4 cwts. super., ⅝ cwt. nitrate, and ⅞ cwt. ammonia	8 11 1
No manure	7 7 1 7 2 0

Compared with the unmanured plots it will be observed that the increase which was obtained by the use of ten loads of dung exceeded 4 tons per acre, while the largest increase obtained with artificials alone was about 2½ tons on the plot where a complete dressing was supplied.

Experiments which were carried out on light land at Blidworth did not show such a good result from the application of dung, but in the case of the artificial manures they confirmed the results furnished by the experiments at Hodsock, viz., that whilst a satisfactory increase may be obtained from a manure containing nitrogen, potash, and phosphates, the omission of any one of these ingredients, and particularly of potash, resulted in a very material decline in the produce. Farmyard manure at the rate of ten loads per acre yielded 8 tons 8cwt., and kiln dust at the rate of ½ ton per acre yielded 10 tons and 2qr.

THE WEATHER.

MONDAY (October 1st).—The weather was fine over Great Britain, but slight rain fell again in Ireland. Rain was measured in the morning as the result of the fall in the preceding twenty-four hours, over the entire kingdom, but the amounts were mostly small. The barometer had risen generally, but the type of weather was still cyclonic, and the winds were south-westerly, the air being drawn from the Atlantic. The temperature was rather low during Sunday night in the Northern and Midland districts, where the thermometer fell below 40deg., but at many of the English coast stations the readings did not fall below 50deg. The mid-day temperatures slightly exceeded 60deg. over the southern portion of the kingdom. In London the day was very fine, and in the afternoon the thermometer in the shade rose to 63deg.

TUESDAY (October 2nd).—Slight showers occurred in many parts of the British Islands, but the rainfall was not heavy. At all the western stations rain was measured in the morning as a result of the fall since the previous day, and in parts of Ireland the amounts were large. Monday night was cold in Scotland, but in other parts of the kingdom the temperature was fairly high, the readings not falling below 50deg. in the South of England. The mid-day temperatures were again high over the Southern portion of the country, where the thermometer registered 60deg. and upwards, while in the North the readings were in fair agreement with the normal. The day was mostly fine in London, and the temperature rose to 65deg.

WEDNESDAY (October 3rd).—The weather was generally very fine, and a decided fall of temperature occurred in most parts of the country. Rain was measured in the morning nearly everywhere as the result of the fall since the preceding day; but the amounts were mostly small. Thunder and lightning had occurred over the Northern parts of England and Wales. Tuesday night was cold over the Northern and Western portions of the kingdom, the thermometer falling to within a few degrees of the freezing point at several stations. It was only in the South of England that the midday temperatures touched 60deg., and at many places in the North the readings throughout the day were below 50deg. The day was very fine in London, and the highest temperature was 59deg.

THURSDAY (October 4th).—A storm area had arrived on our west coasts from the Atlantic, and gales were experienced in many parts of the British Islands. The disturbance was apparently travelling to the northward, but dull and rainy weather had spread over the entire country. Very heavy rain was measured in the morning at several of the western stations, as the result of the fall since the previous

day, and at Roche's Point the amount in the twenty-four hours exceeded an inch and a-half. Frost occurred in the screen in parts of Scotland during Wednesday night, and there was a ground frost in the English midlands. Rain fell heavily for some hours in London during the afternoon. The exposed thermometer on the grass registered two degrees of frost in the southern suburbs early in the morning, but during the day the shade temperature rose to sixty-two degrees.

FRIDAY (October 5th).—Sharp showers were experienced in most parts of our islands, and the weather continued very unsettled. Rain was measured in the morning, as the result of the fall since the previous day, over the whole kingdom, and at several places the amounts were large. Thunder and lightning occurred in the South of Ireland in the morning, and lightning was seen in other parts of the country during Thursday night. The midday temperatures rose to about sixty degrees in the South of England, but at the North-western stations the readings scarcely touched fifty degrees. The winds were south-westerly, and they were strong at many places on our coasts. The day was showery in London, but the temperature rose again to sixty-two degrees.

SATURDAY AND SUNDAY (October 6th and 7th).—Weather of a varied character was experienced during the two days, the southern and eastern districts being under the influence of an anticyclone situated over the Continent, and the rest of the kingdom affected by cyclonic disturbances from off the ocean moving up the western coasts. Fresh or strong southerly to westerly winds were therefore experienced generally, and on several sections of the north-western coasts gales were felt each day, locally about the Irish Sea rather severe. Fair to very fine dry weather prevailed in most parts of England, while in the west and north the conditions were very changeable, with frequent, and in many places heavy, rain. With the wind in the mild quarter, temperature remained above the normal practically everywhere, many of the night values being in the fifties, and the day maxima in the sixties.

FARM PROSPECTS.

Aberdeen.

Harvest work is progressing fairly well. Last week was very suitable for the work, and a great deal of crop was put into the stook, and in the earlier districts, where crops were ready for carting, leading was carried on briskly. The crops generally are not to bulk so well as at one time expected. Clean land in many instances is very deficient where under oats. Where barley has been grown on that break, which is often the case, the bulk is better, and I fancy the financial results also will be better. As yet I have not heard many farmers speak of threshing. I think well-ripened oats will do pretty well, but I fear barley will not be up to the standard weight of grain, and in all probability it will be deficient in colour on account of the wet and sunless season which has been experienced in this county. Turnips are to be a light crop, and are setting too early, indicative of early maturity and a light carting crop. Unless farmers are prepared to use

Artificial Feeding Stuffs

on an extensive scale, they must stock lightly during the winter months. The county continues to keep free of disease among the herds and flocks, and it is to be hoped that the strenuous measures adopted in the south will be the means of preventing the disease getting a hold in the north. When foot-and-mouth disease was rampant in the county last time—now a good many years ago, fortunately—farmers suffered incalculable loss, and the business of buying and selling stock was much paralysed, thereby causing great inconvenience to all interested in agriculture. During the past fortnight I have heard of many complaints of disease among potatoes in the field. The quality is only middling, and the tubers poor in the run, meaning a remarkably poor crop of very indifferent quality of potatoes.—J. B. (October 2nd).

Bucks.

The dry weather and frosty nights have sent the keep in the pastures away very fast, and roots and green crops have not done so well as they would have done if the weather had been showery. The arable land ploughs up very dry, and no rye or vetches have been put in until the last few days, and then too dry.

Rain is Wanted

to enable planting to be got on with. Wheat does not make so much money as it did. Store sheep are dear, the prospects of the root crop having made them so. Not much thrashing has been done until lately. We now hear much complaint of the yield of wheat, and the few samples of barley that have been shown appear to be of middling quality mostly.—J. T. (October 2nd).

Devonshire.

The harvest has been good and conducted at small cost. The drought has told on the root crops, and ground so hard that team labour on the farm and preparations for future crops backward. The pastures very bare, and keep short. Fruit crops abundant. Stock healthy. The lifting of potatoes and mangolds will soon begin, but rain required very badly, that cultivation for wheat may proceed.—G. H. (October 3rd).

Glamorganshire.

The month of September having been beautifully fine, with the exception of one or two showers, has enabled the later harvest to be gathered in good condition, and the corn stubbles to be worked and cleaned. To be able to accomplish this latter task satisfactorily in the autumn gives a comfortable feeling to the farmer of arable land, who can reconcile his mind to the fact that he will not have much work to do to the land for roots next spring. Grass keep is not so plentiful as it was in the beginning of September, but the showers of the last few days have stimulated its growth a little.

Roots.

It has also helped to wash the mildew off the swedes and turnips, which had appeared to a certain extent. Swedes on the whole may be considered a fairly good crop, also mangolds, and although there were rumours of potato disease some time ago, the tubers turn up generally in good condition. The yields from threshings of wheat and barley have proved disappointing, and the barley is deficient in good colour from a maltster's point of view.—C. J. S. (October 4th).

Nottinghamshire.

The weather in North Notts during the past week has been somewhat variable in characted, with a lower temperature. The showers which have fallen were badly wanted, as the land was hard and dry, making ploughing of clover leys and stubbles rather stiff work. Many have been taking advantage of the spell of dry weather by lifting their potatoes and doing what thrashing that was required. The yield of corn, however, proved to be

Very Disappointing and Poor,

compared with last year; below an average, even at its best. The potato crop, especially the early varieties, has suffered much from disease, and at present appears very largely a failure, but it will only be after raising and picking the tubers that the exact amount of loss by disease can be known. Roots and pastures now look luxuriant, and stock are doing well thereon.

Mangolds

are an exceptionally good crop, and common turnips of late have grown remarkably well. Manure carting has been done with a minimum amount of horse-power owing to the dry weather, but labourers are still very scarce hereabouts. The preparation of the fallows for the reception of seed wheat has been proceeded with under very favourable conditions; in fact

Wheat Drilling

will commence next week. Many apples were blown off the trees during the storm of wind last week, and there is an abundant crop of all kinds of fruit which is still fetching a wretchedly poor price. The fruit is generally smaller than usual, but as a whole the crop is a good, fair sample of an average one. We are spared the worry and bother of an election contest in Bassetlaw, the late member being returned unopposed, whereas over the boundary farmers are fairly in the throes of the election, striving to do their level best to return the member which will help them in Parliament.—AGRESTIC (October 5th).

North Wilts.

The summer we have had this year of more than usual brilliancy and duration seems now to have come to a close. If the crops of cereals have scarcely been up to the usual average, those of hay in this district have been in quality and quantity very satisfactory. Although more rain would have been useful for the pastures, the stock on the whole have done well, and the prices have not been much to complain of. Among the troubles and trials are those of scarce and dear labour, which it is hoped in this district, as the railway works approach completion, may be lessened.—(October 5th).

Shropshire.

Heavy showers of rain falling, stopping all out-door work. It is well it did not come a week or two ago, but there is much fruit still on the trees. We are now hoping the weather to take up again. Barley was thrashed with good yield, about seven bags per acre, but it grew on highly manured land. Temperature has fallen to 54 degrees; barometer 29.7. Ploughing ley for wheat is carried on on this dry land; the wet has helped the work. Our flocks of sheep have not escaped the maggot-fly.—J. G.

Staffordshire.

There are fairly good prospects on the farm, both with respect to work on arable land and as regards keep for live stock. With the coming of colder weather there is naturally a check in the growth of grazing cattle, and also in the yield of dairy cows. Additional food in the shape of corn and cake should now be given, although pastures are for the time of year well furnished with good grass. Nothing is more useful during the first spell of cold in autumn than a little dry fodder, preferably old hay. Arable land still continues dry, and cultivation of stubbles in which the season has encouraged the growth of couch and other weeds has been pushed forward in favourable weather. In several respects the

Present Condition of Autumn Crops

is very decidedly better than in two preceding years. In place of patchy and diseased turnips noticeable at the corresponding period of 1898 and 1899 we have now crops of swedes and other turnips which give good promise of a crop of healthy roots. And in place of a thin and weak plant of young seeds in the stubbles, we have the fullest and strongest bed of clover for many years past.—T. C. S. (October 4th).

Foreign Prospects.

FRANCE.—According to the returns of the Minister of Agriculture, the wheat crop this year equals 37,500,000qrs. (by measure), compared with 44,160,000qrs. and 44,050,000qrs. in two previous years. This discrepancy is apparently regarded with equanimity by our neighbours, who realise that considerable reserves remain over from former crops, and, should there be any likelihood of shortage, it can be dealt with as the occasion arises.

BELGIUM.—Fine weather keeps farmers busy on the land, and in Holland farmers are busy finishing autumn sowings under favourable conditions.

GERMANY.—In the interior rain is wanted, as the shallow water in the rivers is impeding traffic; otherwise weather is seasonable.

SPAIN.—The sowings are being effected in the Two Castilles and Navarra under favourable auspices. The wheat harvest in Castilla la Nueva and Leon has proved an abundant one.

ITALY.—The rainfall has been most beneficial to the already sown fields, but fine weather is now needed for rice cutting and the vintage.

HUNGARY.—The continued absence of rain has militated against the preparation of the fields for the season's sowings. Budapest reports quiet trading in wheat for consumption, and only moderate demand for distant delivery.

ROUMANIA.—According to official returns the wheat crop produced 6,842,000qrs., against 3,158,000qrs. in 1899. Barley yielded 1,766,000qrs., compared with 550,000qrs. The outlook for the maize crop is satisfactory, and taken altogether it appears probable that Danubian grain will be much in evidence this year in Western Europe.

RUSSIA.—In Black Sea ports there is an improved export demand and prices are hardening. In Azov ports supplies come forward in sufficient quantities to meet shipping inquiry, but business is hampered by the high range of steam freights. Frost is reported in eastern districts, the rainfall has been slight, and altogether insufficient in Southern and Black Soil governments.

ASIA MINOR.—Weather continues very favourable for the ingathering of the last crops, but rain is now much desired for preparing the fields for the autumn sowings.

UNITED STATES.—The *Cincinnati Price Current* says that the wheat crop and its trade features have not essentially changed. Seeding is progressing under conditions generally favourable.—*Dornbusch.*

Addingham Autumn Fair.—The annual fair for the sale of sheep and lambs at Addingham was held on Tuesday. There was a good attendance, and a large number of sheep and lambs were on offer. The prices obtained were higher than last year. Half-bred ewes made 38s. to 42s.; Lonk ewes, 23s. to 30s.; Scotch ewes, 17s. to 22s.; Cheviot ewes, 20s.; lambs, 19s. to 24s.; and Scotch wether lambs, 12s. 6d. each.

Bandon Fair (co. Cork), which took place on Wednesday, was a large one, and a good demand prevailed for all classes of cattle in condition. Prices: Calves, second class, £4 10s. to £4 12s. 6d.; third class, £3 to £3 15s. Yearlings, first class £7 10s. to £8 10s.; second class, £7 to £7 5s.; third class, £4 12s. 6d. to £6 5s. Two-year-olds, first class, £10 5s. to £11 10s.; second class £9 to £9 10s.; third class, £7 12s. 6d. to £8 5s. Springers, first class, £14 5s. to £17, second class, £12 to £13 15s.; third class, £9 to £11. Lambs, second class, £1 to £1 5s.; third class, 15s. to 16s.; over twelve months and under twenty-four months old, first class, £1 17s. to £2; second class, £1 13s. to £1 15s.; third class, £1 9s. to £1 10s.

CORN MARKETS.

LONDON.

Mark Lane, Monday.—Malt : Very little doing. Barley : Grinding declined 6d per qr, a fair demand for malting. Wheat was about the same as last Monday. Oats in buyers' favour. Maize declined 3d to 6d per qr. Flour firm.—NIXON, GOWER AND CO.

Mark Lane, Wednesday.—New English wheat was in a shade better supply, but holders were not pressing either here or on the country exchanges. Fine white rules up to 33s, and red of similar sample 32s per 63lb delivered. American descriptions maintained, and white fairly plentiful. Flour unaltered, although to sell consumers would no doubt receive any little advantage. The London Millers' Association kept prices on a par with last week's advance. Sellers of grinding barley were not so firm in their demands, and by the close of business Persian was perhaps 3d cheaper since last Monday. Oats, although no lower to-day, were easy at the recent decline, and supplies are plentiful at present, both of American and Russian. Maize unaltered.

Mark Lane, Friday.—The attendance continued scanty throughout. New English wheat unaltered, and in slow request, although not pressed. Fine white, 33s ; and red, 32s per 63lb delivered. American whites continue fairly plentiful. Despite a slow consumptive demand for flour, quotations were no lower since last Wednesday. American first patents quoted at 26s to 27s ; second ditto, 24s to 25s. First bakers, 21s to 22s ; and second, 19s to 20s. Hungarian up to 30s 6d. Oats steady at the recent decline for American, and Russian tends more in sellers' favour. American mixed clipped quoted at 14s ex ship, 14s 3d ex quay ; white clipped in these positions, 15s 3d and 15s 6d, 40lb. Flat maize, although not too plentiful, is 6d lower on the week, being steady to-day at the reduction. Mixed American, 20s 6d ex ship, 20s 9d ex quay ; Odessa, 25s 6d ex quay. The market for beans and peas displayed no material change, except that for the latter.

COUNTRY.

Ashford, Tuesday.—Wheat fair supply, about 6d to 1s cheaper. New oats, some lower prices even than 12s being quoted. The supply of malting barley quite equals demand. Flour, 24s ; seconds, 26s ; households, 28s ; whites, 29s.

Aylesbury, Saturday.—The wheat trade was not so good, and occasionally at 6d per qr less money on the week. Barley, oats, and beans unchanged. Wheat, 28s to 30s per imperial quarter.

Banbury, Thursday.—Wheat, red (new), 28s 6d to 30s 6d per qr ; ditto, ditto (old), 31s to 32s 6d per qr ; barley, 24s to 34s per qr ; beans (new), 29s to 30s per qr ; beans (old), 33s to 34s per qr ; oats, 17s to 19s per qr. Wheat a quiet trade at about last week's rates.

Boston, Wednesday.—Wheat, 28s to 28s 6d ; grinding barley, 23s to 24s ; malting barley, 26s to 30s ; oats, 15s to 17s ; beans, 29s to 30s ; maize, 23s to 25s.

Braintree, Wednesday.—Small supply of wheat and a quiet trade, reds making from 30s up to 33s, and white 34s to 35s per qr. More barley showing, and a better trade. Middle qualities made from 24s to 30s ; better samples up to 36s.

Bristol, Thursday.—Trade has been quiet since our last. A small attendance at our to-day's market. Wheat, 6d lower ; foreign, a turn easier. Grinding barley, maize, and oats, without change. Flour dull with little doing.—GRACE BROTHERS.

Cambridge, Saturday.—During the week the corn trade has been quiet and steady. Supplies still continue small, and farmers successfully resist any reduction in price. At this market to-day a small supply of wheat met with a dull trade, and prices were scarcely so firm as last Saturday. Red from 29s, and white up to 31s per 504 lb. Barley in good supply, and, good lots being scarce, also found a better demand.

Canterbury, Saturday.—Wheat, in short supply, sold at full prices. A little more inquiry for malting barley. Oats dull. Ruling prices :—White wheat, 31s to 33s ; red 30s to 32s; malting barley, 28s to 35s ; grinding, 21s to 24s ; white oats, 18s to 21s ; black, 16s to 20s ; peas, 30s to 32s ; tick beans, 30s to 32s ; mazagans, 28s to 29s ; flat maize, 22s to 23s ; round, 27s to 28s per quarter. Winter tares, 7s 6d to 7s 9d per bushel.

Chester, Saturday.—There was a freer trade in English grain, with very little alteration in the values of wheat. Old oats, in good demand, were dearer. Quotations : Wheat, new, 4s 1d to 4s 3d ; old, 4s 5d to 4s 6d per 75lb. Grinding barley, 3s to 3s 6d per 64lb. Oats new, 2s 2d to 2s 4d ; old, 3s 2d to 3s 7d per 46lb. Indian corn, 11s 3d to 11s 9d per 240lb.

Chichester, Wednesday. — Although there was a fair attendance, the tone of business was quiet. Wheat was rather inactive, and no change occurred in prices. Feeding stuffs steady, with a fair consumptive demand. Malting barley and flour unaltered.

Colchester, Saturday.—Wheat, moderate supply, sluggish trade at about last week's prices. Barley, supply very moderate, good samples in demand and made full prices. Beans and oats fully firm.—FRANCIS AND CO.

Dorchester, Saturday.—Good attendance. English wheat quiet at last week's prices. Foreign easier. Large quantity of malting barley, most of medium quality, but only the best was wanted. Grinding barley firm.

Dover, Saturday.—White wheat, 30s to 32s ; red, 28s to 33s. Barley, malting, 26s to 34s ; grinding, 24s to 26s. Oats, white, 17s to 20s ; black 14s to 17s. Peas, 30s to 31s. Beans, 30s to 32s.

Glasgow, Wednesday.—To-day there was a small attendance at our corn exchange. Wheat and Flour dull and unchanged, with a slightly easier tendency. Indian cord still scarce, and held for late rates. Barley scarce on spot, and held for full prices. Oats steady. Beans and pease unaltered. Oatmeal steady.—GIBSON AND CLARK.

Glasgow, Wednesday.—Wheat and flour dull and unchanged, with a slightly easier tendency. Indian corn still scarce and held for late rates. Barley scarce on spot and held for full prices. Oats steady. Beans and barley unaltered. Oatmeal steady.

Hereford, Wednesday.—Supplies of English grain considerable. English wheats a turn in buyers' favour. Barley very dull and hard to sell, with a tendency towards lower prices. Oats firm, at recent rates. Maize slightly easier on the week ; no change in the value. Vetches scarce. For beans and peas moderate demand. Quotations (wholesale) : Wheat, white, 3s 6d to 3s 8d per bushel ; red, 3s to 3s 9d ; oats, 2s 3d to 3s ; maize, 2s 8d to 3s 2d ; vetches, winter, 4s to 6s ; and spring, 3s 6d to 5s.

Ipswich, Tuesday.—Small supply of wheat, trade slow, at barely last week's rates. Reds new, 31s to 32s ; old, 32s 6d ; white, 34s. Fair supply of barley, fine samples in request at from 34s to 36s ; other descriptions slow of sale at from 26s to 30s. Oats slow. Maize quiet. Beans and peas unaltered.

Leeds, Tuesday.—There has been less animation in the wheat trade during the past week, and prices have come back 3d to 6d per qr from late extreme figures ; the tone, however, remains healthy ; the demand is rather restricted. Malting barley unchanged, with a more general inquiry. Maize 3d lower. Beans and oats unchanged.—DUNNS AND CO.

Leeds, Friday. The demand for both English and foreign wheat continues of a retail character, and Tuesday's easier prices are not realised except for the best description. Malting and feeding barley quiet and the turn lower. Beans, peas, oats, maize, and flour all firmly held.

Leicester, Saturday.—Fair attendance, with moderate supplies of home-grown wheats, which sold steadily at 29s to 33s per 36 stone. Old oats firm. New quiet. Barley in fair demand.

Lincoln, Friday.—Good supply of new wheats, with a steady trade, at about last week's rates, viz., 28s to 30s. Foreign quiet. Large show of barley, mostly common, prices, 27s to 32s. Oats dull at slightly reduced rates. Maize, beans, and peas unaltered.

Liverpool, Friday.—Wheat quiet, small business. Kansas wheat ½d lower ; other sorts unchanged. Flour firm, with a rather better demand for foreign. The Liverpool Millers' Association make no change in the minimum price of bakers'. Maize has a good consumptive demand for mixed and yellow American, and firmly held at 1d to 1½d over last Tuesday. European and Plate have a steady trade and occasionally ½d lower. Barley has a fair inquiry for malting at unchanged prices. Feeding steady trade at quotations. Beans are slow and favour buyers at last market day's figures. Peas have an improved inquiry at ½d per cental decline for Canadians, other sorts unchanged. Oats firm, but quiet at last market day's full prices for English. Foreign has a better inquiry at unchanged prices. Oatmeal steady, with only a moderate business at about late rates. Oil-cake firm with a fairly good demand ; prices unaltered.—SEGAR AND TUNNICLIFFE.

Maidstone, Thursday.—Our wheat trade to-day was firm, and 6d over per qr from last week's prices. Barley, if of good quality, sells well, and the full rates of previous day maintained. Oats are a trifle easier in cost. Maize a slight decline. Beans and peas no change. Winter tares are on the run down. Not any alteration in rye, hemp, brank, sergo, or millet.

Newark, Wednesday. — Wheat repeated last week's prices. Barley a dragging trade, except for the best samples. Oats and beans at rather lower prices.

Newcastle-on-Tyne, Saturday.—Buyers of wheat at our to-day's market had a slight advantage in prices. Maize firm and favoured sellers. Barley, peas, and beans without quotable change. Oats firm for fine qualities ; common sorts 6d per 336lbs easier. Fl our unchanged. Showery weather.—JOSEPH POLLARD AND CO.

Newcastle-on-Tyne, Saturday.—The wheat trade is disappointing to factors, and if anything rather easier. Flour remains unchanged. Malting barley goes badly for sellers, but may improve. Oats, certainly, better for buyers, the new samples coming in freely. Beans, peas, and maize, no change. White wheat, English, 28s to 32s ; ditto foreign, 31s to 33s ; red wheat, English, 28s to 30s ; ditto foreign, 29s to 31s per 504lb ; malting barley, English, 24s to 28s per 448lb ; oats, English, 21s to 27s ; ditto foreign, 17s 6d to 19s 6d per 336lb ; beans, 31s to 32s 6d ; peas, 30s to 32s per 504lb ; maize, 22s to 23s 6d per 480lb ; flour, 22s to 27s per 280lb ; hay, 1899 crop (old), 80s to 90s ; crop 1900, 75s to 80s per ton ; clover, 1899 crop (old), 105s to 110s ; crop 1900, 90s to 100s per ton. Weather unsettled, showery.—GEO. W. WATSON AND CO.

Northampton, Saturday.—Our corn market manifested no fresh feature ; dulness and inactivity was general as regards buying and selling. Supply and demand and prices were about as heretofore :—White wheat, 31s to 33s 496lb ; red, new, 27s to 30s ; red, old, 30s to 32s ; malting barley, 26s to 30s ; grinding ditto, 22s to 24s ; oats, 17s to 22s. ; old, 24s ; beans, 28s to 30s ; old, 32s to 35s ; flour, 23s to 27s, 280lb.

Norwich, Saturday.—At our market to-day wheat was rather in buyers' favour. Barley is now being freely offered, the condition being much improved and prices ranged from 26s to 30s per qr for average sorts. Rough and boisterous weather has prevailed during the past week with heavy showers of rain. Wheat, red, 30s 6d to 31s 6d per qr, weight 63lbs. per bushel imperial. Corn Inspector's return for the week ending October 1st, 1900 :—Wheat, 3,764-5, 28s 11½d, barley, 4,362, 27s 2½d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat in less supply, but business passing was slow at previous currencies. Barley, plenty offering, the bulk of which of inferior quality and condition. Such were slow of sale, and irregular prices, while fine dry parcels commanded full rates. Oats in moderate supply and values supported. Beans unaltered in value.—ROBERT HUBBLE.

Oxford, Saturday.—Wheat slow trade. Oats, 29s to 32s. Barley in demand for best qualities, but inferior very slow sale.

Peterborough, Saturday.—The supply of wheat to-day has been small, and trade was flat, but purchases could not generally be made for less money. Barley offered freely, and all but the best samples were lower. Oats made late rates.—THOMAS HILL AND SON.

Plymouth, Thursday.—There was a small attendance at our Corn Exchange to-day. Electioneering seems to have stopped all signs of business. Wheat alone remains firm, while barley, maize, and oats are unchanged.—ORLANDO DAVIS AND CO.

Reading, Saturday.—The wheat supply of to-day proved considerably above the average, and business was more bright, although prices were slightly lower than last week. Old parcels of wheat sold readily at 30s to 34s per qr ; and new, 28s to 32s per qr. Other kinds of corn, including barley and oats, experienced a steady demand at recent currencies.

Ripon, Thursday.—There are a few inquiries for seed wheat from farmers. Malting barley is rather dull. The attendance is below the average Wheat, English (new), 28s to 30s ; ditto (old), 31s 6d to 32s 6d ; ditto foreign, 31s to 35s ; barley, malting, 24s to 28s ; ditto, grinding, 23s to 24s ; oats (old), 25s to 26s ; ditto (new), 17s to 19s ; round maize, 26s to 27s 6d ; ditto, flat, 23s per qr ; beans (old), 1s per stone ; bran, £5 to £5 5s per ton.

Romford, Wednesday.—Wheat trade was slow at last week's prices. A fair supply. Red wheat made 30s to 31s, and white wheat 31s to 32s 6d per qr.

St. Neots, Thursday.—Poor attendance and a very small supply of wheat, but prices showed no improvement, 29s to 30s being the value of the new crop. Fair show of barley, some samples being of good quality, and prices ranged from 26s to 34s.—ELGOOD AND SON.

Salisbury, Tuesday.—There was a moderate attendance of buyers, and a fair supply of grain. Wheat met a slow trade, and prices were 6d per qr lower than last week. Barley was in fair demand. Oats sold at last week's rates. Beans were firm. The quotations were :—Wheat, old, 32s to 36s ; ditto new, 28s to 32s ; best samples of barley, 32s to 36s; ditto secondary, 26s to 29s ; oats, new, 16s to 20s ; ditto, old, 20s to 23s ; beans, 32s to 36s.

Scarborough, Thursday.—A good show of barley, which made 24s to 28s ; wheat, 28s to 29s 6d ; small supply of both black and white oats ; black made 16s 6d to 17s 6d ; and white, 17s 6d to 18s 6d.

Sheffield, Tuesday.—There was a moderate attendance, and trade in wheat was slow at last week's prices. American maize was 3d cheaper, small 6d dearer, and beans 3d per qr more. Quotations :—Wheat, white, 33s to 33s 6d ; red, 32s to 33s ; new, 31s to 32s per 504lb ; oats, old white, 26s ; ditto old black, 22s ; new, 18s 6d to 20s per 335lb ; peas, grinding, 28s to 29s ; ditto blue, 53s to 70s per 504lb ; beans, Egyptian, 33s ; ditto, English (new), 31s 6d to 32s per 532lb ; barley, grinding, 23s 6d to 24s 6d ; ditto malting, 27s to 35s per 448lb ; Indian corn, small old, 28s to 29s ; ditto American mixed, 23s to 23s 6d per 480lb.

Spalding, Tuesday.—At the corn market there was a drop of 6d per qr in the price of wheat, which sold at 28s 6d. Oats were also down 6d per qr, making 15s to 17s. Barley was a slow trade at 1s less money. Beans and peas and other articles unchanged.

Stockton, Wednesday.—There was a fair quantity of farmers' wheat showing of good quality, which made 29s to 30s per qr. During the week the trade in foreign wheat has been quiet; and prices show no change. Oats and maize unaltered. A good show of malting barley, which made 24s to 27s 6d per qr.

Sunderland, Saturday.—Farmers as yet are offering their grain sparingly. Wheat quiet, unchanged, and no alteration in value of barley or oats. Arrivals, coastwise : — Barley, 391 qrs. Foreign nil.—E. AND F. RICHARDSON.

Taunton, Saturday.—Wheat, a quiet trade ; firm for best qualities, slightly easier for inferior. Malting barley, steady trade for best qualities ; inferior a little easier. All feeding stuffs steady, and unchanged.

Wakefield, Friday.—The constant changes in the American markets tend to unsettle the trade in this country and cause consumers to keep off forward purchases. Wheat meets a quiet demand to-day, last week's rates being maintained. No change in demand or prices of Yorkshire barley; south county qualities are held above buyers' views. Maize, beans, and oats slow.—DUNNS AND CO.

Wakefield, Friday.—There is an easier tone in English wheats to-day, and foreign maintains late rates, but the business doing in both is small. A fair supply of New Yorkshire barleys, and no trade of any importance has been done as yet. No alteration in feeding stuffs.—MICHAEL SANDERSON AND SON, LIMITED.

Wisbech, Saturday.—A scanty supply of grain. Wheat trade slow at 6d decline. Red, 29s to 30s ; white, 31s. Oats, new, 16s to 18s ; old up to 24s. Barley 25s to 28s.—JAMES FLETCHER.

Wolverhampton, Wednesday. — Very few people at market and business was quiet. English wheat, old, 13s to 13s 6d per 216lb ; oats, old, 15s to 16s ; new, 10s to 11s ; beans, old, 14s 6d to 15s 6d ; new, 12s 6d to 13s 6d per 196lb ; maize, 24s to 25s per 480lb.

Worcester, Saturday.—A quiet market for all kinds of grain. English and foreign wheats showed an easier tendency. Maize 3d and barley 6d per quarter lower. Oats and beans sold slowly at about late rates. Wheat, white, 29s to 31s ; red, 28s to 30s per quarter.

Worksop, Wednesday.—Good attendance, large show of barley, and good show of grain, all round. White wheat, old, 30s to 33s ; red wheat old, 31s to 32s ; white wheat new, 28s to 29s ; ditto red, 27s to 28s ; best malting barley, 30s to 32s ; seconds, 28s to 30s ; grinding, 23s to 25s ; white oats, old, 24s to 26s ; black ditto, 22s to 24s ; white oats, new, 18s to 20s ; flat maize, 25s to 26s ; round maize, 28s to 29s per qr.

York, Saturday.—Wheat slow at last week's prices. Fine white, 29s 6d to 30s 6d ; red and mixed, 28s 6d to 29s 6d per qr of 36 stone. Good samples of malting barley sold readily at last week's prices, fine 27s to 29s ; good, 25s to 27s ; ordinary, 23s to 25s per qr of 32 stone. Oats without change, and rather scarce ; old, 23s to 25s ; new short, 17s to 19s ; blacks, 17s to 18s per qr of 24 stone. Rye, 7½d ; old beans 11d per stone.

FOREIGN.

The Antwerp wheat market has shown rather a better tendency, and prices have, if anything, been the turn in favour of sellers. Another official estimate as to the French wheat crop has just appeared. It shows a total of 109,025,950 hectolitres, and it supports the conclusion that France will have to import wheat this year to make good her deficit—a deficit of little importance probably, but still a deficit. French farmers are anticipating that this will have some effect upon prices, and that they will become more satisfactory to growers without at the same time sensibly increasing the cost of bread. For the present, wheat quotations have not advanced in France, notwithstanding the reserve shown by holders in regard to supplies ; the milling trade has made strong efforts to check any decidedly upward tendency, and thus far it has succeeded in doing so. Last week's sales of wheat at Marseilles amounted to 8,000 quintals. Wheat quotations have shown little change at Paris. Wheat has been dull and weak at Berlin ; disposable wheat has also barely supported previous rates at Dantzic. There are complaints of drought in Hungary ; autumn wheat sowing has been delayed in consequence of this difficulty. The Odessa wheat market has exhibited a firm tone. The quantity of wheat now on route for Europe is returned at 1,120,000qr, as compared with 1,280,000qr at the corresponding date of 1899. The total of 1,120,000qr is made up as follows :—France, 100,000 ; Belgium, 295,000qr ; Holland, 315,000qr ; Germany and the North, 95,000qr ; and Italy, Spain, &c., 305,000qr.

Hamburg, Saturday.—Barley market remains quiet here, and buyers are hard to find, although holders are disposed to allow a reasonable reduction in price ; some fine samples are shown, and the selection is really good, but the best lots are held firm, and buyers cannot make up their mind to pay the extreme figures asked for such lots.—FRANCIS M. TH. DUHNE.

Hamburg, Saturday.—Weather seasonable. Market more quiet than usual at this time of the year. The rich crop of fruit in Germany tells upon the consumption of bread-stuff. The imports during the week amounted to :—4,127 tons wheat ; 4,158 tons rye ; 7,316 tons barley ; 10,520 tons maize. New German wheat, particularly dry Saale, was in fair demand and sold for export at 28s 6d to 29s ; good Holstein and Mecklenburg fetched 28s 6d, common Holstein, 27s to 27s 9d per 504lb, f.o.b. Hard Winter No. 2 and fine River Plate is held at 29s 3d to 29s 9d per 480lb. Rye quiet, 9 10 15. South Russian is offering at 22s 9d per 480lb. c.i.f. Fine Saale barley on the spot has been taken by our brewers and for England at 36s to 36s 6d, finest at 39s 6d, 40s per 448lb. f.o.b. Good Saale is offering at 32s, 34s. Good Bohemian is selling at 34s to 35s, fine at 35s 6d to 37s per 448lb. f.o.b. Feeding barley quiet, 60-61 Ko South Russian is offering at 18s 3d per 400lb. c.i.f. There is but little actual demand for maize, the business done being chiefly for covering purposes. For September steamer parcels 21s has been paid. October, 20s 6d. November, 20s. February-March, 18s 9d, 19s per 480lb c.i.f. Hamburg.—JOHN TATLOCK.

POULTRY AND PROVISIONS.

Smithfield, Saturday.—Demand ruled fairly firm for poultry supplies, however, were heavier. Quotations: Fowls, Yorkshire, 2s 3d to 2s 9d; Essex, 2s 6d to 3s; Boston, 2s to 2s 3d; Surrey, 2s 9d to 3s 6d; Sussex, 2s 6d to 3s; Welsh, 1s 9d to 2s; Irish, 1s 6d to 1s 10d; turkey (cock), 8s 0d to 9s; hen, 4s 6d to 5s 6d; ducks, country, 2s 3d to 2s 9d; pigeons, Bordeaux, 9d to 11d; feathered, 7d to 9d; wild rabbits, 1d to 1s; tame, 1s to 1s 3d each; Australian, 7s 6d to 9s 6d per dozen; pheasants, 3s 6d to 5s 6d; partridges, young, 3s 6d to 4s; old, 1s 10d to 2s; grouse, young, 6s to 7s; old, 3s 9d per brace; hares, 3s to 3s 6d; leverets, 1s 9d to 2s 9d; widgeon, 1s 9d; pintail, 10d to 1s; teal, 8d to 10d; golden plover, 7d to 9d; black, 4d to 5d; venison, haunches, 16s to 18s each; fore-quarters, 5d per lb.

Berkeley, Wednesday.—There was a good supply of single Gloucester cheese brought in, which sold readily at prices ranging from 54s to 58s per cwt.

Glasgow Wednesday.—Arrivals smaller than lately but fully ample for the demand, and sellers willing to meet buyers; prices range from 54s to 64s per cwt. Nothing doing in Canadians. Others quiet.

Liverpool, Saturday.—Bacon has further hardened in value under the influence of strong cable advices and good consumptive demand, and the market closes firm. We quote to-day, choice Cumberland cut, 20-22lbs, 55s to 56s; Wiltshire, 48s to 51s 6d; 32-38lb, 45s to 50s; long middles, rib-in, 18-22lbs, 50s to 56s; clear bellies, 14-16lbs, 49s to 52s 6d; 18-20lbs, 48s to 52s; Staffordshire cut (lean on), 35-40lbs and Birmingham cut 33-38lbs, 46s to 48s; clear Staffords (lean off), 40-44lbs, and Yorkshire cut, 40-45lbs, 44s 6d to 46s 6d; singed Wiltshire, Canadian, 45-50lbs, 58s to 63s; American, [illegible] short clear backs, 12-16lbs, 44s to 46s; 16-20lbs, 44s to 45s; fat backs (export), 40s to 42s; long clear middles, 35-40lbs, 45s to 46s; 40-45lbs, 44s to 45s; short clear middles, 45-50lb, 42s 6d to 43s 6d; shoulders, square cut, 12-14lbs, 37s 6d to 42s; 14-16lbs, 36s to 40s; New York cut, 11-13lbs, 33s to 34s per cwt. Hams are also more firmly held, and with increased inquiry there is some little improvement in prices. We quote choice long cut, 8 to 12lb, 48s 6d to 54s; 14 to 16lb, 48s to 53; short cut and AC, 10 to 12lb, 47s 6d to 52s; 12 to 14lb, 46s to 52s; 14 to 16lb, 44s to 48s per cwt. Lard is again dearer and in good demand. We quote pails and kegs, 40s to 41s; prime Western (in tierces), 39s to 39s 6d per cwt. Beef remains quietly steady. We quote extra India mess, 70s to 75s; Plate and packet, 65s to 67s 6d per 304lb. Pork firm but in moderate request. We quote finest prime mess, 70s to 75s per 200lb. Cheese.—The market has been quiet, demand being moderate, but with a firm undertone there is no material alteration in prices. We quote finest Canadian, coloured, 54s to 54s 6d; white, 53s 6d to 54s; States coloured, 53s to 54s; white, 52s to 53s. Second qualities full cream sell readily from 44s to 51s per cwt. Butter shows no alteration on the week; there is perhaps a little more inquiry for finest qualities. We quote finest Canadian creamery, in boxes, 98s to 102s; States, 92s to 98s; finest ladies and imitation creamery, 78s to 84s; finest Danish, 106s to 114s; Irish creamery, 100s to 105s; Cork firsts, 91s; seconds, 83s; thirds, 77s per cwt.—HODGSON BROTHERS.

Newport, Wednesday.—Supply good, and fair attendance of buyers. Quotations:—Caerphillies, 50s to 56s per cwt; fancy dairies, 58s to 61s; single Gloucesters, 50s to 54s; doubles, 58s to 60s; truckles, 58s to 60s; Cheddars, 58s.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Good supplies of vegetables were offered, but the demand was very slow. Potatoes were in better request. A good supply of fruit met a fair sale. Greenstuffs:—Cabbages, 3s 6d to 4s; beetroots, 2s 6d per tally; cauliflowers, 6d per dozen; spinach, 1s 9d per bushel; carrots, 2s 6d; turnips, 2s; parsley, 1s 6d; leeks, 3s per dozen bunches; celery, 12s to 14s per dozen bunches; horse-radish, 1s to 1s 3d per bundle; English onions, 4s 6d per cwt; Valencia, 6s 6d per case; Dutch, 3s 9d per bag. Potatoes: Beauty of Hebrons, 4s 6d; Early Regents, 4s; Snowdrops, 4s 6d to 5s; Up-to-Dates, 3s 6d to 4s per cwt. Fruit: English grapes, 6d to 1s 6d per lb; Denia, 3s to 5s per case; English apples, 1s to 4s; ditto pears, 1s 6d to 2s 6d per bushel; ditto Williams, 1s 6d to 2s per half-sieve; Californian, 4s to 7s per case; French Williams, 4s to 5s per crate; plums, 1s 6d to 2s; damsons, 1s to 1s 9d per half-sieve; English peaches, 2s to 6s per dozen; Valencia melons, 4s to 6s per case; pineapples, 1s 6d to 4s each; bananas, 5s to 9s per bunch; lemons, 8s to 18s per case.

POTATOES.

Borough and Spitalfields. Saturday.—Arrivals have been moderate. The trade has been steady, with prices for best samples slightly improved. Quotations: English: Beauty of Hebrons, 3s 3d to 4s 3d; Early Puritans, 3s 3d to 4s 3d; Snowdrops, 3s 3d to 4s 6d; Reading Giants, 2s 9d to 3s 0d; Professor Maerkers, 3s to 3s 3d. Up-to-Dates, 3s to 4s per cwt.

Magdeburg, Wednesday.—Absolutely nothing doing. The business in our home market is satisfactory, and every one possesses good prices this season, because the crop of Seconds is not good, and it must partly be replaced by new [illegible]. We are at present selling in England our "Excel" brand at 3s 3d per bag, f.o.b., Hamburg, nett cash, against B/L., for shipment within fourteen days, in lots of [illegible]. There is no better guarantee to be had here than each parcel passes under our constant personal control. Offers [illegible] for our "L" brand, 3s 9d above terms. This brand will advance before long. Potatoes: English, and even Scotch, are already travelling in our country, and also coming into market, as usually, so that it is very [illegible] stuff at a reasonable price. All farmers, and [illegible] persons, know already that "potatoes grow [illegible] soil." Almost all English buyers [illegible] with small dealers and [illegible] new purchase with reliable [illegible] reported in England. We [illegible] per cwt. per rail, per public; Magnum Bonum [illegible]. Potatoes: Magnum Bonum [illegible] per ton, f.o.b., Hamburg, for cash, against [illegible] shipment, if unsold.—R. WILHELM AND CO.

HOPS.

Canterbury, Saturday.—A [illegible] done during the week, but most growers decline to sell at present rates. Choice East Kent [illegible] and some exceptional [illegible] sold at £6.

Worcester, Saturday.—Picking [illegible] in this district, and the result shows that the crop was considerably [illegible] well under last year's growth. A [illegible] again shown. Best [illegible] medium [illegible] and [illegible] for less money.

Worcester, Saturday.—[illegible] be sold [illegible] values [illegible] the week ending [illegible] AND CO.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The season is in close accord with farmers' wishes, and the commencement of October has been as propitious as was the entire course of the preceding month. The record of September rainfall, as made by us, indicates a fall for the thirty days of 1·33 inches less than the mean :—

	1900.		1889-90.
January	2·75	....	1·85
February	3·81	....	1·53
March	1·10	....	1·54
April	0·72	....	1·69
May	0·98	....	2·00
June	2·73	....	1·94
July	1·20	....	2·58
August	3·06	....	2·38
September	1·01	....	2·34
	17·37	....	17·85

The close agreement of 1900 experiences with the average of the last twenty years is a good sign, and despite the dry September the land is by no means destitute of moisture. Some stations in September recorded nearly half an inch of rain, others a full two inches, but our London register gives a very fair idea of the general rainfall for Great Britain, though not for Scotland or Ireland. The showery weather of the 4th and 6th of the present month was not unfavourable to farmers, who are glad when the ground for October sowings is a little less hard on the surface than it is at present. The subsoil is in a good state – neither too wet nor too dry.

The tremendous rainfall between the banks of the Rhone and the straits of Gibraltar has been the meteorological event of the week. Spain will for the most part benefit agriculturally, but the vintage has been sadly interrupted, and the flooded rivers include such great streams as the Rhone, Garonne, Ebro, and Tagus.

The Russian crops are stated by our correspondents to be excellent and to be much in excess of what has been given as the probable yield in importers' lists in this country. We can only wait for further light on this difficult subject; the areas are so enormous in Russia that estimates are very untrustworthy if made from the survey of even a region as large as France. The high freights are keeping back the shipments, yet even with this impediment against them they are very considerable.

The British markets since October came in have been in buyers' favour for almost every staple except oilseeds. The large imports of breadstuffs, maize, and oats, the increase in the supply of barley on passage, and the interruption of trade by the elections, have all told against the position of holders of grain.

The imperial averages show the following changes: Wheat, 3d. decline on the month; barley, 1s. 9d. advance, and oats, 1s. 11d. decline. These alterations are due in the case of barley to the increased supply of malting samples, and in that of oats to the lower value of new grain to old and seasoned corn for horses. The slight change in wheat may be accepted as a real alteration, nor do new and old samples differ much in price from one another.

The rise of 1s. 3d. per sack on the month in town household flour was induced by a rise of 1s. to 1s. 6d. in the terms asked by American millers for those north-western kinds which have such an influence at Mark Lane, Glasgow, and Liverpool. Paris shows little change in flour prices from a month ago, and the latest notes from Mark Lane indicate a reaction from the September advance.

The influence of American wheat reserves, extending as it does to British, French, and Netherlands markets, makes the following return as cabled very well worth studying. These figures include Canada and California; not usually given in the weekly cable.

AMERICAN WHEAT STOCKS.

	1900.	1899.	1898.
1st January	12.6	6.97	9.1
1st February	11.8	7.1	7.0
1st March	11.5	7.0	6.2
1st April	10.8	6.7	5.2
1st May	10.6	6.3	4.2
1st June	9.6	6.4	4.0
1st July	7.5	6.5	3.5
1st August	9.0	6.6	3.2
1st September	8.8	6.3	2.8
1st October	10.4	8.0	2.8
1st November	—	10.2	4.7
1st December	—	11.7	6.4

The unit is *a million quarters*—that is to say, the return for October 1st, 1900, given as 10.4, is 10,400,000 qrs.

The following is a return, in round numbers, of London arrivals for the three months ending with Sept. 30. The large receipts of oats and flour will be specially noted.

THREE MONTHS' ARRIVALS INTO LONDON.

July 1 to Sept. 30.

Wheat,	qrs. 763,000	Malt,	qrs.	....	271,000
Barley,	,, 166,000	Tares,	,,	....	500
Oats,	,, 1,436,000	Lentils	,,	....	2,500
Beans	,, 16,000	Farmseeds	,,	....	41,000
Peas	,, 33,000	Flour,	brls.	....	1,200
Maize	,, 494,000	,,	sks.	....	1,934,000

The estimated requirements and supplies of breadstuffs work out about as follows :—

	Qrs.
A quarter's supply	1,540,000
,, wants	1,378,000
Surplus	162,000

London stocks, therefore, should show an increase of about 162,000 qrs. of breadstuffs. The actual increase revealed in the official returns issued on October 6 was 127,000 qrs. of wheat and 44,000 sacks of flour. If we reckon the flour as wheat we shall have 160,000 qrs. of breadstuffs actual increase. These figures witness to a fair average rate of food wants in London. The large receipt of oats has put 223,000 qrs. on to the stocks, but 166,000 qrs. of barley have not proved sufficient, and 35,000 qrs. in granary on July 1 have gone into use. The London stocks a.e as follows :

OCTOBER 1, 1900.

Wheat, qrs.	260,217	Malt, qrs.	1,741
Barley ,,	55,246	Tares ,,	330
Oats ,,	461,500	Rye ,,	686
Beans ,,	11,076	Linseed ,,	1,975
Peas ,,	6,821	Rapeseed,,	5,663
Maize ,,	66,754	Flour, sacks	408,000

The holdings of grain in the twelve chief ports are as follows: Wheat, 1,452,000 qrs.; flour, 814,000 sacks; maize, 418,000 qrs.; barley, 373,000 qrs.; oats, 635,000 qrs.; beans, 36,150 qrs., and peas 14,150 qrs. A few returns are sent up from the ports as "estimates, official figures not yet out," but it is not likely that the full particulars will introduce any material change.

As compared with a year ago our holdings of foreign oats are largely increased, those of foreign barley are reduced, and those of maize and of peas are much reduced. The ultimate figures for October 1, 1900, for wheat, flour, and beans are likely to coincide very closely with those for October 1, 1899.

The following quantities of grain are now on passage to the United Kingdom :—Wheat 1,900,000 qrs., flour 412,000 sacks, barley 600,000 qrs., maize 726,000 qrs., beans 11,000 qrs., peas 23,000 qrs., linseed 60,000 qrs., rapeseed 5,000 qrs., and cotton-seed 7,450 tons. The week's imports into the United Kingdom were as follows :—

Foreign wheat	460,000 qrs.
,, flour	202,000 qrs.
Total	662,000 qrs.
English wheat sales	164,000 qrs.
Total supply	826,000 qrs.
Total wants	567,000
Surplus	159,000 qrs.
Stocks, October 1, 1900	2,378,000
Stocks, October 8, 1900	2,537,000 qrs.

The imports of spring corn were :—

Maize	205,380 qrs.
Barley	165,000 qrs.
Oats	118,136 qrs.
Beans	4,236 qrs.
Peas	4,283 qrs.
Linseed	13,575 qrs.
Rye	12,000 cwt.

The market for maize has receded 6d. per flat corn, but round and yellow, though weakened in position by this retrogression, are seldom parted with for less than September's closing values.

Barley has receded 3d. per qr. for both Persian and Russian, while oats are depressed at nearly all markets. The trade in oilseeds continues to be marked by extremely high rates, which, however, may be modified by the new Egyptian cottonseed crop now being secured.

THE BALTIC.

Business opened at the Great Eastern Hotel on Monday last, and the temporary location was not found inconvenient. The week's trade has been quiet, and the following sales show a disposition to take a little less money for nearly all cargoes. Wheat; Argentine, 31s.; Hard Duluth, 32s. 9d.; Hard Winter, 30s.; Californian, 32s. 3d.; Victorian, 32s. 3d.; Azoff, 33s.; Roumanian, 31s.; Bulgarian, 30s.; Odessa Glinka, 31s.; No. 1 Northern, 32s. 6d., and fine Manitoba, 32s. 9d. Maize: American, 20s.; and Argentine, 21s. 3d. Barley: Azoff, 19s.; and Persian, 16s. 9d. Oats: Petersburg, 13s., and Canadian White, 15s. 3d. Linseed; Argentine, 52s.; and Calcutta, 60s. per qr.

The arrivals of grain and seed-laden vessels at ports-of-call for the week were 4 wheat (1 Adelaide, 1 Rosario, and 2 from California)—total, 4.

Since January 1, 1900, the total arrivals have been 260 wheat, 13 wheat and barley, 1 wheat and peas, 6 flour, 10 maize, 1 maize and oats, 24 barley, 18 beans, 7 locust beans, 1 linseed, 3 canary-seed, 2 fenugreek seed, 5 valonea—total, 351.

Last year during the same time the arrivals were 241 wheat, 10 flour, 3 maize, 6 barley, 1 barley and beans, 1 rye, barley, and oats, 8 beans, 1 locust beans, 6 linseed, 5 canaryseed, and 7 valonea—total, 289.

THIS DAY'S MARKETS.

MARK LANE, MONDAY.

[FIRST REPORT.]

Better quality is to be noticed in the samples of new wheat and barley sent to London, and this makes those staples steady where others are against sellers. Some very good Kent wheat, weighing a full 63lbs., is on offer at 31s. 6d., and a few 64lb. samples from both Kent and Berkshire are to be met with at 32s. to 33s. The Norfolk samples weigh about 62lbs., and come at 30s. to 31s. per qr. Some chicken wheat, chiefly from Essex, is offered at 27s. per qr. The new barley includes some 37s. to 38s. per qr. lots, but 32s. to 34s. commands ninety per cent. at least of the offerings. The new oats are fairly cheap at 17s. 6d. to 19s. Foreign produce is 6d. lower for almost all sorts of wheat and barley, and again 3d. lower for light oats. The maize market for October delivery is firmer. Beans and peas are steady. Rye is cheaper on the week. Oilseeds are dear, 60s. paid for good linseed.

(*For Close of Market see foot of Column.*)

CLOSE OF THE MARKET.

By Telephone, 2 p.m.

THE MARKET CLOSED DULL, AND IN BUYERS' FAVOUR.

THE FLOUR TRADE.

MARK LANE, Oct. 8th.

The market for English and American flour was adversely affected by the warm weather, and 6d. decline was conceded in order to effect sales of town whites, town households, and of all the American brands. Country flour was also fully 6d. cheaper. The best grades of American made 26s. 3d. for Pillsbury's, 28s. for Star, and 26s. 6d. for Morrison's, while good second grades came at 21s. for Iron Duke, 20s. 6d. for Manhattan, 21s. for Improved Nicollet, and 20s. 6d. for Gilt Edge. Kansas flour made 25s. for Magnate, Dazzle, and Syndicate patents, and 24s. for Sunbean. Finest Hungarian flour, such as Six Anchors, made 31s. Australian flour at 23s. was in fair request, and the supply being quite small, trade was stronger than for other sorts of flour. Oregon flour favoured the buyer.

LONDON TERM MARKET.

This market is held twice a day, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made :—

WHEAT.—	Oct. s d.	Dec. s. d.	March. s. d.
Oct. 1 noon	6 9	6 10	7 0
4 p.m.	6 10	6 11	7 1
Oct. 2 noon	6 10	6 11	7 1
4 p.m.	6 10	6 11	7 1
Oct. 3 noon	6 10	6 11	7 1
4 p.m.	6 10	6 11	7 1
Oct. 4 noon	6 10	6 11	7 1
4 p.m.	6 10	6 11	7 1
Oct. 5 noon	6 10	6 11	7 1
4 p.m.	6 10	6 11	7 1
Oct. 6 noon	6 10	6 11	7 1
To-day noon	6 9	6 10	7 0

The maize market for futures shows 4s. 3d. per cental obtained for November delivery, but 3s. 10d. taken for next June. The American new crop will cheapen prices after February.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States.

The Term market is temporarily situated at the Great Eastern Hotel, No. 190, Bishopsgate-street, ground floor.

SEEDS.

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., write that cloverseeds generally exhibit a quiet but steady tone. High prices are realised for trefoil. There is no change in either alsyke or white cloverseed. Perennial ryegrasses are easier; meantime, imported Italian keeps strong. Timothy is dear this season. Some arrivals are noted of New Zealand cocksfoot, which is obtainable on moderate terms. Mustard and rapeseed are in short supply and favour sellers. The business passing in winter tares and seed rye is limited; and as regards birdseeds there is no fresh feature. Some choice New Zealand wrinkled seed peas, just landed, are offering at tempting rates; whilst for blue peas and haricot beans the tendency continues upwards.

GRAIN AND FLOUR FACTORS' REPORTS.

Flour.—A quiet trade at last week's prices.—T. S. MEDILL, Mark Lane.

The market for milling offals remains steady without change from last week, except that buyers of middlings and pollard are reserved, and demand is slow, but sellers ask last week's price. Bran sells at former quotations. RICHARD DOGGETT, Mark Lane.

Business in wheat has again been of a very limited character, at prices generally unaltered on the week. Maize, about 3d. dearer. Barley unchanged. American oats 3d. higher, other sorts unaltered.—W. P. WOOD AND CO., Mark Lane.

We have only a moderate attendance at to-day's market, and little is doing in seeds. Red clover, supported by foreign advices, continues strong. Very few samples of new English have yet appeared. New American shows very poor quality. White Clover, Alsike, and Trefoil are quiet, but firm. In grasses there is little passing. Bird seeds are inactive. Blue peas continue strong. Rapeseed and mustard seed tend upwards.—JOHN PICKARD AND CO., Mark Lane.

Wheat with liberal arrivals meets a poor demand, and prices are rather easier. Flour a slow trade at last week's prices. Maize 3d. dearer for flat, round unchanged. Barley is unchanged except Persian, which is 3d. and 6d. per qr. lower. Oats a large supply, and prices are supported.—COVENTRY, Mark Lane.

Offals: The demand for bran has been only moderate. No alteration in values, with less disposition to speculate than during last month. Pollard in fair request at late rates. Weather showery.—GREENHILL BROS., Belfast, October 6.

Flour.—Whilst values are unchanged, business is checked by the prices asked for shipment. Grain.—Indian corn has maintained last week's prices, although the scarcity has been slightly relieved by arrivals. Oats remain particularly dull. Canadian peas and grinding beans are quiet, the former 1½d. to 3d. cheaper to arrive. Mill stuffs.—The demand for bran is better at the reduced quotation; thirds firm. — MCKINNON AND MCDONALD, Glasgow, October 6.

Wheat quiet, small business. Kansas wheat ½d. per cental lower; other sorts unchanged. Flour firm, with a rather better demand for foreign. The Liverpool Millers' Association make no change in the minimum price of bakers' grade. Maize has a good consumptive demand for mixed and yellow American, and firmly held at 1d. to 1½d. per cental over last Tuesday. European and Plate have a steady trade and occasionally ½d. lower. Barley has a fair inquiry for malting at unchanged prices. Feeding steady trade at quotations. Beans are slow and favour buyers at last market day's figures. Peas have an improved inquiry at ½d. per cental decline for Canadians, other sorts unchanged. Oats firm, but quiet at last market day's full prices for English. Foreign has a better inquiry at unchanged prices. Oatmeal steady, with only a moderate business at about late rates. Oilcake firm with a fairly good demand; prices unaltered. —ROSS T. SMYTH, Liverpool, October 6.

THE BALTIC, MONDAY, 1 p.m.

STATE OF TRADE.

Wheat cargoes are 3d. lower both for those off coast and for those on passage. Futures are fairly steady. Maize sells well at last week's decline, but an attempt to recover ground then lost stops the sale. Barley and oats are dull. Oilseeds are firm for near dates, but decidedly cheaper for dates in 1901.

BUSINESS DONE.

WHEAT.—Oregon, 32s, arrived; Californian, 32s 6d, just shipped; Walla Walla, 30s 3d, arrived; Walla Walla, 31s, prompt shipment; best Duluth, 33s, prompt shipment; No. 1 Northern, 32s 6d, November shipment; No. 2 Red Winter, 31s, November shipment; No. 2, Hard Winter, 30s, November shipment.

MAIZE.—Roumanian, 20s 6d, May shipment; Galatz, 22s 3d, November shipment; Argentine, 21s 3d, on passage; American, 20s, on passage.

BARLEY.—Persian, 17s, on passage; Odessa, 19s 6d, on passage.

OATS.—White Libau, 12s 9d, arrived; American mixed, 14s, on passage.

BEANS.—Saida, 30s 6d, October shipment; Smyrna, 27s 6d, October shipment.

LINSEED.—Libau, 53s, November shipment; Argentine, 51s 6d, December shipment.

RAPESEED.—Brown Calcutta, 44s 6d, November shipment.

COTTONSEED.—Egyptian, £7 1s 3d, December shipment.

PROVISIONS.

London, Monday.—The arrivals from Ireland last week were 3,525 bales bacon, and from foreign ports 7,810 bales bacon. The continued scarcity of bacon has caused a further advance in prices, and on Friday Irish, Danish, and Canadian were all 4s., 5s. dearer. The market was very strong, and all goods arriving sold. Irish, 60s, 67s, to 69s; Danish, 60s, 67s, to 69s; Canadian, 60s to 64s. There was a steadier feeling in the butter market, and prices showed a slight improvement generally, most noticeable in Danish at 112s to 114s; Irish, 92s to 106s; Colonial, 102s to 106s; Canadian, 98s to 102s. Lard, a hardening market at slightly improved prices. Irish, 40s to 54s; American pails, 41s to 42s.

CATTLE.

Metropolitan Market, Islington.

Monday, Oct. 8th, 1900.

	British.	Total.	Oct. 9th, 1899.
Beasts	1,429	1,429	1,399
Sheep and lambs	6,110	6,110	7,600
Calves	5	5	—
Pigs	110	110	—
Milch cows	55	55	60

Quotations per 8lbs (sinking the offal).

ENGLISH.	Inferior. s. d.	Second. s. d.	First. s. d.
Beasts	3 4 —	4 0 —	4 10
Sheep	3 2 —	5 0 —	5 10
Lambs	5 4 ..	5 8 ..	6 4
Pigs	3 2 ..	4 0 ..	4 8

Milch cows, per head, £15 to £22.

British arrivals include as follows:—Scotland, 0; Eastern Counties, 30; Midland, Home and Western Counties, 1,184; Devon, 30; Ireland, 170.

In the beast market there was a fair average supply amongst which were a few from Scotland, the first this season. Trade was decidedly firmer, with an upward tendency in value for fat butchering cows and bulls. There was more demand by country buyers, rates for the latter being higher. No Irish stores on the market.

The following are top quotations per 8lb. (sinking the offal):—

		To-day.			Oct. 9, 1899.
Devons	4s	7d to 4s 9d	..	—	to —
Herefords	4s	8d to 4s 10d	..	4s 0d	to 4s 8d
Runts	4s	7d to 4s 9d	..	4s 5d	to 4s 6d
Lincolns	4s	0d to 4s 4d	..	3s 10d	to 4s 2d
Irish	4s	2d to 4s 4d	..	4s 0d	to 4s 2d
Fat cows	3s	8d to 3s 10d	..	3s 4d	to 3s 6d

In the sheep market there was an increase of 350 head compared with Monday last. For wethers trade was slow, but late rates were obtained. Ewes being in less demand were difficult to dispose of even at a reduction of 2d per 8lb. The supply included 180 Scotch, 1,950 Irish, and 521 from the Eastern Counties. Best quality lambs met with a ready sale at late rates.

Undermentioned quotations are at per 8lbs. (sinking the offal), and are for the best of each class penned:

	To-day.			Oct. 9th, 1899.
7½ to 8-stone Downs	5s 8d	to 5s 10d	.. 5s	6d to 5s 8d
9-stone ditto	5s 6d	to 5s 8d	.. 5s	4d to 5s 6d
10-stone half-breds	5s 4d	to 5s 6d	.. 5s	2d to 5s 4d
12-stone Lincoln	4s 10d	to 5s 0d	.. 4s	10d to 5s 0d
10-stone Irish	5s 0d	to 5s 2d	.. 4s	10d to 5s 0d
10-stone Down ewes	3s 10d	to 4s 0d	.. 4s	0d to 4s 2d
11-stone half-bred ditto	3s 4d	to 3s 6d	.. —	to —
5-stone Down lambs	6s 2d	to 6s 4d	.. —	to —
6-stone half-bred ditto	5s 8d	to 5s 10d	.. —	to —

Calf trade nominal.

Trade for pigs was firm, with a larger supply; best small breeds were quoted at 4s 8d per 8lb.

London Central, Monday.—Moderate supplies, trade slow. Beef: Carcases, 3s 6d to 3s 8d; hindquarters, 4s to 4s 4d; roastings, 5s to 5s 4d. Sheep: Ewes, 3s 2d to 3s 4d; wethers, 4s 2d to 4s 6d; hindquarters, ewe, 4s 4d to 4s 8d: wether, 5s 4d to 5s 8d. Pigs, large, 3s 4d to 3s 8d; small, 4s to 4s 4d.

St. Ives (Hunts), Monday.—Beasts 1,104, sheep and lambs 1,429, pigs 358. Beef, 7s 3d to 8s 6d; mutton, 7s 7d to 9s 4d; pork, 6s to 6s 9d. sows 5s 6d to 6s. Fat and store cattle good trade. Fat and store sheep fair. Fat pigs good demand stores fair. Milch cows fair, prices £14 to £22.

FOREIGN CATTLE.

Deptford, Monday.—Beasts, 1,454. To-day's supply compared with Monday last showed an increase of 676, and consisted of 1,198 from the United States and 256 from Canada, most of the latter consisting of ranchers. Trade for the former was of a slightly firmer and steadier nature, both in regard to tone and value, but for ranche cattle extremely dull and dragging at less money by fully 2d. per 8lbs. The following were the quotations per 8lbs, offal given in: 85 to 88 stone States, 4s 1d to 4s 2d; second quality ditto, 3s 10d; best Canadians, 3s 8d; Ranche ditto, 3s 4d to 3s 6d. No sheep on the market. The following were the numbers on offer on the corresponding day last year, with the current top rates:—Beasts, 1,819, 4s 2d to 4s 3d per 8lb, to dress from 7.0 to 760lb; sheep, 3,214, 3s 8d to 3s 10d per 8lb, to dress about 72lb.

Liverpool, Monday.—Demand fair for the best quality of cattle at about last week's rates; middling a shade lower. Sheep.—Trade slow, and, excepting prime quality, prices lower all round. Prices: Beef, 6½d to 4¼d per lb; mutton, 8d to 5½d per lb. At market: 1,781 cattle and 8,466 sheep.

FEEDING STUFFS.

London, Monday.—Linseed Cake: Market very steady, but not much trade. Cotton cake firm. Decorticated cake tending dearer. Meal 2s 6d dearer. Linseed still advancing.

English linseed cake	£8 10 0	to	—	ex mill
American Western linseed cake	7 17 6	to	8 0 0	ex quay
Russian oil cake	8 0 0	to	8 5 0	ex quay
Decorticated cotton cake	7 0 0	to	7 2 6	ex quay
Decorticated cotton meal	6 15 0	to	—	ex quay
London made cotton cake (best)	5 5 0	to	5 7 6	ex mill
Egyptian cotton cake (in bags)	5 2 6		—	ex quay
Burton desiccated ale grains (bags included)	4 10 0			on rail, Burton
Rangoon Rice Meal	4 15 0		—	ex warehouse
Russian linseed in bulk, per 416lbs	2 17 6	to	—	ex warehouse
Calcutta linseed in bags, per 410 lbs	3 0 0	to	3 2 0	ex warehouse.

—ROBT. AND JOHN HEWETSON.

HOPS.

London (Borough), Monday.—Messrs. W. H. and H. Le May, hop factors, 67, Borough High-street, London, S.E., report: Growers are still maintaining their firm attitude, consequently the business is limited to those hops which the growers are willing to offer. Prices must be quoted firm.

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

The market for fat beasts at Islington not only showed no improvement, but was of a decidedly slower nature, with a downward tendency in value, though the very best Herefords, Runts, and Devons maintained last week's quotations. The cause of the downward slide in second quality was the larger number forwarded for sale. On both market days sales of fat cows and butchering bulls were more forced, owing to a slacker demand, and this naturally meant the easing of prices. The few rough cattle were difficult to dispose of, owing to so many being seized of late owing to tuberculosis. Though the number on sale at Deptford showed a decrease of 415 as compared with last week, the arrivals were heavier, as on Saturday 1,163 were withheld. Trade for good beasts was fairly steady, both in regard to tone and value, but plain ditto, consisting of Canadian ranche cattle, could not be cleared. The total number of beasts offered for sale on both markets was 5,852, consisting of 1,740 British (increase 200) and 4,112 foreign, these latter comprising 2,999 from the United States and 1,113 from Canada. The following were the top rates paid per 8lbs. (sinking the offal):—90-stone Herefords, 4s. 10d.; 85 to 90 stone Runts, 4s. 9d.; 80-stone Devons, 4s. 9d.; 100-stone Lincolns, 4s. 4d.; 110-stone ditto, 4s. to 4s. 2d.; 90-stone Irish (Dublins), 4s. 4d.; Waterfords, 4s. 2d.; 90-stone fat cows, 3s. 6d. to 3s. 8d.; 100-stone fat bulls, 3s. 4d.; 90-stone States oxen, 4s. to 4s. 1d.; 85-stone Canadians, 3s. 8d. to 3s. 10d.; ranchers, 3s. 4d. to 3s. 6d. With respect to the sheep trade, which was entirely confined to the Islington Market, it was void of life, with the choicest Down and halfbreds of neat, handy rates alone maintaining late rates, these clearing early. For ewes there was less demand, rates favouring the buyers. There was again a fair inquiry for lambs (the best only) at last week's improved rates. Best pens of sheep made per 8lbs. as follows (sinking the offal):—7½ to 8 stone Downs, 5s. 10d.; 9-stone ditto, 5s. 8d.; 8-stone Scotch, 5s. 8d.; 10-stone Downs, 5s. 6d. to 5s. 8d.; 10-stone halfbreds, 5s. 4d. to 5s. 6d.; 10-stone Irish, 5s. 2d.; 12-stone half-breds, 5s. to 5s. 2d.; 10-stone Down ewes, 4s. 2d.; 11-stone halfbred ditto, 3s. 10d.; 5-stone fat Down lambs, 6s. 2d. to 6s. 4d.; 6-stone halfbred ditto, 5s. 8d. to 5s. 10d. Calves were short in number (45), and met a steady trade, the best making 4s. 8d. per 8lbs. Pig trade slow; best small breeds were quoted at from 4s. 6d. to 4s. 8d.

Trade in the West.

The rain has worked wonders both with the pastures and the root crops, and the result has been a corresponding improvement in the trade. Flockmasters at once took advantage of the improved outlook to ask higher rates for their draft stocks, which have been rather more than maintained since Prindlbury and Bridport fairs, whilst sales of barreners have shown a corresponding improvement, as also have all classes of dairy beasts, the best of which are now once more bringing £20 to £22 each, and barreners from £24 to £32 per pair, or a rise of 10s. to 15s. per bullock. Young stock are likewise commanding a much readier sale. But fat bullocks or sheep have not improved in a corresponding ratio; at some markets beef has favoured buyers a litt'e, as has also mutton, which all round may be written ½d. per lb. lower; but veal and pork, on the contrary, are rather the other way.

Trade in Ireland.

Inquiry for good bullocks and heifers opened fairly active, and last day's top rates were fully maintained, some excellent Polled Angus making rather more money. Second class and half-meated beasts sold rather draggingly, and rough sorts were very hard to move. Prices were for best ox and heifer beef from 56s. to 58s., and for a few lots 60s. per cwt.; second class, 48s. to 54s.; and coarser descriptions, from 40s. to 46s. per cwt. In the mutton department very little alteration was to be noted from the previous market in any class of sheep. Choice hoggets for the London trade met with a rather more animated inquiry, and late rates were easier realised. Aged wethers and heavy ewes for home consumption were scarce and full rates maintained. The number of sheep and lambs in market was 7,216, or 733 less than previous Thursday. Prime wethers from 6¼d. to 6¾d. per lb.; ewe, 4½d. to 5¼d.; and inferior, from 4d. per lb. A clearance was not effected. Prime veal cheaper at from 6½d. to 7½d. per lb., and inferior neglected and only bringing from 4d. per lb. up. A moderate market of dairy cattle. Prime springers and newly-calved cows met with a good sale at late rates, but second class and rough cows irregular. Best animals were worth from £17 to £21, and other sorts from £9 up. A limited supply of pigs, and with a full attendance of cross-Channel buyers prices improved fully 1s. per cwt. on the week. Choice lightweight pigs, from 44s. to 46s. per cwt., and coarse bacon pigs from 34s. to 40s. per cwt.

LONDON.

London Central, Wednesday.—Fair supplies offered, and best beef met slightly improved demand; other qualities ruled slow. Arrivals of beef included 40 tons Scotch, 500 Liverpool sides, 1,450 hindquarters, and 600 forequarters American refrigerated. Quotations: Beef, Scotch, short sides, 4s 6d to 4s 10d; long, 4s 2d to 4s 4d; English, 4s to 4s 2d; American Deptford-killed, 3s 10d to 4s; Liverpool, 3s 10d to 4s; American refrigerated hindquarters, 3s 4d to 4s; forequarters, best, 2s 6d to 2s 8d, seconds, 2s 2d to 2s 6d. Mutton: Scotch, 4s 8d to 5s; English wethers, 4s 2d to 4s 6d; ewes, 3s 2d to 3s 4d. Veal: English and Dutch, 3s 8d to 4s 4d. Pork: English, 4s to 4s 4d; and Dutch, 3s 8d to 4s per 8lb.

London Central, Friday.—Good supplies offered, but trade very slow. Arrivals of beef included 80 tons Scotch, 450 Liverpool sides, 3,700 hindquarters, and 2,300 forequarters American refrigerated. Quotations: Beef, Scotch, short sides, 4s 6d to 4s 10d; long, 4s 2d to 4s 4d; English, 4s to 4s 2d; American, Deptford-killed, 3s 10d to 4s; Liverpool, 3s 9d to 3s 11d; American refrigerated hindquarters, best, 3s 8d to 4s; seconds, 3s 4d to 3s 6d; forequarters, 2s 6d to 2s 8d; seconds, 2s 4d to 2s 6d. Mutton: Scotch, 4s 4d to 4s 8d; English wethers, 4s to 4s 4d; ewes, 2s 10d to 3s 2d; Canterbury, 2s 6d to 2s 8d; Wellington, 2s 5d to 2s 7d; Sydney and River Plate, 2s 2d to 2s 3d. Veal: English and Dutch, 3s 8d to 4s 4d. Pork: English, 4s to 4s 4d; Dutch, 3s 8d to 4s; and Irish, 3s 6d to 3s 8d per 8lb.

Islington, Thursday.—Moderate number of beasts on offer; quite demand, fat bulls and rough cattle again forming the chief proportion. Sheep pens were only filled to a moderate extent, but the inquiry for both wethers and ewes was of a slow character, at about late prices; 7½st to 8st down wethers quoted 5s 8d to 5s 10d; 9st ditto, 5s 6d to 5s 8d; 10st down ewes, 4s to 4s 2d; 11st half-bred ditto, 3s 6d to 3s 8d. Calves in moderate supply sold steadily, the best on offer making 5s 6d to 5s 8d per lb, to link the offal. Total supplies: 40 beasts, 1,490 sheep, 35 calves, 140 pigs, and 5 milch cows.

COUNTRY.

Ashford, Tuesday.—Good supply of beef, with slow trade; prime makes up to 11s 6d, and in some cases 12s; medium, 9s 6d to 10s 6d; cows, 7s 6d to 8s per score. Mutton remains about the same. Pork, roasters, 9s 6d to 11s; medium hogs, 8s to 9s 6d; large hogs, 8s to 9s.

Basingstoke, Wednesday.—At Raynbird and Sons' sale yard there was a very large attendance of buyers to meet a supply consisting of 40 fat beasts, 77 calves, 534 fat sheep and lambs, 390 pigs, and 124 head of dairy and store cattle, for which the following prices were realised:—Fat beasts, £14 to £22; fat calves, 70s to 97s 6d; small, 18s to 50s; fat wethers, 42s to 55s 6d; fat ewes, 29s to 40s; lambs, 31s to 51s; fat hogs, 60s to 88s; fat porkers, 42s to 58s; small, 26s to 34s; store pigs, 11s to 24s; dairy cows, £8 10s to £20. The show of fat beasts was mostly of a second rate quality, for which there was a dull inquiry. The few choice lots met a ready sale at late rates. A good show of fat sheep and fat lambs met a brisk trade, with a clearance at full prices. Store sheep and lambs met a ready sale, and wanted. Prime quality Hants Down wethers and young ewes made 48s, 53s, 56s, 48s 6d, 55s 6d, 47s, 48s 6d, 52s, 47s, 55s 6d, 51s, 46s, 42s, 40s, 47s, 45s; 9 months old ditto, 43s, 44s 6d, 46s, 46s 6d, 47s 6d, 48s, 51s, 44s, 41s, 40s 6d; Southdown lambs, 31s; rams, 54s, 38s, 46s, 47s, 40s, 42s, 45s 6d; old ewes, 35s 6d, 35s, 36s, 37s, 40s, 38s, 29s; 3 months old sucking lambs, 35s, 17s 6d, 24s; store lambs, 31s 6d. With a large entry of dairy cattle on offer, for the best descriptions there was a ready sale. Inferior sorts are difficult to dispose of. Store cattle are a dull trade. Fat calves met a moderate trade at less money. Fat hogs and porkers met a brisk trade, with a clearance at late rates. Store pigs also sold well. Ruling values: Best quality Devon steers, 7d to 7¼d per lb; ditto Shorthorn ditto, 6d to 6¾d; bulls, cows, and inferior ditto, 5d to 5½d; best quality sheep, 8¼d to 8¾d; second ditto, 7¾d to 8d; old ewes, rams, and inferior ditto, 6d to 6½d; three months old sucking lambs, 8¾d to 9d; fat calves, 6d to 8½d; fat hogs up to 8s 6d; and porkers, 11s per score.

Boston, Wednesday.—Best beef, 7s 9d to 8s; cow beef, 6s 3d to 7s per stone; useful steers, £14 10s to £16 10s; yearlings, £4 to £8; in-calvers, £19 to £22; heifers, £15 10s; calves, 55s to 60s; store sheep, 42s to 46s.

Calne.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne:—

Prime stores.	Thickness of fat in any part of the back.	Price per sc.
6 sc 10 lbs to 9 sc 10 lbs	2½ in. and under	9s 0d
Under 10 sc 10 lbs	Not exceeding 2½ in.	8s 6d
Under 11 sc 10 lbs	Not exceeding 2¾ in.	7s 9d
Under 12 sc	Not exceeding 3 in.	—

Any pigs outside these limits at their value. Half truck, 12 pigs. Whole truck, 25.—CHARLES AND THOMAS HARRIS AND CO., Limited, Calne, Wilts.

Cambridge, Monday.—The stock exhibited for sale at this market and the prices obtained were as follows:—Beasts, 857; sheep, 900; pigs, 412; horses, 14. Beef, 6s to 8s per stone; mutton, 4s 4d to 5s 8d; pork, 6s 3d to 7s 3d. A smaller show store beasts, and trade slow. Fat beasts, very little alteration in the trade. Fat sheep a fair trade all round at late rates. Stores, a fair show of lambs, and several lots sold. Fat pigs, a good brisk trade at more money. Store trade not so good as last week. Hay, straw, and roots, short supplies.

Canterbury, Saturday.—Large supply of sheep, slow trade. Lambs, 13s up to 16s; better class animals, 17s to 22s. Some half-bred lambs, strong in condition, averaged 27s 6d. Old sheep sold at declining prices owing to the shortness of keep. Good useful ewes ranged from 26s to 28s; younger animals up to 32s; ewe tegs, 27s 6d to 35s 6d; wether tegs, 31s to 33s 6d; yearling bullocks found purchasers at from £6 12s 6d to £8, and dairy cows at from £12 to £17 per head.

Carlisle, Saturday.—About 250 Irish store cattle offered. The bulk were fine wintering heifers. Small attendance, and fair trade, at £6 to £8 10s for small beasts, and up to £15 10s for the best specimens; bullocks to £11 10s. Young pigs a small show and slow sale, at 22s to 28s.

Chichester, Wednesday.—There was a large supply of store sheep, and on the whole a good selling trade was experienced at about late rates. Fat mutton and beef met a fair demand at unchanged prices.

Derby, Tuesday.—Fair attendance of buyers, and an average supply. Prices not altered, but firm all round. Beef, 5½d to 6¼d; mutton, 7d to 8d per lb.

Doncaster, Tuesday.—A moderate supply of cattle and sheep, and average trade. Beef, 7s 6d to 8s 6d per stone; mutton, 5½d to 8d per lb.

Dorchester, Saturday.—Large supply of beef, much in excess of demand; dragging trade. Milch beasts sold from £6 to £19 10s; fat heifers, £16 10s to £21 each; barreners, £9 to £13; fat cows, £11 to £14; steers, £16 10s to £21; cows and calves, £9 to £13; sheep firmer at late rates. Down ewes, 38s to 45s; wethers 43s to 51s; crossbred lambs, 20s to 33s.

Dublin, Thursday.—A fair demand for all classes of cattle with some irregularity in prices. Choice finished beef was perhaps slightly dearer, but rougher sorts were more difficult to clear. Sheep unaltered in value, and a fair clearance effected. Cattle (best), 30s to 33s per cwt; exceptional, 34s 6d per cwt; rough and unfinished descriptions, 27s to 29s per cwt. Mutton, 5½d to 7d per lb.—GANLY, SONS, AND CO.

Dumfries, Wednesday.—Large supplies of beef met a good demand, but scarcely made the top prices of late market. Horned bullocks to £18; polled bullocks, to £21; Galloway bullocks, to £17; Ayrshire bullocks, to £19; Galloway heifers, to £13; Ayrshire cows, to £15; calving heifers, to £13.

Glasgow, Wednesday.—Trade fair, and prices for best qualities well sustained. Top Scotch cattle, 68s to 71s per cwt; secondary, 65s; Irish, 63s to 65s; best States, 60s; Canadians, 58s per cwt. Sheep in good demand, especially prime ewes; quotations, 8¼d to 8½d; secondary, 7½d to 8d per lb. Dead meat steady.

Hereford, Wednesday.—Return of stock brought to the cattle market this day:—Bullocks and cows 496, calves 87, sheep and lambs 3,337, pigs (fat and sows) 39, sucking pigs 74, pigs (stores, not more than ten) 200, pigs (stores, more than ten) 10, horses 6. Prices of stock: Best beef, 6d to 7d per lb; wether sheep, 6¾d to 8d per lb; ewes, 5¾d to 6d per lb; veal, 9d per lb; lamb, 9¼d per lb; pork, 4½d to 5d per lb; bacon, 4d to 5d per lb.

Ipswich, Tuesday.—Messrs Robert Bond and Sons report a short supply of fat cattle, which met a very sharp trade at higher prices, neat yard-fed animals making up to £22, and grass cattle to £21 15s. Fat sheep were well represented, and realised last week's prices, lambs making up to 51s and 52s 6d. Grazing sheep sold without alteration in value; an excellent lot of about six score first-class lambs (in nice condition) averaged 32s 6d. Various lots of ewes and young lambs changed hands freely. A large entry of weaning calves, and a brisk trade for all the best. Fat calves made from £3 to £4 17s 6d. The number of fat and store swine on offer was not so large; the demand was strong, and recent high quotations were well maintained. This being the second autumn sale of grazing cattle, 229 steers and heifers were penned, there were more buyers present, and a demand prevailed. A consignment of well-bred cattle were disposed of at the following prices:—Ten shorthorn Scots, £9 2s 6d; eleven north country heifers, £7 10s; twelve home-bred steers, eighteen months old, made £10 5s to £9 15s; forward shorthorn steers; twenty months old, £11 7s 6d; fifteen Cumberlnd yearlings, £7 5s; twenty very choice north country shorthorn steers, sixteeen months old, made from £10 2s 6d to £8 15s; twelve good roan north country heifers made £9 and £8 17s 6d; red poll heifers, £7 17s 6d; ten yearlings, £6 12s; polled steers, £7 10s; twenty home-bred calves from £4 15s to £5 17s 6d. A large entry of cows, a shorthorn realised £22; polled cows, £16 10s. Numbers at sale:—Beasts 1,008, sheep 1,770, pigs 1,930, horses 20, calves 51.

Leeds, Tuesday.—The supply of cattle and sheep was slightly below last week, the former numbering 601, against 607, and the latter 1,930, compared with 1,970. Dealers were fairly well represented, but buyers, as had been the case for the past few weeks, were not so numerous. There was a good entry of cattle, which comprised a choice assortment of home-district stock, together with a very large and useful consignment of Irish cattle. Business generally ruled quiet for beef, only the best quality meeting with a ready sale, coarse and inferior meeting with a dragging and unsatisfactory sale. The choicest heifers and bullocks made from 6¼d to 6½d per lb., the higher quotation being the exception. Good useful beef made 6d., and coarse and inferior from 5d per lb. Although sheep were slightly below the aggregate of last week, the supply was more than equal to the demand. A moderate selling trade was experienced for the best class of sheep, but the market on the whole was dull and slow, and the rougher kinds of sheep were altogether neglected. Nice small shearlings made 8d to 8½d; large and heavy sheep 7d to 7¼d, ewes and tups 5d to 6d per lb. Rather fewer calves were offered, best veal animals making 7d to 7½d per lb. Dairy cattle were a small entry, a moderate trade being experienced, the best milkers maintaining recent prices, which ranged from £15 to £20 10s. Numbers at market—Cattle 601; sheep 1,930; calves 10.

Leicester, Saturday.—Heavy supplies of stock in good condition. Trade sluggish at easier rates. Milch cows sold freely at £16 to £24 per head; bullocks £12 to £16. Sheep large supply, and trade slow at easier prices.

Lincoln, Tuesday.—There was a smaller show of beasts, and a better trade. Prime beef, 7s 6d to 8s; lower qualities, 6s 6d to 7s 6d per stone. The supply of sheep was fair and trade steady. Ewe mutton, 5½d to 6½d; wether ditto, 8d to 8½d; lamb, 8d to 8½d per lb.

Lincoln, Friday.—Trade not very brisk. Milch beasts, £17 to £21; store bullocks, £14 to £17; two-year-olds, £8 to £12; and young stock, £5 to £8. Good number of lambs; best made 35s to 36s each; and other sorts, 28s to 32s.

Newcastle, Tuesday.—Cattle, sheep, and lambs in favour of buyers. Numbers:—Cattle, 2,292; sheep and lambs, 7,157; pigs, 981; calves, 49. Prices (sinking the offal):—Beef, 5s to 8s; pork, 5s to 9s 6d per stone; mutton, 5d to 8d; lamb, 6d to 8½d; veal, 5d to 9d per lb.

Norwich, Saturday.—The show of store cattle here to-day was large; prices showed scarcely any change, but sales proceeded slowly. Fat beasts made about former terms, viz., 7s 6d to 7s 9d and 8s per 14lb. The supply of store sheep and lambs was about an average; lambs made 28s to 36s per head, and breeding ewes 35s to 58s per head. Fat sheep brought 8s 6d to 9s and 9s 6d per 14lb. Keep prospects are pretty good in Norfolk.

Romford, Wednesday.—A large supply of fat beasts, and trade very slow. Best animals made 4s 4d to 4s 6d, and middlings 3s 10d to 4s per stone. Calves in short supply, and trade about the same, at 4s 8d to 5s per stone. Sheep in short supply, and trade a little better. Best sheep made 5s 6d to 5s 8d, and middlings, 5s 2d to 5s 4d per stone. Only a slow demand for the few store beasts offered. A little more demand in the pig trade. An average supply. Small porkers made 4s to 4s 4d, and large hogs 3s 8d to 3s 10d per stone.

Salford, Tuesday.—The supply of cattle was about the same as last week. Trade was rather better, but there was no improvement in the prices obtained. There was a decrease of about 1,000 in the number of sheep and lambs on offer. Choice quality of both met with an improved demand at late rates, but rough and inferior changed hands slowly. The calf trade was quiet, last market day's prices being obtained. Quotations:—Cattle, 5d to 6¼d; sheep, 6d to 8¼d; lambs, 7d to 8¼d; calves, 5¼d to 7¾d per lb. At market—Cattle, 2,369; sheep and lambs, 8,367; calves, 117; pigs, 108.

Sheffield, Tuesday.—Only a very small show of milch beasts, but a good demand for the best lots, which made from £15 to £23, others £16 to £19.

Shrewsbury, Tuesday.—Cows with calves, pigs and calves a better trade. Beef and mutton in fair demand at late prices. Quotations:—Beef, 6¼d to 7¼d; mutton, 6¾d to 8¼d; and veal, 7¼d to 8¼d per lb. Porket pigs, 9s to 10s; and bacons, 8s to 9s per score. Cows, with calves, up to £23 12s 6d. Hay, up to £3 10s; and straw, up to £2 5s per ton. Numbers offered:—87 rams, 387 cattle, 46 cows with calves, 4,165 sheep and lambs, 83 calves, 48 fat, 110 porket, and 264 store pigs.

Spalding, Tuesday.—There was to-day a good trade for beef at 7s 6d to 8s per stone; cow beef, 7s. Stores sold fairly well, and cows and heifers were in demand at good prices. There was an improved trade for mutton, which made 7¾d to 8d per lb.

Stockton, Wednesday.—There were on offer 195 cattle, 535 sheep, 100 lambs, and 299 pigs. Fair supply of best cattle, but customers were few, and trade slow, at 7s 6d to 8s 3d; rougher sorts, 6s 6d to 7s 3d per stone. Young sheep and lambs, 8¼d; ewes, 6d; tups, 5d per lb.

Taunton, Saturday.—Moderate supply, small attendance, and quiet trade.

Thame, Tuesday.—There was a very full supply of stock at market, and trade for best qualities showed an improvement, but the half-meaty animals were a dragging trade. Mr. Bond's sale comprised 122 fat beasts, 278 fat sheep and store

lambs, 121 fat and weaning calves, and 160 fat and store pigs. Fat bullocks made £16 to £19 5s; fat heifers, £14 to £19; fat wether sheep, 44s to 57s; fat ewes, 38s to 51s; store lambs, 25s to 37s; fat calves, £3 to £4; cow calves, 23s to 61s; bull calves, 17s to 52s; fat pigs, 9s per score. Porkets a good trade. Store pigs made 14s to 27s.

Wakefield, Wednesday.—Smaller supplies of both beef and mutton, and a very slow demand for both, and prices ruled at about last week's rates. Best beef made 6½d per lb; other qualities, 5d to 6d; choice small sheep moved off slowly at 8d; inferior animals making 5d to 6d. Numbers:—Beasts, 1,454; sheep, 2,807.

Wolverhampton, Wednesday.—Fair supply all round, very slow trade. Beef, 5d to 7d per lb; mutton, 6d to 8¼d per lb; lamb, 7½d to 8½d per lb; veal, 7d to 8d per lb. Milch cows a good supply; fair trade from £12 to £22. Bacon pigs, 9s to 9s 3d per score; porkets, 9s 6d to 9s 9d per score; sows, 7s 6d per score.

Worcester, Saturday.—Good supplies of fat and store cattle, and an increase in the number of pigs and sheep. Beef rather dearer. Mutton firm. Pigs unchanged. Best beef, 6½d to 7d; inferior, 5½d to 6½d; wether mutton, 7d to 8½d; ewes, 6d to 7d; and veal, 7d per lb. Pork pigs, 9s; and bacons, 9s 9d per score.

Worksop, Wednesday.—The show of stock was good, including some excellent beasts and sheep. Best beef, 7s 6d to 8s 6d per stone; inferior, 6s 6d to 7s; best mutton, 7½d to 8½d per lb; secondary, 5d to 6½d per lb.

York, Thursday.—The offer of English and Irish store cattle was large, and trade was rather dull, with prices tending downwards, but prices asked were high and customers scarce. The chief trade was in three-year-old bullocks, which made up to £15; two-year-olds, £10 to £12; stirks, £6 to £8. Calving cows made a little more money. This was the largest sheep fair of the year. Nearly 50,000 were penned. Trade was flat, and prices had a tendency downwards to the extent of about 1s per head.

FOREIGN.

Deptford, Wednesday.—Beast entries amounted to 1,820, this being 640 less than on Wednesday last, and comprised 1,431 United States and 389 Canadian. Trade dull, and prices easier at 3s 10d to 4s 1d for the former, and 3s 6d to 3s 8d for the latter, with ranch 3s 4d to 3s 6d per 8lb to sink the offal. No sheep offered.

BUTTER.

Tuesday.—Bedale: 1s 6d to 1s 7d per roll of 24oz. Leeds: Danish, 110s to 116s per 112lb; Irish creameries, 106s to 110s; York lump, 14s 6d to 15s 6d per stone; ditto long rolls, 1½lb, 1s 7d to 1s 9d; fresh butter in 1lb prints, 1s 1d to 1s 2d per lb. Settle: 1s to 1s 1d per lb. Sheffield: 1s 3d to 1s 4d per lb. Spalding: 1s per lb. Stone: 1s 2d to 1s 3d per lb.

Wednesday.—Barnsley: 1s 3d per lb. Boston: 1s 1d to 1s 2d per lb. Goole: 1s 2d per lb. Hereford: 1s 3d to 1s 4d per lb. Keighley: (retail), 1s 3d per lb. Kirbymoorside: 10d to 1s per lb. Knaresborough: (wholesale), 1s 6d to 1s 7d; (retail), 1s 7d to 1s 9d per roll of 24oz. Louth: (wholesale), 1s 1d per lb. Market Drayton: 1s to 1s 1d per lb. Market Weighton: 1s per lb. Northallerton: 1s 5d to 1s 8d per roll of 24oz. Stockton: 1s 1d to 1s 3d per lb. Uttoxeter: 1s 2d to 1s 3d per lb. Whitby: 1s per lb. Worksop: 1s 3d to 1s 4d per lb.

Thursday.—Birmingham: 1s 3d to 1s 4d per lb. Brigg: 1s 1d to 1s 2d per lb. Driffield: 1s per lb. Kidderminster: 1s 2d per lb. Masham: 1s 5d to 1s 6d per roll of 24oz. Penistone: 1s 3d per lb. Ripon: 1s 6d to 1s 9d per roll of 24oz. Scarborough: 1s 2d to 1s 3d per lb. Wetherby: 1s 1d to 1s 3d per lb.

Friday.—Altrincham: 1s 3d per lb. Crewe: 1s 2d and 1s 3d per lb. Derby: 1s 3d and 1s 4d per lb. Easingwold; 1s to 1s 2d per lb. Grimsby: Danish and Swedish, 112s to 115s per 112lb; Dutch, 100s to 103s; Canadian, 96s to 108s. Helmsley: 11d to 1s per lb. Leeds: Danish, 112s to 118s per 112lb; Irish creameries, 104s to 110s; York lump, 14s 6d to 15s 6d per stone; ditto long rolls 1½lb, 1s 7d to 1s 9d; fresh butter in 1lb prints, 1s 1d to 1s 2d per lb. Leyburn: 1s 6d to 1s 7d per roll of 24oz. Lincoln: 1s 1d to 1s 2d per lb. Nantwich: 1s 2d to 1s 3d per lb. Otley: 1s 5d to 1s 7d per roll of 24oz. Sandbach: 1s 3d per lb. Stockport: 1s 3d to 1s 6d per lb. Whitchurch: 1s 1d to 1s 2d per lb.

EGGS.

Tuesday.—Bedale: 10 or 11 for 1s. Leeds: Yorkshire, 11s to 12s per 120; Irish, 9s 3d to 9s 9d; Danish, 8s to 9s 6d; Austrian blues, 6s 6d to 7s; ditto reds, 5s 9d to 6s 3d. Settle: 10 or 11 for 1s. Sheffield: 9 or 10 for 1s. Spalding: 12 for 1s. Stone, 11 for 1s.

Wednesday.—Barnsley: 9 or 10 for 1s. Boston: 11 or 12 for 1s. Colne: 2s per score. Goole: 11 for 1s. Hereford: 12 or 14 for 1s. Keighley: 9 for 1s. Kirbymoorside: 12 or 13 for 1s. Knaresborough: 10 or 11 for 1s. Louth (wholesale): 14 for 1s. Market Drayton: 10 to 11 for 1s. Market Weighton: 12 for 1s. Northallerton: 11 for 1s. Stockton: 8 or 9 for 1s. Uttoxeter: 2s 3d to 2s 5d per score. Whitby: 10 for 1s. Worksop: 2s 4d to 2s 6d per score.

Thursday.—Birmingham: 8 or 9 for 1s. Brigg: 11 or 12 for 1s. Driffield: 14 or 15 for 1s. Kidderminster: 12 for 1s. Masham: 11 or 12 for 1s. Penistone: 10 for 1s. Ripon: 10 for 1s. Scarborough: 10 and 11 for 1s. Wetherby: 10 and 12 for 1s.

Friday.—Crewe: 9 and 10 for 1s. Derby: 9 and 10 for 1s. Easingwold: 12 or 13 for 1s. Grimsby: Austrian, 6s 6d to 6s 10d per 120; Russian, 5s 10d to 6s 11d; Danish, 8s 6d to 9s 8d; Canadian, 6s 3d to 7s 3d. Helmsley: 11 or 12 for 1s. Knutsford: 9 for 1s. Leeds: Yorkshire, 11s to 12s per 120; Irish, 9s 3d to 9s 9d; Danish, 8s to 9s 6d; Austrian blues, 6s 6d to 7s; ditto reds, 5s 9d to 6s 3d. Leyburn: 10 or 11 for 1s. Lincoln: 11 or 12 for 1s. Otley: 9 or 10 for 1s. Sandbach: 9 and 10 for 1s. Stockport: 8 for 1s. Whitchurch: 9 and 10 for 1s.

HAY AND STRAW.

Whitechapel, Saturday.—Fair supply, trade steady. Prices:—Best clover, 85s to 100s; inferior ditto, 80s to 85s; specially picked hay, 92s 6d; good ditto, 80s to 87s 6d; inferior ditto, 50s to 60s; mixture and sainfoin, 70s to 90s; and straw, 25s to 36s per load.

Leeds, Tuesday.—A good demand prevails in the warehouses for hay and straw, prices being fully maintained. Quotations:—Meadow hay, 6½d to 7d; clover, 7d to 7½d; wheat straw, 5½d; oat straw, 5d; rye straw (retail), 7d per stone.

Bristol, Tuesday.—The prices quoted at to-day's market were:—Old clover hay, 75s to 80s per ton; old meadow hay, 70s to 75s; new hay, 60s to 70s; and straw, 45s to 50s.

FOREIGN HAY AND STRAW.

London, Saturday.—Hardly anything has passed this week, owing to cheaper offers of English stuff, and Continental holders asking extreme prices, which are from 2s 6d to 5s over those obtainable here. Straw is quiet, but steady. We quote: Timothy and clover mixture, 85s to 87s 6d; Dutch 1st cut clover, 92s 6d; ditto, 2nd cut clover, 92s 6d to 95s; good Dutch hay, 75s; common hay, 65s; large bale French wheat straw, 46s 6d; small ditto, ditto, 43s; ditto, 43s. To do business at least 2s 6d less would have to be taken for clovers. All these prices are per ton delivered by barge alongside.—FULLER AND PRENTIS, 9 and 10, Great Tower Street, E.C.

WOOL.

London, Friday.—Wool, English, per packet of 240 lb—Fleeces, Southdown hoggs, £8 to £11 10s; half-bred hoggs, £7 to £8 10s; ditto wethers, £6 10s to £8; Kent fleeces, £6 to £7; Southdown ewes and wethers, £8 to £11 10s; Leicester ditto, £6 to £7. Colonial, per lb: Victorian, fleece, superior, 1s 6d to 1s 7d; scoured good, 1s 7d to 1s 7½d; scoured average, 1s 5d to 1s 6d; greasy average to fair, 10½d to 11½d; New South Wales, scoured average, 1s 3d to 1s 4d; greasy average, 8½d to 9½d; South Australian, greasy average, 6½d to 7d; New Zealand, scoured average, 1s 4½d to 1s 5½d; greasy average, 8½d to 9½d; Cape, scoured superior, 1s 6d to 1s 8d; fleece average, 8d to 9d; greasy average, 6½d to 7d; Natal, scoured, 1s 2d to 1s 3d; greasy average, 7½d to 7¾d. Crossbreds, greasy, Victorian, good to superior, 10d to 1s; New Zealand, fine, 9d to 10½d; ditto medium, 7¾d to 8d; ditto coarse, 6d to 8d.

Bradford, Thursday.—Market is quiet, buyers and sellers alike being disposed to await the result of the next London sales. Values are not quotably changed, but it may be said that whilst in strong wools prices are steady, there is a tendency to cheapen in the finer sorts. Mohair is firm. Yarn and piece trade unchanged.

Canterbury, Saturday.—Quiet trade, without alteration in prices. Kent fleeces do not exceed 6d per lb, with half-breds at 6½d to 7¼d; and Downs from 8d to 10d; lamb-wool, 4d to 5d per lb.

Leicester, Saturday.—Market quiet during the week, especially in merinos and fine cross-breds. Best home-grown classes met a fair demand, and values steady. Inferior sorts difficult to sell, even at low rates. Yarns in moderate demand, at steady rates.

Liverpool, Wednesday.—The fifth series of periodical wool auctions for this year began on the 25th ultimo, East India wool being catalogued on that and two following days, and sundry descriptions yesterday and to-day. A total of 20,955 bales was catalogued, and nearly 16,000 bales disposed of; America getting about 1,400 bales, France 2,100 bales, and the home trade 12,500 bales. The selection comprised a good quantity of both Joria and Vicanere whites, but Kandahar whites were far from plentiful, and medium to good yellows decidedly scarce. Middle and piecy whites, common yellows and greys, as well as native skin and goat hair, were in large supply. A full attendance of both home and Continental buyers was secured, and competition pretty well maintained throughout. There was not much change from July currency, and on the average sellers were the gainers. White Vicanere was generally ½d per lb dearer, but Joria whites were slightly easier, and Kandahar whites unchanged; yellows, suitable for export, brought rather more money. Common whites and fine greys were stiffer, but the lower greys in wasty condition, as well as native skin and goat hair, favoured buyers to a slight extent.—RONALD AND RODGER, Wool Brokers.

FEEDING STUFFS.

Mark Lane, Monday.—Linseed Cakes.—Imports for the week are again light, but with only a moderate demand values are with difficulty maintained. Russians offer rather more freely for shipment, but spot prices are not quotably lower. Americans remain scarce and firm on spot, but for early arrival there are sellers at a trifle less money. English are without change. Cotton cakes: There have been no fresh arrivals of Egyptian during the week, and warehouse parcels have sold freely at 2s 6d per ton advance. London-made cakes are in fair request and also the turn dearer. Decorticated cakes and meal sell slowly and unchanged. Maize germ meal is a slow trade at slightly easier prices. Rice meal is again inclined to advance, landed parcels being sparingly offered at last week's prices, while 1s 3d per ton more money is asked ex ship for a steamer parcel now due.

—PINNOCK BROS., Mark Lane.

Hull, Tuesday.—The wheat trade is dull to-day. English meets a slow sale at barely last week's prices. Foreign in only poor demand at unaltered prices. Malting barley difficult to sell, especially the commoner qualities, at late rates. Grinding, 6d per quarter cheaper on the week. Oats unaltered. Beans continue scarce and dear. Flat maize 3d per quarter lower; round corn unaltered from last week. Linseed.—The arrivals are 100 qrs from Cantania, 98 qrs Harlingen, 759 qrs Odessa, 25 qrs Rotterdam; total, 982 qrs. The market has again experienced fluctuations, losing ground the early part of the week, but closing again firm on the news of repeated short shipments. Calcutta to London, Sept.-Oct. and Oct.-Nov., which came down as low as 57s 9d, has recovered to 59s, with buyers at the price. Black Sea and Azof are, perhaps, a shade easier, 57s being now the quoted value of arrived seed and seed afloat, whilst 55s 6d is the quotation for Sept.-Oct., and 55s Oct.-Nov. Petersburg 95 per cent. arrived and afloat offers at 54s 6d. Riga, for monthly shipments, Oct.-March, is named 52s 3d to 52s 6d. River Plate, the last business done is Dec.-Jan. at 50s 3d, and Jan.-Feb 49s 3d. Cottonseed.—The market has ruled firm all the week and higher prices paid in every position. Old crop on spot and near at hand sold at £7 7s 6d to £7 8s 9d. September new done at £7 11s 3d to £7 12s 6d. First half October made up to £7 8s 9d, and all the month £7 5s. A fair quantity November-January changed hands at £6 12s 6d to £6 18s 9d, and to-day sellers scarce under £7. Oil seed cakes.—Linseed cakes firm at previous rates. Cotton cakes are 5s dearer, with strong tone. Hemp.—No change.—KEIGHLEY MAXSTED AND CO.

WATERLOO ROUND FEEDING CAKES, £6 15s 0d PER TON; WATERLOO ROUND 97 PER CENT. PURE LINSEED CAKES, £9 2s 6d PER TON; WATERLOO ANGLO SHAPE 97 PER CENT. PURE LINSEED CAKES, £9 0s. 0d. PER TON; WATERLOO 97 PER CENT. PURE EGYPTIAN COTTONSEED CAKES, £5 17s 6d PER TON. ALL F.O.R. HULL.

MANURES.

Liverpool, Friday.—Basic slag is in fair request at the quotations, but here is little or no business passing in other fertilisers; an all-round improvement of 2s 6d per ton has occurred in the value of superphosphate of lime. The tone of the market for feeding stuffs is firm, and in some instances further advanced prices have been established; so far the autumn demand is unimportant, but buyers on the colder weather more inquiry is experienced. Values as per [illegible]: Nitrate of soda, best quality, 1 cwt., guaranteed 95 per cent. pure, in bags, £9 7s 6d to £9 7s 6d per ton. East India bone meal, in bags, £4 5s to £4 7s 6d per ton; kainit, prime 23 per cent., in bags, £2 7s 6d to £2 8s per ton; linseed cake, American, oblong, prime, in bags, £7 15s to £8 per ton; ditto, round, prime, in bulk, £8 15s to £9 per ton; cottonseed cake, N.A., decorticated, prime, fairly soft, in bags, £9 [illegible] per ton; ditto, English [illegible], prime, very soft, in bags, £7 10s to £7 12s 6d per ton; ditto, English, undecorticated, prime, in bulk, £5 5s to £5 12s 6d per ton; rapecake (crushed), 20 to 25 per cent. oil, prime, in bags, £7 5s to £7 10s per ton; maize germ meal, English, prime, in bags, £5 10s to £5 12s 6d per ton; rice germ meal, Rangoon, imported, in bags, per ton, nominal; Indian meal, crushed, fine grinding prime, in bulk, 12s to 12s 6d per 280 lbs.; Indian meal, bold feeding, in bags, £3 3s to £3 5s per ton; N.A. clover seed, new red, fair to good, in bags, per cwt., [illegible]; D.N.S. brand, superphosphate of lime, guaranteed 25 to 27 per cent., in bags, per ton, ditto, ditto, 35 to 37 per cent., in bags, per ton, ditto, ditto, 36 to 38 per cent., in bags, per ton; mineral basic slag, prime quality, guaranteed 30 to 32 per cent. phos., in bags, £1 11s to £1 12s 6d per ton; ditto, ditto, ditto, 35 to 40 phos., in bags, £1 12s 6d to £1 14s per ton; ditto, finest quality, guaranteed 38 to 45 phos., in bags, £1 16s to £1 17s 6d per ton, at the producing depôts. H. JONES, LANCASTER AND CO.

Winsford (Cheshire), Saturday.—Current prices of salt at the works: Common white salt, 11s per ton; fine screened rock salt, 2s 6d per ton, for truck loads to bulk.—THE SALT UNION, LIMITED.

NEWS NOTES.

On Friday there was a very large fair, composed almost exclusively of first and second class cattle, and the demand was brisk, more especially for bullocks. Almost a complete clearance was effected at prices favouring sellers. Quotations: Calves, first class, £4 12s. 6d. to £5 7s. 6d.; second class, £3 15s. to £4 10s.; yearlings, first class, £7 15s. to £8 10s.; second class, £5 15s. to £6 10s.; two-year-olds, first class, £11 7s. 6d. to £12 15s.; second class, £9 8s. 9d. to £10 5s.; third class, £6 10s. to £7 5s.; three-year-olds, first class, £13 15s. to £16; second class, £11 5s. to £13 10s.; third class, £7 14s. 8d. to £9; springers, second class, £12 15s. to £13 10s.

Serious Fire at Welbeck Abbey.—A serious fire, the origin of which has not yet been ascertained, broke out in Welbeck Abbey, the seat of the Duke of Portland, at an early hour on Friday morning, and before it could be subdued that part of the building known as the Oxford Wing, on the west front, was destroyed. The valuable pictures, furniture, and objects of art were saved, but damage was done to the extent, it is estimated, of £25,000. The Duke and Duchess of Portland were not in the abbey, being on a visit to the North of Scotland. Their three children, however, were sleeping in bedrooms near the spot where the fire broke out, but fortunately they were rescued uninjured.

Big Farm Fire at Whitchurch.—One of the most disastrous fires known in Cheshire for many years took place on Wednesday morning at the farm of Mr. Cooper, of Cholmondeley, a noted Cheshire cheese maker. When Mr. and Mrs. Cooper were awakened at three o'clock the stockyard, consisting of the entire produce of this year and a large quantity of hay and corn harvested last year and the year previous, together with a long range of farm buildings, principally stabling, were one dense mass of flames. In due course the engines from Whitchurch, eight miles away, Malpas and Cholmondeley, were on the scene, but by this time all efforts to save any portion of the produce or the buildings was hopeless, but, fortunately, the contiguous buildings were prevented from taking fire by dint of great exertion, there being but little wind and a good supply of water. A locomotive engine, carts, and farm implements were destroyed. The farm belongs to the Marquis of Cholmondeley. The loss is very great, but all is insured. The cause of the fire is a complete mystery, but is believed to be the work of an incendiary.

An Automobile in the Harvest Field.—In the current number of *Engineering* there is an illustration of a mowing and reaping machine fitted with a petrol engine, by which it is driven without aid from horses. This machine is exhibited by the M'Cormick Harvester Machine Company, of Chicago, in their pavilion at the Vincennes branch of the Paris Exhibition. The motor is a double-cylinder 10 horse-power gasoline engine of American design, and this operates the machine. The power from the motor is transmitted by an endless chain to a sprocket wheel and friction clutch placed on the cross-shaft of the mower. This clutch is so arranged as to engage either one bevel-gear wheel or another placed on each side, and in this way the machine can be made to advance or go backward at will. The speed of the motor can be increased or diminished while the machine is at work, by simply changing the regulating lever. The in-and-out-of-gear motion is controlled by a lever conveniently placed at the foot of the operator, and connected by a crank to the friction movements. Steering is effected by a crank placed within easy access of the operator, and connected below by a steel bar direct to the guide wheel, which is in front of the cutter-bar. This wheel is placed in a line with the right-hand main wheel, and in this way the grass cut on the previous round is not disturbed, the machine straddling the window completely.

LIVE STOCK.

OUR ILLUSTRATIONS.

The Guernsey bull Frolic 6th is the property of and was bred by Mr. W. A. Glynn, Seagrove, Sea View, Isle of Wight. This bull was calved on February 28th, 1896, his sire being Frolic 5th 612, and his dam Favourite 13th 1852 by Calais Chief 458. Frolic 6th has had a varied career in the principal showyards this year. At the Bath and West he was not even noticed, but at the Royal Counties he was highly commended, and at the Royal Show came out top of his class.

Mr. H. B. Warren, of Garrendenny Castle, Carlow, is the owner of the hunter gelding Guy Fawkes, which at the Royal Dublin Society's Show in August last won first prize in the class for hunter geldings up to 14st. or 15st., five years old and upwards.

STOCK AND SHOW NOTES

By Herdsman.

It is reported from Shanghai that rinderpest is raging among the cattle bought by the German Commissariat Department for the use of the troops in China.

On Tuesday, the 16th inst., Messrs. John Thornton and Co. will hold a special sale of Shorthorn cattle in the wool sheds adjoining the cattle market at York. From the catalogue which has just come to hand I see that the animals to be offered are: The entire small herd belonging to the late Mr. William Wright, of Wollaton, Nottingham; a large portion of Col. Brocklehurst's, Banksborough (Oakham) herd; a number of young bulls bred by Lord Armstrong, Sir John Swinburne, Bart., and other well-known breeders; and also about half-a-dozen pure-bred Guernsey cows and heifers from the herd belonging to Mr. J. E. Ellis, Wrea Head Farm, Scalby, Scarborough.

The Council of the Tunbridge Wells and South Eastern Counties Agricultural Society have fixed Thursday and Friday, July 25th and 26th, 1901, as the dates for their next annual exhibition. In future the society show will be held each year on the corresponding days.

With the exception of a few aged cows, the whole of the herd of pure-bred Aberdeen-Angus cattle belonging to Mr. Fred Crisp, D.L., J.P., will be sold by auction on the 16th inst., at the Stud Farm, New Southgate, London, N. The cattle include a nice lot of cows, two-year-old heifers, yearling heifers, and heifer calves, the first-class stock bull Governor of Abergeldie 14,447, three young bulls, and four bull calves, comprising representatives of the most valued and sought-after families of the breed. The animals are all in healthy breeding condition, having been in no way fed up for sale. The herd has been shown to a limited extent of late years, and the prizes taken at summer shows this year comprise seven firsts, one second, and championships. The record of Gilderoy 9208, the well-known stock bull, is known to all breeders of Polled cattle, and he has been retained by Mr. Crisp. The sale will commence immediately after a 12 o'clock luncheon, and will be conducted by Messrs. Macdonald, Fraser, and Co., Ltd., of Perth.

On Thursday week Messrs. Sexton, Grimwade, and Beck will sell by auction at the Hendre Stud Farm, Monmouth, a number of pedigree Shires belonging to the Right Hon. Lord Llangattock. This will be the second unreserved sale of animals from the Hendre Stud, and on this occasion there will be offered ten brood mares, twenty-nine fillies and foals, and five yearling and two-year-old colts, being thus pre-eminently a breeder's sale of young stock, which are for the most part by that most successful sire Prince Harold, or his sons, Hendre Crown Prince, Calwich Prince, Hendre Marksman, and Hendre Baronet. The half-score brood mares included in the sale are nearly all well-known either as prize-winners or dams of winners, and they are without exception very valuable mares, and are mostly covered by Prince Harold, those by him being covered by a good young horse Watnall Victor, who is in the sale. The young stallions include two first prize winners and the champion at the Royal Show at York, and all five should make stock horses of the first rank.

The entire herd of pure-bred Jersey cattle belonging to Miss Moore, of Kingston House, Leatherhead, is to be sold by auction on Wednesday, the 10th inst., in consequence of the milk business having been sold and the farm given up at Michaelmas. The herd, which has supplied a large milk business at Leatherhead, has been selected with great judgment by Miss Moore from the best English stock. At the dispersion of Mr. G. A. Fuller's herd, in 1885, Comely, the best and highest priced heifer, was purchased. Amy, another fine specimen, came from Mr. Robinson's herd at Chorleywood, and other beautiful animals were purchased from Mrs. Perkins, of Oakdene, the late Mrs. Hopwood, of Ketton Hall, Stamford, as well as from the late Captain Cooper, of Stoke d'Abernon, Cobham, and other first-class breeders. To these choice cows Island bulls were selected, and in addition to these, occasionally good English bred sires have been used. The heifers calve down at about two years old, and have not been retained in the herd unless they yielded from ten to twelve quarts daily, and this yield increased with maturity to fourteen to sixteen quarts. The animals are famous for their longevity. Daphne and Crocus, two well-known cows, lived till they were respectively seventeen and fifteen years old, Vignette till she was seventeen years, Tasmania 4th till fifteen years, and Amy till eighteen years; the two last are still both alive on the farm at the present time, and have been presented to the old steward Maskell. The animals have only been exhibited at the Guildford and Croydon shows, where they have been winners of prizes, often defeating Royal and County winners. The sale, which will commence at two o'clock and be conducted by Messrs. J. Thornton and Co., will be held at Vale Lodge Farm, which is about half-a-mile from Leatherhead Station.

Messrs. Cronk, of Sevenoaks and 12, Pall Mall, London, have received instructions from Sir Mark W. Collet, Bart., who has at his farm at Lower St. Clere, Kemsing, Sevenoaks, to sell by auction on the premises, on Thursday next, the whole of the live and dead farming stock, which comprises six powerful cart horses, the herd of ten pedigree Shorthorn cows and five bulls, twenty Galloway steers and heifers, one hundred and seventy-three pure-bred Shropshire ewes and lambs, twenty-six pure-bred Shropshire ram lambs, and eighty-three Kent and half-bred ewes and lambs, also the usual farm implements. Twelve o'clock is the hour set down for the commencement of this sale.

The Board of Agriculture have received a notification from the Foreign Office that by a Decree, which came into force on the 18th September last, the importation into Italy of swine flesh salted, smoked, or otherwise prepared for keeping, is permitted from the United Kingdom, provided it be accompanied by a sanitary certificate of the authorities of its place of origin.

Transactions in Store Stock.

[*From the Irish Department of Agriculture and Technical Instruction.*]

Ballinasloe Sheep Fair took place on Tuesday, when the supply was apparently smaller than usual, and consisted chiefly of two-year-old wethers and aged ewes. There was an active demand for wethers, which were all bought up, but ewes exceeding two years old were more or less a drug. Prices:—Lambs, second class, £1. Over twelve and under twenty-four months old, first class, £1 18s. to £2; second class, £1 12s. to £1 14s. 6d. Two years old and upwards, first class, £1 19s. to £2 16s.; second class, £1 14s. to £1 19s.; third class, £1 8s. 6d. to £1 12s.

There was a very small supply of cattle on Thursday, and they were Kerries of an inferior kind, but demand was brisk for all kinds, and almost a complete clearance was effected. Prices: Calves, first class, £5; second class, £3 5s. to £4 10s.; third class, £2 12s. 6d. to £3; two-year-olds, first class, £11 5s. to £12 7s. 6d.; second class, £8 15s. to £10; third class, £4 10s. to £6 15s.; three-year-olds, third class, £7 to £9 5s.

CATTLE.

Sale of Sir W. Boord's Shorthorns.

This small herd of Shorthorn cattle was sold by auction on Friday, the 28th ult., by Messrs. John Thornton and Co., at Wakehurst Place, Sussex. A good local company was present, but the cattle generally were thin and in poor condition, and there was but little competition. The highest price was 31gs., paid by Mr. A. J. Mullins for Edith Gwynne, a red five-year-old cow. Altogether forty-one head were sold, and the total realised was £642 12s., giving an average of £15 13s. 6d. each.

We give below a few of the best priced lots:—

COWS AND HEIFERS.	Gs.
Kennet Lass 4th, roan, c Sept., 1889, s Bismarck 55379 Mr. T. Bannister	13½
Ruby Lassie, red, c April, 1892, s Beeswax 58508 Mr. A. J. Mullins	24
Edith Gwynne, red, c March, 1895, s Charming Land 66814 Mr. A. J. Mullins	31
Charming Gwynne, roan, c June, 1895, s Charming Land 66814 Mr. T. Bannister	15½
Elizabeth, roan, c Nov., 1895, s Scotch Rose 66297 Mr. C. File	17½
Siddington Lady, red, c Nov., 1896, s Ranger 66103 Mr. C. Bell	28
Poll Gwynne, red, c Feb., 1897, s Ralph 71298 Mr. A. J. Mullins	21
Kennet Lady, roan, c August, 1897, s Ralph 71298 Mr. W. W. Harrison	17½
Ethel Gwynne, roan, c Oct., 1897, s Coral Count 70185 Mr. C. File	20
Pink of Fashion, roan, c Nov., 1897, s Ralph 71298 Mr. M. Trewhella	20
Autumn Pine, red and little white, c Dec., 1897, s Ralph 71298 Mr. M. Trewhella	20
Madeline, roan, c August, 1898, s Royal Studley 75548 Mr. J. J. Froud	18
Elsa, white, c April, 1899, s King Athol 72764 Mr. A. J. Mullins	20
BULLS.

Game Boy, roan, c April, 1899, s King Athol 72764 Mr. J. Wells	20
Kennet Lad, roan, c June, 1899, s Grand Duke 61st 67146 Mr. W. W. Harrison	21

Sale of the Kelmscott Shorthorns.

Few men are more popular in the county of Gloucestershire than Mr. R. W. Hobbs, of Kelmscott. His fine herd of dairy Shorthorns, his capital flock of Oxford Downs and his well-known stud of Shires have attracted many visitors to his hospitable farmhouse. On Wednesday last a small portion of the Shorthorn herd was sold by Messrs. John Thornton and Co., and a large company of people assembled. The cows were mostly in full profit, were typical milking Shorthorns, and fit to go into any breeder's herd. Mr. W. T. Garne paid the highest price, 70gs., for Musa 4th, a good red-and-white cow, and 40gs. for Solo 40th, a roan four-year-old. Several of the best cows were purchased by Mr. Dickson Park for founding a new herd near High Wycombe. The bulls also met with a ready sale, selling up to 57gs., which sum was paid by Lord Sherborne for Volunteer 2nd, a smart yearling, bred from the late Mr. Bowly's old Chorus strain. The average for the cows was just over £46, and for the bulls £31 15s., or a total of £1,630 2s. 6d. for forty-one head. We give below a sale list:—

COWS AND HEIFERS	Gs.
Galentia 16th, red, c Nov., 1893, s Nelson 64471 Hon. R. Craven	36
Handsome 5th, red, c Nov., 1893, s Cambrian 63749 Mr. E. Dickson Park	44
Solo 31st, red and little white, c Jan., 1894, s Bellford 63687 Hon. R. Craven	20
Her cow calf, red, c August, 1900, s Vain Soldier 73799 Mr. A. Henderson	17
Musa 4th, red and little white, c May, 1895, s Gloucester 64082 Mr. W. T. Garne	70
Galentia 24th, red and white, c Dec., 1895, s Earl of Southrop 125th 66988 Hon. R. Craven	33
Spotless 17th, roan, c Sept., 1895, s Earl of Southrop 125th 66987 Mr. E. Dickson Park	41
Galentia 22nd, red, c Sept., 1895, s Gloucester 64082 Mr. J. Thorley	52
Primula 40th, white, c April, 1896, s Earl of Southrop 125th 66987 Dr. Macan	29
Decentia 20th, red, c Oct., 1896, s Sir Arthur 63585 Mr. E. Upton	33
Marchioness 11th, red and little white, c Oct., 1896, s Rowley 25th 67345 Hon. R. Craven	30
Musa 7th, red and little white, c Oct., 1896, s Sir Arthur 63585 Mr. W. Cooper	31
Sol 36th, roan, c Nov., 1896, s Rowley 25th 67345 Mr. W. T. Garne	40

Mr. H. B. Warren's Hunter Gelding "Guy Fawkes."

The Smallest of the Wild Cattle.

Among the larger mammals the species or varieties inhabiting islands are more or less markedly inferior in point of size to their nearest Continental relatives. In the case of the smaller islands, like Sardinia and Corsica, the reason of such a diminution in stature is not far to seek, and it is therefore not in the least surprising to find that the Corsican red deer is a very inferior edition of its prototype of the mainland. The buffalo of the small island of Mindoro, in the Philippines, is greatly inferior in size to the wild buffaloes of the tall grass-jungles of Assam. In the case of islands of the dimensions of Sumatra and Borneo the reason of the phenomenon is by no means apparent, especially when we find them inhabited by a man-like ape (the orangutan), almost rivalling in bulk and stature the gorilla of Western Africa. Nevertheless, even in such areas the same feature is to a certain extent noticeable, the wild buffalo of Borneo being considerably smaller than its Indian relative. As regards its actual area, the island of Celebes occupies a kind of intermediate position, since it is much inferior in extent to either Sumatra or Borneo, although far too extensive to come under the denomination of a small island. From its peculiar shape, which recalls the form often assumed by an amœba, it has, however, a much smaller area than could be enclosed by a ring fence than many islands of less than half its acreage, and this may really bring it, so far as the development of animal life is concerned, into the same category as a small island.

Be this as it may, Celebes has the distinction of being the home of the smallest living representative of the wild cattle, or, indeed, of the wild cattle of any period of the earth's history, for no equally diminutive fossil member of the group appears to be known to science. An idea of the extremely diminutive proportions of the anoa, or sapi-utan, as the animal in question is respectively called by the inhabitants of Celebes and the Malays, may be gained when it is stated that its height at the shoulder is only about 3ft. 3in., whereas that of the great Indian wild ox, or gaur, is at least 6ft. 4in., and may, according to some writers, reach as much as 7ft. In fact, the anoa is really not much, if at all, larger than a well-grown Southdown sheep, and scarcely exceeds in this respect the little domesticated Bramini cattle shown a few years ago at the Indian Exhibition held at Earl's Court.

The anoa has many of the characters of the large Indian buffalo, but its horns are relatively shorter, less curved, and more upright. In this, as well as in certain other respects, it is more like the young than the adult of the last-named species; and as young animals frequently show ancestral features which are gradually lost as maturity is approached, it would be a natural supposition that the anoa is a primitive type of buffalo. This idea receives a remarkable confirmation from the circumstance that in the latter Tertiary strata of Northern India there occurs skulls of anoa-like buffaloes, which, however, in correlation with the continental area where they are met with, indicate animals of considerably larger dimensions than the living Celebes animal. In fact the latter, together with the somewhat larger wild buffalo, or tamarau, of the island of Mindoro, and the aforesaid extinct Indian species, constitute an altogether peculiar and primitive group of the buffalo tribe.

In its young state and during middle life the anoa is covered with a fairly thick coat of somewhat woolly hair, which is at first yellowish brown, but eventually becomes dark brown or blackish. In common with other Asiatic buffaloes, the hair is reversed along the middle line of the neck and back as far as the haunches; that is to say the tips are directed towards the head instead of towards the tail. What may be the precise object of this reversal (which is also met with among many antelopes and deer) is not yet ascertained. Possibly it may have something to do with the manner in which the animals rub themselves against the stems or boughs of trees and bushes.

In old individuals, especially those of the male sex, the coat of hair almost completely disappears, leaving the black skin bare and shining, like that of old buffaloes in general. From the more typical buffaloes the anoa differs by the general presence of white markings. These usually take the form of a gorget on the lower part of the throat, and of one or two spots on each side of the under jaw, as well as patches above the lateral hoofs; but there may also be white blotches on the neck and back, and in front of the eyes, while more or less of white may appear on the muzzle and the whole of the lower portion of the limbs. The special interest attaching to these white markings is that the spots on the sides of the face as well as the gorget on the throat are also met with among certain antelopes, such as the kudu and the bushbucks; and from this it has been inferred that the anoa is more nearly related to the antelopes than is any other member of the ox tribe. Although this may be true to a certain extent, the connection with the kudu tribe is remote.

According to the meagre accounts we at present possess of the creature in its native haunts, the anoa dwells in pairs on the elevated ground of the interior of Celebes, where it passes most of its time in thick forests in the neighbourhood of water. In associating in pairs it is quite unlike all other wild cattle, with the possible exception of the Philippine tamarau; and here again it presents a resemblance to the kudu and bushbucks, which also generally go about in pairs or small family parties.

Examples of the anoa are but rarely seen alive in England, although they do not appear very difficult to procure. The first specimen exhibited in the London Zoological Gardens was purchased in May, 1871, and a second was obtained by exchange in June, 1880. Between the latter date and 1890 (when the last complete list of the animals in the menagerie was published) not a single example of this very interesting little buffalo was obtained. At Woburn Abbey a pair dwelt in a good-sized paddock by themselves and flourished for a considerable period, but unfortunately one has since died.

Apart from the interest attaching to it as a primitive island type, and as being the smallest representative of the ox tribe, it cannot fairly be said that the anoa is a very attractive animal. It has nothing specially to commend it from an æsthetic point of view, being, in fact, a rather ugly and ungainly creature; and from its pugnacious disposition it is not adapted for turning out in British parks among other horned animals. Moreover, it has a decidedly delicate constitution, which alone would be sufficient to render it unfit for this kind of life.—R. Lydekker in *Knowledge*.

HORSES.

The Supply of Army Remounts.

Sir John Gilmour, Bart., delivered the opening address of the seventy-eighth session of the Royal (Dick) Veterinary College, Edinburgh, and took as the subject of his remarks the best means of supplying our service with army remounts. The question, he said, naturally divided itself into two heads—the supply of remounts in the time of peace, and the supply of remounts in the time of emergency, but he would not express any decided opinion under the latter head until those interested in horse-breeding in this country could have the benefit of the experience of those in charge of the remount stations in South Africa. Dealing with the first head of his subject—the supply of remounts in time of peace—he said that during the five years previous to the outbreak of the South African war the number of remounts required was about 1,500 per annum. His opinion was that these remounts ought to be bred in this country by our own farmers, and purchased direct from them by the remount department. He knew that certain remount authorities did not consider this plan a feasible one.

The other day General Trueman was asked by Mr. Charles Tyndall if the department were prepared to take from the farmers unbroken three-year-old horses, and the General, replying in the negative, said their best horses in the war were a lot of Argentines, landed in South Africa at £14 apiece, and which were properly broken and knew their business. He (Sir John) thought it would be found that this lot of Argentines were a very exceptional lot, and that they would be balanced by others from the Argentine that were not properly broken and did not know their business. He would also like to know if the price stated included the expenses of the remount officers in the Argentine. From information he had received he could speak of a lot of eighty Argentines served out to a company in which he had a considerable interest. They were supplied at Stellenbosch, and at Wellington, which was not far from the camp, several died, while at Potchefstroom very few remained. Even though they only cost £14, he thought they were pretty dear at that figure. While these remounts would go fairly well in the ranks, when they were ridden separately they neither answered bit nor leg.

He was not one of those who at all approved of

the Government starting large horse-breeding establishments, as the risk and uncertainty of such a scheme would be too great. He found from the statistics of the Royal Commission on Horse-Breeding, of which he was a member, that on an average 60 per cent. of foals were left by the Government or Queen's premier stallions, and he was certain that by purchasing the young horses after they had reached their third year the country would get far better value for its money than at present. He maintained that the farmers of the United Kingdom could breed the animal required, and with a little encouragement they would do so, but he admitted that they could not break and handle a young horse properly. If, instead of the present method of not purchasing until the horses were four or five years of age, and only giving a top price of £40 or £45 for Army remounts, the Government would buy at three and a-half years of age, they would secure many horses of very considerable value, which could be sold to officers joining the service, who had at present to pay good prices to fashionable dealers for high-class chargers.

The money now placed at the disposal of the Royal Commission on Horse-Breeding—£5,000 per annum was ridiculously small and insufficient, but in spite of that the Commission were able to send out to districts in England, Scotland, and Wales twenty-nine thoroughbred stallions to serve half-bred mares at the small fee of 42s. 6d. During the thirteen or fourteen years in which they had carried on the work they had been able to put in the country as sound stallions as it was possible for three veterinary surgeons to make them, and that had undoubtedly resulted in choking off the roads thorough brutes, which propagated their kind and did immense harm to half-bred stock. They served annually about 1,500 mares, which left between 800 and 900 foals.

The scheme had worked so successfully that it only required to be enlarged to place the remount department of the country in the way of having at its disposal admirable half-bred stock to select from. But in order to do so the grant to the Commission must be increased by three or four times the present sum, so that a larger number of approved stallions might be subsidised, and breeders should be assured of a fair market for their stock at three and a-half years old. If such a scheme were properly worked for a few years, he did not think there would be much need for the country to depend on foreigners for its remounts.

Show and Sale of Horses at Whitchurch.

Messrs. Frank Lloyd and Sons held their annual horse show and sale in Whitchurch Smithfield(Salop) on the 28th ult. The catalogue comprised 310 heavy town, light lurry, and van horses, one two, and three year old Shire geldings and fillies, Shire foals, harness horses, and half-bred geldings and fillies, and light foals. £29 10s. was offered for competition, and the following were the awards: Shropshire Challenge Cup for the best mare or gelding in the sale—1st, Mr. John Griffiths, Dearnford Hall, sold at 78gs.; r, Mr. John Horton, Tilstock, 76gs. Lurry horse—1st, Mr. W. K. Hobson, Wood Farm, 50gs. Three-year-old cart gelding or filly—1st, Mr. G. H. Caldecott, 38gs. Two-year-old gelding or filly—1st, Mr. Willis. Yearling gelding or filly—1st, Mr. Thos. Topham. Cart filly foal, 1st, Jas. Ikin, 31gs.; r, Mr. Speed, Coloverley. Cart colt foal—1st, Mr. J. Griffiths, 27gs.; r, Captain Lonsdale, 25gs. Foal by Nailstone Royal Ensign (the gift of Captain Lonsdale), Mr. S. Green, Cloverley. Foals by Dunsmore Ambassador (the gift of Mr. Frank Lloyd)—Mr. J. Griffiths, 27gs. Foal by Elevator (gift of Mr. H. Carr) -Mr. Woodhall, Bronnington. Foal, insured with the County Live Stock Insurance Co.—Mr. Jas. Ikin, Steele. A number of heavy horses sold at from 45gs. to 50gs., and others from 30gs. to 44gs.; two and three year olds, from 29gs. to 48gs.; yearlings, up to 33gs.; Shire mares and foals (Captain Lonsdale), 59gs., 64gs., and 86gs.; Shire foals, 14gs. to 30gs.; harness cobs and ponies, 20gs. to 30gs.; light foals, up to 20gs. Buyers were in good attendance from a very wide district. Trade throughout was sharp, and a capital clearance was effected.

Sale of Shires at Ashbourne.

In accordance with their usual custom Messrs. Sexton, Grimwade, and Beck held, on the day after the Ashbourne Shire Horse Show (September 28th), a sale of pedigree Shire horses in the showyard. Nearly a hundred animals were catalogued, and about half the number changed hands. Both the filly and colt foals were a fine lot, and their owners very naturally placed high reserves upon them. In the two-year-old fillies, Mr. Rains, of Burton-on-Trent, refused 115gs. (the price at the fall of the hammer) for his bay filly, foaled in 1898. This very promising filly took first at Stafford this year, as well as at Burton; second at Tutbury, and second at Uttoxeter. In the class for yearling fillies, Mr. Appleby's chestnut Blanche, sire Limecrofts Harold, was sold for 40gs. to Mr. Stebbing. A very useful colt, not catalogued and the property of Mr. A. C. Duncombe, sire Harold, dam Premier, was sold to Sir William Foulkes for 25gs. Three-year-old fillies made 32gs. and 33gs., and two-year-olds 31gs., 41gs., 40gs. Mr. Bestwick's yearling filly, by King of the Peak, sold for 61gs. to Mr. J. Eadie; and other yearlings made 30gs., 31gs., and 28gs. Mr. Bestwick sold a filly foal for 32gs., and others made 18gs., 10gs., 18gs., 15gs., and 21gs. Colt foals made from 20gs. to 40gs., the latter price being obtained for Mr. J. H. Reeves's colt by Harold.

Wrexham Horse Sales.

Messrs. Frank Lloyd and Sons commenced their October horse sales on Tuesday and Wednesday in the North Wales Repository, Wrexham, with light horses. Over 600 high-class match pairs, harness horses, hunters, Hackney, show cobs, and ponies were offered, and a grand trade was effected, with a splendid clearance all through. There was a very large attendance of buyers from all parts of the United Kingdom. Mr. J. T. Oliver, Carnarvon, sold a grand hunter for 175gs. and a pair for 175gs. Messrs. Evans and Co. sold a pair for 165gs.; and Mr. E. Bailey, Ashbery Heath, a pair for 175gs. Mr. J. Jones, Whitegate Stud, sold a black cob, 13.3 hands, for 200gs. This was a grand cob, a first-prize winner at Dublin this year. The same gentleman also sold a chestnut gelding for 150gs. Other principal prices were as follows:—Mr. Hugh Romery, Ballymena, 75gs., for a chestnut mare; Mr. E. H. Lloyd, 65gs., for a bay gelding; Mr. R. G. Thomas, Calverhall, 70gs., for a brown gelding; Mr. J. T. Oliver, Carnarvon, 90gs., for a bay gelding, and 68gs., for a bay gelding; Mr. J. H. Roberts, Brynlewenalls, 68gs., for a black gelding; Mr. J. H. Wyther, Crowle, 90gs., for a roan gelding; Mr. J. S. Whalley, Whitchurch, 73gs., for a bay gelding; Mr. T. Nicholas, Port Talbot, 76gs., for a chestnut gelding; Mr. W. Foster, Meb Valley, 80gs., for Modjeska, and 60gs., for Primrose, and 85gs., for High and Mighty; Mr. Morgan, Boissant, 76gs., for a bay gelding; Mr. R. Whitworth, 85gs.

Sale of Harness and Agricultural Horses at Carlisle.

Hetherington's Auction Company held their monthly horse sale at Carlisle on Thursday, when sixty saddle and harness and agricultural horses, cobs, and ponies were catalogued. Some useful animals were forward, for which, with a fair attendance of buyers, there was a strong demand at good prices; whilst secondary sorts only met a slow dragging trade. A good number, however, changed hands. Cart horses made to 69gs. from Mr. Wm. Rush, Carlisle, to Messrs. Carr and Co., Carlisle; grey mare, four years old, 35gs., to Mr. Graister, Cross Hill; bay horse, from Mr. Armstrong, Cotehill, 33½gs., to Mrs. Nicholson, Kirkhampton; bay horse, from Mr. Armstrong, Ecclefechan, 29½gs., to Mr. M'Lean, Winder Bogg; bay horse, from Mr. Bell, The Lonning, 30gs., to Mr. Wm. Rush. Saddle and harness horses made to 24gs. for a black mare from Mr. Robinson, Newlands, to Mr. Waddell, Otterburn; Irish gelding, from Mr. Keswick, Dormont, Lockerbie, 23gs., to Mr. Briggs, Upperby. Cobs and ponies to 22½gs., from Mr. Joseph Nicholson, Carlisle, to Mr. Harrison, Brampton; 16gs., from Mr. Ritson, Burdon Mill, to Mr. Laidlow, Newcastle; 16gs., from Mr. Hamilton, Parkhead, to Mr. Musgrove, Carlisle; £15 for a bay pony from Mr. Sander, Low Todhills, to Mr. Wm. Rush.

Horse Sale at Glasgow.

On Tuesday afternoon Mr. J. Vine held a sale of carriage and cart horses at his Horse Bazaar, Glasgow, about 100 animals being catalogued. There was a large attendance of buyers from all parts of the country, and business was of a very satisfactory character. The demand for good horses was very keen; others met a fair selling trade. The ages of the animals ranged from five to twelve years, and they were from 14 to 17 hands high; ponies from 11 to 13.2 hands high. Carriage horses of the best class realised up to 43gs.; secondary, from 20gs. to 30gs.; and inferior from 6gs. to 12gs. Cart horses of the best sort realised up to 40gs.; secondary, from 12gs. to 23gs.; inferior from 4gs. to 12gs. Vanners realised up to 30gs., and they made down to 5gs. Lorry animals made from 6gs. to 38gs., according to substance, style, and action. Ponies, from 4gs. to 20gs.; and cobs, from 5gs. to 25gs.

Sale of Horses at York.

Messrs. Walker and Son's first October stud sale of hunters, harness horses, etc., took place at their Repository, York, on Thursday, when they had a catalogue of about seventy horses. The attendance was good, and trade was keen for anything useful, especially hunters. The following were the principal prices realised:—

	Gs
Chestnut mare, five years, 16 hands	70
Velveteen, chestnut mare, six years, 16 hands	72
Horncastle, chestnut gelding, six years, 16 hands	30
Martin, dark bay gelding, seven years, 16.1 hands (Irish)	32
Bay gelding, nine years, 15.3 hands	55
Bridget, chestnut mare, five years, 15.2½ hands	40
Brown gelding, four years, 15.2½ hands	40
Black gelding, six years, 16 hands	45
Bridget, black mare, six years, 16 hands	50
Bay gelding, six years, 16.1 hands	45
Sportsman, grey gelding	40
Brown gelding, four years, 16 hands	35
Chestnut gelding, six years, 16.1 hands	50
Nun, bay gelding, five years, 15.2½ hands	57
Jester, grey gelding, five years, 15.2½ hands	53
Sally, grey mare, six years, 15.3 hands	31
Warwick, bay horse, 16.2 hands	31
Grey gelding, six or seven years, about 16 hands	48
Bay mare, five years, 16.1 hands	40
Chestnut gelding, six years, 16.1 hands	53
Miss Palliser, bay mare, five years, 16 hands	35
Queen, brown mare, seven years, 16 hands	34
Cream-Laid, chestnut thoroughbred mare, f 1886	50
Grey pony, rising five years, 13.3 hands	37

Making Up Horses for Show and Sale.

In getting draft horses ready for the show ring we (says a writer in the *Breeders' Gazette* of Chicago) usually try to start with them sound, or at least suffering from only such slight blemishes as will readily pass the critical eye of the judge. It has already been stated that it is never good policy to try to win with a colt or horse, mare or filly, that is either unsound or a poor individual. Therefore not only must we start with them sound, but we must so exercise, treat, and feed them that they will stay sound during the period of conditioning or "fitting," and, as they say in the story books, "ever afterwards"

It is an easy matter to feed a horse off his legs. Many and many a time has that been done, and that is perhaps the principal reason why so long a period is necessary to get the condition on properly. Haste in getting them ready and hard grain almost always lead to disaster. There are some horses that it hardly ever pays to try to show, notwithstanding that they are big-bodied enough and perhaps outwardly sound enough to pass muster in the ring. One of these is the gummy-legged beast and another is the one too delicate in constitution. Leave these two at least at home, for the first will give no end of bother from the time he ought to begin to do really well, and the other is likely to contract pneumonia, or some other trouble just when he is most wanted.

Having made choice of the animals on hand, picking out as nearly as possible a "full show," they ought to be stabled, so that the work of feeding may be got through with as easily as possible. Get the youngsters together, the mares and foals together, and the two-year-old and other stallions together, as nearly as may be. Begin slowly with the feeding. Crushed oats, bran, and cut hay, with roots or a little green corn for succulence, must form the breast of the food for some time with the older ones. The mares and foals have already been dealt with, so they may be eliminated from consideration in this article. The yearlings must not be shown over fat, but they must be big and "bowsy," showing that they are growing well and thrifty.

Right here let it be said that it is not possible to name positively any set quantity of food to be given these young things, but a safe rule to follow is to give the yearlings a net half of that which is given the aged stallions. If the older stallions are getting four pounds of the crushed oats at a feed, begin slowly, and increase the feed of the yearlings up to two and so on. Then from that the intelligent feeder can quickly tell where he is with every one under his care. But hasten slowly with them.

In feeding for showing it is better to divide the daily rations up into four parts, giving the first at 6 a.m., the second at 10, the third at 2 p.m., and the fourth at 6. As the fitting for the shows must at least be partly done in the summer the fillies ought to be turned out in the yards at night so that they may escape the attacks of he flies. This was fully covered in the article dealing with the conditioning of foals and mares already alluded to. As stated, the crushed oats, bran, and cut or chopped hay must be the main reliance of the feeder with the young things. He may with advantage cut up some clover and some nice bright oat straw for them by way of a change, and he will find that he may use a larger proportion of the cut clover to the best advantage. A trifle of the oil meal may also be given with the food and the whole ought to be fed damp as previously described. If the reader will turn to the article on getting mares and foals ready he will find the necessary data regarding the feeding of green stuff. As the corn (maize) grows a small ration of it may be fed, but the ripening of the ears should be watched most closely, and whenever the grain gets to the milky stage, and the ears must be pulled off. If the green stalks are fed ears and all due allowance must be made for the latter in measuring the dry grain ration. It is no hard matter to set a horse or mare all wrong by giving too much green corn without reducing the grain fed besides. This is a point well worth the keen attention of all feeders.

As the conditioning period advances the amount of grain must be increased. The crushed oats ration may be varied through the summer with a little rolled barley or ground corn, perhaps with a little soaked rye, though but a very little of the rye ought ever to be fed to mares. Placing the main dependence on the crushed oats, bran, and cut hay, enough of variety may be obtained to keep the appetite whetted well without straying very far along the list of available foods. As the weather gets colder

in the fall and the roots come in, substitute them for the green corn, and substitute education at the halter or bridle for the nightly run to grass. If the fillies are left out on cold nights they may take no severe hurt, but their coats will soon show it. Teach them to go with nothing but a neat rope halter on their heads. Mares always look best thus in the ring. Teach them to walk off squarely and to trot off promptly when given the word, and take advantage of the temperature to give them brief periods in smooth yards where they may exercise, but run few risks of slipping. As the date of showing comes on add a little boiled barley to the ration of all the mares, giving them this in the six o'clock feed. Now, too, they may with the rest of the show horses be given a "drink" in the evening, say at half-past eight or nine o'clock.

It is not hard to get fillies one, two, and three years old up into condition for showing at almost any season of the year. The main point is to keep their appetites sharp, give them plenty of succulent food, and while giving them abundant exercise take plenty of time to teach them what is expected of them in the ring. Too much stress can hardly be laid on this last point. They must be schooled to walk and trot when wanted, and if the schooling is well given the fillies will take pleasure in giving their little show, and do it willingly and well. Put yourself in the judges' place. Which would you prefer, the filly that has to be whipped into motion or the one that steps off proudly and promptly? Teach them to stand still in the proper position. Do not stretch them overmuch, but selecting a piece of ground with just a trifle of a rise in it, school them to pose pleasantly with their legs set well under them and to stand peaceably until turned around. Time and money spent in this sort of education will come back fourfold. Indeed, an animal is hardly fit to be shown unless it knows this part of the game.

Yearling stallions may be conditioned in much the same way as the fillies, save that they cannot be turned out so much. It is a mistake to turn two young stallions of this age together in a lot. They will wrestle and scramble and paw until one or other of them is lamed. Give them much exercise at the halter. As a rule they will need a little more feeding than the fillies, but not much. In the opinion of most folks, a yearling draft colt of the proper conformation looks best docked. This is, however, so purely a matter of taste and conviction that it need not be dealt with here. It is certain, notwithstanding, that docking gives a squarer, fuller look to the quarters. Yearling stallions respond generously to good care, but they must not be overdone on any account. It is better to show them a trifle low in condition, yet withal fat and round, than it is to show them with too mature a look about them. They must have plenty of exercise. It is best as a rule to teach them early to lead beside a pony and give them a right good go-as-you-please every day but Sunday.

Two-year-old stallions require much the same care as older ones. The foods required are the same and they must be kept up at all times, so they require the most abundant exercise in hand. If as yearlings they were broken to lead beside the pony they should be exercised in that way. Some men are apt to go too quickly if trusted with the pony, and for that reason only a sensible and fully trustworthy man ought to be charged with the exercising of the colts. It is hardly possible to give them too much exercise if it is given right, but when the man can ride he may err on the score of giving too much trotting at too smart a gait. Draft stallions vary so much in size, temperament, and constitution, that again it is impossible to name fixed quantities of food, but for those that weigh from 1,700 pounds upwards the quantities and kinds of feed named already when dealing with the feeding of geldings will do very well to begin with under the same conditions of preparation. The foodstuffs then described are all that need be used, and intelligent variation of the rations is always helpful. The two-year-olds also should have their turns in schooling for the ring. If they learned the trick as yearlings, they ought not to be allowed to forget it; if they were never shown before, they must begin at the beginning of the course.

Live Stock in the Counties.

PRELIMINARY STATEMENT OF THE NUMBER OF CATTLE, SHEEP, AND PIGS IN THE SEVERAL COUNTIES OF GREAT BRITAIN, COMPILED FROM THE RETURNS COLLECTED ON THE 4TH JUNE, 1900, WITH A COMPARATIVE STATEMENT FOR 1899.

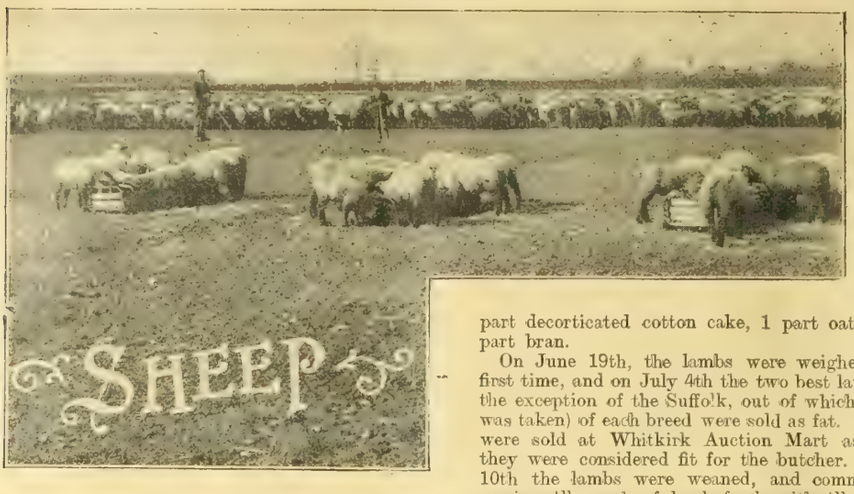
Royal Veterinary College.

The Royal Veterinary College, Great College Street, opened for the winter session on Tuesday, the introductory lecture being given by Professor McFadyean, who at the outset of his address said that this was the one hundred and ninth session. The past one was a very successful one, and in no previous years had there been greater diligence or greater success at the exhibitions. The great event of the year, the war in South Africa, had had a special interest for themselves. Early in the year, when there was a call for volunteers, seven of their students sought and obtained leave of absence in order to fight for the Queen and country. (Cheers.) He grieved to say that one of them had been killed in action. The lecturer then proceeded to trace the history of the Veterinary College. He said they still had much to learn regarding the nature and treatment of animals, but a considerable number of diseases had now been definitely ascertained, and what they had learned with regard to them would never have to be unlearned. Were it not for the experimental methods of investigation, they would never have attained such successful results as had been the case with regard to the discovery of the causes of disease. As to the struggle with animal disease, to this country belonged the system of stamping out purely contagious disease. The outbreak of the cattle plague in 1865 cost this country three millions of money, a big sum to be paid for ignorance. The system of stamping out had not escaped unfavourable criticism. For one thing, it was said to be unscientific, a reproach that was meaningless. Students should widen and deepen their knowledge of all that related to the health and the diseases of animals. Let them each try and do what they could to add to the knowledge of veterinary science.

Sugar Bounties.—Representatives of Germany, Austria-Hungary, and France will meet in Paris within the next few days in order to reopen the discussion on the sugar bounties question. The resumption of the deliberations which were held in Brussels last year on this matter, without, however, leading to any result, is due to the initiative of France. The German delegates are now going to Paris without definite instructions, and it will depend on the result of the preliminary discussion in the French capital whether the Brussels Conference shall be regularly resumed. The chief determining factor in this respect will be the question whether or not France is prepared so to enlarge her concessions in the bounties question as to justify the hope that on the bases of these concessions an understanding will be arrived at among the sugar-producing countries with regard to the abolition of the bounties.



Sheep Breeding Experiments in Yorkshire.*

The questions dealt with in this test primarily concern those farmers who are accustomed to purchase in the autumn a flock of draft ewes, and cross them with a ram of some of the improved breeds, with the express purpose of producing lambs which are to be sold either as fat lambs, or to be fed off on turnips in the succeeding winter, and where the ewes themselves are renewed every year. Farmers who work in this way are usually said to keep a "flying flock." This term will be adopted in this report.

That the return from a flying flock must vary with the quality of the ewes purchased and the district whence they come, as well as with that to which they are transferred, is fully recognised. Perhaps to this circumstance is due the fact that a diversity of opinion exists as to the relative merits of the various rams employed. It is also largely due to the fact that farmers have not the time, nor the opportunity, for making tests extending over a series of years with the same breeds of rams in order to acquire sufficient data on which to base conclusions. The work being conducted at Garforth, and here to be described, aims at providing this information. Obviously many difficulties stand in the way of carrying out tests of this nature with that degree of uniformity which it is desirable should characterise all tests, but by persistently sticking to one line of investigation it is hoped eventually to determine certain facts which will be of value to agriculture.

Outline of the Test.

The ewes employed were those which are extensively kept as flying flocks in Yorkshire, viz., improved Lincoln, and what is known in Yorkshire as the North Country ewe, and north of the Border as half-bred ewes, viz., a cross between a Cheviot ewe and a Border Leicester ram. Fifty of each of these ewes were purchased in September, 1898, the cost per head in each case being 43s. For the most part their teeth and milk vessels were in satisfactory condition. After being run on grass for a few weeks they began to receive, a fortnight before tupping time, a small quantity of barley and cotton cake. After the tupping season they were allowed nothing but grass until about Christmas, when they began again to receive about ½lb. of a mixture of maize and cotton cake, together with about 12lbs. swedes per head.

Five rams were used, viz.:—Lincoln, Oxford, Hampshire, Shropshire, and Suffolk. The Hampshire ram was purchased in York Market. The others were supplied on loan by the following gentlemen:—Lincoln, Mr. R. Fisher, Leconfield, Beverley; Oxford, Colonel Staveley, Eastlands, Tibthorpe, Driffield; Shropshire, Lord Wenlock, Escrick; Suffolk, Lord Ellesmere, Stetchworth Park, Newmarket.

Ten Lincoln ewes and ten North Country ewes were put to each ram. In order, however, to guard against irregularity in the date of the births of the lambs, and also to secure as far as possible uniformity in selection, the ewes were put to the rams in the order in which they came into season, the rams being taken in rotation.

Lambing began on the 6th March. After this the ewes received about 1lb. each of a mixture of 2½ parts linseed cake, 1½ part decorticated cotton cake, 1½ part dried grains, and 1½ part bran, together with about 1 stone of swedes. On May 12th, the ewes and lambs were put for the first time upon seeds, where they continued to graze during the day. In the evening they were removed to an old permanent pasture. They were fed thereafter on a mixture composed of 1 part linseed cake, 1 part decorticated cotton cake, 1 part oats, and 1½ part bran.

On June 19th, the lambs were weighed for the first time, and on July 4th the two best lambs (with the exception of the Suffolk, out of which one only was taken) of each breed were sold as fat. The ewes were sold at Whitkirk Auction Mart as soon as they were considered fit for the butcher. On July 10th the lambs were weaned, and commenced to receive ¼lb. each of lamb food, with ¼lb. of equal parts of linseed cake and maize meal. On October 10th, a few cabbages were given in the field, and between that day and the 19th the lambs were gradually accustomed to turnips, and on the latter date the food was changed to ½lb. each of a mixture composed of 2 parts of decorticated cotton cake, 1 part oats, 1 part crushed maize, and 1 part linseed cake.

On November 7th they commenced to get hay. On account of the small crop of swedes and the necessity for having the hoggs fed off early, the trough food was increased gradually until November 25th, when they received 1lb. per head of a mixture of equal parts of linseed cake, decorticated cotton cake, undecorticated cotton cake, maize, and oats. On November 30th the Green Globe turnips being finished, the lambs were put on swedes without any change in the trough food. It was found that they were consuming about this time ½lb. hay per head per day. On December 16th the trough food was increased to 1¼lb. per head. The swedes consumed were occasionally weighed, and found to be about 1 stone per head per day. On February 2nd all the lambs were sold to Mr. Pickering at an average price of 7½d. per lb., with the exception of five of the best of each breed (with the exception of Suffolk-Lincoln cross), which were kept for the purpose of further testing the rate of increase and the quality of the wool. On March 13th the swedes were finished and the lambs were then given a few mangolds. On April 3rd they were clipped and sent to the Co-operative Stores, Leeds, at an average price of 7½d. per lb.

The Wool.

The wool from each cross was weighed and sent to Mr. Collinson, Bradford, to whom the College is much indebted for the great trouble he has taken in furnishing valuable information on the value of the wool. The following table gives particulars with reference to the two breeds of ewes:—

	Lincoln Ewes.	North Country Ewes.
No. of ewes purchased	50	50
Cost per head	43s.	43s.
Number died before lambing	—	1
Number died during and after lambing	5	7
Average period of gestation	148 days	147 days
Number of lambs—single	9	6
Number of lambs—double	58	60
Number of lambs—triple	3	24
Total lambs dropped	70	90
Ratio of no. of ewes to no. of lambs	1 to 1·4	1 to 1·8
No. of ewes barren	10	4
Weight of wool per head	9·1 lbs	6·3 lbs.
Price per lb. of wool	7½d.	6¼d.
Average price obtained for ewes that reared lambs	45s. 3d.	36s. 6d.
Average period ewes kept after weaning	2½ weeks	5¼ weeks

Comparing these two breeds of ewes, it will be seen that the death rate was highest in the north country ewes, but this may be expected from the greater number of lambs from this breed. Compared with the Lincolns the north country ewes are much more prolific, and much better mothers. On the other hand this very fact renders them more difficult to fatten off for the butcher, and the price received was then much smaller than in the case of the Lincolns. The average price received for the Lincolns was 2s. 3d. more than cost price, while the north country ewes lost 6s. 6d. per head in value. Indeed, it is in these two particulars that the breeds differ most, viz., the smaller number of lambs from the Lincolns, but the greater aptitude of this breed to fatten off early.

Condition of the Lambs.

The lambs (with the exception of the best, which were kept to ascertain the value of their wool) were killed at the Co-operative Stores, at Wakefield, and the carcases were carefully examined by the Manager and Mr. Pickering. The following are their remarks on the character of the mutton of each lot:—

Hoggs from Lincoln Ewes.

Lincoln.—Very fat and full of suet.

Oxford.—Excessively fat, especially breasts and back. Not good for cutting chops. Too much fat to be cut off to make them saleable.

Hampshire.—Very good; more lean than in any of the other Lincoln crosses. Quite as nice and lean mutton as that from the North Country Hoggs.

Shropshire.—Killed well, but very short, and not serviceable from a butcher's point of view.

Hoggs from North Country Ewes.

Lincoln.—Very useful good cross, nice lean meat, and very serviceable in all ways.

Oxford.—Not so fat as the Lincoln Oxfords. Splendid mutton in all ways. Could not wish for anything better.

Hampshire.—Nice and lean, but quite fat enough. Good users.

Shropshire.—Very fat, but better quality than the other Shropshire cross.

Suffolk.—Very prime mutton. Soft in the bone; excellent for making chops; not so fat on the back as some of the other crosses.

As already stated the five best lambs out of each lot were kept until the 29th March, and were then clipped and killed at the Co-operative Stores, Leeds.

Conclusions.

As these experiments are to be continued for a series of years it is undesirable to do more on the present occasion than place the actual figures on record. It would be a very simple matter to draw up a statement as to which of these crosses had done best for any particular purpose, but as future tests will in all probability yield somewhat different results, it is a wiser course to postpone drawing conclusions until the results of a number of years have been obtained.

In fair play to the Suffolk breed it ought to be stated here that that breed has not had a fair trial owing to the large number of barren ewes in this year's experiment. In referring to the tables it is observed that in the cross from the Lincoln with this ram there were never more than three hoggs, and these were throughout poor specimens of the breed. But for the sake of uniformity in the tables, this column might have been entirely omitted. The experiment is being repeated this year on exactly the same lines. Already there is evidence that the Suffolk cross with both breeds of ewes will give a better account of itself than last year.

Another point of difference in the present experiment may be noted, viz., that in addition to the five breeds of rams used last year a Wensleydale and Leicester have been added to the number.

* From Professor J. R. Campbell's first report on the sheep-breeding experiments carried out by the Yorkshire College, Leeds, and the East and West Ridings Joint Agricultural Council.

Sale of Draught Ewes and Lambs at Langholm.

A special sale of draught ewes and lambs was held at Langholm Mart on Thursday by Messrs. Harrison and Co. The stock comprised about 3,500 head, the great bulk of which were Cheviot ewes. There was a good company of buyers forward, and prices on the whole were decidedly in sellers' favour. A fine lot of Cheviot ewes from Terrona topped the market at 26s. 9d., a lot off Glencartholm bringing 3d. less. Other lots from Murtholm, Westwater, etc., made about 2s. less. The market was a good one, being a little better in price than some of the recent sales, and compared with last year prices generally were 2s. to 3s. a head better. The lambs forward were chiefly seconds and thirds, but brought good prices.

Sale of Breeding Sheep at York.

Messrs. Thomas Walker and Sons held their second sale this season of breeding sheep at York Cattle Market on Thursday, when they had forward eighty-seven Oxford Down, Hampshire Down, and Lincoln long-wool shearling rams and lamb rams. There was a large company of buyers present, and keen interest was maintained throughout the sale. The Oxford Down shearling rams sold at an average of 5½gs., the Oxford lambs making an average of 4gs. Some grand Lincoln shearling rams from the flock of Mr. Langdale averaged £6 4s., while those from the flock of Mr. Hoyle made an average of £4 15s. A few Hampshire Down shearling rams sold at an average of 4gs.

Sale of Cheviots at Wooler.

At Wooler Mart, on Wednesday, the second annual sale of rams, ewes, gimmers, and lambs was held, the catalogue comprising over 5,500 head. There was a very large attendance of buyers, and a capital all-round sale resulted. Several lots of rams were sold, making up to £5 5s. The Cheviot ewes came next, and these met with a ready trade, in nearly every instance showing a rise on last year's prices. The crossed Cheviot ewes were also in good demand, the Fowberry Moor lot of eighty being 8s. 6d. up at 24s. The average rise would be about 4s. a head. Mules and Blackfaces also brought more money, the consignment of 100 from Wrangham being 4s. 6d. up. Among the three-parts-bred ewes several lots made a considerable advance on last year's figures. Melkington, at 58s., showing a rise of 18s.; Ford Hill, unwarranted, at 37s., were 15s. up. The half-bred ewes were in equal request, Kirknewton, at 35s., being 6s. 6d. up, the unwarranted lot, at 31s., showing a

rise of 9s. a head; North Hazelrigg, at 42s., were 4s. 6d. up; and Dunsall, at 43s. 6d., were 6s. up. The three-parts-bred gimmers sold well. West Fenton, at 43s. 6d., were 2s. 6d. up; Melkington, at 51s., showed a rise of 6s.; and West Horton, at 43s. 6d., made 11s. 6d. more. The half-bred were in equal demand. South Doddington being 9s. up at 34s. Several lots of Cheviot gimmers and the three-parts, half-bred, Cheviot, and mule lambs were a brisk trade.

The Kentish Ram Sale at Ashford.

The great features of the Kent or Romney Marsh Sheep Breeders' Association's ram sale at Ashford, on the 28th ult., of which we were only able to give a brief report in our last issue, were the large demand for export purposes and the greater evenness in the prices realised for the rams. No fewer than ninety-three of the 380 rams sold are destined for South America and other foreign parts, Messrs. Waldron and Co., the buyers for export, purchasing in addition to a large number of average quality animals a considerable number at from 10gs. to 16gs. per head. In regard to the second feature it is interesting to notice that while last year and the year before the top values were considerably higher, this year's average was much more satisfactory than in those years. The first sale organised by the association was in 1897, when with a top value of 46gs. 516 tegs averaged £7 15s. 7d. per head; but in the next two years the trade fell off and prices dropped. At the same time it is somewhat curious to find that the highest price made for a single Kent ram teg at any of the association's sales was last year, when the average value was the lowest, and that this year when the top value is the lowest the average value is next to the highest. The following tables will show in a more striking manner the facts stated above:—

Below we give particulars of the various consignments sold which were not noticed in our last issue.

Mr. F. Neame's rams were sold by Messrs. Nethersole and Honeyball, who disposed of forty-nine animals for a total of £429 19s. 6d., or an average per head of £8 15s. 6d. The following were the prices:—Mr. J. S. S. Godwin, 10½gs.; Messrs. Webb and Co., 4½gs.; Mr. Wacher, 5½gs. (twice), 6½gs.; Mr. English, 5½gs., 5gs., 4gs. (twice); Mr. R. Wood, 8½gs., 7gs., 6gs., 5½gs.; Messrs. Waldron and Co., 14½gs. (twice), 12½gs. (twice), 11gs., 9½gs., 7gs., 6gs (twice), Mr. Champion, 14gs., 11½gs., 7gs.; Mr. Checksfield, 12gs., 10½gs.; Mr. J. E. Quested, 20gs., 17½gs., 12gs.; Mr. Elgar, 10gs. (twice), 5gs.; Mr. H. Marsh, 8½gs.; Mr. H. Spanton, 4gs. (five times); Mr. Millen, 12gs.; Mr. Pilcher, 5½gs.; Mr. Ward, 6gs., 5½gs.; Mr. Mair, 9gs., 7gs.; Mr. Clifford, 6gs.; Exors. of Mr. Wood, 5½gs.; Mr. Prebble, 8½gs.

Messrs. W. and C. Petley disposed of Mr. F. de Collard's and Mr. G. P. Hogben's consignment, twelve of the former going for £91 7s. and eight of the latter for £38 13s. Mr. de Collard's rams sold as follows:—Mr. S. Champion, 11gs., 7gs., 4½gs.; Mr. E. Wacher, 8½gs., 6½gs., 5½gs., 4½gs. (three times; Mr. A. Amos, 14gs.; Messrs. Webb and Co., 10gs.; Mr. Solly, 4½gs. The prices realised for Mr. Hogben's lot were:—Mr. Graves, 4½gs., 4gs. (three times); Mr. Prebble, 4½gs., 4gs. (twice); Mr. Spanton, 4gs.

Mr. W. Millen's consignment, sold by Messrs. W. Millen and Son, went as follows:—Mr. Dixon, 10½gs., 4gs.; Mr. F. Mair, 6½gs., 6gs.; Mr. H. Neame, 14½gs., 10gs., 6gs. (twice); Mr. A. Ambrose, 7½gs., 7gs., 4gs. (twice); Messrs. Waldron and Co., 7gs., 6½gs., 5gs.; Colonel Thompson, 5gs.; Messrs. Webb and Co., 6gs.; Mr. Clifford, 6gs. (twice); Mr. F. Wood, 6½gs.; Mr. F. Neame, 4gs.; Mr. T. Byron, 4gs. The total realised for the twenty-three rams was £154 17s. 6d., or an average per head of £6 14s. 7d.

Six rams from Earl Sondes' flock, sold by Messrs. Swaffer Bros., made £32 0s. 6d., the purchasers being Mr. Ward, 5gs.; Mr. R. Strouts, 5½gs.; Mr. Broadley, 4gs.; Mr. F. Mair, 4½gs.; Mr. W. Horn, 6½gs., and 5gs.

Mr. J. H. Harvey's seven rams averaged £7 10s. per head, he prices being:—Mr. Harvey, 5gs.; Mr. F. Collard, 10gs.; Mr. G. Webb, 5½gs.; Mr. G. Collard, 10gs. (twice), 5½gs.; and Mr. G. Clements, 4gs.

Messrs. Reeve and Finn had by far the largest catalogue, they disposing of over seven consignments. For Mr. W. E. Long's eighteen rams they obtained a total of £83 9s. 6d., or an average of £4 12 9d. The prices were: Messrs. Webb and Co., 5gs., 4gs.; Mr. H. Pye, jun., 4gs. (five times); Mr. Bensted, 4gs.; Messrs. Waldron and Co., 5gs., 4½gs.; Mr. T. Hilder, 4gs.; Mr. Moses, 5gs.; Colonel Thompson, 5½gs., 4½gs., 4gs.; Mr. Rigden, 6gs., 4gs.; Mr. Nettlefold, 4gs.

Twenty-one from Messrs. C. File and Sons' flock realised £90 16s. 6d., Messrs. Waldron and Co. buying five at 4gs.; Mr. White one at 4gs.; Mr. Millen, 5gs., 4½gs., 4gs.; Mr. R. Wood one at 4gs.; Mr. Willett two at 4gs.; Mr. Meeson four at 4gs.; Mr. T. Pilcher one at 4gs.; Mr. P. Collick two at 4gs.; Mr. A. Hambrook one at 4gs.; Mr. R. Strouts one at 5gs.

For twenty animals belonging to Mr. G. Farmer £152 15s. 6d. was obtained, the individual prices being:—Mr. T. Powell, 9gs., 8gs.; Mr. Meeson, 4½gs. (twice),; Mr. A. Ambrose, 8gs., 7gs., 4½gs.; Mr. Bensted, 9½gs., 8gs.; Mr. Long, 10½gs.; Messrs. Webb and Co., 9gs., 8½gs.; Messrs. Waldron and Co., 8½gs (twice); Mr. T. Broadley, 5½gs., 4gs.; Mr. F. Collard, 8gs. (twice), 5gs.

£8 1s. 8d. was the average of the fifteen from Mr. J. E. Quested's flock, and the buyers and prices were: Mr. S. Millen, 10gs., 8gs., 7gs.; Mr. H. Spanton, 6½gs. (twice), 5gs., 4gs.; Mr. Rayfield, 5½gs.; Mr. Meeson, 10gs., 6gs., 5gs.; Mr. J. Finn-Kelcey, 15½gs.; Mr. Elgar, 8½gs.; Mr. Selmes, 9gs. (twice).

Mr. Arthur Finn's twenty realised the total of £163, the top price being 16gs., paid by Mr. T. J. Pearson, who also purchased at 11½gs., 8½gs., and 7½gs. Other prices were:—Messrs. Waldron and Co., 11½gs., 10gs., 7½gs., 6gs., 5½gs., 4½gs. (twice); Mr. G. Brann, 10gs., 5gs., 4½gs., 4gs.; Mr. E. Finn, 7½gs., 7gs., 6gs.; Mr. A. Brown, 12gs., 11gs.

Mr. C. File's lot sold as follows:—Mr. Arthur Finn, 25gs.; Mr. W. F. Collard, 20gs., 16gs.; Mr. G. Farmer, 25gs.; Mr. Elgar, 10gs.; Mr. Willett, 4gs.; Mr. Page, 7gs.; Mr. Levett, 9½gs., 8½gs., 8gs., 7½gs., 5½gs.; Messrs. Waldron and Co., 9½gs., 9gs., 8½gs., 7½gs., 7gs., 5½gs.; Mr. R. Neve, 11½gs. (twice). The total for the eighteen was the fine one of £213 3s., or an average per head of £11 16s. 10d.

The prices obtained for Mr. J. D. Maxted's rams were:—Mr. Elgar, 5gs., 4½gs., 4gs.; Mr. Moses, 4gs.; Messrs. Waldron and Co., 5gs., 4gs. (twice); Mr. Pilcher, 4gs.; Mr. Harvey, 5gs.; Mr. Whitehead, 4½gs.; Mr. Tuff, 4gs. (thrice); Mr. Scott, 4½gs. The total for fourteen was £63 10s. 6d.

Ripon Fair.

The October Sheep Fair at Ripon took place on Thursday. There was a very good show, and prices were high, but trade slow, farmers being disinclined to buy on account of mildew among turnips in some quarters. A few Wensleydale rams on offer made £7 to £8; half-bred ewes, 42s. and upwards. There was a small show of good-bred sheep; twice-crossed lambs sold at 30s. to 35s.; and Masham half-bred lambs 22s. each.

Northallerton Fair.

Northallerton October cheese fair was held on Thursday in wretched weather. There was, compared with previous years, a small show. Trade was generally slow, and a lot of sheep remained unsold. The prices realised were as follows:—Half-bred lambs, 16s. to 20s.; twice crossed lambs, 28s. to 32s.; half-bred ewes, 38s. to £2; Scotch ewes, 10s. to 16s.; shearling rams, £3 10s. to £4 10s.; rams, £5 to £6; tups, to £10 10s. each.

New Zealand Sheep.

An interim report of the sheep in New Zealand on April 30th gives the number at 19,347,346, showing a decrease of 1,160 as compared with the previous year. The decrease is in the South Island, where it amounted to 40,153, while in the North Island there was an increase of 38,993. Evidently the great advance in the export of frozen mutton is telling on the flocks, as in the Canterbury district, which is the largest exporter, there was a decrease of 67,898, despite the drafts received from other parts of the colony.

Glasgow and Leith Wool Sales.

There has been rather a quiet feeling in the Scotch wool trade during September. No public sales have taken place, and the private transactions have not been important. The approaching elections here and in America have rather distracted attention from business in both markets. When these are over and the South African war has been brought to a successful close, more activity is expected in the trade. There has been some movement in half-bred wools and cheviots at firm prices, and stocks of these kinds are moderate. In black-faced the demand has been mostly for present consumption in the home trade, and the amount taken for shipment has not been large.

NOTE.—The figures for the current year are approximate only.

Dispute over a Cattle Transaction.—At Shrewsbury County Court, before his Honour Judge Harris Lea, Henry Russell, auctioneer, Shrewsbury, sued William John Hatley, cattle dealer, Birmingham, to recover £4, said to be due in a cattle dealing transaction. It was stated that on June 26th Mr. Russell held a sale of stock in Shrewsbury Smithfield, and defendant was one of the purchasers. When the accounts were made up, an unendorsed cheque was found among the receipts. The cheque was subsequently returned by the bank as dishonoured, and plaintiff alleged it had been traced to the defendant. Being written to, defendant said if the cheque were sent to him he would forward one of his own to cover the amount. This was done, but when Mr Hatley's cheque was presented at the bank it was found to have been stopped. Replying to Mr. Eastley, the plaintiff said his clerk, who received the cheque, believed he had it from the defendant. Cash was received from the defendant that day on another transaction. Other Birmingham men bought stock the same day, and he took cheques from all his customers, but inquiries which had been made showed that the cheque in question came from the defendant. Cheques were often received unendorsed from regular customers. Mr Eastley said the defendant paid cash for all he bought on the day in question, and it was not until ten days or so after the sale that he received a letter from Mr. Russell stating that the cheque had been dishonoured. The cheque was sent to him, and he drew out a fresh one, and forwarded it to complainant, but payment was subsequently stopped because it was found that the dishonoured cheque had not been in defendant's possession prior to his receiving it from the plaintiff. It was stated that the person who drew the first cheque was prepared to pay the amount, and after hearing the defendant's evidence a verdict was given in his favour.

SHOWS.

The Dairy Show.

The twenty-fifth annual show of the British Dairy Farmers' Association opens to-morrow (Tuesday) at the Agricultural Hall, Islington, London, and will remain open to the public until the following Friday. To-morrow the public will be admitted to the Agricultural Hall at 10 a.m., the charge for entrance being 2s. 6d. until 6 p.m., when it will fall to 1s., and will remain at the latter figure on the three following days. The show has been arranged upon similar lines to those of late years, and the attractions include cattle, goats, poultry, pigeons, all kinds of dairy produce, appliances, etc., milking and butter tests and butter-making competitions, and the band of the Coldstream Guards.

Tuxford.

The twenty-third annual show of the Tuxford Agricultural Society, which was held on Thursday, was, unfortunately, marred by rain, and the Society will doubtless suffer heavy loss. The prize-money amounted to upwards of £200, for which there were a large number of entries, and the show of Shire horses as a whole was well up to the standard that has for many years been maintained at Tuxford. Encouragement of agriculture in its own immediate district being the motto of the Society, the exhibits in all the sections were restricted to a radius of twelve miles in a direct line from Tuxford. The chief feature of the show was the horses, cattle being very few, whilst there were no sheep or pigs, but good displays of poultry and farm produce. There were fourteen classes devoted to horses, and these contained some first-class animals. The prizes in the first three classes were given by the Duchess of Newcastle for the best animals by Nyn King Charles, Royal Derby, or Tom Cribb. The winner for the best filly foal by Nyn King Charles or Royal Derby was owned by Mr. Arthur, Apley Head, Mr. Hewitt taking second place. In the colt foal class Dr. Whitington showed the winner, and Mr. G. Tomlinson, Tuxford, was second. For colts or fillies the winner turned up in a roan colt exhibited by Mr. Headland. This animal was afterwards bought privately by Mr. Talbot, Tuxford, who obtained the second prize. The first prize for cart colt or filly foal, the property of a tenant farmer not occupying more than seventy acres of land, was readily awarded to Mr. Saul's bay King Holt filly, which has won many prizes this year. Mr. White's (East Markham) Downham Ben colt, which has also won several prizes, came second. The reserve was awarded to Mr. Dakin's brown filly by Capston Harold. She has also been a great winner at numerous shows, and with only receiving reserve spoke highly of the merits of her class. For the best Shire mare that has bred a foal in 1899 or 1900, the first prize was won by Mr. Staniland, Carlton-on-Trent, with his four-year-old mare. Mr. Forshaw took second with a level lean mare, the reserve going to Mr. Ashton's brown mare, which won the Duke's cup at Clumber. Mr. Saul came out again at the top in class six with his slashing big two-year-old bay filly, which has been winning all over the country. She also won first afterwards in Mr. Forshaw's class. The second prize filly, a winner of several prizes, was the property of the Duchess of Newcastle. The yearling colts was a capital class, Mr. Wareing, of Blyton, having an easy win with his big Midville Squire. He has a lot of bone and hair, and very good feet, and was afterwards sold for a good figure on the ground. The second winner was owned by Mr. Wilkinson, of Hockerton. Mr. Addington, Carlton, came out at the top in the next class with a very lengthy good-looking filly, but a great number of the onlookers preferred the second one, owned by Mr. W. Hird. For the best Shire filly foal, the winner was easily spotted in Mr. Forshaw's beautiful filly by Nailstone Cœur de Lion, out of the famous Tom's Flower. It is about as correct on its legs and feet as could be wished, and has never been beaten in its own sex yet. The second was by the same sire, owned by Mr. J. Pinder, Farndon. The shire colt foal class brought together fourteen exhibits. Mr. Chilton, Southwell, took the premier award with a black foal by Nailstone Cœur de Lion, Mr. White being second with his Downham Ben Colt, which took a similar position in Class 4. In the next class, the winners (as in the previous one) were placed in the same order. In the open radius filly foal class, the winner (a bay), owned by Mr. Wareing, was also by Nailstone Cœur de Lion. She afterwards won the 50-guinea cup and the Shire Horse Society's medal for the best female on the ground, and was purchased at a big figure by Mr. Forshaw, who afterwards sold her to go to the south. Mr. Pinder's Nailstone Cœur de Lion foal came second, which was second in Class 9, and Mr. Saul's King Holt filly was third, which was first in Class 4. This was a capital class and found the judges no end of trouble to put them in their right positions. In the open class for the best mare served by any horse belonging to Mr. J. Forshaw, Carlton Stud Farm, there were twenty-seven entries. Mr. Saul came out first with a beautiful two-year-old filly, which was afterwards sold at a very long figure to go into Cheshire. Mr. Baddiley, Blyth, was second with his Clarborough winner.

Messrs. Sexton, Grimwade, and Beck, Peterborough, held a sale of pedigree Shire horses in a tent, in consequence of the wet, but only a few were purchased. A great many foals and colts were sold privately before the auction commenced. There was keen competition for Nailstone Cœur de Lion foals, and amongst the purchasers were Mr. Oxley (Brant Broughton), Mr. Richardson (Cambs), Mr. Forshaw, and several others from out of the south.

The following were the awards in the horse and cattle sections:—

Prize List.

HORSES.

Filly foal by Nyn King Charles or Royal Derby: 1, Mr. J. B. Arthur, Apley Head; 2, Mr. J. Hewitt, Haughton Park; 3, Mr. C. E. Whitington.

Colt foal by Nyn King Charles or Royal Derby: 1, Mr. C. E. Whitington, Tuxford; 2, Mr. G. Tomlinson, Tuxford; 3, Mr. Crossland, Lound Hall; r, Mr. C. P. Popple, Weston.

Colt or filly foal by Tom Cribb: 1, Mr. Headland; 2, Mr. G. S. Talbot, Tuxford.

Cart colt or filly foal, bred within the radius, the property of a tenant farmer not occupying more than seventy acres of land: 1, Mr. W. Saul, Bolham; 2, Mr. G. White, East Markham; r, Mr. James Dakin, Scarthingmoor.

Shire mare that has bred a foal in 1899 or 1900: 1, Mr. A. Staniland, Carlton-on-Trent; 2, Mr. J. Forshaw, Carlton-on-Trent; r, Mr. H. B. Ashton, Gamston.

Two-year-old Shire filly, bred within the radius: 1, Mr. W. Saul; 2, the Duchess of Newcastle; r, Mr. T. J. Cullen, Rolleston.

Yearling Shire colt, bred within a twenty-five miles radius of Tuxford: 1, Mr. Wareing, Blyton, Gainsborough; 2, Mr. R. Wilkinson, Hockerton, Southwell; r, Duchess of Newcastle.

Yearling Shire filly, bred within the radius: 1, Mr. W. P. Addington, Carlton-on-Trent; 2, Mr. W. Hird, Wheatley; r, Mr. W. Saul.

Shire filly foal, bred within the radius: 1, Mr. J. Forshaw; 2, Mr. J. Pinder, Farndon; r, Mr. W. Saul; he, Mr. J. Harrison, Everton.

Shire colt foal, bred within the radius: 1, Mr. R. Shilton, Southwell; 2, Mr. G. White, East Markham; r, Mr. H. Richards, Lound Field.

Shire colt foal, owned or bred within a radius of twenty-five miles of Tuxford: 1, Mr. R. Chilton; 2, Mr. G. White; 3, Mr. E. A. M. T. Fisher, Welby Manor.

Shire filly foal, owned or bred within a radius of twenty-five miles of Tuxford: 1, Mr. W. Wareing; 2, Mr. J. Pinder; 3, Mr. W. Saul; r, Mr. J. Forshaw.

Shire mare, served by any of Mr. J. Forshaw's horses (open to the united Kingdom): 1, Mr. W. Saul; 2, Mr. J. E. Baddiley, Blyth; 3, Mr. R. Moore and Sons, Bilborough; r, Mr. E. A. M. T. Fisher.

Challenge cup, value 50gs., for the best colt or filly foal shown in one of the above classes, and eligible for the Stud Book: Mr. W. Wareing; r, Mr. W. Chilton.

CATTLE

Cow, in calf or in milk, three years old and upwards: 1, Mr. G. Cartwright, Ragnall; all; 2, Mr. J. Forshaw; 3, Mr. J. Dakin, Weston.

Heifer, under three years old: 1 and 3, Mr. C. H. Stafford, Fledborough; 2, Mr. J. Dakin.

Cow, the property of a cottager not occupying more than twenty acres, in calf or in milk: 2, Mr. R. Dakin, Sutton-on-Trent.

Shorthorn bull, under two years old: 1, Mr. J. Hollely, Westwood.

Moreton-in-Marsh Horse Show.

The Moreton-in-Marsh Shire Horse Society's annual show took place on Tuesday on the Cricket Ground at Moreton, and was in every way a success. Gratifying evidence was given of the improvement in Shire horse breeding in the neighbourhood, while exhibits sent by many noted breeders made the show additionally attractive. The class for mares three years old and upwards was not only the best ever seen at Moreton, but in the opinion of many qualified to judge, one of the best seen at any show in England this year. The twelve entries gave the judges much trouble. The first prize went to Miss Alice de Rothschild (Aylesbury) for Lily, a mare by Royal William II., bred by Baron Ferdinand de Rothschild. Mr. P. A. Muntz was second with Lockinge Belle, a mare of greater size, which has been first at many shows, including Ashbourne, where the winner here was placed fifth. Mr. A. Henderson, M.P., was third with Moors Cambria, a good, stylish mare. There was a strong local class of colt-foals, and here Mr. W. Lidsey, of Lemington Moreton, a local breeder, was first with a very excellent colt by Markeaton Royal Harold, Mr. W. Darlington, of Malvern, being second with a very promising and stylish colt, Clevelode. Lord Roberts, Mr. H. Juffs (Moreton) was third. In the open class, Mr. Lidsey's colt was beaten by Mr. A. Henderson's Briscot Gladiator, a very handsome colt. There were seven or eight very promising filly foals in the local class, and Mr. Lidsey was again first with an excellent short-legged bay, by King of Keele. Mr. W. Darlington was second with Clevelode Little Gem, a nice black. There were some excellent exhibits in the open filly foal class. Miss Alice de Rothschild was easily first with an offspring of the mare which was first in the class before-mentioned, a foal with a wonderful development of body for her age. Mr. A. Henderson, M.P., was second with Buscot Lilac, a filly of beautiful outline, which was only beaten in weight. Mr. P. A. Muntz, M.P., was third with a big, weighty filly, and Mr. S. E. Shirley, of Ettington Park, reserved. In a class for tenant farmers' yearling filly, the Misses Bull (Great Wolford) were first with Bashful, and Mr. A. N. Ashton (Newbold-on-Stour) was second and third with Armscott Wine and Armscott Credit. It was noteworthy that all three winners were by Doemster. In the open class for yearling filly Mr. J. Bradley, of Tilton, Leicester, was first with Halstead Violet, a filly considered one of the best of her age in England; Mr. A. Henderson, M.P., was second with Lockinge Harriet, a big, upstanding, stylish filly; and Armscott Credit was third, the owner having preferred to enter this filly instead of the one which was placed before her in the local class.

The yearling colts in the open class were a good lot. Mr. P. A. Muntz was first with a fine big colt by Dunsmore Masterman. Mr. H. P. Taunton (Redlynch, near Salisbury) was second, and the Hon. R. Hardinge (Burford) third. Dunsmore Sterling Harold, a stylish, upstanding horse, shown by Mr. Muntz, was first in the open class for two-year-old colts, beating Lockinge Soudan, belonging to Lord Wantage, which was a good second. In a good class of two-year-old fillies, Mr. Muntz was again first with a very big and true black by Harold, Dunsmore June Rose. Mr. R. W. Hudson (Great Marlow) was second with Danesfield Madge, and Mr. J. Bradley third with Halstead Lady Harold. There was a capital show of mares in the local classes, the chief prizes going to Mr. P. Slatter (Bourton-on-the-Hill), Mr. W. M. Jones (Banbury), Mr. A. Henderson, M.P., Mr. W. W. Hands (Evenlode), and the Misses Bull (Great Walford). The champion prizes were awarded as follows:—Colt foal, Mr. Henderson's Buscot Gladiator; filly foal, Miss Alice de Rothschild; tenant farmer's two-year-old mare, Mr. W. M. Jones's Marvellous; gold medal presented by the Shire Horse Society for best mare or filly, Miss Alice de Rothschild's Lily.

The show of hunters, polo ponies, and the jumping and driving competitions, which have been added to the show during the last two years, proved an attractive feature. In a class for mare calculated to breed a hunter, Mr. H. S. J. A. Sandford (Broadway) was first with Irish, and Mr. A. Rushout, M.F.H., second with Greling. Mr. A. B. Freeman Mitford, C.B., was first with Mattishall in a class for foal sired by his horse Hamlet, and Mr. F. Clayton (Moreton) was second. For hunter, mare or gelding, under seven, Mr. F. Hargreaves (Halford Manor) was first and second. In a class for light-weights Mr. J. S. Wilkes, of Tredington, took first honours, and Mr. G. A. G. Lonsada (Shipton-under-Wychwood) second. First and second prizes for polo ponies went to Mr. A. Flower (Stratford-on-Avon). Mr. F. Baguley, of Moreton, took two first prizes in driving competitions with well-known steppers—Daylesford King and Daylesford Confidence; and other winners in these classes were Mr. A. G. Shepard (Stourton), Messrs. Woollianis (Adiestrop), P. J. Wilkes (Honington), and C. Williams (Little Rollright). Mr. Wilkes and Mr. J. Wheeler (Seudley) were first and second respectively in a class for horses that have never won a jumping prize value £5. The open jumping prize was won by Artist, belonging to Mr. F. Firkins (Leigh, Worcester), Mr. T. Wadams (Alvechurch) being second with Jolly Boy.

Shaftesbury.

The annual show of the Shaftesbury Farmers' Club was held on Wednesday in a field on Burton Hill. Fine weather favoured the exhibition, and the attendance of the public was consequently large. There was a general consensus of opinion that the show was one of the best ever held at Shaftesbury, and the success which attended it must have proved very gratifying to the promoters. The entries numbered 347, as compared with 321 last year, and all the sections contributed to this increase, with the exception of that for hunters, hacks, and harness horses; but, if fewer in number, the animals shown were in quality equal, if not superior, to those seen at former exhibitions. This section, as usual, was distinct from the other parts of the show, and was managed by a separate committee. The Horse Show Committee, following the precedent of previous years, had arranged a capital programme of driving and jumping competitions in the large horse ring, which proved most interesting to the large crowd of spectators that lined the ropes. There was a fair entry of agricultural horses, but the prize-winners stood well out from the rest of the competitors. Mr. S. A. Hiscock was, as usual, the most successful exhibitor in this department, taking all three first prizes and one second. There was a better muster than ordinary of horned stock, the entries in the dairy classes being of exceptional merit. Mr. Arthur Hiscock, jun., secured eight out of the nine first prizes offered with animals which for all-round excellence were equal to anything he has ever shown at Shaftesbury. The champion prize, given by Mr. A. Hiscock, jun., for the best cow in the dairy classes, was won by Mr. N. Benjafield with one of a pair which took first prize in Class 8. The donor of the prize, Mr. Hiscock, did not enter his cattle for the championship. Mr. N. Benjafield took two second prizes in addition to the champion award. Following the example of the Gillingham Society, the Shaftesbury Farmers' Club this year offered prizes for herds of dairy cows, which were judged on the farms of the different exhibitors. Mr. A. Hiscock, jun., won easily, and Mr. J. H. Macey, of Bowerstock, Dinton, was second. There was about an average show of breeding pigs, and the honours were divided between Mr. A. Hiscock, jun., and Mr. N. Benjafield. Mr. G. Goldie showed the best pen of bacon pigs. Sheep were a small entry, but some

excellent pens were shown. The successful competitors were Mr. G. Jeffrey, Donhead; Mr. H. Richards, Charlton; Mr. F. W. Richards, Childbridge, Wimborne; and Mr. G. Goldie, Compton. Dead poultry and eggs were introduced for the first time this year, and the innovation proved a success. As usual, the butter-making competition attracted a great deal of attention, and the judges considered that the quality of the butter made by the competitors was of a very high standard.

Judging in the great horse ring commenced about noon. There were seven entries in the local harness class, but the animals shown were a moderate lot. Mr. H. Johnson's cob stood out from the rest of the competitors, and Mr. Hiscock's Klondike, which took the second award, was a useful trapper. In the open pony class Mr A. Hiscock carried off the blue rosette with a dun-coloured cob, Mr. A. Hardy, of Blandford, being second. The tenant farmers residing within twelve miles of Shaftesbury showed some useful hunters. Of the eight entered four were quickly weeded out by the judges, but the others took some looking over. First prize went to a well-bred bay horse of Mr. Knott's, and the second to another horse shown by the same exhibitor. There was a strong show of hacks, but Mr. Apperley's Nobleman, a fine chestnut with good action and manners, was an easy first. Mr. H. P. Woolcott, of Swindon, took second with The Monk. The open heavy-weight hunter class was well filled, and included some remarkably good horses. Mr. E. R. Apperley's Jorrocks, a grand-looking horse, gained the premier award, with Mr. N. Learmonth's The Saxon a good second. Sixteen horses faced the judges in the light-weight class, and the first and second prizes went respectively to Mr. Woolcott and Mr. Knott. There were some good exhibits in the open harness classes, the first prizes going to Mr. Brook and Mr. Corry. Tandems were a poor show, Mr. Wilson's team winning easily.

Prize List.

CART HORSES.

Cart mare or gelding over three years of age, in work: 1 and 2, Mr. S. A. Hiscock, Motcombe; r, Mr. J. W. Shute, Motcombe.

Cart gelding or filly under three years of age: 1, Mr. S. A. Hiscock; 2, Mr. J. W. Shute; r, Mr. J. Ralph, Stour Row; hc, Mr. G. Goldie, Compton.

Cart mare and foal: 1, Mr. A. Hiscock; 2, Mr. A, Tucker, Motcombe.

CATTLE.

Dairy cows in calf, which have been regularly milked to within two months of due time to calve: 1 and champion, Mr. N. Benjafield, Motcombe; 2, Mr. Arthur Hiscock; r, Mr. W. Mullins, Melbury Abbas; hc, Mr. Edwin Hiscock, Marnhull.

Dairy cow, with offspring under nine months old: 1, Mr. Arthur Hiscock; 2, Mr. F. J. Hunt, Fifehead; r, Mr. M. S. Tucker, Black Ven, Fontmell Magna.

Two heifers, under 36 months old, in calf or in milk: 1, Mr. Arthur Hiscock, Motcombe; 2, Mr. A. Tucker; r, Mr. J. Woodford, Sedghill.

Two best heifers, under 24 months old: 1, Mr. Arthur Hiscock; 2, Mr. A. Tucker; r, Lord Wolverton; c, Mr. G. Goldie, Compton Abbas, and Mr. A. T. Carpenter, Shaftesbury.

Heifer calves, under 12 months old: 1, Mr. Arthur Hiscock; 2, Mr. N. Benjafield, Motcombe; r, Mr. A. Tucker; hc, Mr. G. Goldie.

Dairy cow, for dairy purposes: 1 and r, Mr. Arthur Hiscock; 2, Mr. A. T. Carpenter; hc, Mr. Edwin Hiscock, Marnhull.

Bull, any age: 1 Mr. Arthur Hiscock; 2, Mr. N. Benjafield.

Bull, under 24 months old: 1, Mr. Arthur Hiscock; 2, Lord Wolverton, Iwerne Minster; r, Mr. N. Benjafield; c, Mr. Albert Hiscock, West Stour.

Bull calf, under 12 months old: 1, Mr. Arthur Hiscock; 2, Mr. J. T. Mitchell, Mere; r and c, Mr. N. Benjafield.

PIGS.

Breeding sow with litter under 10 weeks old: 1, Mr. N Benjafield, Motcombe; 2, Mr. A. Hiscock, Motcombe; r, Mr. Carpenter, Shaftesbury.

Sow in farrow: 1, Mr. A. Hiscock; 2, Mr. N. Benjafield.

Best boar: 1, Mr. A. Hiscock; 2, Hon. C. B. Portman, Childe Okeford, Blandford; r, Mr. N. Benjafield.

Pen of ten bacon pigs, of weight, shape, and quality best calculated to meet the requirements of the trade, to be the *bona-fide* property of and fattened by the exhibitor, and to be removed from the show field for immediate slaughter: 1 Mr. G. Goldie, Compton; 2, Mr. W. Goldie, Compton; 3, Mr. W. Lear, Sherborne Causeway; 4, Mr. Baker, Whitings.

SHEEP.

Breeding ewes, two, four, and six teeth, from flocks under 300, two of each age; from flocks of 300 and under 400, three of each age; and from flocks of 400 and over, four of each age; and declared by the owner to be kept for stock: 1, Mr. H. Richards, Charlton; 2, Mr. G. Goldie; r, Mr. G. Jeffrey, Donhead.

Ram, over one year old: 1, Mr. G. Jeffrey, Donhead; 2, Mr. G. Goldie, Compton; r, Mr. H. Richards, Charlton.

Ram lamb; 1, Mr. G. Goldie; 2, Mr. W. Goldie.

Chilver lambs, from flocks under 300, six lambs; from 300 and under 400, nine lambs; and over 400, twelve lambs: 1, Mr. G. Jeffrey; 2, Mr. G. Goldie; r, Mr. W. Goldie.

Pen of ten chilver lambs (open): 1, Mr. F. W. Richards, Childbridge, Wimborne; 2, Mr. G. Jeffrey, Donhead.

BUTTER.

Six pounds of butter, rolls or lumps: 1, Lord Portman, Bryanston; 2, Mr. Jehu Moore, Bryanston; 3, Mr. A. Harris, Stourton Caundle; r, Mrs. T. Imber, Shaftesbury; hc, Mr. C. Prideaux, Motcombe.

Six pounds of butter, rolls, or lumps (open): 1, Mr. H. Fricker, Cann; 2, Mr. Jehu Moore, dairyman to Lord Portman, Bryanston; equal 3, Mr. A. E. L. Pitt-Rivers, Rushmore, and Mr. A. Eastment; r, Mr. C. Prideaux.

CHEESE.

Two cwt. of cheese: 1, Mr. H. Watts; 2, Mr. Arthur Hiscock, Motcombe; 3 and r, Mr. M. S. Tucker, Fontmell Magna; c, Mr. Edwin Hiscock, Marnhull.

Special cheese prize, open to all England.—Two cwt. raw milk cheese, made by exhibitor or his servant: 1, Mr. T. C. Candy, Woolcombe Farm, Cattistock; 2, Mr. H. Hoddinott, Milborne Wick, Sherborne; 3, Mr. H. Moorse, Stoke Trister, Wincanton; 4, Mr. H. J. Weeden, Marsh Farm, Blandford; r, Mr. S. E. Richards, Coldcot Farm, Stourton.

BUTTER-MAKING COMPETITIONS.

Open to members and their families and all persons who have received instruction at either of the Dorset Technical Butter Schools: 1, Miss A. Hurford, Thorncombe, Chard; 2, Miss L. Goldie, Manor Farm, Compton Abbas; 3, Mr. Jehu Moore; 4, Mr. B. G. M. Dare, Bowshot Farm, Wootton, Charmouth; r and vhc, Miss L. S. P. Harris, Search Farm, Stourton; hc, Miss Dora Marsh, Stroud Farm, Lydlinch, Sturminster.

Open to members and persons residing in the counties of Wilts and Dorset: 1, Mr. Jehu Moore; 2, Miss L. Goldie; 3, Mr. B. J. Gare, Wootton, Charmouth; 4, Miss M. Russell, Donhead; r, Miss E. Courtney, Drimpton, Beaminster; hc, Miss L. S. P. Harris.

HERDS OF DAIRY CATTLE.

Open to all members of the Society: 1, Mr. Arthur Hiscock, Motcombe; 2, Mr. J. H. Macey, Baverstock, Dinton; 3, Mr. J. White, Zeals Park, Mere; r, Mr. Edwin Hiscock, Marnhull; vhc, Mrs. Trowbridge, Fernbrook, Motcombe; c Lord Wolverton, Iwerne Minster.

HUNTERS, HACKS, AND HARNESS HORSES.

Horse, being the *bona fide* property of a member of the Society, to be driven in harness: 1, Mr. H. Johnson, Shaftesbury; 2 and r, Mr. W. Hiscock, Wincanton; 3, Mr. Arthur Hiscock.

Pony, not exceeding 13.2, to be driven in harness: 1, Mr. Arthur Hiscock; 2, Mr. W. Hardy, Blandford; r, Mr. R. H. H. Eden, Sherborne; hc, Mr. J. J. Brook, Middle Street, Yeovil.

Hunter, being the *bona fide* property of a tenant farmer residing within twelve miles of the town of Shaftesbury: 1 and 2, Mr. S. Knott, Sturminster Newton; 3, Mr. E. H. Pope, Horningsham, Warminster; r, Mr. W. Curtis, Stalbridge.

Hack: 1, Mr. E. R. Apperley, The Paddock, Cheltenham; 2, Mr. H. P. Woolcott, Wanborough Plain, Swindon; 3, Mr. S. Knott, Sturminster Newton; r, Mr. E. Brown, Antelope Hotel, Sherborne.

Weight-carrying hunter, up to 14 stone (open to England): 1, Mr. E. R. Apperley; 2, Mr. N. Learmonth, Hanford; 3, Miss A. Tyrwhitt Drake, Holnest Park, Sherborne; r, Mr. H. P. Woolcott.

Light-weight hunter (open to England): 1, Mr. H. P. Woolcott; 2, Mr. S. Knott; 3, Mr. N. Learmonth; r, Mr. Cable, Cattistock.

Horse, to be driven in harness: 1, Mr. J. J. Brook; 2, Mr. W. Corry, Over Compton, Sherborne; 3, Mr. W. Hiscock, Wincanton; r, Mr. Arthur Hiscock, Motcombe.

Horse, under 15 hands, to be driven in harness: 1, Mr. W. Corry; 2, Mr. W. Hiscock; 3, Mr. Arthur Hiscock; r, Mr. H. Johnson, Shaftesbury.

Tandem, any height, to be driven (open to England): 1, Mr. Wilson, Fifehead; 2, Mr. A. Butler, Gillingham; r, Major Williams, Sherborne.

Fencer (open to England): 1, Mr. C. A. Daniell, Atworth, Melksham; 2, Mr. B. Sims, Cheltenham; 3, Mr. Gilbert Coles, Westmoreland, Frome.

Fencer: 1, Mr. Gilbert Coles; 2, Mr. R. H. H. Eden, Sherborne; 3, Mr. Hill, Broadport, Shepton Mallet.

Mr. W. A. Glynn's Guernsey Bull "Frolic 6th."

West Middlesex Horse Show.

The first of what is hoped will prove a successful series of Horse Shows was held on Thursday, in the Churchend Paddocks, Willesden Green, the attendance being most satisfactory, whilst the entry proved quite a surprise, many of the best horses in the country competing. There were only two classes for hunters, and, although the entry was not large, the appearance of Gendarme and Sportsman, now the property of Mr. Nixon Grey (Cardiff), redeemed the section. Both headed their classes, Mr. Charles Brook's unnamed gelding being second in the heavy-weights, and Mr. A. Hardie Jackson's The Rector next to Sportsman in the under 14st. class. Hacks were more numerous, and, taken all round, were more even as regards quality. Mrs. Graves's Ask Mama and Messrs. J. A. Preece and Sons' Gold Edge being the respective leaders. A very choice Irish mare, exhibited in the 15-hands and over class by the Brentwood breeders, Messrs. E. and A. Baxter, was the pick of the section, after the two winners. The harness classes were the largest in the show, Mr. E. Blackman, Mr. T. W. Johns, and Miss N. Dayer Smith being the leading winners; whilst in a section for hacks of any height, to be ridden by ladies, there was no denying the claims of the well-known chestnut gelding, Herald, owned by Miss Violet Haines. Only a pair lot of polo ponies were formed, Messrs. H. and F. Rich's Arago easily winning the silver cup offered as a prize; and among the leading winners in the ever-popular jumping competition was Mr. W. W. Grundy, of Worcester, who won first and third prizes in the over 14-hands 2in. class, with Swallow and Stag, the former being particularly clever over his fences.

"Mark Lane Express" Diary.

October

9. Sale of Shorthorn bull calves, belonging to Mr. W. Dornie, Collynie, and Mr. W. S. Mare, Uppermill, at Tellycairn, Oldmeldrum, Aberdeenshire.
9. Worcestershire Horse Society's Show and Sale of Cart Horses, Colts, and Foals, at Worcester Cattle Market.
9. Sale of the late Mr. Felix Goldwin's herd of Lincoln Red Shorthorns, at Upper Hall, near Louth.
9, 10, 11, and 12. British Dairy Farmers' Association's Show at the Royal Agricultural Hall, Islington.
9 to 13. Horse Show and Sales at Crewe Horse Repository.
10. Chertsey Agricultural Association's Show.
10. Sale of the herd of Jerseys, belonging to Miss E. Moore, at Kingston House, Leatherhead.
10. Sale of Shorthorn Bull Calves, from the herds of Newton, Pirriesmill, and Strowan, at Newton, Insch, Aberdeenshire.
11. Sale of Shorthorns, belonging to Messrs. Low, of Mains of Sunnyair, Forres.
11. Sale of Mr. Harold Martin's herd at Lincoln Red Shorthorns, at Wainfleet, Lincolnshire.
11. Sale of Clydesdales, Hackneys, and Shetland Ponies, at Seaham Harbour.
11. Sale of Col. W. M. Tufnell's Black Polled Aberdeen-Angus Cattle, at Langley, Great Waltham, Chelmsford, Essex.
11, 12, and 13. Glasgow Agricultural Society's Autumn Show.
12. Worcestershire Shire Horse Show and Sale, at Droitwich.
12. Sale of the herd of Black Polled Aberdeen-Angus cattle, belonging to Col. J. F. Brocklehurst, of Rainsboro', Oakbourn, at the Horse Repository, Peterboro'.
12. Sale of Mr. G. Inglis' herd of Shorthorns, at Inverness Auction Market.
12. Sale of pedigree Horses, Cattle, Sheep, and Pigs, and also Fat Stock, belonging to Mr. W. Parker, at Great Stanney Hall, near Chester.
12. Sale of pure bred Sussex Cattle at Haywards Heath.
13. Liverpool District Farmers' Club's Show, at North Haymarket, Liverpool.
13. Sale of Mr. J. Brooks-Wood's Nettleton herd of Lincoln Red Shorthorns, at Caister Fair.
15. Sale of pure bred Dutch Cattle, belonging to Messrs. Rumbal and Sons, at Pond Green Farm, Walthamstow, Essex.
16. Sale of the late Mr. W. Wright's herd of Shorthorns and young bulls from other herds, at York.
16. Sale of Mr. F. Crisp's Aberdeen-Angus Cattle, at the Stud Farm, Whitchurch, New Southgate.
16. Sale of Clydesdales, Hackneys, Shetland Ponies, etc., at Seaham Harbour.
16 and 17. Cheshire Dairy Farmers' Association's Show at Chester.
17, 18, and 19. Sale of Horses, at Cheshire Repository, Crewe.
18. Galloway Cattle Sales' Association's Heifer Show at Castle Douglas.
18. Sale of the Right Hon. Lord Llangattock's Shire Horses at The Heath, Monmouth.
18. Sale of Shetland Ponies, belonging to the Countess of Hopetoun and Mr. R. W. R. Mackenzie, at Hopetoun House.
19. Sale of Red Polled Cattle, the property of Mr. J. E. Platt, at the Dale Hall, Ipswich.
19. Show and Sale of Shire Horses, at Lichfield.
20 to 25. Breeders' Exhibition at the Royal Agricultural Hall, Islington.

Twenty new members were elected at the Council meeting of the British Dairy Farmers' Association on Wednesday last.

SOCIETIES.

Dairy Trade and Can Protection Society.

The Council meeting of this Society took place at the offices, 57 and 58, Chancery Lane, on Wednesday. The first business on the agenda was the election of a president for the remaining term of office held by the late Mr. James Leggett. It was proposed by Mr. J. T. Horner, and seconded by Mr. Barton, that Mr. F. Ramsay be elected president, which was carried unanimously, and that gentleman then took the chair. The minutes of the last meeting were read and confirmed. The following gentlemen were admitted members of the Society:—Mr. G. B. Ramsay, Great Quebec Street, W., and Mr. J. Susser, Faulkland Road, Kentish Town.

The secretary then read the can exchange report for September, which showed that 510 cans and one churn had been recovered, and the delivery was 383 cans and eleven churns.

Messrs. Redwood and Destailes, the Society's analysts, informed the Council that during the month of September they had received direct from the members of the Society eighty-nine samples of milk for examination. Three were found to be of poor quality and twenty adulterated. Their inspector took at the railway stations twenty-six samples, one of which was considered poor. The secretary then reported the prosecution of Eliza Danton for stealing forty-seven cans and milk from various places, the property of the members, and who, after remand, was sentenced at Marylebone Police Court to three months' imprisonment with hard labour. He also reported a second prosecution, that of a boy, John Boucher, for stealing milk and cans and barrow straps, the property of the members, and who was sentenced at Clerkenwell Police Court to be birched. He also reported on several complaints of property being missing, and which he had recovered.

Totnes Union Chamber.

A meeting of Totnes Union Chamber of Agriculture was held on Tuesday at Totnes, to consider the position of agriculturists in connection with the General Election. The President (Mr. W. Blackler) occupied the chair, and there was a moderate attendance.

Mr. A. Tucker, the secretary, reported that he had written the Parliamentary candidates in the county asking if they were prepared, if returned, to support the re-enactment of the Agricultural Rates Act, and any measures brought before Parliament in the agricultural interest. Mr. Mildmay, M.P., wrote that he was certainly in favour of the re-enactment of the Act as well as the removal of any unjust burdens upon land. Mr. Rankin (Torquay) was in favour of it, and would support any other Bill having for its object the removal of unfair burdens on land. Mr. J. A. Nix (Mid-Devon) replied that he would support it unless legislation having the same object should be required on broader lines as a result of the Royal Commission on the incidence of local taxation, and also any legislation that had for its object the removal of unfair burdens on land. Mr. E. J. Soares (Barnstaple) would support the Act, but wished to see Mr. Lambert's amendments introduced. Sir W. C. Gull (Barnstaple, was strongly in favour of the Act, and would do all he reasonably could to see that burdens were placed on the persons and industries best able to bear them. The Secretary, in reply to a question, said Mr. Seale-Hayne had not replied. Mr. White (Paignton): Silence gives consent, I expect.

The President welcomed Mr. Mildmay, M.P., saying that there was special reason for them being proud of Mr. Mildmay, because in South Africa he had upheld the honour of the country in a splendid manner, and also the Yeomanry he went out to represent.

Mr. Mildmay, received with cheers, said he was glad to think he had been again returned to the Totnes Division. He plainly realised how much he owed to the support the agriculturists had constantly given him. It would always be his endeavour to act in Parliament as may best benefit the farming community. He should like to see a great many more practical agriculturists in the House of Commons, and hoped there would be as the result of this election. He continued to hold the same opinions as he always did, and should never change them. The foundation of his opinions was that England could not be prosperous without a prosperous agriculture. He wanted to see a revision of the whole system of local taxation on a comprehensive basis. The Union Government passed a measure which only justly lightened the burden of local taxation pressing on the farmers. They did not ask for that as a mercy, but as an act of simple justice. The farmer should not be taxed on his capital, but on his profits like other professions. With regard to his Bill, he was still of opinion that the people ought to know when they were buying foreign meat. It was said that would be advertising the foreigner, but he contended that they knew English meat was good honest stuff, and did not want to buy faked-up foreign stuff, but would be glad to have the quality of the meat guaranteed. He should do his best to press it in future. He acknowledged the way in which the farming interest had supported him, and said he hoped he should do nothing to forfeit their very kind indulgence.

The President moved "that this meeting is strongly of opinion that no candidate for Parliament should receive the support of the agricultural interest who will not pledge himself to vote for the renewal of the Agricultural Rates Act and support the interests of agriculture generally." This was seconded and carried.

Mr. Evans (Littlehempston) moved that the Chamber petition the Local Government Board to amend the law so as to give all Rural District Councils the power to prune the hedges, fences, and trees adjoining the highway. Mr. G. Coaker (Rattery) seconded ,and the resolution was carried by 13 votes to 3.

Suffolk Sheep.

At a meeting of the Suffolk Sheep Society on Friday, Mr. S. W. Slater presiding, the following gentlemen were elected members:—Mr. Felix T. Cobbold, Felixstowe; Mr. John Sherwood, Ipswich; Mr. A. V. C. Lambert, Foxearth Hall; Mr. H. Wainwright, Botesdale; Mr. Charles Cuthbert Eley, East Bergholt; Mr. R. Collingham, Cuckney, Mansfield; Mr. Roland Dawson, Kirton Hall; Mr. R. H. Sherwood, Birdbrook; Hon. Sir J. Gorell Barnes, Stratford Hills; Mr. G. W. Bendall, Shottisham; Mr. J. Westren, Elmsett; Mrs. Clotilde Davies, Herringswell; Mr. W. G. Fairhead, Brick House, Peldon, Colchester; Mr. A. E. Gray, Wenhaston; Mr. David Johnson, Middleton Hall, Mendham; Mr. Charles Jiggens, Burgate; Mr. C. S. Wentworth Reeve, Livermere Park; Sir Emilius Laurie, Bart., Maxwelton House, N.B.; Mr. Edward Brooke, Ufford Place; and Mr. Sam Woodiwiss, Graveleys, Great Waltham, the last-named gentleman being a life member.

The secretary (Mr. Ernest Prentice) stated that the entries for the flock competitions for 1900 were as follows:—

District A, Challenge Cup.—Sir Hugh E. Adair, Bart., Flixton Hall, 300 ewes; Mr. S. R. Sherwood, Playford, 253; Mr. H. S. Smith, Walton Grange, 180; and Mr. R. Holmes White, Boulge Hall, 183.

District B, Challenge Cup.—Mr. A. H. Cobbald, Eldo House, Bury St. Edmunds, 512 ewes; Mr. B. Hitchcock, Creeting All Saints, 127; Mr. Henry Lingwood, Needham Market, 22; and Mr. Joseph Watkins, Claydon Hall, 210.

District C, Challenge Cup.—Major E. W. Baird, Exning, 142 ewes; Mr. Robert Barclay, Higham, 453; Marquis of Bristol, Tuddenham, 235; Mrs. Clotilde Davies, Herringswell, 271; Mr. E. R. Pratt, Royston Hall, Downham, 282.

District D, Challenge Cup.—Mr. A. W. Ruggles-Brise, Spains Hall, Braintree, 303 ewes; Mr. Thomas Keeble, Bentley Hall, 300; Sir T. Barrett Lennard, Bart., Aldham Hall, 149; and Messrs. Stanford Brothers, Beaumont Hall, 295.

Pretyman Challenge Cup.—Major E. W. Baird, 12 ewe lambs; Mr. Robert Barclay, 51; Mr. A. W. Ruggles-Brise, 28; Marquis of Bristol, 25; Mr. Herbert E. Smith, 18; Messrs. Stanford Brothers, 30; and Mr. R. Holmes White, 19.

The secretary remarked that there were twenty-four entries, as against twenty-one last year, there being only two entries in District C, as against five this year.

The following gentlemen were appointed as judges:—Mr. D. Abbott Green, Mr. J. W. Eagle, Mr. J. R. Grimsey, and Mr. J. C. Dawson; Mr. George Pettit reserve.

The Marquis of Bristol was nominated Vice-President, and Mr. S. R. Sherwood, Mr. Thomas Goodchild, and the secretary (Mr. Ernest Prentice) representatives upon the Council of the National Sheep-Breeders' Association in 1901.

Gloucestershire.

The cash account of the Gloucestershire Agricultural Society up to September 25th last shows receipts amounting to £2,303 1s. 6d., the principal items in which are: Transfer from deposit account, £250; subscriptions, £294 18s.; prizes given by members, £218 5s.; entry fees, £394 1s.; Gloucester Local Committee, £350; royalties, £107; and gate money, £654 15s. 9d. The principal amounts on the expenditure side are: Balance due to bankers brought forward, £221 1s. 11d.; prizes, £768 5s.; advertising, bill-posting, stationery, and printing, £214 6s. 4d.; shedding and grand stand, £549 19s.; band, £80; expenses of judges, stewards, dinner to Mayor and Corporation, refreshments (including polo players), and travelling expenses, £139 5s. 9d.; secretary's salary, £100; balance at bank, £128 5s 10d. The last-named amount has been added to cash on deposit at the Capital and Counties Bank, which now stands at £478 5s. 10d.

All farm live stock should be given "Molassine." It is an excellent food and condiment combined. See advertisement on back page of this issue.—[ADVT.]

MILLING.

Wheat from a Miller's Standpoint.

At the annual meeting of the Cheshire, Shropshire, and North Wales Farmers' Supply Association, Mr. J. Hastings Brown, of Crewe, read a paper on "Wheat from a Miller's Standpoint," which contained some valuable hints on wheat-growing, and elicited a very interesting discussion. Mr. Brown said: In this short paper I shall not try to persuade you that when growing wheat you should consider millers' interests before your own. I take it for granted that what all farmers wish to grow is a crop that will give them the best cash return for their expenditure in growing it. I am strongly of the opinion that the very best millers' wheat should also be the best paying wheat for farmers to grow; and that, while endeavouring to produce a large and bulky crop, you should not forget to aim also at the production of grain of the most perfect description for the purpose for which it is required.

Many farmers tell us "wheat is not worth growing at the wretched price you millers give us for it." I admit that it is most discouraging to receive such low prices for your grain as have been ruling of late years, but I submit that no grain crop should be altogether condemned as a non-paying one until it has been produced of the very highest quality for its purpose that your land and our home climate will allow of. Wheat is a cereal grain that is in ever increasing demand in almost every country in the world, and it is a strange and sad fact that with a steadily increasing consumption the home production of it has dwindled down to about half what it was at the time of our grandfathers. The United Kingdom requires, roughly speaking, about thirty million quarters of wheat each year to feed its population, and toward this large quantity we grow at home only between seven and eight million quarters, taking the average of the past ten years.

Now, why is it that with an active consumptive demand at your very doors for four times the quantity of wheat you now grow, your wheat is often a drug on the market, and sells for shillings per quarter under the price paid at the same time for the better classes of foreign wheat? In my opinion the chief reason is, that in face of a growing demand for increased strength and quality in flour, there has been a steady deterioration in the strength and quality of English grown wheat, owing to the introduction and use of heavy cropping but inferior varieties of seed With the advance in general prosperity, the British people have become more and more fastidious about their bread. They insist upon having a large loaf for their money, and are not satisfied if it is not also of good texture and colour.

To make such a loaf, the bakers demand a strong and glutenous flour, and if some millers cannot, or will not, supply them with this, there are hosts of foreign millers' agents and representatives ready and willing to do so. It is useless for us to say to a baker, "Here is a fine-looking sack of English wheat flour; it is whiter and of better flavour than any foreign stuff you can get for the same money." He tells us at once, "It is of no use to me; it may be all you say as to colour and flavour, but it is not strong enough to bake into decent bread by itself, nor will it turn out sufficient bread per sack." What he requires is, first of all, strength, combined with as good colour and flavour as we can give him with strength.

Now, this quality of glutenous strength is exactly what your modern English wheat lacks, and this is the reason why millers, taking an average of the whole country, cannot use more than about 25 per cent. of it in their grists. Since seedsmen have introduced and farmers have taken to growing soft and inferior yellow wheats of the square head type, this want of strength and general all-round quality has been greatly accentuated, and millers are thereby limited to using a much smaller proportion of it than they otherwise would do. At certain seasons of the year, when your wheat is offered for sale in larger quantities than millers can use it, its price is naturally depressed, and much below the stronger foreign wheats. At such times Duluth and Manitoba spring wheats are held from 3s. 6d. to 4s. per quarter more money than English, and millers have to pay this difference for extra strong wheats to blend with weak English, to make up for its deficiencies.

Really strong wheats are nearly always of a dark greyish brown in colour, hard and flinty in appearance, and when broken across the grain do not look very soft and chalky white inside. From pure white wheat of the best varieties we get a beautifully white, clear flour, which, although weak, is not weaker, and is of better quality generally than can be made from any yellow-skinned wheat of the square head type. As white wheat is, however, a more delicate grain, more easily weather soiled, and more risky to get properly harvested in our moist climate, I think most farmers would be safer to grow the stronger and hardier dark wheats. You may perhaps now ask, "How are we to grow this strong wheat: where is the seed to be had, and how are we to know that it is the right sort to give us a bulky crop of good quality?" This is, I admit, a difficulty, but not an insuperable one.

The old and better milling wheats, such as Red

Launnas and Red Nursery, have almost, if not altogether, disappeared and gone out of cultivation in favour of the heavier cropping, but inferior, yellow kinds, which are weak, starchy, and characterless. I do not suggest that any wheat should be grown that is not a good heavy cropper. What is wanted is a variety which will give both weight and quality of grain, and for the attainment of such I would make the following four suggestions:—First, that farmers should do more experimental work, both on their own farms and in association through their agricultural societies and colleges. Second, that they should get their local supply associations to procure for them from distant counties a change of seed of the best and strongest kind available. Third, that when ordering seed wheat from their seedsmen they should insist that the strength quality of the grain is quite as important as its bulk producing properties.

Lastly, that they should consult the miller to whom they usually sell their wheat as to his opinion of the seed before actually purchasing. Some of their well-known strong foreign wheats might with advantage be experimented with on a small scale, with a view to acclimatising them to English soil. I do not ask you to believe that by growing stronger and better wheat from a miller's point of view you can thereby raise the standard of value to the old high level that our fathers and grandfathers can tell us of, but I do claim that it should be possible to grow wheat that would give better monetary results both to the growers and to those who manufacture it into flour for the nation's use, than do these miserable soft wheats of the square head type so generally grown of late years.

By sowing the right seed at the right time, by using suitable manures and reaping the crop before it gets too ripe, I believe it quite possible to produce a heavy out-turn of strong and good quality grain. I do not suggest that English farmers can ever grow wheat with the excessive strength of the strongest foreign. It may not be possible even to grow wheat sufficiently strong to be used altogether by itself. What is wanted is either pure white wheat of superlatively white colour, or red wheat that has sufficient backbone of gluten in it to enable us safely to use, say, 60 per cent. of it in our mixes, without having bakers growling at us, and going to the foreign miller for what they cannot get from us.

Millers have found by experience that it is easier far to supply what there is a good demand for, than to waste their time and energy in endeavouring to create a demand for what is not wanted. At present farmers experience an indifferent demand, at an indifferent price, for the comparatively small quantity of wheat they grow. Would it not be a wise course to make every effort to supply the class of wheat there is the largest demand for, instead of offering for sale grain which millers can only use very sparingly? I venture to say that of good strong wheat you might grow double the acreage now grown, and at the same time have millers tumbling over one another for every sack of it at comparatively better prices than you now receive. We cannot all attain the highest and best in either farming or milling, but we must aim high to shoot high, and I would say in conclusion that the only possible way to successfully meet the competition of foreign countries is to keep the quality of all our productions at least equal to, and if possible, superior to theirs. Unless we do this, we must inevitably lose ground and fall behind in the competitive race of nations.

The subject of old-age pensions has always received a great amount of attention from politicians and others, and during the present election it has come in for a good share of discussion. One of the chief difficulties to overcome in the matter is the great cost, the sum estimated by the Departmental Committee of the Local Government Board being £10,300,000 for a pension of from 5s. to 7s. per week. This figure, however, was stated by Mr. Sinclair, in an interesting letter to the *Times*, to be wrong, Mr. Sinclair showing that £2,700,000 would cover the cost of such a pension. The letter mentioned has, together with other interesting facts concerning old-age pensions, been printed in pamphlet form, and all who take any interest in this important subject would do well to give the pamphlet a careful perusal.

Stack Fire near Brighton.—A stack on Mr. Thos. Duplock's Farm, situated on the Ditching Road, near Brighton, was totally destroyed by fire on the 29th ult., the loss being estimated at £200. How the outbreak originated is not known. Both the police and the Volunteer Fire Brigade turned out, but on arriving the firemen found that not a drop of water was available. Fortunately, Mr. Colman, of the Brighton Waterworks, who was present, knew of water being obtainable from a hydrant on the farm at the bottom of the hill some distance away. This source of supply was immediately tapped, but it was at once seen that the amount of water procurable fell far short of what was anticipated. It was found, indeed, on affixing the hose that the water could not be pumped up the hill, and therefore nothing could be done but to let the fire burn itself out, the firemen taking protective measures to prevent another stack, situated but little more than the length of a cricket pitch away, from sharing the same fate. The stack was fully insured.

Crop Acreage in 1900.

THE FOLLOWING IS A PRELIMINARY STATEMENT OF THE ACREAGE UNDER WHEAT, BARLEY, OATS CLOVER, AND PERMANENT PASTURE, COMPILED FROM THE RETURNS COLLECTED ON THE 4TH JUNE, 1900, WITH A COMPARATIVE STATEMENT FOR 1899.

Counties.	Wheat.		Barley.		Oats.		Clover and Rotation Grasses.		Permanent Pasture.

Brough Hill Fair.—The attendance at this fair on Monday was the largest of recent years, but there was a comparatively light show of horses. Heavy animals were unusually scarce, and owners were able to command high prices. In special cases £70 to £80 was quoted, while £60 was frequently asked. The demand for harness horses was not so great, and prices ranged from £15 to £60. There was a light show of unbroken stags, and business ruled slow at £6 to £20. A few Yankee colts and fillies realised to £27. There was an active trade in sheep, black-faced lambs realising from 8s. to 10s., and grey-faced lambs, 25s. Tuesday's proceedings were spiritless and uninteresting. Very few better-class horses were paraded for sale. A fair business in inferior animals was effected, and several heavy batches were moved away during the afternoon. Business in unbroken pony stags was resumed at £6 to £12, and prices for work horses covered a very wide range.

Stack Fire near Bury St. Edmunds.—Early on Tuesday morning a fire was discovered on the farm premises of Mr. W. S. Peddar, of Higham Hall, about midway between Bury St. Edmunds and Newmarket. Several members of the fire brigade were called out, and very promptly put in an appearance, but it was impossible to save several stacks from destruction. The drum of a threshing machine was also destroyed. The origin of the fire has not at present been discovered. The property was insured.

About nine o'clock on Wednesday morning a fire broke out in the covered stackyard of Cliff Farm, Flamborough, adjoining Cliff House, occupied by Miss E. Marsden. The workmen were threshing at the time, and it is not known whether the fire originated through a spark from the engine or owing to friction of the elevator. The adjoining stables were destroyed, and also the threshing machine elevator. The total damage is estimated at over £500, and this is only partly covered by insurance.

LETTERS TO THE EDITOR.

Experiments in Sugar Beet Growing.

Sir,—As you are aware, I have for several years past carried out very successful experiments in sugar beet growing in different parts of England, Scotland, and Ireland. Encouraged by the success which has attended my efforts I intend to continue the experiments in 1901, and have pleasure in repeating my offer of former years to supply gratuitously a quantity of sugar beet seed to farmers willing to experiment.

As in many of my previous experiments, a manuring with basic slag (supplying phosphoric acid and lime to the land) has given very satisfactory results, it seems to me desirable that this fertiliser should be more extensively tried in this country, all the more as the Germans use it very largely, and with good results, for this purpose. For beets they generally sow it broadcast during autumn or winter, preferably before ploughing.

I am pleased to say that I have induced a leading firm of producers to place a quantity of basic slag at my disposal for experimental purposes, to be supplied gratis to the farmers who undertake a careful experiment with the seed which I shall supply, the experimenters to forward sample roots to me in due course for analysis.

As in previous years, I shall make no charge for analysis and report.

SIGMUND STEIN,
Technical Sugar Expert.

323, Vauxhall Road, Liverpool, October 1st, 1900.

Corn from India.

Sir,—In your corn trade report I observe an interesting notice that "the eagerness of Indian merchants to secure British gold payments is evidenced in attempts already making to sell the April harvest." Further, that this export may come, as in the past, from the close vicinity of famine districts. This actually happened in the Irish famine of 1847. I believe I am correct in saying that food daily was exported from Ireland sufficient to have stayed the famine.

It would take up too much of your valuable space to fully develop my argument; but my researches into the question persuade me that this inequitable state of things was directly attributable to the financial system of this country, and your statement discloses an exchange operation involved in it. It must not be supposed that in stating this I am raising any question of the standard of value, with which I am well satisfied; but I do raise a question against the Bank Charter Acts, whereby eighteen million pounds' value of notes emanate from the Issue Department of the Bank of England without any deposit of gold and without any distinction from the issues represented by bullion deposited for safe custody. It is the above oversight that, as I allege, warps the working of our financial system, and this is directly attributable to Statute Law.

Thus arises the anomalous methods noticed by the late Walter Bagehot, which our bankers are forced to pursue, and, further, from this arises our present agricultural depression and the fierce commercial competition, socially ruinous, which has characterised the past century, the relief of which depends, and alone depends, on the pen of the Chancellor of the Exchequer. THOMAS W. HUSKINSON.

Eppustone, Notts, October 5th, 1900.

Wine Growing in Victoria.

The Royal Commission (Victoria) appointed to inquire into the wine industry have presented their report. The first recommendation is that established winery companies should be reorganised on an extended co-operative principle, and strengthened by Government advances in the shape of loans at the following rates:—To co-operative winery companies with a share-list of at least 100 vignerons, and a paid-up capital of £5,000, £10,000, in sums of £2,000 annually; and companies of half that size, £5,000, in sums of £1,000 annually, the interest to be 3½ per cent., with 1 per cent. added as a sinking fund. The loans are to be spent on buildings, plant, and the purchase of wine, at least 50,000 gallons yearly, by the large companies, and 25,000 gallons by the smaller. The repayments of the loans are to begin at the end of three years, and are to extend over twenty years, with the right of paying off the whole or part at any time. The Commission favour the provision of a central cellar, at a cost of £7,500, to be under the control of a thoroughly competent wine handler, and the establishment of a depôt in London, under an expert manager, to receive wines in bulk, bearing the Government stamp. They want £5,000 spent in advertising the wines in the United Kingdom, legislation of a vigorous nature to prevent adulteration of wines, and the establishment of a thorough system of inspection of wine shops. Under this scheme, if adopted, growers will receive up to 1s. per gallon cash on delivery at the winery, and the balance from the sales in London.

THE GARDEN.

The days are shortening rapidly now, and the sun sinks lower and lower in the sky. Soon—too soon—we shall have "chill November" here again, and then Christmas! How quickly the years go by now; and the older one grows, the faster they fly.

Although October is now in, we have had no touch of frost here yet, and the garden shows very few signs of the hand of autumn, the frequent showers experienced for some time past having kept everything in a growing condition. Potatoes are nearly all dug and stored, the haulm having completely died off, and the tubers are much better off in a dry shed than they would be in the damp ground. They should be very carefully sorted over before being stored away, rejecting every one showing the least indications of the disease, as, especially when stored in bulk, this will spread rapidly. Those only slightly affected are boiled and fed to chickens or pigs, the really bad ones being burnt, but fortunately we have very little disease, on the whole, which I attribute to having used no animal manure at all this season—nothing but the turf or grass turned in, and a little artificial.

By the way, one plot that was manured with a light sprinkling of "Fertility" (from the Anglo-Continental Guano Company) only, produced a splendid crop at the rate of just over twenty tons to the acre! Many of the tubers scaled from ½lb. to 1lb. in weight, and not a bad or unsound one in the lot, while there were very few small ones, and no chats at all! This is the best potato fertilizer I have ever used, and it is nearly or quite as good for tomatoes.

The variety was my old favourite Beauty of Hebron, which, I am pleased to see, has just been given an award of merit by the Royal Horticultural Society, at Chiswick. Although it was introduced (from the U.S.A.) sixteen or more years ago, it seems it has never received an award of any kind before, though sent for trial more than once, but this season it turned out so well, both as regards cropping and quality (when cooked, etc.), that the award could not be withheld. The affair has created a mild sensation, especially as it is by no means a new variety, but there are very few of the new ones that can come up to this yet, when it is properly grown.

Another grand potato for flavour is Schoolmaster, but as it is not a very heavy cropper it is seldom grown to any extent now, which is a pity. It is a white round, with a rough, netted skin, and very firm, white flesh. It does well here, and we have a good crop from two moderate-sized beds, very sound and free from disease, but its flavour is its strong point, and in this respect it is almost unequalled.

Continue planting out the young cabbage plants from the sowing made in July or August. Rows of Brussels sprouts, Savoys, broccoli, etc., already established had better be moulded up moderately, as this not only affords the plants a good deal of support, but also protects them at a rather vulnerable point.

Green vegetables of nearly all kinds, and especially scarlet runners, vegetable marrows, cauliflowers, etc., etc., are exceedingly abundant and fine just now, owing to the showery and on the whole mild and "growing" weather experienced for some time past. I seldom remember such a crop of scarlet runners as we have now, and as we cannot possibly use half of them, we are having a quantity put down in deep jars, with salt, in the manner I have frequently referred to in this column.

Any small green (or ripe) tomatoes, of which there ought to be plenty now, both indoors and out, may be utilised for making pickles, which when rightly done are most excellent. Small cucumbers, of any kind, may be similarly used, also any spare cauliflowers, French beans (while small or young), and so forth.

Lose no time in preparing any ground to be planted with hardy fruit trees or bushes presently. Except in the case of heavy clay soils, which I believe are as a rule best left almost undisturbed, planting the trees in slight mounds on the surface, and depending chiefly on surface drainage—I am in favour of working the soil well, and rather deeply, before planting. But in the case of any of the bush fruits (gooseberries, currants, raspberries, etc.), the land ought to be rather liberally manured as well as being dug or trenched, while for the larger fruits—apples, pears, etc.—no manure should be used when planting, unless, of course, the soil is desperately poor.

Again, where a heavy, damp, or cold soil prevails, only apples on the Paradise, and pears on the Quince stocks ought to be employed, as these form chiefly surface roots, but on a deep, light, or free formation apples on the crab and pears on the natural or "free" stock will in the case of most varieties be found to afford the best results.

There is still a good deal of bright colour here. Late roses are grand, and fuchsias, the Michaelmas daisies, torch lilies, and chrysanthemums, with the white and other antirrhinums, African marigolds, and begonias of several kinds, are still quite gay.

Any more or less tender plants now outside which it is desired to preserve had better be lifted, potted, and housed at once. Chrysanthemums in pots must go inside directly the buds begin to show colour, and in most places the entire collection had better be housed now. Insert cuttings of roses in a sheltered border, and those of calceolarias in cold pits or frames.

White Root Rot.*

The Board of Agriculture have had their attention directed to a disease likely, if not checked, to prove destructive among fruit trees. The attack is found to be caused by a fungus belonging to the genus *Rosellinia*, the spawn or mycelium of which spreads below the surface of the soil, extending rapidly from the root of one tree to another. The following information concerning the features of this attack has been taken from an article in the Kew Bulletin for 1896.†

Amongst the numerous root diseases of various plants caused by parasitic fungi, none are better known, or extending over a greater area, than the Pourridié of the French, which occurs in France, Italy, Switzerland, Austria, south-west Germany, and has recently been recorded from several widely separated localities in Britain. The fungus causing this disease is called *Rosellinia necatrix*, Prill. and Del. (=*Dematophora necatrix*, Hartig), which frequently devastates vineyards and orchards; its attacks, however, are unfortunately not confined to vines and fruit trees; potatoes, beans, beet, etc., are also destroyed, and Hartig states that the mycelium soon kills young maples, oaks, beeches, pines, and spruces.

The mycelium first attacks and kills the youngest rootlets, and then enters into the larger branches of the root, in which it rapidly spreads and forms an irregular network of slender strands; finally bursting through the cortex and enveloping the roots in a snow-white, fluffy mycelium, here and there running into slender, cord-like strands, which traverse the soil, and by this means spread from one tree to another. At a later stage of development, numerous minute, black compact masses of mycelium or *sclerotia* are formed in the cortex of the roots, and from each of these spring several slender spines, each of which bears an abundant crop of conidia or reproductive bodies at its tip. In addition to the white mycelium, a very characteristic pale brown or olive mycelium is also present on the surface of the roots, formed of septate or jointed threads of variable thickness, having pear-shaped swellings at intervals; these swollen portions finally become free by the disappearance of the intermediate portions of the mycelium, and form bodies capable of germinating and giving origin to a new crop of mycelium. Under certain conditions some of the sclerotia, instead of producing the spine-like bodies bearing conidia, become converted into hollow spheres or *pycnidia*, containing in their interior numerous minute reproductive bodies or stylospores, which germinate at once and produce new plants. Finally, the highest, or ascigerous form of fruit is rare, and only develops on old trunks that have been dead and decayed for a long time.

Rosellinia necatrix is almost entirely confined to heavy clay soils, where the water drains away with difficulty, whereas *Rosellinia glomerata*, Viala, an allied, but much rarer fungus, with a similar destructive habit, hitherto observed only in France, is met with attacking plants growing in loose sandy soil, where the subsoil is wet.

Preventive Measures.

Owing to the habit of the fungus in penetrating and spreading in the living tissues of the root of its victim, cure is practically impossible when a plant is once permeated with mycelium; and keeping in view the varied modes of reproduction, facilitating the rapid spread of the disease, no efforts should be spared for preventing this when the presence of the fungus is once detected.

Undoubtedly the most frequent and rapid mode of spreading is by means of the mycelium travelling in the soil, and a good method of isolating diseased patches is to cut a narrow trench, from nine inches to a foot deep, round each, care being taken to throw the excavated soil on the diseased portion, and not outside of it. This method, which was first suggested by Hartig for the purpose of preventing the spread of subterranean fungi in the German forests, cannot be too strongly commended, especially where the diseased patches are small in area. The amount of success depends entirely on the thoroughness, combined with an intelligent method of carrying out the work. Half attempts invariably result in a loss of time and labour without benefit. It may be enough to point out that the disease may be spread by the spores of the fungus, by infected soil carried on the shoes of labourers, by dirty tools, wheels of carts, animals, etc., from diseased centres. Diseased and fallen trees, and especially stumps and roots, should be at once destroyed by burning. The soil surrounding diseased stumps should be burned after the stumps have been removed, so as to destroy the smaller diseased portions of the root that remained behind. Quicklime should be mixed with the soil in places from which diseased plants have been removed.

A second preventive method, which has proved of service in France, is to lay bare the trunk as far below the surface of the soil as can be done without injury to the tree, and to liberally coat the exposed trunk and adjoining soil with powdered sulphur.

Stagnant water should not be allowed to remain in the soil, as this favours the spread of the fungus.

* A Board of Agriculture leaflet, which may be obtained free of charge and post free on application to the Secretary, Board of Agriculture, 4, Whitehall Place, London, S.W. Letters of application should be addressed, and not be stamped.

† "Root Diseases Caused by Fungi," by Geo. Massee, F.L.S., Kew Bulletin, Jan., 1896, p. 1.

AGRICULTURAL LAW.

Agriculturists and the Workmen's Compensation Act.

The Board of Agriculture desire to call attention to the provisions of the Workmen's Compensation Act, 1900, the object of which is to extend to workmen in agriculture the benefits of the Workmen's Compensation Act, 1897. The new Act comes into operation on July 1st, 1901; and if, on or after that date, any personal injury by accident, arising out of, and in the course of, employment in agriculture is caused to a workman, his employer will be liable to pay him compensation, subject to certain provisions referred to below. But no employer is liable to pay compensation under the Act unless the habitually employs one or more workmen in agriculture.

The term "workman" includes every person who is engaged in agriculture, whether by way of manual labour or otherwise, and whether his agreement is one of service, or apprenticeship, or otherwise, and is expressed or implied, is oral or in writing.

The expression "agriculture" includes horticulture, forestry, and the use of land for any purpose of husbandry, inclusive of the keeping or breeding of live stock, poultry, or bees, and the growth of fruit and vegetables. It should be observed that this definition is very wide in its terms, and that the Act, therefore, imposes a liability not only upon farmers and other persons engaged in agriculture, in the more limited and ordinary sense of that expression, but also upon many other persons, as, for instance, persons who habitually employ one or more gardeners or others in garden work, whether in the way of trade or business or otherwise, and whether the gardens are attached to houses or not.

Where a workman is employed by the same employer mainly in agriculture, but partly or occasionally in other work, the Act applies also to the employment of the workman in such other work.

The amount of compensation payable under the Act is regulated by the following provisions of the Act of 1897:—

(*a*) where death results from the injury—

(i) if the workman leaves any dependants wholly dependent upon his earnings at the time of his death, the amount is to be a sum equal to his earnings in the employment of the same employer during the three years next preceding the injury, or the sum of one hundred and fifty pounds, whichever of those sums is the larger, but not exceeding in any case three hundred pounds, provided that the amount of any weekly payments made is to be deducted from such sum, and if the period of the workman's employment by the said employer has been less than the said three years, then the amount of his earnings during the said three years is to be deemed to be 156 times his average weekly earnings during the period of his actual employment under the said employer;

(ii) if the workman does not leave any such dependants, but leaves any dependants in part dependent upon his earnings at the time of his death, the amount is to be such sum, not exceeding in any case the amount payable under the foregoing provisions, as may be agreed upon, or, in default of agreement, may be determined, on arbitration, to be reasonable and proportionate to the injury to the said dependants; and

(iii) if he leaves no dependants, the amount is to be the reasonable expenses of his medical attendance and burial, not exceeding ten pounds;

(*b*) where total or partial incapacity for work results from the injury the compensation is to be a weekly payment during the incapacity after the second week not exceeding fifty per cent. of his average weekly earnings during the previous twelve months, if he has been so long employed, but if not, then for any less period during which he has been in the employment of the same employer, such weekly payment not to exceed one pound.

In fixing the amount of the weekly payment regard is to be had to the difference between the amount of the average weekly earnings before the accident and the average amount which he is able to earn after the accident, and to any payment not being wages which he may receive from the employer in respect of his injury during the period of his incapacity.

Any weekly payment may be reviewed at the request either of the employer or of the workman, and on such review may be ended, diminished, or increased, subject to the maximum above provided, and the amount of payment is, in default of agreement, to be settled by arbitration.

Where any weekly payment has been continued for not less than six months, the liability therefor may, on the application by or on behalf of the employer, be redeemed by the payment of a lump sum, to be settled, in default of agreement, by arbitration, and such lump sum may be ordered by the arbitrator to be invested or otherwise applied as above mentioned.

An employer is not, however, liable to pay compensation in respect of any injury which does not disable the workman for a period of at least two weeks from earning full wages at the work at which he was employed.

If it is proved that the injury to a workman is attributable to the serious and wilful misconduct of that workman, any compensation claimed in respect of that injury will be disallowed.

To meet cases of sub-contracting the new Act specially provides that where an employer agrees for the execution of any work in agriculture by or under a sub-contractor, such employer shall be liable to pay compensation to any workman employed in the execution of the work, whether the workman is entitled to obtain it from the sub-contractor himself or not; but, if the workman takes advantage of this provision, the employer so made liable is entitled to be indemnified by any other person who would have been liable independently of this provision. Examples of such sub-contracting in agriculture are cases where work is done through a ganger, or where crops are cut for the occupier by a farmer with his own men and implements.

These enactments as to cases of sub-contracting do not apply where the sub-contractor's work is merely ancillary or incidental to, and is no part of, or process in, the trade or business carried on by the person who entrusts the work to the sub-contractor; and in cases in which the sub-contractor provides and uses machinery driven by mechanical power for the purpose of threshing, ploughing, or other agricultural work, he and he alone is liable to pay compensation to any workman employed by him on such work.

In cases where damages in respect of an injury are recoverable from some person other than his employer, the workman may, at his option, proceed either at law against that person to recover damages, or against his employer for compensation under the Workmen's Compensation Acts, but not against both; and if compensation be paid under the Acts, the employer is entitled to be indemnified by the said other person.

All questions as to compensation under the new Act are, in case of difference, to be settled by arbitration in accordance with the Workmen's Compensation Act, 1897.

In view of the liability attaching to farmers and others under the above-named Acts, the Board of Agriculture desire particularly to call attention to the fact that many of the leading insurance companies are now issuing farmers' insurance policies which provide for the payment of compensation on the basis of the Workmen's Compensation Act for all accidents occurring to workmen in the course of employment in agriculture, and cover, in addition, the existing liability of farmers in connection with accidents to their servants under the Employers' Liability Act, 1880. The annual premiums charged for these policies range from about 3s. for every £100 of wages paid.

The Food Preservatives Committee.

The members of the Food Preservatives Committee, Dr. Timbrell Bulstrode and Professor Tunnicliffe, and Mr. Charles J. Huddart, secretary, who proceeded last month to Ireland, for the purpose of investigating the dairying industry of that country in relation to the use of chemical preservatives, have now returned to town. The inquiries made embraced the city of Dublin and the surrounding district and the great butter-making centres in the south and west of Ireland. In the north, time sufficed only for a visit to the county of Cavan, but in that county, as in those which were visited in the south and west, large tracts of country were traversed, and detailed inspection made of farms and farm premises, and the several operations which precede the actual despatch of milk to the large creameries and of butter to the markets and factories. The processes of manufacture at creameries and butter factories, as well as at bacon and margarine factories, also engaged the attention of the committee at one and another place. In Dublin itself not only were the officials of the Government Departments interviewed, but the Committee had the privilege of repeated conferences with Sir Charles Cameron, the Health Officer for the City, and with his colleagues. The mass of information acquired as a result both of the visit paid to the Continent, especially to Denmark, and of the visit to Ireland, just concluded, will need collation and summarising, with a view to the presentation to the whole Committee of Reports on those results, which reports will need very careful consideration before the Committee proceed to draw up their report upon the evidence before them.

Howden October Cattle Fair took place on Tuesday. There was a pretty good attendance, but not a good show of cattle. Bullocks about two years old sold at £9 to £12 each. In-calvers were not numerous, neither were milk cows. The latter made £16 to £18 each. There was a fair show of horses, foals ranging from £10 to £15 each.

LITERARY NOTICES.

A copy of a wall calendar for October, 1900, to September, 1901, has come to hand from Messrs. W. S. White and Co., general merchants, of 515, High Street, Lincoln, who are most widely known for their fine wheat sharps, etc.

"Ideal Homes for the People" is the title of a small book by Mr. G. E. Clare, M.S.A., and Mr. W. G. Ross, A.R.I.B.A., who point out the difficulties met with in building for the working classes in rural districts, and give particulars of a new, substantial, but cheap form of construction which they maintain will be found to constitute a remedy. The authors first of all give a graphic description of the problem, then they devote a chapter to the remedy, which is succeeded by twenty-five plates, showing some recently executed examples of cottages, farm buildings, gentlemen's bungalows, and small country houses, etc. This work is worthy the attention of all land owners, farmers, and all employers of labour. It is nicely printed on art paper, and sold at 1s. net.

We have received from the Nitrate Association of Propaganda, Iquique, Chili, an album of views of the Chilian Nitrate works and ports. The views, which number close on sixty, are excellent, and give one a good idea of the extensiveness of the industry.

New Agricultural Patents.

Specially compiled for the MARK LANE EXPRESS by Mr. G. D. Howard (Hughes, Son, and Co.), Patent Agent, 38, Chancery Lane, London, W.C., of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

16,512.—Gilbert Harris, Cheddar, Somersetshire, for an invention of "The modern potato raiser."

16,544.—Friedrich Kuchelmeister and Leopold Nobis, London, for an invention of "An improved apparatus for roasting coffee malt and the like."

16,662.—Ferdinand Konig, London, for an invention of "Improvements in harness for cattle."

16,752.—John Scott, Glasgow, for an invention of "Improvements in the application of seeding, ridging, and planting apparatus to motor cultivators and other wheeled vehicles."

16,887.—Frederick St. Barbe Sladen, Coalbrookdale, Shropshire, for an invention of "Improvements in lawn mowers."

16,913.—John Sibley, London, for an invention of "An improved tine and point for cultivators and the like and an improved method of connecting same together."

Northallerton October Fair.—This fair was held on Wednesday. There was a small supply of grazing stock, while grazing sheep and lambs were not so numerous as in former years. Trade throughout ruled very slow, and not a great amount of business was done. Milk cows sold at £16 to £22; two-year-old bullocks, £12 to £14; yearling bullocks and heifers, £7 to £9; geld heifers, £11 to £12; geld cows, £10 to £11. A small number of grazing sheep and lambs, but a fair trade was done. Half-bred lambs, 18s. to 22s.; twice-crossed lambs, 26s. to 30s.

Retford Fair.—There was a very large show of horned stock at this fair on Tuesday, and also about 7,000 sheep were penned. Among these were a large number of shearling rams from the best Lincolnshire flockmasters, and the prices realised were satisfactory, some of the best making 8gs. to 10gs. per head. Lambs made 30s. to 36s., and ewes £2 to £2 10s., milch cows £18 to £24, two-year-old bullocks £13 to £16, and young beasts £8 to £10 per head. In the horse fair a few good heavy horses suitable for town work made £40 to £50 each. A few useful foals made from £20. Light horses suitable for cab work were eagerly sought after by London dealers, and made £28 to £30 per head. There was a large show of ponies, which made from £5 to £13. In the cheese fair Trent side dairy cheese sold at 70s. to 80s. per cwt.

Herts, Beds, and Bucks Valuers' Association.—The fiftieth annual meeting of this Association was held at the Trocadero Restaurant, London, on Friday week, when there was a large attendance of members. The prices of agricultural produce, etc., were discussed and recorded as usual. Being the jubilee of its existence, Mr. F. J. Brown, of Tring, read an interesting history of the Association, extracts from which it is proposed to publish. Before the introduction of the Agricultural Holdings Bill last year, the Association appointed a committee to draw up the amendments which in their opinion were necessary to the 1883 Act. The secretary now reported that all the important introductions and most of the minor ones are to be found in the Agricultural Holdings Amendment Act, 1900. The annual dinner followed, Mr. J. R. Eve, of Bedford, chairman of the Association, presiding. Many guests were present, amongst others being Mr. S. B. L. Druce (secretary to the Farmers' Club), Mr. Julian C. Rogers (secretary of the Surveyors' Institution), Professor F. J. Lloyd, and Mr. E. H. Godfrey (secretary of the Central Chamber of Agriculture). The membership of the Association now amounts to fifty-two.

DAIRY SHOW, OCT. 9th to 12th.

MOLASSINE

DAIRY SHOW, OCT. 9th to 12th.

FOOD FOR HORSES, CATTLE, SHEEP, PIGS. etc.

Replacing an equal quantity of Fodder.

A STAPLE FOOD AND CONDIMENT COMBINED. Patented in all the principal Countries in the World.

ANNUAL CONSUMPTION, 1,200,000 CWT.

Manufactured by Messrs. Henry Tate & Sons, Sugar Refineries, London and Liverpool, exclusively for the Molassine Company, Ltd.

Introduced into the Imperial and Royal Stables of **GERMANY** and **RUSSIA.** It is adopted throughout **THE GERMAN ARMY,** and during the few months it has been on the Market in the United Kingdom it has met with a **most favourable reception,** which is evidenced by the **many Repeat Orders** we are daily receiving, and assurances of its **permanent adoption.**

MOLASSINE contains 36 to 40 per cent. of **Sugar,** and is a combination of **Sugar, Treacle,** or **Syrup with Vegetable substances.** It is guaranteed to consist exclusively of natural organic materials.

RESULTS OF FEEDING WITH MOLASSINE.

IT STIMULATES APPETITE, IMPROVES DIGESTION. GRIPE AND DIARRHŒA COMPLETELY DISAPPEAR.

HORSES. From 2 to 4 lbs. per day.

CATTLE. 8 lbs. per day.
SHEEP. 1½ lbs. per day.

PIGS. Per 100 lbs. of their own weight, from 1 lb. to 1½ lbs.

MILCH COWS. 5 lbs. per day.

After a few weeks' feeding are in the **best condition,** and show **strength, highest working power,** and a **smooth** and **glossy coat.**

Thrive quickly, and especially in the last period of fattening, take willingly to their food, and thus **become weeks sooner ready for the market. The meat is of best quality.**

Eat Molassine greedily. The disagreeable smell of the Pig-Stye disappears, the **animals are in the best health.**

After 8 to 10 days' feeding give more milk, richer in cream.

MOLASSINE replaces an Equal Quantity of FODDER.

MOLASSINE packed in bags of 1½ cwt. each.

On rails, Sugar Works of Messrs. HENRY TATE and SONS, SILVERTOWN, ESSEX.

Price per ton, £6 15s. Price per cwt. £0 7s. 6d

For buyers of regular weekly or monthly supplies we shall be pleased to quote special prices.

WINTER STOCKS SHOULD BE ORDERED WITHOUT DELAY.

For samples and prices apply to The MOLASSINE COMPANY, Ltd, 36, Mark Lane, London, E.C.

First Class Representatives and Distributors throughout the United Kingdom wanted.

Price One Shilling.

(Post Free, 1s. 3d.)

VOL. LXXXIII. No. 3603. | LONDON, MONDAY, OCTOBER 15, 1900. THIRTY-TWO PAGES PRICE—3D.

SOCIETIES.

THE NATIONAL ASSOCIATION of ENGLISH HOP GROWERS.
(Founded June, 1894.)

PRESIDENT.—COLONEL BROOKFIELD, M.P.

HON. TREASURER.—E. ALBERT WHITE, ESQ., Beltring, Kent.

SECRETARY.—THOMAS IRONMONGER.

CENTRAL OFFICE.—61, HOP EXCHANGE, BOROUGH, LONDON.

GENERAL OBJECTS.

To promote united action among English hop growers as a body for the improvement of the industry.

To promote, support, or oppose such legislative and other measures as may affect the industry.

To collect and publish, for the benefit of members, special statistical and other useful information relating to English and foreign hop culture.

To arrange for arbitrations in cases of dispute between sellers and buyers of hops, for the avoidance of litigation.

ANNUAL SUBSCRIPTIONS.

Ordinary members, 3d. per acre of hops under cultivation; honorary members, £1 1s.; hop factors, £1 1s.

CENTRAL AND ASSOCIATED CHAMBERS OF AGRICULTURE.

NOTICE OF MEETING.

A MEETING of the COUNCIL of the CENTRAL AND ASSOCIATED CHAMBERS OF AGRICULTURE will be held (by permission of the Society of Arts) at the House of the Society of Arts, John Street, Adelphi, on Tuesday, November 6, 1900, at 11 o'clock in the forenoon.

Members of Council representing either the Central Chamber or Associated Chambers are requested to attend.

Subscribing Members of the Central Chamber are invited to be present, and may speak by permission of the Chairman, but are not entitled to move resolutions or to vote.

AGENDA.

To transact General Business.
To receive Communications.
To consider Alterations in the Laws and Bye-Laws proposed by the Business Committee.
To receive Reports of Committees (if any).
To receive "Statement of Legislation required in the Agricultural Interest," prepared by the Business and Parliamentary Committees in pursuance of Council's resolution of May 29th last.
To consider the following subjects:—
(1) The Report of the Royal Commission on Local Taxation (if issued).
(2) Agricultural Insurance.

Associated Chambers and Clubs are requested to consider the above subjects, and to send up any resolutions which they may pass thereupon to the Secretary of the Central Chamber before the Meeting of the Business Committee, at 8 p.m. on Monday, November 5th, 1900. Suggestions of subjects for discussion at future Meetings of the Council should be forwarded at the same time.

ERNEST H. GODFREY, Secretary.

Auction dates are fixed as may be required.

London office: 69, King William Street, E.C.
Country offices: Bromley, Kent; and at Beckenham

KENT.—TO BE LET, a FARM of about 250 acres, within eighteen miles of London, and between two stations on the London, Chatham, and Dover Railway and the South-Eastern Railway, at one of which is a siding for manure.

The Farm comprises about 170 acres of good fruit-growing land, about eighty acres of pasture land, and two acres of orchard, together with an excellent farmhouse in good repair, situated about the centre of the farm and adjoining a good road, and ample new farm buildings in good condition, including bullock lodges, stables, barns, wagon lodge, granary, and oasthouse, and also cottage accommodation and new fruit pickers' houses.

Water is laid on to the farm and farm stables, and a perfect water supply provided.

An offer to take a portion of the farm would be entertained.

For particulars, apply to Messrs. MEYNELL and PEMBERTON, 30, Old Queen-street, Storey's Gate, Westminster, London, S.W.; or to Mr. WELLARD, Eynsford, Kent.

FARMS, ESTATES, MILLS, BUSINESSES, ETC.

MESSRS. CRONK'S LIST of FARMS, containing particulars of numerous Farms in Kent, Surrey, Sussex, and elsewhere, to be obtained gratis at their offices, or will be sent by post on receipt of a stamp. Properties inserted free.—12, Pall Mall, London, S.W., & Sevenoaks, Kent.

TO LET, in the WINCHESTER NEIGHBOURHOOD, a FARM of 884 Acres, as follows:—

Grass	124	Acres.
Down	180	,,
Arable	442	,,
Woods	138	,,
	884	,,

There are two good sets of Buildings, and an excellent House. The Sporting, which is very good, could be Let with the Farm.—Apply, J. ARTHUR WALLINGTON, Esq., Basingstoke.

FOR SALE.

NORFOLK ESTATE, 700 ACRES, all let, good residence, pay over 4 per cent. net.

Farm and good residence, near sea, 250 acres let, pay 4½ per cent. net.

Farm and good residence, near river, 100 acres.

Three cottages, with 1½ acre, near Norwich, adjoining river and main road, producing £18 10s. per annum. Price £280.

Block of freehold cottages, producing £130 per annum in Norwich. Price £1,800.

Brickyard, near rising and populous seaside town, 13 acres freehold land, best brick earth. All plant, machinery, etc., in working order. Price, immediate, £4,500.

Apply, W. HILL FORSTER, Auctioneer, Norwich, Norfolk.

UPPER THAMES STREET (Dowgate).—Capital WHARF, possessing a frontage of 42ft. to the Thames, and occupying an area of upwards of 5,000 superficial feet, capital warehouse of three floors, fitted with cranes and loophole doors, also a building of three floors and basement, suitable for offices or foreman's dwelling; rent of the whole £600 per annum.—Apply to Messrs. FARE BROTHER, ELLIS, and CO., 29, Fleet-street, Temple Bar, E.C.

TO be SOLD, at once, as a going concern (owing to sudden death of late proprietor), a flourishing BUSINESS in Hay, Straw, Corn, Seeds, Milling, Coal, Cake, Artificial Manures, etc. Good machinery, modern buildings, stabling, etc., adjoining G.W.R. Station. Unique business position. Fullest investigation invited. Moderate incoming.—Apply by letter, in first instance, to the representatives of late E. and J. HOLBROOK, Bramley, Basingstoke.

SEEDS, PLANTS, ETC.

200,000 AUTUMN SOWN CABBAGE PLANTS, Fidler's Early Eclipse, the earliest and best spring cabbage in cultivation, 3s. 1,000; Wheeler's Imperial and Early Offenham, 2s. 6d; spring sown Scotch Kale and Sprouting Broccoli, 3s.; white spring Broccoli, 4s.—W. HORNE and SONS, Cliffe, Rochester, Kent.

SEED POTATOES.—Early, mid-season, and main crop varieties: Challenge, Conquest, British Queen, and Up-to-Date. All of excellent quality and shape, and exceptionally heavy croppers, grown specially for seed from select stocks. Special quotation for autumn delivery. Illustrated descriptive catalogue and prices on application to "Manager," Earl of Rosebery's Home Farm, Dalmeny Park, Edinburgh.

SEED WHEAT. Standard red and Square-head. Heavy cropping varieties of fine quality, grown specially for seed from select stocks. Prices moderate. Samples, with illustrated descriptive catalogue of seed grain, on application to "Manager," Earl of Rosebery's Home Farm, Dalmeny Park, Edinburgh.

CABBAGE PLANTS! CABBAGE PLANTS!—Autumn-sown, Enfield Market, Early Rainham, Wheeler's Imperial, Red Pickling, Early and Late Drumhead, White and Brown Cos Lettuce.—T. Davies, Tangley, Guildford.

SEED WHEAT.—Scholey's Square Head, from thin sand, 32s. per 496 lbs.; 5 qr. lots, 30s. Cash with order.—WYATT PAUL, Manor Farm, Bradford Abbas, Sherborne, Dorset.

EXCELSIOR WHEAT. Selected expressly for Seed for the last 5 years, is very prolific, has produced sixty-four bushels of grain and 3 tons of straw per acre with ordinary cultivation. Grain of Superior Milling quality; straw strong, clean and almost impossible to become lost. It is still the most profitable and hardy wheat to grow on all soils. Price 42s. per quarter, 36 stones nett, sacks included; on Rail for cash with order. Used for Growers' Records passing above to THOS. CHETTLE, The Manor Farm, Reading.

SEED WHEAT.—Square heads, Master, grown on Marsh wharp land; 38s. per qr. of 36 st., on rail. Cash with order.—H. A. KILHAM, Tydd Wisbech

RAILWAY ANNOUNCEMENT.

LONDON & NORTH-WESTERN RAILWAY.

KENNEL CLUB'S "CENTURY" DOG SHOW,

TO BE HELD AT THE CRYSTAL PALACE, OCTOBER 16 to 18, 1900.

For the convenience of Exhibitors at the above Show, the London and North-Western Railway Company have made arrangements for Through Vans for the conveyance of Dogs, to be run to the Crystal Palace on Monday, October 15, by the trains leaving—

Carlisle	at	8.30 a.m.
Liverpool (Lime Street)	„	12. 0 noon.
Manchester (London Road)	„	12. 0 „
Shrewsbury	„	12.35 „
Wolverhampton	„	1.35 p.m.
Birmingham (New Street)	„	2.10 „
Northampton (Castle)	„	3.37 „

These will be in addition to the Vans running regularly on the Through Trains to London.

Consignments from the Branch Lines, and from Nottingham, Peterboro', Oxford, Cambridge, etc., will be placed in these Vans at the various Junctions, thus ensuring direct transit to the Crystal Palace.

Rates for the conveyance of Dogs, which in no case exceed those charged by any other route, can be obtained at the various Stations on the Line.

Arrangements will also be made for the return of the Traffic in Through Vans at the close of the Show, and Exhibitors wishing to avail themselves of these facilities are requested to order their consignments "Per London and North-Western Railway."

Exhibitors are requested to be careful to write their names and addresses distinctly on the backs of the direction labels issued by the Show Committee.

The Company's representatives will be at the Show to answer enquiries with regard to the arrangements for the return journey. All information can be obtained of MR. ROBERT TURNBULL, Superintendent of the Line, Euston Station, London; the Company's District Superintendent, MR J. GROOM, Euston Station, London; or MR. R. F. CASTLEMAN, Broad Street Station, E.C.

FRED. HARRISON, General Manager.

HALL'S SANITARY WASHABLE DISTEMPER

(PATENTED)

A NEW SANITARY WATER PAINT,

HAS GREAT ADVANTAGES,

SOME OF WHICH ARE AS FOLLOWS:—

It sets hard, Kills Vermin, and Disinfects.

It is washable in 3 weeks, does not scale, and can be Painted or Varnished. Made in two qualities, for inside and outside work.

It is made in Dark Rich Shades as well as in Light Tints, contains no Lead, and does not Turn Black.

It only requires the addition of Water to make it ready for use, so that anybody can apply it.

It is Cheaper, Cleaner, Healthier, and more Artistic than Wall Paper.

It makes an excellent Shading for Greenhouses, the inside quality lasting about 9 months, the outside quality several years

D. CLARKE'S Carbolized

WHEAT PROTECTOR.

WHEAT

WHEAT

BEST AND CHEAPEST DRESSING FOR SEEDS.

In use in England for OVER FIFTY YEARS, and is now being used extensively in the Colonies of Australia, New Zealand, and Central Africa.

A 9d. PACKET DRESSES 8 BUSHELS OF SEED.

This specific takes the place of Bluestone, and by its use the Seed is strongly carbolized and is protected both by the smell and taste from being eaten by birds and other pests. The seed also germinates quicker by its use.

Numerous Testimonials have been received, testifying that the "PROTECTOR"

Prevents Smut in Wheat, Oats, and Barley.

Prevents Destruction of Seed by Birds or Worms.

Seed germinates a fortnight earlier.

Saves a quarter bushel of Seed per acre.

HAVE YOU TRIED THE
"VESTA" Milk Meal for CALVES?

Read what others say:

Mr GEORGE BROWN, of Eastham, Cheshire, a noted Feeder and Rearer of Calves, says:—"Your Calf Meal is undoubtedly the best I have ever used. Having reared some hundreds I think I can speak with some authority."

Mr. THOS. LEDSON, of Bromboro', writes:—"Your Calf Meal is excellent. My Calves have always done well on it."

☞ GIVE IT A TRIAL.
Price 12/6 per cwt. delivered.

For Particulars, Prices, Samples, etc., apply to
The Liverpool "Vesta" Cake Co.,
14, BLACKSTOCK ST., LIVERPOOL.

SILCOCK'S CALF REARING.

CALF MEAL

To rear Calves economically and profitably use SILCOCK'S SOLUBLE CALF MEAL. Thousands of Calves are reared on it annually; it is a true milk substitute, is very easily digested, dissolves at once in water, gives least trouble in preparing, does not scour, is very economical in use, as one pint makes one gallon of thick gruel, and it fits early for cake feeding. It contains about 80 per cent. of soluble feeding digestible ingredients, while in milk, butter-milk, and whey the figures stand at 12½, 9, and 6 per cent. respectively. With the minimum of cost and trouble SILCOCK'S CALF MEAL gives the maximum results. Use SILCOCK'S SOLUBLE CALF MEAL, feed regularly, in right quantity and at correct temperature and you will have little trouble in rearing paying calves.

Price, 12/6 per cwt., carriage paid 5 cwt. lots, 12/-.

WARRINGTON.

BIBBY'S "CREAM EQUIVALENT" for CALVES.

An Ounce of Fact is worth a Ton Theory.

A STRIKING FACT.

In our Spring number of "Bibby's Quarterly" we reproduced the photographs of two groups of Calves which are now being reared at the Hornby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.

One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."

We asked our readers to tell us which of these groups were fed on New Milk, and 1t Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the "Cream Equivalent" fed Calves as having been fed on New Milk.

We think the above striking FACT speaks volumes for "Cream Equivalent."

The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.

SOLE MANUFACTURERS:—

J. BIBBY & SONS,
Exchange Chambers, Liverpool.

HUSK OR HOOSE

IN HEIFERS, CALVES & SHEEP

SHEEP AND TAR.

The annual meeting of the Black-faced Sheep Breeders' Association was held last week at Castleton. This society is an extremely useful one, although it bears such an ambiguous title—for, owing to the way in which the title is framed, it is not at all clear whether it is the breeders or the sheep to which the adjective applies. The point, however, which was raised at the meeting is not affected, whether the breeders have black faces or whether it is their stock that possess this distinction. This point was as to the use of tar and other similar materials for the marking of sheep. In the old days the farmer believed in the truth of the proverb "don't lose your sheep for a ha'porth of tar"—a proverb which, by the way, is often misquoted, and made to refer to ships instead of sheep. In those days such a precaution may have been necessary, for then fences were few and far between, and almost all sheep were reared upon vast ranges of unenclosed land. It appears that the tar branding iron was the only method which had then presented itself to the sheep-owner, although later on some genius or other hit upon the idea of nicking the ears in some particular fashion. The chief difficulty of adopting this method seems to have been that of finding a sufficiently large number of easily distinguishable marks. The use of tar has certainly decreased the value of the wool, and that in two ways. In the first place, it meant a certain amount of loss, which, although small in proportion to each fleece, might mean a considerable weight in a large clip; and, in the second place, if any of the tar happened to be overlooked in the process of sorting, it might stain a considerable portion of wool in the course of the washing process, and so either depreciate the colour or cause extra trouble and expense in bringing it up to the mark again. The question has been raised more than once by wool merchants and manufacturers, and with but small success.

Now that the Association has taken the matter up, we may expect some better results. At the meeting referred to a resolution was adopted which runs: "That it would be an advantage to sheep-breeders if the Government would take steps to prevent deleterious dips from being placed on the market, and that the use of tar was to be deprecated." The use of tar does not only mean the marking of sheep as above referred to, but also to its use in sheep dips. There is little doubt that this compound and other kindred substances, such as pitch oil, have been frequently used in some kinds of dips, and some farmers have gone to the length of using a crude mixture of common tar and rancid butter, under the belief that it was the best thing possible for killing parasites and keeping out the cold. This mistaken idea has undoubtedly been responsible for the injuring of much wool, and must have consequently assisted materially in the reduction of prices. The substances referred to by no means exhaust the list of materials which may prove injurious when taking a place in the composition of sheep dips, for many have been found which have caused more or less serious injury, not only to the fleece, but also to the skin. As the law stands at present, the sheep farmer is pretty much at the mercy of the manufacturer, for it would be impossible to insist upon a chemical analysis in every case before purchasing. Probably the proper course would be to require such matters to be put upon the same footing as fertilisers and feeding-stuffs, and to require the county council officials to deal with the matter in the same manner. The Board of Agriculture might well give some attention to the question.

SAMPLES.

By a Man of Mark Lane.

The wheat yield of New South Wales promises well, and if the weather continues favourable will probably exceed that of last year. A record year for grain traffic is expected on the railways. I also hear that the wool received from the country, so far, shows a considerable increase on the corresponding period of the previous season.

In the New South Wales Legislative Assembly on Wednesday was read for the first time an Old Age Pensions Bill, which provides for the grant, after continuous residence for twenty-five years in the Colony, of an annual allowance of £35 to married couples and of £20 to single individuals. The Act will be administered by a board under certain restrictions.

I hear that Lord Carrington, whose interest in the provision of allotments is so well-known in Buckinghamshire and Lincolnshire, has just offered, in response to a demand for land for allotment holdings at Aylesbury, thirty-seven acres to the Urban District Council of that

town, at the same rent at which the ground is at present let.

According to the returns published by the Italian Minister of Agriculture the quantity of corn produced in Italy during the present year is estimated to be 42,200,000 hectolitres, or 6,400,000 hectolitres less than last year.

The receipts on account of revenue from April 1st, 1900, when there was a balance of £3,517,047, to October 6th, were £51,342,811, as against £51,010,580 in the corresponding period of the preceding financial year, which commenced with a balance of £8,919,173. The net expenditure was £93,688,973, as against £58,296,179 to the corresponding date in the previous year. The Treasury balances on October 6th, 1900, amounted to £1,307,684, and at the corresponding date of 1889 to £2,599,294.

Viscount Fujianmi, Master of the Horse to the Emperor of Japan, is travelling through Europe for the purpose of purchasing horses and cattle for his Imperial master. He has already visited France, and gone through Scotland and various parts of England, making extensive purchases. On Saturday the Viscount left for Russia, whence he returns to Japan.

AGRICULTURAL POLITICS.

By a Lobbyist.

One of the most interesting facts in connection with the later part of the General Election is the return of Mr. Spear for the Tavistock division of Devonshire. Mr. Spear has been described as a Unionist edition of Mr. George Lambert. He is a landlord—not by any means a rich one—who farms his own land, and farms it intelligently. He has an excellent conception of agricultural necessities, and he has revealed this conception in a series of pregnant speeches. He goes to Westminster with a decided programme. For instance, he believes in the Rating Act, and will demand its renewal. He regards the Agricultural Holdings Act Amendment Act as a wise measure, which can, however, be amended in one or two particulars. He has strong views in regard to local taxation, and will, if he can, carry into practical legislative effect what are expected to be the recommendations of the Royal Commissioners. Mr. Spear is the kind of man the farmers ought to return to the House of Commons—a practical farmer, with sensible ideals and a common-sense sympathy.

It is an excellent thing—I would I could regard it as a portent—that Mr. Spear should have been returned by the farmers themselves. It was they who were his sponsors and supporters—they who were the officers in his army of sympathisers. This I regard as being due to the fact that Tavistock is in close proximity to Callington, the centre in which the now famous Callington Platform is ever and anon revised.

The Callington Platform is thus of more value than ever I anticipated it could be. It is something more than a platonic assertion. It first of all induces politicians to accept its planks; and, next, it induces farmers to the duty of wise-selfishness—to, in a word, work for those politicians as though it were a matter of personal honour. If this were done in every county—if we had a contagious Callington Platform in every shire—then we should find the House of Commons giving heed to the necessities of agriculture in something other than the present discursive and irrelevant spirit.

I am, however, more strongly impressed than even I was last week by the comparative unimpressionability of the rural electors to the khaki-cry. They must, of course, have in a measure been infected by the furious wave of patriotism that has swept over the country. But they have not been carried off their feet by it. They have still retained their mental balance. This explains why it is that the questions like old-age pensions, the housing of the working population, and the desirability of enlarging the facilities for securing small holdings have figured prominently in the rival orations of the shires.

This explains, too, why it is that the Radical orators have been even more persistent than of yore in alluding to the workhouse as "that hideous Bastille of our incomplete civilisation." They have done this in obedience to their comprehension of the fact that the electors require it and desire it. The rural candidates have in many cases whitewashed, or, as the case may be, denounced Mr. Kruger only in the most perfunctory and methodical manner. The fires of their oratory have been withheld until they have come to deal with what I may describe as the labourers' bread-and-butter politics.

In no county have I been impressed with this fact in the course of my electoral peregrinations so much as in Norfolk. There the Radical candidates disregarded the khaki-fever as though it were non-existent, or, if they dealt with it at all, only did it in order that they might denounce the tragic maladministration of the war. Outside their formal addresses they confined their attention entirely to the labourer and his needs. Indeed, a local Small Holdings Association—whose purpose is to enable the labourer to purchase small holdings by easy instalments, but which had possessed little vitality until the election—suddenly assumed the most significant economic importance, and was made the excuse for painting pleasant pictures of the county, radiant with a small army of peasant proprietors.

What was the result of this policy? Why, that the Radical candidate in each instance seriously improved his electoral position. Of course, I am not advising that the farmers should adopt this policy of disregarding all Imperial issues and selfishly excluding themselves from every movement that should make us great. There is an old Persian proverb which tells us that the snail thinks his shell the world. I would a little of this conceit possessed the farmer. But now that the labourers are demanding a sympathetic heed to their weal we may hope that the farmers will at last not be indifferent to their own interest.

One of the men whom every farmer should hope to see in the House of Commons—I regret that I should be compelled to write my article ere the result of his fight in the Saffron Walden division can be known—is Mr. Wing Gray. He is a second Mr. Spear. When he sat in the House for the Maldon division he revealed a splendidly practical sympathy with the agricultural interest. No man that I know brought so clear a head to the discussion of agrarian problems. He was fortunate certainly in securing the ear of the House. However, he was thus fortunate because the politicians perceived that he was a common-sense man with a common-sense purpose. Usually your mission-possessed man is a sore-toned, dour-eyed individual from whom you instinctively recoil. Mr. Gray attracted attention by the fact that his purpose did not sour his temperament.

Could not, however, the Tory organisers have found him a constituency even in his own loved Essex, where the electoral fates were not so unsmiling as in Saffron Walden? In 1895 the Radicals had a majority of 425; in 1892 it was 1,181; in 1886, 740; and in 1885, 1,749. It may be that Mr. Wing Gray preferred a sturdy fight. There are, we know, some men who are never so happy as when badly handicapped in a contest. Still, Mr. Gray deserved a better fate than to be sent into a fight in which, if electoral indications go for anything, he could only woo defeat.

Herein lies one of my grievances against the Conservative organisers. The Tories are under a debt of overwhelming gratitude to the farmers. How have they requited it? How many Spears and Wing Grays have they sent into the electoral field? How many Spears have they offered the prospect of a winnable seat? Of course, the reply may be that all the Spears and Grays in Toryism do not possess the financial capacity to fight a seat. This is no doubt true.

What is equally true is that official Conservatism is ever ready to lend financial aid to candidates who are wise enough to secure its good opinion. It is perfectly well known in political circles that over a score of Tory candidates have received considerable assistance. I could myself name a dozen. There is no abasement in receiving this help. You are fighting a fight for patriotism's sake, and the patriot needs money for his purpose just as much as does the traitor. When, however, has official Toryism held its opened purse to farmer candidates? It will help military men by the dozen, and they have no diffidence in receiving this help. Why should they not extend it to farmers, and why should the farmers exhibit diffidence?

I am thankful Mr. Spear has been returned. He certainly did not receive, or seek, or want financial help. He had, however, official countenance. This same countenance might well have been extended to a score of such men as he.

PRACTICE WITH SCIENCE.

Beet Hay.

In an article entitled "Fostering Competition by Food Exports," the *Breeders' Gazette* of Chicago says:—"As the years go by it grows more and more astounding that American meat-makers should permit so many thousands of tons of flesh-forming materials either to go to waste completely or in handy shape for shipment to some other country to enable its farmers to make competition for them in the world's markets. The British farmer annually fattens his beeves with American cotton-cake and oil-cake, while the Continental farmer makes meat of many substances not familiarly in use in Albion. The last item of the United States' export commerce to excite remark in this immediate connection is 'beet hay.' It is well known that the pulp of the sugar beet, after it has been treated so as to remove the bulk of the saccharine matter, makes very satisfactory feed for both sheep and cattle, even for hogs, and with the very limited amount of this product for disposal in the country one would think, in view of the extremely profitable returns obtained from feeding it, that it would all be quickly snapped up at the very reasonable prices asked for it. This, unfortunately, is not the case, but the German farmer is not blind to his opportunity. The pulp as it comes from the machinery of the sugar refinery cannot be shipped long distances on account of the amount of water it contains, so a system of driers has been patented, and now the dried pulp is labelled "beet hay," baled and sent to Germany. The beet sugar refinery at Binghamton, N.Y., is the first to have one of these driers and to put in operation the process that retains the nutritious elements with the fibrous product. An ample market in Germany has been found for all the 'hay' this refinery can furnish, and at the most remunerative prices. A ton of ordinarily good hay sells in Germany for about £4; for the best 'beet hay' £5 can readily be obtained. All this sounds extraordinary, but what sounds still more so is that the same pulp before drying, and of course relatively containing more nourishment, is sold by the same refinery for a shilling a ton. It may not be possible always to take the pulp to the stock, but it is possible to take the stock to the pulp."

Destructive Farm Fire.—Earl on Monday last a serious fire occurred on the farm of Mr. J. Evison, at Ramsey, Hunts, the whole produce of the harvest being burned. Twelve stacks of corn, large quantities of roots, all the farm implements, including a complete set of threshing tackle, together with the whole of the buildings, were destroyed. The Ramsey Fire Brigade, with a steam engine, were quickly at work, but were only able to save the live stock and an adjoining cottage. The cause of the outbreak is unknown.

The Excelsior Wheat.—This is an improved and selected type of square head wheat produced and sold by Mr. T. Chettle, of the Manor Farm, Reading. It is claimed for it that it is the heaviest cropping (eight quarters per acre, Imperial), combined with the best quality grain and the strongest and best storm-resisting straw of any variety grown. Judging from the numerous testimonials Mr. Chettle has received, a few of which are given in a circular issued by him, his claims are by no means imaginary ones. The Excelsior is not a sport, or even a so-called new variety of wheat, but it is an improvement on an old favourite made by careful selections during the past nineteen years. Mr. Chettle states that for three years in succession one of the largest seed firms bought all he grew on an eleven hundred acres farm, and in 1887 they bought 1,700 bushels to sell again at double the price he is now charging. The seed he is offering this year was hand-picked before reaping, and the whole was cut by self-binders. We should advise those who [illegible] to purchase seed wheat to obtain a copy of Mr. Chettle's circular, for it is a well known saying that "a change of seed always pays."

THE DAIRY.

National Diploma in Dairying.

At a meeting of the National Agricultural Examination Board held on Thursday, October 11th, at 13, Hanover Square, Lord Moreton in the chair, it was announced that the following candidates had been successful in the examinations for the National Diploma in Dairying, held recently at Reading and Kilmarnock:—

AT READING.

Ernest Christopher Brown, Midland Dairy Institute, Kingston Fields, Derby.
Ella Evans, Tyn-y-Coed, Sarn, Pwllheli, N. Wales.
Edith Morton Jackson, Erw Wen, Llangollen, N. Wales.
Margaret Robertson McDuff, British Dairy Institute, Reading.
John Percival, Harper Fold Farm, Radcliffe, near Manchester.
Charles Donald Stewart, Yarrow Bridge, Duxbury, Chorley.

AT KILMARNOCK.

Jane Barbour, Redwells, Cardenden, Fifeshire.
John Donald, Burrowin, Bogside, Stirling.
Agnes Kinross, Wester Balbeggie, Kirkcaldy.
Jemima A. Veitch, Backshot, Forth, Lanarkshire.
Philippa Wilkinson, Needingworth, St. Ives, Hunts.

Each of these competitors will therefore receive the National Diploma in the Science and Practice of Dairying. It was decided by the Board to hold similar examinations in the autumn of next year (1901), under practically the same regulations at the two centres of Reading and Kilmarnock.

Macclesfield Cheese Fair.

The annual prize cheese fair at Macclesfield was held in the Drill Hall on Monday, when there were twenty-four pitches of excellent quality, though in some cases it was rather over-ripe through the heat in September. The judges were Mr. J. Hancock, of Manchester, and Alderman Thomas, J.P., of Crewe. The highest price realised was 75s. per cwt., which was paid for the first-prize lot, exhibited by Mr. C. E. Thornycroft, of Thornycroft Hall. For the other lots there was a fair trade at prices ranging from 55s. to 67s. per cwt. The awards were:—Twenty cheeses over 50lb. each: 1, C. E. Thornycroft, Thornycroft Hall; 2, Wm. Thompstone, Henshall Hall, Siddington; 3, James Hague, Walker's Heath, Gawsworth; 4, Nathan Thompstone, Northwood, Siddington. Twenty cheeses under 50lb. each: 1, John Worth, Sand Bank, Siddington; 2, P. Ford, Tan House Farm, Eaton; 3, James Davenport, Lower Gresley, Wincle; 4, Mrs. Lomas, Mill End, Gawsworth. Best three half-pounds of butter: 1, C. E. Thornycroft; 2, Miss Dora Brocklehurst, Marton; 3, Miss A. Cooke, Pott Shrigley.

Leicester October Cheese Fair.

There was a good average pitch of both flat Leicestershire and Stilton cheese at the October Cheese Fair at Leicester on Thursday, and there was a moderate attendance of buyers. The season, as a whole, had proved very favourable for cheesemaking, and the flat cheese came to hand in good, ripe, buttery condition. The demand was not keen, only the best dairies being sought after. Choice flat cheese made 85s. to 90s. per cwt.; secondary qualities a dull trade at 68s. to 70s., and inferior quite neglected at 60s. to 65s. Stilton cheese were plentiful, but a considerable proportion was lacking in ripeness and flavour, and trade ruled slow. Choice prime dairies were in brisk demand at 9d. to 10d.; secondary qualities, 7½d. to 8½d.; and inferior lots, 6d. to 7d. per lb. A good many lots were left unsold.

Impure Dutch Butter.

In the City of London Court on Thursday, an action was brought by Messrs. Ellers and Co., merchants, Water Lane, E.C., against Van Upen and Co., merchants, Water Lane, E.C., to recover £50 as damages for selling impure butter. It appeared that in June last the defendants imported to this country a parcel of Dutch butter valued at about £1,000, and they offered it to the plaintiffs in the ordinary course of business. The defendants bought it and sold it again at a profit. Then they found out that it was adulterated with 10 per cent. of margarine, and they lost their profit. It was suggested that the butter which was imported to this country was frequently so skilfully adulterated that even the public analysts had a difficulty in detecting impurities.

Defendants asserted that the butter was perfectly pure, although it was of a low class. The case had been adjourned and ten samples drawn from the bulk for examination under the Court's orders. Of these four were pure, four were considerably suspicious, and two were clearly adulterated.

The jury found for the plaintiffs for the full amount claimed, but they said they did not think the defendants knew the butter was adulterated. At the same time they thought that the English public ought to be protected from Dutch adulterations, and the Deputy Judge (Mr. Pitt-Lewis, Q.C.), in concurring, said that no one cared to eat margarine thinking it was butter. He regarded the case as one of great public importance, and he certified for costs on the higher scale.

FARM.

Memoranda on Manures.*

Since this publication is intended for circulation among our farmers, it has been thought advisable to take advantage of its issue by reprinting some of the notes which have appeared in former bulletins, and adding a few additional particulars from works which have recently appeared regarding the application of natural manures and artificial fertilisers.

It is nearly fifty years since Stoeckhardt, at that time professor in the agricultural school of Tharandt, Saxony, said that a farmer who bought guano, bonemeal, or other artificial fertilisers, and at the same time neglected to make proper use of the dung of the cattle on his own farm, must be regarded as an agricultural spendthrift. Every intelligent farmer in Canada will in these modern days agree with the old German professor, and maintain that the treasury of the farm is the dungstead, and that leaks and emanations from it of valuable fertilising constituents must lead to financial embarrassment and possibly ruin.

This statement may be positively made without in the slightest degree detracting from the merits of artificial fertilisers, for, when properly selected and applied, their value becomes abundantly evident. The question as to whether their use is remunerative has been frequently discussed, and depends to a large extent on the care employed in their selection. Supposing that the intelligent farmer has considered composition, cost, etc., to the best of his ability, made his selection, and applied the fertiliser, he may still be in doubt as regards the result, unless he takes steps to make a manure trial with it. As regards the best way of doing this, Hellriegal† has related his experience. He recognises how difficult it is for practical agriculturists, fully occupied with their regular work, and engaged in meeting all the difficulties caused by workmen, weather and market rates, to carry out regularly planned manure experiments. He therefore describes a method which experience in his estimation had justified, and recommends it for the purpose of ascertaining whether any application of lime, marl, dung, or fertilisers had really produced the improvement which, from the point of view of cost, had been expected. This plan is to pass over, at one or several places, properly selected, a few square rods of the field without applying the dung or fertiliser. In this way unmanured plots, which do not require to be measured with great exactitude, but merely paced, and do not need to be harvested separately, are left in the manured field, by means of which any improvement in the latter may be remarked and valued.

This plan exacts that it should be possible to *see* a distinct difference between the unmanured plots and the manured field, not only as regards the height and density of the resulting crop, but also in reference to the fulness of the ears and the development of the grains. In the event of such a distinct difference being invisible, the manure is justly discredited as unfit for its intended purpose. It would seem advisable to recommend this plan to farmers who use fertilisers, because some of them may manure the whole field, fail to see any improvement on account of being unable to make comparisons, and perhaps condemn the fertiliser unjustly. The simplicity of the plan above described, and its applicability everywhere and every year, would appear to commend it to the practical agriculturist. At the same time it is necessary to remark that there are instances on record of fertilisers having been applied and remaining utterly without effect owing to some defect in the soil. Such defects have often been cured by a previous application of marl or lime, which not only produced good effects themselves, but improved also the action of the fertilisers afterwards applied.

The Care of Nitrogen.

This element is the most valuable of fertilising constituents, and one which is exceedingly liable to loss.

In many of the fertilisers described in this and former reports their cost is very much increased by the admixture of nitrogenous constituents. This cost farmers might save by properly caring for the stock of nitrogen on their farms, and this stock might even be increased by cultivating those crops which have the power of appropriating the nitrogen of the atmosphere. Nevertheless the fertiliser manufacturers still seem to be under the necessity of supplying this element in considerable quantity in their goods, and of charging for it. In the case of the mixed fertilisers, this extra charge varies from 8dols. to 14dols. per ton, which the farmer must pay if he purchases, and which he can readily save in his own stables, or produce upon his own farm. Nearly the whole of the nitrogen in the fodder fed to farm stock is to be found in the excreta of the animals, and one-half of it is contained in the urine. It is further well known that 95 per cent. of the potash contained in the food of cattle and sheep may be recovered by carefully saving the liquid manure only. It has, moreover, been ascertained that stable-yard manure experiences considerable loss of its fertilising constituents, but more especially of nitrogen, when left to itself in the dung heap. According to the experiments of Wolff, this loss amounts to 55 per cent. of the nitrogen contained in fresh manure from horned cattle. The later experiments of Heiden and Holdefleiss place it at 23.4 per cent. These results were obtained when ordinary reasonable care is taken of the manure, but give no data for estimating the loss which occurs when, as is very frequently the case in Canada, the manure is treated with the grossest neglect. It is safe to assume that, generally, 50 per cent. of the nitrogen contained in the barn-yard manure of this country returns unutilised to the atmosphere, or is otherwise lost by careless treatment. Supposing that an average quantity of 36,000lbs. is produced in fresh condition annually by each animal, and that it contains 0.4 per cent. of nitrogen, it follows that a loss of 72lbs. of nitrogen, worth 8.64dols., takes place for each head of cattle. This loss can be prevented by daily strewing the stables with 2lbs. of ground plaster for each animal, which at once prevents any smell of ammonia from arising in the stable. The quantity prescribed means 700lbs., or a cost of about 2.50dols. annually for each 1,000lbs. live weight, but, by adopting this plan, the farmer would to a great extent be relieved from the necessity of purchasing the nitrogen of artificial fertilisers.

In a pamphlet published by Vieweg in 1859, entitled "Ein Pfund Stickstoff kaum einen Groschen," which may be freely translated, "A pound of nitrogen for a penny," Dr. Meyer-Altenberg maintained that ground gypsum is the very best preservative of barn-yard manure when applied in the stable, because it secured "certainty and completeness of effect, ease of execution, and the lowest possible cost." He further described the effect of its application on the domain of Beberbeck in Hesse, and other impoverished farms, showing that it is possible to bring such into a fertile condition, without the purchase of manure or fertilisers or feeding stuffs, excepting a little straw for bedding and oats for the horses.

Treatment of Stable-yard Manure.

Dr. Meyer-Altenberg, in the little work above mentioned, takes care to point out that the use of gypsum, without subsequent careful treatment of the dungheaps, does not give the desired effect, and he dwells on the importance of having the manure thoroughly trodden down, and made as compact as possible. This is also shown in Dr. J. König's prize essay, "How can the farmer preserve and increase the stock of nitrogen on his property?" (Berlin, 1887.) In a special chapter of this work the author discusses "The evolution of free nitrogen during the fermentation and storage of stable manure," describes the experiments which were made from 1860 to 1885 regarding its treatment and gives finally the results of the discussion from which the following sentences may be translated with advantage:—

1. In the decomposition of nitrogenous substances of every nature a loss, more or less considerable, of free nitrogen takes place.

2. This loss is the greater the more the atmosphere has access to the decomposing mass.

3. Too much moisture is just as hurtful as too little. Stable manure requires such a degree of humidity as permits its components to lie close to each other.

4. The addition of substances which fix ammonia (such as gypsum, kainite, and kieserite) prevent or reduce the loss of nitrogen. These substances are, however, of little or no value if care is not taken at the same time to prevent as much as possible the access of air.

12. In storing stable manure in dungsteads the latter must be watertight and roofed in, and the treading down of their contents by the farm animals is to be recommended.

One thing in connection with this question is perfectly certain, and that is that the use of gypsum, or ordinary ground land plaster, prevents any loss of nitrogen in the stable, and while the manure is being forwarded to the dungheap. Further, if the work from which the foregoing quotations have been made be carefully studied, and also the experiments and writings of Holdefleiss, Vogel and others, it appears to be quite certain that the use of the same article, or of the gypsum produced in the manufacture of "acid-phosphate," completely prevents the loss of ammonia from the liquid part of the manure, and also from the organic nitrogen of the solids, provided the whole has, previous to fermentation, been made thoroughly compact, and atmospheric air almost completely excluded. Where it is found impossible to attend to the latter precautions, the safest way will probably be found to lie in avoiding fermentation altogether, by conveying the fresh manure, after treatment with gypsum, on to the field to be manured and bringing it under the soil as rapidly as possible. The latter practice has been proved to be most advantageous by the experiments which have been carried on for some time past, at the Central Experimental Farm by Director Saunders. (See Reports for 1898.)

Not only has the addition of substances which have the faculty of fixing ammonia been recom-

* Fertilisers, 1900. Bulletin No. 70. Laboratory of the Inland Revenue Department, Ottawa, Canada.

† Dungungsversuch und Vegetationsversuch; Berlin, 1897.

mended for stable manure, but its improvement to a greater extent has been proposed by the addition of fertilisers. The following quotation is taken from Bulletin No. 45 (for March, 1897) of the Massachusetts Agricultural College, and was written by Dr. C. A. Goessmann, chemist for that institution:

"*The practice of adding to the manurial refuse materials of the farm, as stable manure, vegetable compost, etc., such single commercial manurial substances as will enrich them in the direction desirable for any particular crop to be raised, does not yet receive that degree of general attention which it deserves.*" (The italics are in the original.) An addition of potash in the form of muriate or sulphate of potash, or of phosphoric acid in the form of fine ground South Carolina or Florida soft phosphate, etc., will in many instances not only improve their general fitness as complete manure, but quite frequently permit a material reduction in the amount of barn-yard manure ordinarily considered sufficient to secure satisfactory results.

"Average composition of seventy-five samples of barn-yard manure:—

	Per cent.	Lbs. per ton.
Moisture	67·00	1,340·0
Nitrogen	0·52	10·4
Potassium oxide	0·56	11·2
Phosphoric acid	0·39	7·8

"The average barn-yard manure contains, it will be noticed from the above statement, a larger percentage of nitrogen, as compared with its potash and phosphoric acid, than is generally considered economical. An addition of from thirty to forty pounds of muriate of potash, and of one hundred pounds of fine ground natural phosphate (soft Florida or South Carolina floats) per ton of barn-yard manure would greatly increase its value as an efficient and economical general fertiliser."

These are no doubt most excellent suggestions, and there is no reason why these substances should not be introduced into the stable manure in the same manner as in the case of the ground plaster above mentioned. Plain superphosphate and kainit might also be used, some of the constituents in which would be useful in fixing the ammonia, as soon as formed from the organic nitrogen. Should this suggestion be found to have practical value, there is no doubt that our fertiliser manufacturers would be found able to supply our farmers, at a moderate cost, with a mixture of ground plaster, superphosphate, and kainit, in such proportions as experience might show to be most advantageous. No better application can be made of the wood ashes produced in the farmer's household than by mixing them with the barnyard manure, and most excellent results are known to have followed this practice.

(To be continued.)

MILLING.

The Kinds of Wheat Millers Require

A week ago English wheat was making a little more money than when these notes last appeared, but it has returned to the old figure, and prices are not firm at that. The fact of it is, there is a great deal of very poor quality on offer, and millers do not care much about buying it. There is a poor sale for flour, too, at 6¼d. less on the past week, and some kinds of offals, notably ordinary bran and sharps, are not making so much by 5s. to 10s. per ton as they fetched a fortnight ago. At the same time, broad bran is in much request, and commands big prices.

I agree with a great deal Mr. Brown, of Crewe, said in his paper, which was published in the MARK LANE EXPRESS of the 8th inst., but am not quite so sanguine as he appears to be in regard to growing fairly strong wheats with high yield. It is a notable fact that all the strong wheats, or practically all, produce less grain to the acre than the weaker sorts. At the same time, the reader of the paper—and others—are doing yeoman service to the trade in calling attention to the matter and in urging millers to press upon farmers the necessity for improving their seed wheat, with a view to giving us more strength, as well as colour and flavour. Undoubtedly the wheats of years ago were much stronger than the bulk of those cultivated now. Some of the starchy varieties we have to grind at the present time are notoriously weak, and although we can never expect to produce wheats anything like those of the North-West of America, farmers might, and could, grow far better wheats for us to mill, and they, doubtless, would do so if millers made it worth their while. Given that

The Stronger and More Desirable Wheats Yield Less,

millers must make it right with agriculturists by paying some 2s. or 3s. per quarter more. If the wheat is better and more valuable to millers, it is a self-evident fact that it is worth more money. Of course, this is supposing that we cannot produce fairly strong wheats in this country of high, or even average, yield, and then the matter resolves itself into a question of price, and until we, as a trade, show our appreciation of the efforts made by farmers on our behalf by paying a little more money, they will do what everyone else would do under the circumstances—grow the sorts which yield the best.

It is well known that the stronger and better quality wheats like Red Lammas will not yield like the starchy sorts of the Squarehead and Windsor Forest type, and therefore there must be a *quid pro quo*, or they will go uncultivated. For several years now experiments have been made in different parts of the country, and even abroad, as to the possibility of growing the hard wheat of the North-West of America, of Russia, and of Hungary, but they have not proved altogether satisfactory. In this country some excellent samples, really strong and just what we millers want, have been raised in the first year, but the cultivation of them for two or three years generally has the effect of making them soft, and of the English types, while the yield, as few as the experience of the writer goes, has always suffered. It is

Purely a Question of Soil and Climate,

and it seems that although our wheats can, and in fact have been greatly improved by experimentalists in cross-breeding, we can never grow very strong kinds in this country. If farmers would give us these stronger sorts we should use home-grown wheat a great deal more in our mixtures than we care to do at present. It would be unwise to underestimate the splendid colour and flavour of home-grown wheat, and it would also be unwise to sacrifice these qualities in the search for that excessive strength which will never be acquired on our soils and in our climate. In other words, what millers want is colour and flavour, with as much strength as farmers can give them. Every member of the trade knows that red wheats make a darker flour than the lighter coloured varieties, but to obviate this they can be mixed with the delicate white kinds, while the yellow-skinned sorts, which are often coarse, may well be rejected altogether.

Mr. Brown admits that to grow strong wheats with a remunerative yield constitutes a difficulty, but he thinks, and perhaps rightly thinks, that it is a difficulty which will be overcome. At any rate, it would be interesting to know how some of the new evolved sorts which have been advertised in the agricultural journals of late turn out as to colour, flavour, strength, yield, and general bread-making properties. It would also be interesting to know how long they will keep true to these qualities. As they are probably the progeny of many kinds of strong foreign sorts with home-grown wheats there is certainly

More Probability of their Retaining their Strength

than wheats imported straight from abroad, where soil and climate are so different. During the progress of cross-breeding they have had gradually blended into them, as it were, in the same climate in which they are intended to grow, the very qualities which we millers need. What has been aimed at in these experiments which have been conducted by our leading scientists and seedsmen during recent years too has not only been improved quality and enhanced yield, but length and strength of straw. Freedom from disease and earliness in ripening have also been taken into consideration. The latter is very important in a climate like ours. These qualities, however, refer more to the farmer than the miller, but at the same time they indirectly affect the latter and are very desirable. The danger, perhaps, is in expecting too much in the direction of strength, for it is quite certain that millers will not be willing to sacrifice anything in the way of colour and flavour. Millers may be a hard body to please in regard to the wheats supplied for milling purposes, but there is one consolation—they are no worse in this country than in America and the Colonies. In the United States experiments in the improvement of home-grown kinds have been conducted for some time by the Department of Agriculture. Hungarian wheats have also been tested, while an effort is being made to introduce strong hard wheats into Australia. All this striving after better qualites augurs well for the trade, and the future may see us better supplied than ever before.

Quality, not Quantity, Wanted.

It may be stated that the strength of flour depends in the first place upon dryness, the capability of absorbing a large quantity of water, and in the second place upon its containing a sufficient quantity of gluten of good quality to retain that moisture. It has been defined as "the measure of the capacity of the flour for producing a bold, large-volumed, well-risen loaf." Unfortunately there is no certain method of judging the strength of flour except by baking, although inferentially it may be judged by the character of the gluten. Of this product it is quality which is wanted, and not quantity. After a wet, unsatisfactory harvest time in this country, it is often found that English wheat contains a great deal of gluten, but it is of that ragged kind which is no use in helping to pile the loaf. Very nearly all instruments which have been invented to test gluten have failed in that they have measured quantity instead of quality. In short, the attempts which have been made to determine the quality of the gluten apart from its actual percentage have generally proved disappointing. An expert can tell something of the quality of the wet gluten by feel and appearance. Some glutens are firm and elastic and will stretch a long way, and these are the qualities which make a flour valuable for bread-making. Others are soft and sticky, possessing no "spring," and the flours from which they have been washed are always disappointing. In judging these glutens there is nothing so satisfactory and so reliable as the baking test.

MILLER-FARMER.

LETTER TO THE EDITOR.

New and Old Breeds of Wheat.

Sir,—Some years ago a writer in the *Field* gave the results of the growth of some different sorts of wheat which seemed to reflect seriously and unfairly on the merits of varieties produced by one particular firm. As I had myself grown all the different kinds referred to, and knew very well that, to say the least, on an average of seasons, one was as good as the other, I called attention to the fact that the preparation of the land as given, on which the discredited crops were grown, was undoubtedly the reason for their apparent failure, the cultivation described being contrary to sound and experienced practice.

I notice in your last issue a letter written by the agent to the Earl of Denbigh, giving the results of a so called trial between Carter's "White Monarch" and "Scholey's Square Head," the endeavour evidently being to show that the latter is the better variety. I should like, however, to point out that the wheats were grown on two different fields, and after different crops. We are told that the cultivation of the land had been the same, the only difference being that the "Square Head" was grown after clover, and the "White Monarch" after beans. That I submit is sufficient explanation. Everyone knows that clover is the very best preparation for a wheat crop, probably on an average giving one quarter per acre more than a crop after beans with more straw. Again, if the land on which these crops were sown requires 2½ bushels of Square Head, it is obvious that the much larger corns of the White Monarch would require at least another peck. Under exactly similar conditions I grew over 5qrs. per acre of White Monarch, although that part of the field was thinned by wire worm, as against about 4qrs. of Square Head and another wheat, the straw being a foot longer and stronger.

When I bought the White Monarch I asked whether it was one of the wheats Messrs. Garton have bred, for which they claim greater strength—that is, increased gluten—and was told that it was not, but a large yielder with still straw. I believe their present (1900) issue has that distinctive feature.

As I am not in any way connected with Messrs. Garton, I should not have intervened had not I received by the same post a circular advertisement of "Warp Grown Square Head," in which, besides two testimonials from Mr. Cave, I found a copy of his letter.

I have grown Square Head with the best results, but I believe that the best wheats we have can, and will be, beaten. It is a well-known fact that in some districts Messrs. Garton's oats have fairly knocked out other varieties.—Yours faithfully,

JOHN FRANCIS BEDDALL.

LITERARY NOTICES.

"Every-day Farming," by Paul Gill, and published by Messrs. Henry Good and Son, 12, Moorgate Street, E.C., is a small work intended for the ordinary or what may be termed everyday farmers, who have neither the training, time, means, or the inclination to grapple with the higher branches of the subject. In this treatise the author first of all reviews the past and present state of depression in agriculture, and then states how a farmer can avoid past losses and in future make a profit. He advocates the addition of pigs and poultry to the farm stock, and shows that the old cry of some agriculturists that "pigs and poultry don't pay" is wrong. For the last chapter Mr. Gill gives a sketch of how he would manage a hundred acre farm. The writer has used only the simplest and plainest terms and phrases, and altogether the work is a very good one for those for whom it is intended.

Barnsley October Fair.—There was a large attendance at this horse and cattle fair, which was held on Thursday. There was a good show of cattle, calving cows making £15 to £20, and this class of stock was in most demand. Two year olds, £6 to £13; and yearlings, to about £5. A good show of sheep, chiefly of the Lincoln and crossbred class. Shearlings, 48s. to 52s. each. A large number of horses were shown, but generally the class was only moderate. Some useful horses made £25 to £30; light horses, £35 up to £40; ponies, £7 to £10 each.

By Lupulin.

Home Notes.

The Borough.

I am glad to be able to report that with the practical closing of the electoral disturbances of our commercial atmosphere there is very satisfactory evidence of the commencement of a better condition of trade in hops. During the past week we have been encouraged by more inquiries and much more resulting business. Something like a normal state of activity has prevailed, with the pleasing consequence of the realisation of higher prices than have been heard of this season. On Monday values advanced at least 5s., and before the end of the week this was certainly doubled, so that I am not exaggerating in putting the upward movement at about 15s. on the week. The improvement is principally noticeable in the medium qualities, which are the samples mostly before the buyers at present, the larger and better growths from East and Mid Kent being as yet held in reserve. A few choice Kents have been sold, and I hear that it is not difficult to obtain 130s. for them, and that even 140s. has been reached.

The Tide Has Turned

and is flowing in favour of growers, who may now reasonably expect that their produce will float on the top of it. I do not wish to be too sanguine, or to disappoint my friends by painting too bright a picture, but I am not alone in anticipating that henceforward we shall see a steady improvement in the tone of the market, which must be upheld throughout the season. To what extent the strength arising from the admitted condition of affairs will carry values it is difficult to say. But there are now current confident predictions that choice hops will be saleable at 160s. before long, and some optimists are declaring that £10 will be reached by the end of next month. It is, at any rate, quite clear that the future of the trade is entirely under the control of planters, and I trust they will rightly utilise the advantage thus placed in their hands.

The Official Crop Repor

is not yet issued, though the Board of Agriculture was b en pressed to hasten the publication of the figures, for the reason that they are specially required at an early date this year. We do not, however, need them to convince all concerned that the crop is exceptionally small, and if further evidence be required it is to be found in a recent agricultural report in a contemporary, which places the general condition of the hop crop on October 1st at the figure of 61. This statement shows a falling off during the four months of observation, as it stood on July 1st, at 71, on August 1st at 72, on September 1st at 65, concluding with the figure quoted above. The average of the condition at the end of the picking in the five years 1895 to 1899 is 87.7, so that our present record is 26.7 points lower, representing a reduction from the average (which includes the excessive crop of last year) of nearly 30 per cent.

Under these circumstances we naturally look with some anxiety to

The American Crop,

concerning which I refer my readers to the report elsewhere in this issue, and which I am assured by experts is a practically correct statement. Prices are rapidly advancing on the other side the Atlantic. Merchants who have contracted with growers there before the crop was known are now selling the produce on this side at 100s. to 105s., and are not pressing sales thereat, as they have full confidence in higher prices later on. It is also expected that our imports from America will be abnormally small; indeed, it is stated by some that local consumption will require all the hops that America will grow, and only if they are tempted by very high prices on this side will any appreciable shipment take place. We may, at any rate, be satisfied that we have nothing to fear from American competition, and the same may be said of the Continental growth, which will be practically absorbed by their own brewers.

Imports and Exports

during September do not present any remarkable features. The total imports are 5,189 cwt., being 216 cwt. less than in the corresponding month last year; but exports have somewhat increased, being 1,356 cwt., against 1,118 cwt. in September, 1899. The balance of the month affecting our markets may therefore be taken as 3,833 cwt., the similar balance last year being 4,287 cwt.

The New Parliament

will be sufficiently satisfactory regarding the representation therein of the hop-growing industry. Our old and well-tried friends, Lieut.-Col. Warde, Captain Boscawen, and Mr. Lawrence Hardy, have again been returned for Kent. I regret we have lost, through indisposition, Mr. F. Gorell Barnes, but he is succeeded in the Faversham division by Captain Howard, who will doubtless be as ready as his predecessor to do his best for planters. I do not think the electors of Maidstone have been wise in displacing Mr. Cornwallis, but we must accept the chances of election time, and hope we may find a friend in Mr. Barker. In Sussex we have two good members, Lord E. B. Talbot and Sir H. Fletcher, Bart., and just as I am writing I have a telegram conveying the gratifying news that the hop growers' champion,

Colonel Brookfield,

has been elected for the Rye division by the great majority of 2,489. Our esteemed president returned from South Africa in time to put in four days' work in the election battlefield. He was accorded a right royal reception by the Mayor, Corporation, and inhabitants of the ancient town of Rye, and I cordially congratulate him upon the triumph he has achieved in again adding M.P. to his name in such a substantial manner.

Our good friend Mr. W. G. Nicholson has been returned unopposed for the Petersfield division of Hants. We have Viscount Cranbourne for Rochester, and the Hon. H. Cubitt and the Right Hon. St. John Brodrick for the two divisions of Surrey.

In the Midlands Sir J. Rankin, Bart., retains his seat for Leominster, and Mr. M. Biddulph, who represented the Ross division of Hereford, is succeeded by Mr. P. Clive, a solid Unionist. The retirement of Mr. Radcliffe Cooke from the representation of the city of Hereford allowed the return of Mr. J. S. Arkwright, whose election was unopposed, such an occurrence not being recorded in the history of the city for over two centuries. In Worcestershire we have Lieut.-Col. Long for Evesham, and our loyal supporter, Mr. A. Baldwin, for Bewdley.

Although Colonel W. G. Webb is not perhaps directly representative of our industry, he is so closely connected with it by the large business done by his firm in hops that I must express my pleasure at my old friend's entry into Parliament as the member for the Kingswinford division of Staffordshire, and trust that as opportunity arises he will exercise his influence in the House on behalf of our English hop planters.

**All official reports and notices of the National Association of English Hop Growers will be printed in the* Mark Lane Express, *which will also contain all current information likely to be of interest and benefit to the members of the society.*

Foreign Notes.

Nuremberg.

Without any notable changes in the market the course of the trade in hops has been scarcely sufficient strength to create a tendency in favour sellers, who are holding firmly to their quotations refusing to entertain the lower offers made to them. Consequently transactions are somewhat limited as brewers are evidently endeavouring by their reserve to break down prices, but thus far these efforts have not succeeded. The principal business done has been for export, and in this direction about 3,000 bales have been disposed of, of which the largest proportion were Frieomonts, these being now nearly cleared out.

Munich.

Brewers in this important centre are not buying freely, the sales of the week not having reached 1,000 kilos, while the arrivals total nearly 150,000 kilos. Quotations for best qualities are approximately as follow: Hallertaus, 160s. Spalt and Kunding 185s.; Badens, 140s.; Wurtembergs, 150s.; Saaz, 210s.; other Bohemian growths, 170s. The stocks in dealers' hands on October 5th are estimated at 2,740 cwts.

Wolnzach.

About 1,800 bales have been weighed up from this district. Business is fairly steady, although buyers are not ready yielding to the demands of growers.

Stuttgart.

The business at the last market was active, buyers being numerous and willing to operate at prices asked. The greater part of the hops offered were sold.

Nassau.

The hops of this district are of good colour and quality, and nearly half of the crop has been sold at prices varying from 100s. to 115s.

Burgundy.

The annual hop fair at Beisse-le-Chatel, which is usually an important gathering, was attended by but few buyers this year. These were hardly disposed to do business at the prices demanded by growers, who were very firm in refusing to lower their quotations. A few sales were made at 100 to 105 francs. The position had not materially changed from that at the Dijon Fair, fifteen days previously, when planters were asking 100 to 110 francs for ordinary qualities, and 110 to 120 francs for fine samples. The latest report from this district states that values seem to have settled down, and that 110 to 115 francs are now the current prices at which business is progressing.

France.

The Department du Nord is one of the most important hop-growing districts, about one-third of the French produce having its origin there. The harvest is rather later than in the South, and is only just completed. The quality of the crop promises to be very good, and the yield is calculated at 11 to 12 double quintals per hectare of 2½ acres. The chief centres of the industry are Hazebrouck, Cambrai, and Avesnes, these together having a hop area of about 810 hectares or 2,025 acres. Prices are now quoted in Hazebrouck at 105 to 110 francs per 50 kilos, the value a year ago being only 80 to 90 francs.

Belgium.

The downward movement of prices appears to have been checked, the speculative market being now stationary at 77½ to 80 francs on the Brussels Bourse. But in the country a stronger tone prevails, and figures up to 90 francs are quoted. Growers are very firm in their demands, having full confidence in the ultimate realisation of higher prices than are current at present. Both at Alost and Poperinghe inquiries are numerous and business is generally healthy, the completion of the harvest demonstrating that the expected deficiency has not been exaggerated. It is calculated that the yield in the Alost district is at least 10,000 bales less than last year.

The open market at Asse, held October 2nd, showed that very satisfactory progress in Belgian hop culture is being made, and the bales of samples submitted for prizes strikingly bear out the opinion that the harvesting and curing left nothing to be desired. All the hops exposed for sale were readily taken by buyers at good prices.

America.

Buyers on the New York market are readily taking up all the 1899 hops of fine [illegible] but are slow in finding the new crop, preferring to wait till they can obtain more complete evidence of the average quality. In the meantime a very firm tone is general, and all dealers are [illegible] that under any circumstances higher prices will be realised in the near future. The *American Agriculturist* says: "A short crop at fair values is more satisfactory than a crop producing [illegible] and [illegible] does increasing values as the season goes on."

The reports from the State of New York districts are cheering to growers, and in some cases 16 cents to growers are not keeping these prices, have decided to put their hops into [illegible] and await further developments.

A telegram from San Francisco to hand on Saturday

day tells a similar story, enquiries being active, and recent prices of 14 to 15 cents being easily obtained.

Brewers' stocks are much decreased, and the holdings of dealers and speculators are exceptionally light. There is, therefore, every probability of the establishment of substantial advances within a short time, and it appears absolutely certain that the market throughout the season will be strong for sellers, while the quality available for exportation must be smaller than it has been for many years.

The American Hop Crop for 1900.

The following figures, extracted from the *American Agriculturist*, are the results of a very careful and impartial investigation, and may, therefore, be safely accepted as sufficiently reliable to form the basis of a correct forecast of the probable course of the market during the coming year. The comparisons of the acreage and yield of the various hop districts given below are especially interesting, the quantities of hops being given in bales of 180lbs. each:

New York. Year.	Acreage.	Crop.	Old Stock.	Total Supply. Bales.
1900	16 000	46,000	3,000	49,000
1899	19,0 0	58,000	5,000	63,000
California.				
1900	6,100	44,000	500	44,500
1899	6,750	55,000	4,000	59,000
Oregon.				
1900	15,040	68 000	2,000	70,000
1899	16,000	80,000	700	80,700
Washington.				
1900	5,000	40,000	1,200	41,200
1899	5,250	47,000	800	47,800

These returns indicate that the total area under hops in the U.S.A. has decreased from 47,000 acres, at which it stood last year, to 42,140 acres in 1900. All the States have reduced their acreage, but in different proportions, New York showing a falling off of about 17 per cent., California about 10 per cent., Oregon about 6 per cent., and Washington about 5 per cent.

Not only in acreage, but also in yield, do the figures demonstrate that the hop-growing capacity of our competitors has diminished this year. The total growth of 1899 was 240,000 bales, or 385,714 cwt., and the produce of 1900 only amounts to 198,000 bales, or 318,215 cwt., the general average being 8.20 cwt. per acre in 1899 and 7.55 cwt. in 1900. The stocks at the opening of the '99 season were estimated at 10,500 bales, and this season only 6,700 bales were reckoned to be in hand. Therefore the total deficiency in the present available supply may be taken as exceeding 70,000 cwt., and it may thus be reasonably calculated that not only must the American brewers be compelled to pay considerably more for their supplies than they have been recently doing, but also that very few hops can be spared for exportation to England or to any other market.

It is stated that unless the American growers obtain better remuneration this season than they have received within the last few years, a further decrease in acreage will be effected, especially in New York State, and, although the diminished area is not so pronounced on the Pacific Coast, there is there a decided tendency to plough up the poorest yards, and not to plant new ones until it is evident that the farmers can secure more profit for their outlay and their labour.

(*For Hop Market Reports, see pages* 495, 497.)

New Agricultural Patents.

Specially compiled for the MARK LANE EXPRESS by Mr. G. D. Howard (Hughes, Son, and Co.), Patent Agent, 38, Chancery Lane, London, W.C., of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

17,114.—John Anketell, Regent Street, London, for an invention of "A new or improved machine for planting potatoes and other root crops."

17,116.—William Henry Wortman and John Henry Hall, Chancery Lane, London, for an invention of "Improvements in barrel churns."

17,223.—Thomas Budworth Sharp, Birmingham, for an invention of "Improvements in or appertaining to the manufacture of lard and other edible animal fats, also to butter and the like."

Patents Sealed.

11,694.—J. E. Atterbury, Clare College, Cambridge, for an invention of "Improvements in distributing liquids and manures on crops."

11,875.—F. Franck, Germany, for an invention of "Improvements in manuring and fertilising."

12,257.—C. Kohlert, Berlin, Germany, for an invention of "Improvements in ploughs, agricultural."

Tralee Fair was held on Tuesday, and there was an average supply of stock. Calves and yearlings sold well. Prices: Calves, second class, £4 to £4 12s. 6d.; third class, £2 17s. 6d. to £3 15s. 9d. Yearlings, second class, £5 16s. 3d. to £7; third class, £4 2s. 6d. to £5 10s. Two-year-olds, second class, £7 10s. to £10; third class, £5 10s. to £7. Three-year-olds, third class, £6 10s. to £8. Springers, second class, £11 10s. to £14 5s.; third class, £8 to £10 2s. 6d.

BARLEY AND MALT.

By Hordeum.

Beer Duties.

The General Election is at an end so far as its interest or any further effect upon political action are concerned. The result indicates much more than is apparent upon the surface, for, whilst the majority are busy congratulating the Government upon the splendid return the country has made to its appeal, the thoughtful few read between the lines deep and serious warnings.

It is recognised that our foreign policy, and more especially our Imperial aggrandisement, conform to the views and wishes of a vast number of our electors. So far as these are concerned, our Cabinet can pursue an unbroken line of policy with increased vigour and lavish outlay.

But Imperial politics have no place in these columns other than their influence and effects upon

Domestic Policy.

Unhappily the two can never be altogether dissociated, for the simple but eminently practical reason that "ways and means" dominate both, with the cross relation that internal affairs have to be so managed and controlled that the costs of waging foreign war must be provided from home resources.

Home industries and domestic incomes have to be taxed to maintain armies on the outer fringes of our possessions or ships fit for action upon the high seas. As a consequence, however belligerent our tone may become, it behoves us to keep a keen eye open to watch the course of trade and other events within our own borders.

Keeping this view of the position in sight, it is surprising how little attention generally has been given in the struggle from which we are just emerging to the interests centreing around agriculture. It cannot be said that these interests have been altogether overlooked. We had at the earliest practicable moment the eminently practical and

Comprehensive Statement

prepared and issued by the business and Parliamentary Committee of the Central and Associated Chambers of Agriculture. No less than ten points were advanced of grave practical interest and value. All of these have been discussed in the past, not only at the Central Chamber, but in many of the clubs and societies throughout the length and breadth of the land. Of these proposals the only ones I am able to refer to here are those relating to the beer duties and the use of brewing materials. These directly affect the prosperity of arable farming and the amount derived by the State from that inexpensive and reliable source of income, the duty on beer, although other matters of much importance ought not to be seemingly overlooked, such as the uniform sale of corn by weight and the fraudulent sale of foreign meat. On all these points we must make it understood that care must be given. The trade of China or of South Africa is an important matter, but it is as yet of less direct value to us than the success or ruin of our own great industry vested in our land. When children require food a good milch cow in the paddock is worth many bulls in Bashan. Even such grave and responsible persons as Chancellors of the Exchequer have referred to

"Brewers as Milch Cows,"

and at a comparatively early date their ability to continue to pay the existing excessive taxation they collect for the State or not will be discussed and should be settled.

Now, in this discussion there are two factors demanding attention which are far too commonly overlooked. These are the interests of the producers of the raw material supposed to enter into the composition of beer and those also of the general public or consumers. It is obvious that the duty of tax collectors should be to study so to raise revenue that no harm is done to producers or loss to the public.

One of the surest and best methods of securing these desirable ends will be to adopt the resolution of the Central Chamber so "that the beer duty be readjusted by a reduction in the rate of duty charged on beer brewed only from barley-malt and hops, and a like amount be added on beer containing any substitute for malt and hops."

Hops Pay no Duty,

and consequently the insertion of the name in the resolution is unfortunate. Sufficient would be gained by keeping the alteration to beer containing any other dutiable material than barley-malt. We cannot escape from the fact that the law directly sanctions the use of many substances by brewers, some of which are known to and permitted by the Excise authorities, but of which no notice is taken in any form.

Every pound of substitute for malt is, however, known and carefully entered. In the case of some of the articles they are insufficiently charged with duty. These can be placed upon a fair and just footing, and now is the time for the necessary steps to be taken to secure that result. No election of late years has been fought so independently of the all-powerful influence of beer, and perhaps no recent House would have looked so fairly and equitably into the true merits of the case. In any case, it is much to be desired that the members so soon to reassemble ought to have clear intimation of what is wished in the matter

Brewers' Exhibition.

This important annual fixture, the twenty-second of a successful series, takes place at the Royal Agricultural Hall, Islington, from October 20th to 26th, and in the display of the latest appliances and inventions of interest to the trade will be found in every way up-to-date. Although essentially a business gathering there is always much to attract the general public, and even temperance reformers take a special interest in the improved processes for the production of high-class non-alcoholic drinks, for which this exhibition has been mainly responsible. The malting barley competition, which has done so much towards spurring on the farmer to obtain better seed and to devote more care to barley cultivation, will again form one of the leading features of the show. The prize list has been considerably added to, and the entries promise to reach a satisfactory total. Cash prizes and diplomas are also being offered for English hops, and medals will be given for best samples of soda water, ginger beer, and hop ale. The railway companies are affording facilities for country visitors, and the prospects of a successful trade gathering are assured.

Grain Show at Blandford.

The third annual exhibition of grain grown in the county of Dorset was held at the Blandford Corn Exchange on Thursday. The exhibitions are promoted by the committees of the four agricultural societies of the county, and the headquarters of which are at Dorchester, Blandford, Milborne St. Andrew, and Winfrith. The entries were fairly large, but not quite so numerous as at the previous exhibitions. They were judged by Mr. W. Collis, Alresford; Mr. J. D. Taylor, Bath (for barley); Mr. W. H. Yeatman, Poole (wheat); and Mr. J. J. Forrester, Bryanston (oats). The quality of the barley and the threshing of it showed a great improvement on that of previous years, and especially on that of two years ago. Much greater attention had been paid to the threshing, but it would be greatly to the benefit of the agriculturist if still an advance were made in this detail. In the threshing department both prizes went to Mr. Gifford. One lot was a very useful barley, whilst the second was very steely. It was wonderfully well threshed, and reflected great credit on the machinist. As a whole the quality of the barley shown was very good, and above expectation for the year. The majority of the exhibitors had left their barleys to mature and ripen, important details in the influencing of the judges' opinions. More attention had been paid to screening, but the agriculturists' interests would be improved by a still further amount of care being bestowed in this department, which does much in influencing the prices offered at the various markets. The champion sample of barley was a very excellent one, the quality being good, very kind, and well tackled. It was grown by Mr. Henry Spicer, of Affpuddle. Colonel W. E. Brymer, of Puddletown, was awarded the reserve card for a very good sample, which was as well managed as the champion lot. The oats exhibited were not up to the usual standard, being deficient in colour and weight, whilst in some cases they were by no means sweet. In the wheat section were some good supplies of nice stamp wheat, but in several instances the condition of the grain could be improved upon. Mr. J. Andrews, of Tarrant Rushton, was awarded the champion prize for an excellent stamp of white wheat, grown on a light loam and chalk soil after turnips. The reserve number, which was exhibited by Mr. J. Lockyer, of St. Giles, was a red variety in good condition.

At the dinner which followed, the newly-elected member for the division, Mr. Wingfield Digby, presided. The toast list included the health of the president, and it was proposed in fitting terms by Mr. G. E. Woodhouse, who congratulated Mr. Digby on being re-elected. In the course of his remarks, in responding, the President said he hoped these exhibitions at the Corn Exchange would do a great deal towards encouraging the growth of good barley in the county. In responding to the toast of "The Judges," Mr. Collis said there had been a very great improvement both in the quality and the threshing of the barley since he judged it at Dorchester two years ago, and the judges had a great difficulty in selecting the best samples. He laid special stress on the necessity of agriculturists paying stricter attention to threshing, etc. Mr. Yeatman spoke in high terms of the quality of some of the samples of wheats shown; but the opinion of Mr. Forrester with respect to the oats was not a very favourable one.

Prize List.

Class 1.—Malting barley from bulk of forty quarters: 1, Mr. G. H. Bissell, Affpuddle; 2, Mr. J. P. Gifford, Dorchester; 3, Mr. G. Mitchell, Rogers Hill.

Class 2.—Malting barley from sample: 3sqrs; 1, Mr. G. H. Bissell; 2, Mr. C. Trowbridge, Iwerne; 3, Mr. J. E. Tory, Broadmayne.

Class 3.—Malting barley from bulk of sample of 20qrs.

1, Mr. H. Spicer, Affpuddle; 2, Colonel Brymner, M.P.; 3, Colonel Brymner, M.P.

Class 4.—White wheat, bulk and sample of 25qrs.: 1, Mr. J. Andrews, Rushton; 2, Mr. T. Taylor, Pimperne.

Class 5.—Red wheat: 1, Mr. R. Rogers, Muston; 2, Mr. J. Lockyer, St. Giles; 3, Mr. C. J. Waters, Woodyates.

Oats (spring): 1, Mr. R. Rogers, Muston; 2, Mr. T. R. Spiller, Luccombe; 3, Mr. H. Spicer, Affpuddle.

Threshing and dressing.—Wheat: 1, Mr. J. Lockyer; 2, Mr. C. J. Waters.

Barley: 1 and 2, Mr. J. P. Gifford.

Champion prizes.—Barley: Mr. H. Spicer; r, Col. Brymner. Wheat: Mr. J. Andrews; r, Mr. J. Lockyer.

FARM PROSPECTS.

Berkshire.

The weather has been remarkably fine, and it has been a wonderful time for autumn cultivation, and this will very much forward the work in the spring, and make it much more healthy for planting where it has been done. It has also been a capital time for carting the manure on the land, but in consequence of the dry weather very little of the wheat land has been ploughed, and scarcely any wheat planted. There is a full quantity of rye and vetches put in for next year's crop, and some trifolium, but from the dry weather this last useful plant has made but little progress, and what comes up by the last rains will be too late for a certain crop. The young grasses are a good plant. As

Threshing

proceeds the yield per acre tells a sad tale, for wheat is below an average. Barley is scarcely an average, with a poor quality, and oats are a bad crop. Straw is very cheap, and although the crop of hay was a light one the price does not improve. Mangolds are good, and swedes and turnips have done very well where they were properly attended to, so that the root crop is the best we have had for three or four years. Cattle are dull of sale, at about the same rates that have been for the last three months. Sheep were a good trade for a time, but now it is rather dull and a little lower in price. Pigs sell fairly well at late prices. Fruit is very plentiful, and orchards have made more money than usual. Potatoes are sound and free from disease. Labour is the great difficulty, and there is not sufficient men left to keep the land in good cultivation, for nearly all the young men are gone for soldiers, policemen, or porters, and then, how can the land be cultivated, for those few that are left demand higher wages, and how is the money to be found with the present low prices and bad yield of the produce? And in the end it will be known that all the poor land will fall down to grass, and not be cultivated at all. J. L. (October 11th).

Carmarthen.

Glorious weather continuing again, rain when it is wanted, and sunshine. I am an old man and do not remember a more prolific summer. Abundance of grass, and cattle are thriving well upon it, and are in demand at the fairs, and good prices are given for them. The sheep are not quite as brisk at from 7d. to 8d. per lb. Horses of all kinds fetch high prices. Mangolds and swedes are growing well, and seem to be a good crop. The potatoes are small, and do not seem to be quite healthy. Fruit is very plentiful, especially apples, and we could have a good supply of cider

If we Knew the Way to Make it.

All stone fruit is a very full crop. There is very little corn thrashed yet of the little that is set here, and does not seem to be an average yield. Milk is in request, which is sent to Swansea, Cardiff, and other towns from this county at from 7½d. to 8½d. per gallon. Butter is selling at 1s. to 1s. 2d per lb. Very little cheese is made, and the skim milk from the separators is given to calves and to fatten pigs, which sell at 8s. 6d. per score, and find it pay better than making skim cheese, which sells at about 3d. per lb.—October 12th.

East Suffolk.

The result of harvest is being proved, and is very unsatisfactory. The crop in many cases is very small, and the price is bad. It is pitiful to hear of how small a sum an acre of wheat or barley brings in. The day of

Abatement of Rent

or permanent reduction has come again, for the grant of half the rates is not enough any longer. The increased cost of labour also makes an appeal to the landlord a necessity, or it will be a necessity to leave the land in the landlords' hands. Of course, if the tenant could have full liberty and security, it might soon be possible to pay more rent. But at present landlords do not see this, and the House of Lords forbids it to be provided by act of Parliament. Hence farms, especially large ones in East Suffolk, have to advertise for tenants.

The Greatest Drought

of the year appears to be now upon us. Swedes are feeling it, and feed grows short. At present mangolds seem growing. Healthy cattle and sheep we gladly report. Swine fever is somewhat about, but not much public noise is made of that now. Plough cannot get on much on the dry, hard land, for autumn sowing of beans, tares, oats, and wheat. Steam cultivation is not thought the right thing for wheat, and one hears of winter oats taking the place of wheat.—J. G. (October 12th).

Mid Essex.

The weather has been exceptionally fine for cleaning the land, which is so hard and dry that a good bit of ploughing must wait for rain. Wheat-sowing has begun, but sowing generally must wait for rain. Wheat, threshed, is yielding less than was expected, bad farmers being hit harder than where land is done well. Barleys also are yielding badly, and to all present appearances the crops will yield

Two Quarters per Acre Less

than last year. Prices for barley are disappointing, but there are few good samples and the berries are small and often stained. Oats, beans, and peas are all below the average. Mangolds have grown well this mild weather, but the crop will be lighter than last year, a good, heavy crop being the exception in a few places. All sheep feed has improved, and sheep and lambs have correspondingly improved in price. Beef and mutton are selling fairly well, but pigs have taken a decided turn for the better. The tempting price of sows for London feeding has very materially reduced the stocks. Labour continues scarce and dear, and with small crops the effects will be felt considerably, with increased taxes; and, strange to note, everything a farmer wishes to purchase is dear, and his corn produce drags out as bad a price as ever; but, no doubt now, with another strong Government, we shall have

Railway Rates Looked Into

and altered, so that the foreigner will be made to pay as much as the home producer, as at present it is much cheaper to get wheat from America into the centre of our little island than for the English farmer to rail his corn just a few stations on any line.—Mid Essex (October 13th).

Shropshire.

Weather keeping dry; barometer 30.3; thermometer 54; mornings chilly. All work going on well in the fields, gardens, and orchards. Common turnips are used for dairy stock to keep them to their milk, and the maggot fly is driven off the sheep.—J. G.

Westmorland.

If ever the month of September deserved the character and importance attached to it by our forefathers, namely, that of being the balancing month of the year, certainly the month just expired is worthy of it, as it is marvellous how greatly it has redeemed the mischief done by the violent storms of wind and rain which took place early in August, laying and twisting the uncut corn in all directions, which rendered cutting a tedious and prolonged operation, causing considerable waste through shedding of over-ripened corn. September has been all that the most sanguine farmer could desire, and has enabled all who have exercised ordinary patience to secure their crops in splendid condition, fit for threshing and marketing if the demand was forthcoming and prices remunerative. The yield of oats is disappointing, especially on light soils, caused to some extent by shedding of over-ripened crops, but more by the extreme forcing weather of July. Aftermaths are less satisfactory than usual, but stock of every kind is getting the full benefit of what the season has produced, as there is no waste by trampling into the dry ground.

Store Cattle

are not coming to market in that splendid condition which the abundance of grass through summer would lead one to expect; in fact, they are generally below average for the period. There is, however, abundance of provender, both green crop and dry, and the latter generally well secured, which adds considerably to its value. Store stock of all kinds are in good demand at fair prices; fat, on the other hand, has receded in value, and cannot now be remunerating the feeder. October has opened out unfavourably, and is blocking the lifting of potatoes, which are proving a disappointing crop, the tubers being generally small and the early varieties much diseased.—T. B. (October 10th).

Foreign Prospects.

France.—Autumn sowings of wheat, rye, and barley proceed steadily in changeable but, on the whole, suitable weather.

Holland.—Fine weather has permitted the practical conclusion of wheat and ryesowings.

Germany.—The weather during the past week has been of a seasonable character, and advantageous for agriculture.

Spain.—With copious rains in many localities in the Peninsula the wheat sowings this season will be effected in good condition in a well-prepared seed bed.

Italy.—Weather recently has been favourable for agricultural work. According to an official estimate this year's wheat crop amounted to 14,442,000qrs., as compared with 15,990,000qrs. in 1899, and 16,656,000qrs. in 1899.

Roumania.—Farmers are complaining of the absence of rain; ploughing and sowing are being actively followed, but the work is difficult through the dryness of the soil. Maize has profited by the recent favourable weather, and a good and abundant crop is anticipated.

Russia.—The temperature in most parts of the empire continues high, and complaints are common of the unseasonable dryness of the weather, which retards Azima wheat and rye sowing, and prevents germination in those fields already sown.

United States.—The *Cincinnati Price Current* says there has been good weather for farm field work, and wheat seeding is progressing favourably. The crop is growing well in the west, but ily is appearing in the early sown portions of Ohio and Indiana. Corn is drying well.—*Dornbusch*.

THE WEATHER.

Monday (October 8th).—Magnificent weather prevailed over the South of England, and the conditions were generally fine over Great Britain. A cyclonic disturbance was travelling to the north-eastward along our west coasts, and rain fell in parts of Ireland. Heavy rain was measured in the morning in the northern and western districts as the result of the fall since the previous morning, and in the North of Ireland the amount measured nearly two inches. Sunday night was warm in England and Ireland, the temperature at many coast stations falling very little below 60deg. The midday temperature rose to 70deg. and above in the South of England.

Tuesday (October 9th).—Exceptionally fine weather again prevailed over the South of England, and the temperature was very high for the season. The conditions were still unsettled over the northern and western portions of the kingdom, where the sky was generally cloudy, and rain fell in many places. Heavy rain was measured in the morning, as the result of the fall since the previous day, in Ireland, and at a few stations in the West of England. The day was very bright and fine in London, and the thermometer in the shade was above seventy degrees for several hours, the highest reading being seventy-five degrees. The temperature throughout the day was nearly twenty degrees above the average.

Wednesday (October 10th).—Cooler weather spread over the whole of the British Islands, and in parts of Scotland the early morning temperatures were only a few degrees above the freezing point. The mid-day temperatures were generally between fifty and fifty-eight degrees, the readings at many places in the south and south-east of England being fully fifteen degrees cooler than on the previous day. Rain was measured in nearly all parts of the country in the morning, as the result of the fall since Tuesday, and at many of the northern stations the fall was heavy. Slight rain fell in London in the early morning, but the day was fine, although there was a good deal of cloud at times. The highest temperature in the metropolis was sixty degrees.

Thursday (October 11th).—The weather was fine over the southern portion of the country, but the conditions were decidedly unsettled in the north. Light easterly winds were blowing in the English Channel, but over the greater part of England the winds were light and variable. On our north and north-west coasts the wind was strong and squally from the south-west. Wednesday night was cold in the northern and inland districts, and ground frost occurred in places. The midday temperatures were everywhere lower than of late, the readings only touching fifty-five degrees in a few places. The exposed thermometer registered two degrees of frost in the suburbs of London in the early morning, and the highest temperature during the day was fifty-six degrees.

Friday (October 12th).—The weather was fine in the South of England, but there was more cloud than of late, and in the northern and western portions of our islands the sky was mostly overcast. Rain was measured in the morning, as the result of the fall in the previous twenty-four hours, in Scotland and in the North of Ireland, and slight rain fell again during the day at a few of the western stations. Thursday night was cold in the northern and inland districts, the sheltered thermometer falling to within a few degrees of the freezing point. The midday temperatures were very little above fifty degrees, except in the South of England, where, however, the readings fell short of sixty degrees. The day was fine in London, and the highest temperature was fifty-eight degrees.

Saturday and Sunday (October 13th and 14th).—Unsettled weather prevailed over our islands during the two days, and strong winds or gales occurred on all our north and west coasts, accompanied by a rough sea. Rain fell on Saturday over nearly the entire kingdom, and rather large amounts were measured in Scotland. On Sunday showers of rain wer general, and hail occurred in places. Snow fell in parts of Scotland, and on Saturday night temperatures were low nearly everywhere, the sheltered thermometer falling below the freezing point at Nairn, and within a degree or two of the freezing point in Scotland and in the north of England. Sunday was cold in London, the thermometer not exceeding fifty degrees.

CORN MARKETS.

LONDON.

Mark Lane, Monday.—Malt: No alteration since last Monday. Barley: Grinding, 3d per qr cheaper. Malting rather quiet, without alteration in price. Wheat slow, at barely late rates. Oats declined about 3d per qr. Maize: Flat 3d per qr dearer; round steady. Flour dull.—NIXON, GOWER, AND CO.

Mark Lane, Wednesday.—New home-grown wheat was not materially altered, although prices inclined easier. Country markets still practically absorb everything that comes up. Very fine white quoted at 33s, and red of similar sample 32s 63lb delivered. Foreign sorts also tended in buyers' favour, and the stock of American remains heavy. No. 1 Northern Spring, 33s 6d to 33s 9d ex ship, and nominal ex quay in absence of offers. No. 1 hard Manitoba, 33s 9d in the former, and 34s in the latter position. Hard Duluth, 34s ex ship, 34s 6d landed. Australian, 33s to 33s 6d 496lb. The market for flour moved in sympathy with wheat, quotations of the leading brands being maintained with difficulty. The London Millers' Association kept prices similar to those current last Monday afternoon. Town household, 26s, and whites, 29s per sack. Both Persian and Black Sea barley were rather more firmly held, although manifesting no decided change in values. Nothing fresh occurred in oats, sellers being fairly reserved, apart from the slack consumptive demand which prevailed. Arrivals show a falling off. Maize more firmly held, apart from the slow movements carried on, and supplies restricted.

Mark Lane, Friday.—Only a small attendance of buyers was noticeable since the commencement of business. New English wheat is 6d easier on the week, and fairly submitted on the country exchanges. Fine white, 32s 6d, and red of similar sample 31s 6d 63lb delivered. American descriptions 3d easier, and stocks continue heavy. Flour is also 3d lower, even at which concession consumers fail to enter the market. The London Millers' Association made no alteration this afternoon. Town household, 26s; whites, 29s per sack. American first patents nominal, at 25s 6d to 26s 6d; and second ditto, 23s to 24s. First bakers, 21s to 22s; second, 19s to 20s. Hungarian up to 30s. Australian patents, 22s to 23s 280lb. Grinding barley unaltered, and the supply of Persian continues adequate. Black Sea is fairly plentiful. Fine malting, 30s, 33s; medium sorts being in ample supply. American oats firm at fully late rates. Flat maize maintained, and firmer on the week; round being also against buyers. Mixed American, 20s 9d ex ship, and 21s ex quay. Odessa 25s ex ship to come up, and 25s 6d ex quay. Good sound new Plate, 23s ex quay. Beans and peas remain lifeless markets, and Egyptian splits held for 20s 6d ex mill.

COUNTRY.

Ashford, Tuesday.—White wheat, 30s to 33s; red ditto, 30s to 32s; white oats, 16s to 22s; black ditto, 14s to 20s; malting barley, 27s to 29s (medium), and 30s to 33s (best).

Aylesbury, Saturday.—The wheat trade, despite a good attendance and fair quantity on offer, was dull, with a decline of 6d per qr on the week. Barley, beans, and oats unchanged. Wheat, 27s 6d to 29s 6d; barley, 26s to 36s; beans, 30s to 35s; oats, 18s to 24s per quarter.

Banbury, Thursday.—Wheat (white), 30s to 32s per qr; wheat (red), 30s 6d to 31s per qr; barley, 28s to 29s per qr; beans (new), 28s to 30s per qr; oats (new), 24s to 26s per qr; oats (old), 24s to 26s per qr. Wheat in fair supply at barely last week's rates.

Boston, Wednesday.—A fair show and declining prices. Wheat, 27s to 28s; malting barley, 26s to 28s; grinding barley, 23s to 24s; oats, 15s to 17s; beans, 29s to 30s; maize, 23s to 25s 6d.

Braintree, Wednesday.—Average supply, and fair trade. Red wheat as last week, prices ranging from 30s to 32s 6d per qr; white wheat slightly better, prices from 32s to 35s. More barley showing, best qualities making up to 36s; others averaged about 27s.

Bristol, Thursday.—The demand has been slow since our last. English wheat was in moderate supply at to-day's market at about 6d lower. Foreign also made from 3d to 6d less money. Grinding barley and flat maize 3d easier. Round maize and oats without change. Flour slow trade.—GRACE BROTHERS.

Cambridge, Saturday.—During the week the wheat trade has been dull, and supplies have been rather better. Prices are hardly so firm as last week. At this market to-day wheat was in moderate supply, and, with only a languid demand, prices were slightly easier. Wheat, 29s to 31s, and white up to 31s per 504lb. There was a dull trade for barley for anything like good lots. Beans unaltered.

Canterbury, Saturday.—Wheat and barley slow; maize a little firmer. Ruling prices:—White wheat, 31s to 32s; red ditto, 30s to 32s; malting barley, 28s to 35s; grinding ditto, 21s to 24s; white oats, 18s to 21s; black, 16s to 20s; peas, 30s to 32s; tick beans, 30s to 32s; mazagans, 28s to 29s; flat maize, 22s to 23s; round ditto, 27s to 28s per quarter; winter tares, 6s to 6s 6d per bushel.

Carlisle, Saturday.—Small supply of oats in our market to-day. Quick sale at full rates. New, 16s 6d to 18s 6d per 336lb; old, 23s to 24s 6d per 336lb.—THOMAS ROBINSON.

Chester, Saturday.—There was a larger offering of English grain. Wheat was unchanged in value; oats were steady; but Indian corn, through scarcity, was 3d per sack dearer. Quotations: Wheat, white and red, 4s 1d to 4s 3d per 75lb. Grinding barley, 3s to 3s 6d per 64lb. Beans, 4s 10d to 5s 6d per 80lb. Oats new, 2s 2d to 2s 4d; old, 3s 2d to 3s 7d per 46lb. Indian corn, 11s 6d to 11s 9d per 240lb.

Chichester, Wednesday.—Small attendance and quiet market, business generally being on a limited scale. Wheat was the turn easier. Feeding stuffs also had a drooping tendency. Flour unchanged.

Colchester, Saturday.—Wheat, short supply, poor demand; prices 6d to 1s per qr lower. Barley, freely offered, best samples sold at good prices. Inferior runs neglected. Beans, peas, and oats unaltered.—FRANCIS AND CO.

Dorchester, Saturday.—Good attendance, but trade was not brisk. There was a large quantity of malting barley offering, most of inferior quality, for which it was difficult to find buyers.

Edinburgh, Wednesday.—Wheat in good demand at late rates; average price 28s 8d. Oats dull: average 21s 8d. Barley exceptionally dull, at 6d cheaper; average 23s 4d. Best Midlothian flour brought 26s 6d.

Glasgow, Wednesday.—There was a small attendance at our Corn Exchange to-day. Wheat and flour quiet, but quotably unaltered. Indian corn firm, but unchanged. Grinding beans steady. Canadian pease 6d lower, owing to a fresh arrival at quay. Foreign oats steady. Home oats firm, with a slightly dearer tendency. Barley firm. Oatmeal quiet. Bran and thirds unaltered.—GIBSON AND CLARK.

Glasgow, Wednesday.—Wheat and flour quiet but quotably unaltered. Indian corn firm but unchanged. Grinding beans steady. Canadian peas 6d per boll lower owing to a fresh arrival at the quay. Foreign oats steady. Home oats firm, with a slightly dearer tendency. Barley firm. Oatmeal quiet.

Hull, [illegible]. A fair supply of English wheat, which met a slow sale at lower prices, fine new making 29s and old 31s per qr. [illegible] wheat also easier at 28s to 32s per qr. Malting barley [illegible] slow at 23s to 28s; grinding barley easier at 22s. Oats rather slow, new making 18s and fine old 22s per qr. English beans in fair request at 30s to 35s, and foreign 29s 6d. Maize scarce, especially round, which sold at 26s and flat at 21s per qr.

Ipswich, Tuesday.—Moderate supply of wheat, and trade dull at about 6d less than last week. Reds, 30s to 31s; white, 32s 6d. Good supply of barley, and fine samples were in request at from 34s to 35s; other descriptions 26s to 30s. Oats steady. Maize firm. Beans and peas unaltered.

Leeds, Tuesday.—With heavier shipments during the past week and weaker American advices, the wheat trade has become inactive, with the tendency of prices slightly in buyers' favour. Millers confine their purchasers to-day to pressing requirement at occasionally 3d per qr under late rates. Barley meets still a restricted demand, common qualities proving very unsaleable. Maize, 3d dearer. Beans and oats slow.—DUNNS AND CO.

Leeds, Friday.—The demand for both English and foreign wheat is still restricted to pressing wants, although prices are from 3d to 6d below Tuesday's reduced rates, new English being offered as low as 27s, and old from 30s to 32s. Maize firmly held. No change in beans, peas, oats, barley, or flour.

Leicester, Saturday.—Fair attendance, with moderate supplies of wheats. Old samples steady. New wheats slow trade. Prices 29s to 32s per 36 stones. Barley in steady request. Fine oats firmer.

Lincoln, Friday.—Good supply of new wheats, trade steady at somewhat easier rates. Reds, 27s to 28s. Whites, 28s to 29s. Foreign, quiet. Large show of barley, prices ruled from 25s to 34s. Oats dull. No change in peas, beans, and maize.

Liverpool, Friday.—Wheat quiet, with a steady business at late rates, except Kansas wheat, which is ½d to 1d 100lbs. lower. Flour—There is only a quiet trade passing for flour, and prices show no change from last market day. The Liverpool Millers' Association make no change in the minimum price of English. Maize has experienced a fair consumptive demand at last Tuesday's prices for mixed American. European and Plate have a fair inquiry, values showing no change. Barley for brewing is fairly active, Chilians having a good demand, and full prices are obtainable. Beans are slow, and 3d lower for Egyptian and flat kinds, other sorts unchanged. Peas have a quiet trade at ½d decline from Tuesday. Oats—English oats have experienced a firm trade and 1d advance for new has been registered; foreign kinds have a moderate demand, but steady at Tuesday's values. Oatmeal firm trade at unchanged prices. Oilcake—Only a moderate business has taken place, but prices are firmly held at last market day's currencies.—SEGAR AND TUNNICLIFFE.

Maidstone, Thursday.—Business at the market to-day was slow, and the wheat on offer did not move off at all freely; the prices of last week were about realised. Barley, if of good quality, has a good demand, the cost of which is slightly over recent rates. Oats are a little easier to-day. Beans and peas no change, though the latter are scarce. Winter tares are to be obtained at less money than at the first of the season. Not any alteration in rye, brank, hemp, sergo, or millet.

Manchester, Thursday.—A quiet tone has prevailed during the greater part of the week, and in no quarter have we heard of more than a moderate trade being done. English wheat favours the buyer to the extent of 6d per qr, whilst foreign is about 1½d per cental lower. Flour is very slow, prices quotably unaltered. English oats are firm at late rates. Peas and beans easy. Indian corn 1½d per cental dearer on the week.

Newcastle-on-Tyne, Saturday.—Wheat closed in buyers' favour this day by 3d to 6d per quarter. Flour in slow demand, and disappointing to sellers. Feeding stuffs, generally, had the turn against sellers.—GEO. W. WATSON AND CO.

Newcastle-on-Tyne, Saturday.—Wheat at our to-day's market ruled quiet, prices rather in favour of buyers. Maize firmly held, factors refused to accept last week's prices. Barley easier. Old Scotch oats firm, new easier. Beans and peas steady at late rates. Flour unchanged.—JOSEPH POLLARD AND CO.

Newport, Wednesday.—Wheat: Slow sale and rather easier. Maize: Good demand at last week's prices. Barley: No change on the week. Oats: No change. Fines, 24s 6d. Offal very firm.

Northampton, Saturday.—Good attendance, with more showing. Generally speaking, the trade was quiet, and in some cases a little lower than last week's prices. White wheat, 30s to 33s; red, new, 27s to 30s; ditto, old, 31s to 33s; malting barley, 26s to 30s; grinding ditto, 22s to 24s; oats, 17s to 22s; old, 24s; beans, 30s to 32s; fine old, 35s; peas, 26s to 34s; flour, 23s to 27s.

Norwich, Saturday.—The wheat trade was about the same as last week, being rather against the seller. A good supply of barley on offer, which sold freely at last week's prices. We had unusually mild weather at the beginning of the week, but the past few days have been cold and damp. Wheat, red, 30s to 30s 6d per qr, weight 63lbs. per bushel imperial. Corn Inspector's return for the week ending October 8th, 1900:—Wheat, 4,080-3, 29s 3¾d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat in less supply, but trade ruled steady at previous rates. Barley a fair trade in fine parcels, which commanded full prices; inferior sorts almost unsaleable. Oats in moderate supply, moderate trade at unaltered prices. Beans, small show and firm.—ROBERT HUBBLE.

Peterborough, Saturday.—There has been a small supply of wheat to-day, but trade was slow, and last week's prices barely supported. Good barley firm, middling qualities still flat. Oats steady and unchanged.—THOMAS HILL AND SON.

Plymouth, Thursday.—There was an average attendance at our Corn Exchange to-day. Very little has been done during the week. The prices for all stuffs remain unchanged, and business is very quiet.—ORLANDO DAVIS AND CO.

Reading, Saturday.—We had an abundant supply of wheat on offer to-day at the Exchange, and business ruled brisk. There was, however, a slight fall in prices, which were 6d per qr less than last week. The barley supply was an average one, and a good demand ensued at figures which were very similar to those of previous markets, and other sorts sold at recent rates.

Romford, Wednesday.—Wheat 6d a quarter cheaper. A fair supply. Red wheat made 29s 6d to 31s, and white wheat 30s to 31s 6d per qr.

Sheffield, Tuesday.—Moderate attendance. Market for wheat slow, but former prices firmly adhered to. Indian corn advanced another 6d per qr. Beans and oats firm at former prices. Flour unaltered. Quotations:—Wheat, white, 33s to 33s 6d; red, 32s to 33s; new, 31s to 32s per 504lb; oats, old white, 26s; ditto old black, 22s; new, 18s 6d to 20s per 336lb; peas, grinding, 28s to 29s; ditto blue, 53s to 70s per 504lb; beans, Egyptian, 33s; ditto, English (new), 31s 6d to 32s per 532lb; barley, grinding, 23s 6d to 24s 6d; ditto malting, 27s to 35s per 448lb; Indian corn, small old, 28s to 29s; ditto American mixed, 23s to 23s 6d per 480lb.

Spalding, Tuesday.—Wheat was 6d easier making up to 28s, and a little more for seed wheat. Oats were 6d lower, selling at 15s to 17s. A slow trade for barley at previous prices. Beans and peas unchanged in value.

Stockton, Wednesday.—There were few samples of farmers wheat showing, which made 30s per qr. The foreign wheat trade keeps very dull owing to large arrivals and millers buying only for immediate requirements. There is no quotable change to record. Maize, 3d to 6d per qr dearer. Oats unchanged. There was only a small show of malting barley, which met a slow trade at last week's prices.

Sunderland, Saturday.—Wheat quiet and in buyers' favour. Barley and oats steady without change. Arrivals: Coastwise, oats, [illegible] qrs.; foreign, nil.—E. and F. RICHARDSON.

Taunton, Saturday.—Good attendance. Wheat, a quiet trade, at 6d per quarter decline. Large supply of malting barley, which sold slowly at last week's rates. All feeding stuffs slightly easier.

Wakefield, Friday.—Wheat trade dull an inanimate, millers seemingly being determined to reduce stocks. Foreign shippers have scarcely reduced limits and holders on this side are quite content to await a renewal of demand. Malting barley meets a limited sale, many maltsters not yet operating to any extent; prices rather favour buyers. Maize, beans, and oats very slow.—DUNNS AND CO.

Wakefield, Friday.—There is a very slight business on to-day's market in wheats, and 6d per quarter less money is occasionally accepted for both English and foreign. We have a fair supply of new Yorkshire barley, but maltsters as yet have not operated to any extent. No alteration in feeding stuffs.—MICHAEL SANDERSON AND SON, LIMITED.

Winchester, Saturday.—Wheat in short supply, which met a slow trade at barely last week's prices. A fair quantity of barley on offer at 28s to 35s, according to quality. Maize 6d lower. Oats in fair request at late rates. Flour 24s to 26s, with small demand.—FEAR, COLEBROOK AND CO., LD.

Wisbech, Saturday.—Very little grain offering. Wheat slow at late rates. New red, 29s; white, 30s; old up to 31s. Oats steadier, new 17s to 19s; old up to 24s. Barley irregular in quality and price.—JAMES FLETCHER.

Worcester, Saturday.—English wheat offering in fair quantity, but dull demand and trade inactive. Old samples sold at about last week's rates, but new made less money. Foreign also easier. Grinding barley cheaper. Other feeding stuffs quiet at late rates. Wheat, white, 28s to 30s; red, 26s to 28s per quarter.

Worksop, Wednesday.—There was a large attendance of both farmers and factors. An exceptionally large show of barley, and best qualities found ready buyers, but secondary qualities were rather difficult to sell. Wheat was a small show, but made fully last week's prices. White wheat, old, 31s to 32s; old red 30s to 31s; white wheat, new, 28s to 29s; red wheat, new, 27s to 28s; best malting barley, 30s to 32s; secondary, 28s to 30s; grinding barley, 23s to 25s; old white oats, 25s to 27s; old black, 24s to 25s; new white oats, 18s to 20s; new black, 17s to 18s; maize, flat, 24s to 25s; ditto round 23s to 24s per qr.

FOREIGN.

The Antwerp wheat market has ruled quiet, and prices have, if anything, been tending slightly downwards. Autumn sowing has been rapidly proceeded with in France, recent rains having rendered field work easier, but floods have occurred in the Valley of the Rhone and some of the Southern Departments. The hopes entertained by French farmers of an improvement in prices in consequence of the less abundant crop of wheat in France this year, have not thus far been realised. Only a comparatively limited business has been passing in wheat at Marseilles; hard wheat, however, has been pretty well maintained. Wheat has also shown little activity at Paris. Flour for consumption has remained at about previous rates in the French capital. Wheat has continued dull at Berlin, and prices have slightly fallen. Advices from Ibrail report only a restricted business in wheat on export account. Wheat has been dull and weak at Konigsberg and Dantzic. Copions rains have fallen in various parts of Spain, and wheat sowing has been proceeded with under favourable conditions. The weather has also been favourable for field work in Italy. Wheat quotations have given way at Odessa, in sympathy with the lower prices reported from New York, and in consequence of an absence of any active foreign demand. The quantity of wheat now en route for Europe is returned at 1,130,000 qrs. as compared with 1,345,000 qrs. at the corresponding date of 1899. The total of 1,130,000 qrs, representing the quantity of wheat now en route for the Continent, is made up as follows:—France, 80,000 qrs; Belgium, 330,000 qrs; Holland, 325,000 qrs; Germany and the North, 95,000 qrs; and Italy, Spain, etc., 300,000 qrs.

Hamburg, Saturday.—Weather remarkably fine for the time of year. Trade quiet, breadstuffs being little inquired after, and the high prices for feeding stuff impel business, farmers trying to get on with their home produce, instead of buying imported grain. The imports during the week amounted to 2,175 tons wheat, 3,453 tons rye, 5,763 tons barley, 9,785 tons maize. Offers of dry new German wheat are scarce, farmers being busy on the fields which prevents their threshing freely. Fine yellow Holstein, Mecklenburg, and Saale is held at 28s to 28s 6d; secondary quality at 26s 9d to 27s 6d per 504lb. f.o.b. Hard Winter No. 2 and River Plate is offering at 29s to 30s 6d per 480lb. c.i.f. Hamburg. Rye quiet. 9 20-25 Taganrog is offering at 22s 6d to 23s per 480lb. c.i.f. Good Saale barley is selling at 31s 6d to 34s, fine is held at 33s to 42s; good Bohemian has been taken at 33s 6d to 36s. Mecklenburg, Prussian, and Holstein at 25s 6d to 28s per 448 b. f.o.b. Russian feeding barley is held at 18s 3d to 18s 9d per 400lb. c.i.f. Hamburg. Mixed maize in scanty supply, but at the same time, owing to the high prices, there is not much demand. We quote—prompt, 21s; Dec., 19s 6d; Jan., Feb., March, 19s per 480lb, c.i.f. Hamburg. River Plate maize, Oct. shipment, 20s 3d to 20s 6d c.i.f. rye terms.—JOHN TATLOCK.

Hamburg, Saturday.—Barley market remains quiet and there is little doing, as buyers decline to operate at the high prices asked by the holders. Prices are certainly open to reasonable counterbids, but decline to agree to a material reduction. The big Burton brewers pick out a few of the best lots for special purposes, but don't entertain any medium quality. I quote good to fine new Chevalier, Saale, and Bohemian, 30s to 34s; extra fine to choice, 35s to 40s per 448lb f.o.b., steamer here.—FRANCIS M. FU[illegible]DENT.

POULTRY AND PROVISIONS.

Smithfield, Saturday.—Fair supplies were offered this morning, and met an improved demand. Quotations. Fowls: Yorkshire, 2s 3d to 2s 9d; Essex, 2s 6d to 3s; Welsh, 1s 8d to 2s; Surrey, 3s to 3s 6d; Sussex, 2s 6d to 3s; Boston, 2s to 2s 6d; Irish, 1s 6d to 1s 9d; Aylesbury ducks, 2s 6d to 3s; country, 2s 3d to 2s 9d; turkey (cocks), 5s 6d to 7s 6d; hen, 3s 6d to 4s 9d; Bordeaux pigeons, 9d to 11d; feathered, 7d to 9d; wild rabbits, 8d to 10d; tame, 1s to 1s 3d each; Australian, 7s 6d to 9s 6d per dozen; pheasants, 5s 6d to 6s; young partridges, 3s to 3s 6d; old, 1s 6d to 1s 10d; young grouse, 5s to 6s; old, 3s to 3s 6d per brace; hares, 3s to 3s 3d; leverets, 1s 9d to 2s 3d; wild ducks, 1s 6d; pintail, 1s 3d; teal, 8d; widgeon, 1s; woodcock, 2s; snipe, 6d; golden plover, 7d to 9d; black, 4d to 5d; venison, haunches, 16s to 18s each; forequarters, 3d per lb.

Liverpool, Saturday.—Bacon: The market rules firm, but the demand is moderate and restricted to immediate needs. We quote, to-day, choice Cumberland cut, 20lb to 22lb, 49s to 52s 6d; 26lb to 30lb, 49s to 52s; 32lb to 38lb, 46s 6d to 51s 6d; long middles, rib-in, 18lb to 22lb, 52s to 58s; clear bellies, 14lb to 16lb, 49s 6d to 52s 6d; 18lb to 20lb, 49s to 52s; Staffordshire cut (lean on), 35lb to 40lb, and Birmingham cut, 33lb to 38lb, 46s to 49s; clear Staffords (lean off), 40lb to 44lb, 44s 6d to 47s; singed Wiltshire, Canadian, 45lb to 55lb, 58s to 63s; American, 40lb to 50lb, 49s to 53s; short clear backs, 12lb to 16lb, 44s to 46s; 16lb to 20lb, 43s to 45s; fat backs (export), 40s to 42s; long clear middles, 30lb to 40lb, 45s to 46s; 40lb to 45lb, 44s to 45s; short clear middles, 45lb to 50lb, 43s to 43s 6d; short middles (rib in), 18lb to 23lb, 48s to 51s. Shoulders, square cut, 12lb to 14lb, 38s to 42s; 14lb to 16lb, 37s to 41s; New York cut, 11lb to 13lb, 34s to 35s 6d per cwt. Hams are in steady request at about unaltered values. We quote choice long cut, 8lb to 12lb, 48s to 54s; 14lb to 16lb, 47s to 52s; short cut and A.C., 10lb to 12lb., 47s to 52s; 12lb to 14lb, 46s to 51s 6d; 14lb to 15lb, 44s to 48s per cwt. Lard is in moderate demand, and c.i.f. quotations being reduced causes lower prices to be quoted on spot. We quote pails and kegs, 34s 6d to 35s; prime Western (in tierces), 33s 6d to 33s per cwt. Cheese.—The demand has been limited, but with improved cables holders are firm, and there is little alteration to report in price. We quote finest Canadian, coloured, cool late makes, 54s to 55s; white, 54s to 54s 6d; States coloured 53s to 54s; white, 52s 6d to 53s 6d. Lower grades, in small supply, sell readily from 44s to 50s per cwt. Butter.—The market is firmer, and with higher quotations for Continental more attention is being given to fancy fresh-made Canadian, which is also improving in value. We quote to-day, fancy Canadian creamery, in boxes, 100s to 104s; finest States, 96s to 100s; finest ladies and imitation creamery, 80s to 88s; finest Danish, 104s to 106s; Australian, 104s to 106s; Irish creamery, 103s to 108s; Cork firsts, 93s; seconds, 85s; thirds, 78s per cwt. —Hobson Bros. Ltd.

Otley: 9 or 10 for 1s.

COLONIAL DAIRY PRODUCE.

London, Friday.—The prices of choicest Australian butter are 108s to 110s per cwt, with a few sales of small lots at 112s. Finest makes here to-day fine, 98s to 99s. The Copenhagen official quotation which stood at 101 kroner when the last report was issued, fell to 95 kroner on 27th September, and since then has risen two kroner a week, and now stands at 99 kroner, which is 13 kroner lower than twelve months since. There has been an easier tone this week owing possibly to the stocks of July cheese which have been released from cold store in Canada and were sold for forward delivery on a basis of 53s to 54s. This is temporarily discounting the market for autumn cheese.—W. Weddel and Co.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Vegetables sold quietly. Good supplies of home-grown fruit met a fair demand. Grapes sold: Hamburgs, 3s to 3s 6d per lb.; Gros Colmans, 2s to 3s per dozen; Muscats, 2s per lb.; Almeria, 1s per lb.; Tomatoes, 2s per bushel; carrots, 1s 6d to 2s 3d; turnips, 2s to 2s 6d; parsley, 1s 6d; leeks, 2s to 3s per dozen bunches; horseradish, 1s 3d per bundle; celery, 12s to 14s per dozen bundles; Brussels sprouts, 1s to 1s 6d per dozen; cauliflowers, 3d to 1s per head; cabbages, 5s to 6s per cwt. Vegetable marrows, 1s per dozen. Potatoes, 60s to 90s per ton. Fruit: English grapes, 6d to 1s 6d per lb.; Dessert, 3s to 5s per barrel; English apples, 1s to 3s per bushel; William pears, 1s 6d to 2s 6d per dozen. Cobnuts, 4s to 7s per cwt. French Walnuts, 6s to 8s per cwt.; Brazils, 5s to 5s 6d per cwt. Bananas, per bunch, 1s to 3s; per dozen, 1s to 1s 6d per bunch. Lemons, per case, 3s to 3s 6d; per box, 1s to 1s 6d per dozen. Oranges, per case, 3s to 4s per cwt.; per dozen, 1s to 1s 6d. Watercress, 3d per dozen bunches. Mushrooms, 1s to 1s 6d per lb.

POTATOES.

Borough and Spitalfields.—Supplies were very large this morning, but the demand was good, and prices ruled steady, with prices for most sorts unchanged. Prices: Penny Blues, 3s to 3s 6d; Early Rose, 3s to 3s 6d; Snowdrops, 3s to 3s 6d; Reds, 3s to 3s 6d; Professor Maerkers, 3s to 3s 6d; Early Rose, 3s to 4s per cwt.

Goole.—Wednesday. Potatoes: Good supplies were made to-day, as an advance of 1s per ton was asked. Prices, 65s to 75s per ton.

HOPS.

Canterbury.—Saturday. There was a large attendance of growers and dealers at the Corn Exchange to-day, when a few parcels of Hops were offered for sale. Business was very quiet, and prices were nominally unchanged. Best Kents realised from £3 10s to £4 per cwt.; seconds, £2 10s to £3; and inferior, £1 10s to £2. Mid and East Sussex Hops have been in request, and prices have ruled firm. Best Sussex realised £3 10s to £3 15s per cwt.

Worcester.—Saturday. There was a fair attendance of growers and dealers at the Corn Exchange to-day, when a few parcels of Hops were offered for sale. Business was very quiet, and prices were nominally unchanged. Best Kents realised from £3 10s to £4 per cwt.; seconds, £2 10s to £3; and inferior, £1 10s to £2. Mid and East Sussex Hops have been in request, and prices have ruled firm. Best Sussex realised £3 10s to £3 15s per cwt.

—ADVT.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

Wales, Scotland and Ireland appear to have secured more nearly average crop yields than England this year. The fine weather late in the season helped the Welshman and the Scot, while Ireland escaped our harsh and ungenial spring. The oat crop in Cumberland, Westmoreland, and the Lake District is grown on many upland acres on little more than the chance of its ripening. This year the fine and warm September enabled farmers to harvest the crop to the last sheaf. There were oats out in North Wales as recently as the 9th inst., but this was due to the wonderfully genial opening of October, which led the farmers to leave them fully to ripen, despite a sowing so late as to render mature grain unlikely. Taking the whole of the United Kingdom it is probable that oats will be the least below average of the year's crops. Wheat is the poorest of the three yields.

The American Bureau issued no report on wheat on the 11th inst., the date for which a return was due. A review of the wheat crop, based on threshings as well as on estimators' reports, will be issued later in the year. This is an approximation to the English system, and will probably give more satisfaction in the end. There is not much doubt expressed concerning the American wheat yield on the markets, where a crop of about 65,000,000 qrs. is the general assumption. This would leave 21,000,000 qrs. for exportation. American shipments for August and September were 4,020,000 qrs., being at the rate of 24,120,000 qrs. *per annum.* On the crop estimate, therefore, we may expect that American exports will soon begin to abate.

The growing crops in the Antipodes are the subject of contrasting advices, for while the five Australian colonies all send excellent reports, Argentina and Chili have suffered from constant rainstorms. As the Antipodean October is our June, the injury to the wheat may easily be imagined.

The supplies of breadstuffs for the week have been as follows: —

	Qrs.
Foreign wheat	422,000
„ flour	160,000
Total	582,000
English wheat	150,000
Total supplies	732,000
„ wants	567,000
Surplus	165,000
Stocks October 8	2,537,000
Stocks October 15	2,702,000

The imports of spring corn included 241,000 qrs. of maize, 235,000 qrs. of barley, and 180,000 qrs. of oats, and in each case were in excess of the current rate of requirements.

The quantity of barley on passage is 653,000 qrs., including 280,000 qrs. Russian, 100,000 qrs. American feeding, 210,000 qrs. malting, and 60,000 qrs. Persian, Turkish, and Syrian; of maize 625,000 qrs. are on passage, as compared with 990,000 qrs. in 1899 and 602,000 in 1898.

Imports since a new cereal year was with us, *i.e.*, from Sept. 1 to Oct. 13, show the following rate of receipts: —

	Qrs. per annum.
Breadstuffs	27,500,000
Barley	7,146,000
Oats	9,810,000
Maize	11,767,000

The receipts of last cereal year were recorded as follows, after deducting exports and re shipments:—

	Qrs.
Breadstuffs	21,031,000
Barley	4,515,000
Oats	7,615,000
Maize	13,340,000

In a consideration of these figures will be found a clue to the chief price movements since October came in. The rate at which wheat has been imported is quite six points in 27—a considerable percentage—ahead of the requirements. The imports of oats have been at a rate probably 30, and possibly 40 per cent. larger than is needed. Hence wheat and oats have, despite moderate deliveries of the home crop, proved reactionary in tendency.

The following is the record of wheat on passage on October 12th for this and three preceding years:—

	Qrs.
From California	895,000
„ North America	385,000
„ South „	210,000
„ Australasia	220,000
„ Russia	125,000
All other countries	70,000
Oct. 12th, 1900	1,905,000
Oct. 12th, 1899	1,605,000
1898	1,205,000
1897	1,575,000

An average of 2,000,000 qrs. on passage is generally assumed, so that October figures are seen to have been moderate for now four consecutive years.

The wheat markets of the last six days have been depressed by reason of the large imports, but as these receipts leave only moderate quantities on passage a gradual recovery may be anticipated. In London the indisposition to do business which involves cash payments from 15th to 31st December may delay the recovery till November is past, but in the provinces an earlier recovery is looked for

Flour is about 6d. lower on the week, and is not a brisk sale even at this decline. The American houses are not holding their flour quite so stiffly as had been thought likely. Strange as it may seem to us, there is a strong movement in France in favour of the Bill giving a bounty of 2s. per sack, or thereabouts, on flour exports. The idea of course is that wheat should be imported, and the French workman get the profit of converting the raw material into flour. So far as we can see, the bill would give England French flour at, allowing for shippers' profits, 1s. per sack under cost price.

Maize has been in improved request. The American Government estimate of the 1900 yield was published on Friday, and the total given, 1,950,000,000 bushels, is 128,000,000 bushels less than that of the 1899 crop. The sale of small round maize is steady, though the price is high.

Barley has been in better demand for malting purposes, but the quality is not first rate, and 30s. is much nearer the mean for malting samples than 35s., which should be averaged in any good year. London now quotes 31s. 9d. per quarter. Feeding barley is 3d. cheaper at the very important market of Bristol, but London is scarcely changed.

THE BALTIC.

The trade in wheat cargoes shows a decline of 3d. to 6d. on most kinds, while maize cargoes are a little firmer on the week. In barley there is no change to mention, but oats and oilseeds have favoured buyers. Recorded sale include:—Wheat: Argentine, at 31s.; South Australian, 31s. 9d.; Walla Walla, 30s. 3d.; Hard Winter, 29s. 9d.; Odessa Ghirka, 31s. 6d.; No. 1 Duluth, 32s. 6d.; and No. 1 Northern, 31s. 6d. per qr. Maize: La Plata, at 21s.; Galatz, at 22s.; Mixed American, 20s., and fine Cinquantina, 27s. 6d. per qr. Barley: Roumanian, at 18s. 9d.; Russian, 18s. 9d., and Persian, at 17s. per qr. Oats: American, at 14s. 6d., and Baltic, 304lb., at 13s. per qr. Linseed; Argentine, at 51s. 9d. per qr., and Cottonseed, Egyptian, at £7 7s. 6d. per ton.

The arrivals of grain and seed laden vessels at ports of call since last review have been nine, as will be seen by the following table:—

Cargo	Total.	Danube	Saffi.	Argentine Republic.	Calif. and Oregon.	Chili, Australia, and N.Z.	Total last week.	Total since Jan. 1, 1900.	Total same time 1899.
Wheat	5	1	—	1	2	2	4	280	254

THIS DAY'S MARKETS.

MARK LANE, MONDAY.

[FIRST REPORT.]

There is difficulty to-day in obtaining promises of October delivery from the docks, and the prospects of a lighterman's strike is disconcerting to buyers and sellers alike. English wheat was offered at 6d. to 1s. decline for ordinary samples, as the supply is increasing for the moment faster than the demand. Foreign wheat was 1s. cheaper, wherever the buyer was content with delivery "as soon as reasonably possible," but wherever "time was of the essence of the contract," full prices had to be paid. Maize, barley, and oats were in rather better request at Friday's full prices. Wisconsin peas are very scarce, and 50s. is paid, while fine white Australian make 45s. per qr. Egyptian beans sell best for the split pulse at a guinea for three cwt. The buckwheat commands over 27s. for good Russian dari, up to 28s. for the very best, and Sorkhum 23s. The price of Tonifred barley is 6d. per 336lb. lower on the week. Turkish canaryseed is also somewhat lower.

CLOSE OF THE MARKET.

By Telephone, 2 *p.m.*

THE MARKET CLOSED 6d. DOWN FOR BREADSTUFFS. 6d. UP FOR CERTAIN SORTS OF FEEDING STUFFS. TRADE WAS NOT BRISK IN ANY STAPLE.

THE FLOUR TRADE.

MARK LANE, Oct. 15th.

The demand for London makes was not brisk, and 6d. decline was allowed both on Town Whites and Town Households. The country supply was large, and all sorts were fully 6d. lower on the week. The mixtures of new English wheat flour with stronger American types sold fairly well, and are in favour with bakers. The fine Hungarian pastry flour is in fair request at currencies. French is neglected. American makes vary, as usual, a good deal in price, 28s. 3d. being paid to-day for Star brand, while 14s. was taken for Red Dog, the latter, of course, feeding flour only. The three great houses of Washburn, Pillsbury, and Morrison asked 26s. 6d. to 26s. 9d. for their finest patents, while such serviceable sorts as Gilt Edge and Happy Medium were quoted at 20s. per sack. Kansas flour made 24s. for Crosby's best, and the best Chicago made 25s. per sack. There is a fair demand for rice at 9os. per ton for feeding purposes, while rice flour is in some request at 22s. for cones and at 24s. for flour itself. Ground rice at 10s. per cwt. goes steadily into use. With rice may be classed off products of maize. These also sell well firm maize starch at £8 15s. per ton, down to coarse maize meal at £5 10s. per ton. Maize cones have now a regular sale at Mark Lane, 19s. per 280lbs. being paid for first grade and 18s. 6d. for secondary. The price of maize grits is about £6 2s. 6d. per ton. Some specially fine white English-made maize germ meal fetches £5 10s. per ton.

LONDON TERM MARKET.

This market is held twice a day, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made :—

WHEAT.—	Oct.	Dec.	March.
	s d.	s. d.	s. d.
Oct. 8 noon	6 9	6 10	7 0
4 p.m.	6 9	6 10	7 0
Oct. 9 noon	6 9	6 10	7 0
4 p.m.	6 9	6 10	7 0
Oct. 10 noon	6 9	6 10	7 0
4 p.m.	6 9	6 10	7 0
Oct. 11 noon	6 8	6 9	7 0
4 p.m.	6 8	6 9	7 0
Oct. 12 noon	6 8	6 9	7 0
4 p.m.	6 8	6 9	7 0
Oct. 13 noon	6 8	6 9	7 0
To-day noon	6 8	6 9	6 11

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States.

The Term market (while the "Baltic" is rebuilding) is temporarily situated at the Great Eastern Hotel, No. 190, Bishopsgate-street, ground floor.

Some speculative sales for June delivery took places this morning at 6s. 11d. per cental ; maize made 4s. 4d. per cental for November delivery.

GRAIN AND FLOUR FACTORS' REPORTS.

The trade for milling offals is firm at the full prices of last week.—RICHARD DOGGETT, Mark Lane.

Our market is very quiet at present. Buyers of cloverseeds are waiting for definite information about the home and foreign crops before operating. Judging by the continuous advance in the U.S. the American crop of red must be as short in quantity as it certainly is poor in quality. Perennial ryegrass is recovering. Mustard and rapeseed continue strong. Birdseeds are dull. Blue peas quiet.—JOHN PICARD AND CO., Mark Lane.

Flour : A quiet trade, at prices 3d. to 6d. lower on the week.—J. S. MEDILL, Mark Lane.

The demand for foreign descriptions of wheat is still very limited, and supplies continuing liberal, sellers have to submit to a reduction of 6d. on the week. Maize on the spot is about 6d. dearer. Barley steady, unaltered. Oats are 3d. dearer. W. P. WOOD AND CO., Mark Lane.

Arrivals of wheat and flour are moderate. Prices have declined 3d. per qr. in wheat, and 3d. and 6d. per sack on flour. Maize sells at 6d. per qr. advance. Grinding barley is 3d per qr. dearer. Oats are firm and occasionally 3d. per qr. dearer.—COVENTRY, Mark Lane.

Offals.—Weather upon the whole rather mild. The demand for bran and other offals only moderate. No change in values.—GREENHILL BROTHERS, Belfast, October 13.

Flour.—Prices are rather easier on the week, and the demand is very slow. Grain.—Arrivals of Indian corn are being wiped up immediately. Value is 1½d. per boll lower. Oats are in better demand. Canadian pease are 9d. per boll lower on spot. Beans unchanged. Barley quiet. Milistuffs—Bran dull. Thirds firm.—MCKINNON AND MCDONALD, Glasgow, October 13.

Wheat quiet with a steady business at late rates except Kansas wheat, which is ½d. to 1d. per 100lb. lower. Flour—There is only a quiet trade passing for flour, and prices show no change from last market day. The Liverpool Millers' Association make no change in the minimum price of English. Maize has experienced a fair consumptive demand at last Tuesday's prices for mixed American. European and Plate have a fair inquiry, values showing no change. Barley for brewing is fairly active, Chilians have a good demand, and full prices are obtainable. Beans are slow, and 3d. per qr. lower for Egyptian and flat kinds, other sorts unchanged. Peas have a quiet trade at ½d. per cental. decline from Tuesday. Oats—English oats have experienced a firm trade, and 1d. advance for new has been registered. Foreign kinds have a very moderate demand, but steady at Tuesday's values. Oatmeal firm trade at unchanged prices. Oilcake—Only a moderate business has taken place, but prices are firmly held at last market day's currencies.—ROSS T. SMYTH, Liverpool, October 13.

THE BALTIC, MONDAY, 1 p.m.

STATE OF TRADE.

Wheat cargoes were neglected, and maize lost the briskness observable at the close of last week. On the other hand there was a rally in oats, which at present low prices are at last attracting speculative purchases for holding till winter demand sets in. Rye cargoes declined 6d and linseed 1s per qr on the week. Cargoes of cottonseed showed a decline of 5s to 10s per ton on the week.

BUSINESS DONE.

WHEAT.—No. 2 Red Winter, 30s 3d, prompt shipment ; No. 1 Northern, 31s 6d, prompt shipment ; Fine Manitoba, 32s 3d, on passage ; Australian, 31s, on passage.

MAIZE.—Roumanian, 19s 6d, April shipment ; Argentine 21s 3d, on passage.

BARLEY.—Azoff, 18s 3d, on passage ; Persian, 16s 9d, on passage.

OATS.—Black Libau, 304lb, 14s 9d, prompt shipment ; St. Petersburg, 320lb, 14s 9d, prompt shipment ; American, 320lb, 14s 9d, November shipment.

LINSEED.—Bombay, 52s, May shipment.

COTTONSEED.—Egyptian, £6 17s 6d, December shipment.

LOCUST BEANS.—Portuguese, £4 18s 9d, November shipment.

OATMEAL.—Canadian Maple Leaf, £10 7s 6d, November shipment.

PROVISIONS.

London, Monday.—The arrivals from Ireland last week were 3,112 bales bacon, and from Continental ports 8,370 bales bacon. The marked for bacon remained very firm, and prices were unchanged, all bacon of every description being wanted as soon as it arrived. The market closed firm. Irish, 64s to 69s ; Danish, 64s to 68s up to 69s ; Canadian, 60s to 64s. The butter market was distinctly better, and sellers were enabled to make an advance of some 2s to 4s generally over previous rates. Danish at 114s to 118s ; Colonial, 104s to 110s ; Irish, 96s to 106s ; Canadian, 98s to 102s. Lard a steady demand at unchanged rates.

CATTLE.

Metropolitan Market, Islington.

Monday, Oct. 15th, 1900.

	British.	Total.	Oct. 16th, 1899.
Beasts	1,470	1,470	1,900
Sheep and lambs	6,480	6,480	8,120
Calves	5	5	15
Pigs	10	10	—
Milch cows	65	65	75

Quotations per 8lbs (sinking the offal).

ENGLISH.	Inferior.	Second.	First.
	s. d.	s. d.	s. d.
Beasts	3 4 —	4 2 —	5 0
Sheep	3 2 —	5 2 —	6 0
Lambs	5 4 ..	5 8 ..	6 2
Pigs	3 0 ..	4 0 ..	4 10

Milch cows, per head, £14 to £21 10s.

British arrivals include as follows :—Scotland, 5 ; Eastern Counties, 30 ; Midland, Home and Western Counties 1,2—, Devon, 40 ; Ireland, 100.

To-day's supply, consisting chiefly of Herefords, Runts, and Shorthorns, numbered fifty more than on Monday last and was but poorly represented in regard to quality. For the primest sales ruled firm at a slight advance in value, and quality also meeting with more inquiry, there being a good trade at Deptford to-day. Fat butchering cows and bulls also sold to rather better advantage. A general clearance was made.

The following are top quotations per 8lb (sinking the offal) :—

	To-day.	Oct. 15th, 1899.
Scotch	4s 10d to 5s 0d ..	— to —
Devons	4s 10d to 4s 11d ..	4s 6d to 4s 8d
Herefords	4s 10d to 4s 11d ..	4s 6d to 4s 8d
Runts	4s 8d to 4s 10d ..	4s 6d to 4s 6d
Lincolns	4s 2d to 4s 4d ..	4s 0d to 4s 2d
Irish	4s 3d to 4s 6d ..	4s 0d to 4s 2d
Fat cows	3s 11d to 4s 0d ..	3s 6d to 3s 8d

The sheep trade for both wethers and ewes ruled firm, higher rates being both asked and obtained. The supply included 958 from the Eastern Counties, 310 Scotch, and 2,050 Irish. For best quality lambs there was a fair inquiry, but prices ruled easier, half meaty sorts were difficult to cash.

Undermentioned quotations are at per 8lbs. (sinking the offal), and are for the best of each class penned :—

	To-day.	Oct. 16th, 1899.
7½ to 8 stone Downs	5s 10d to 6s 0d ..	5s 6d to 5s 8d
9-stone ditto	5s 8d to 5s 10d ..	5s 4d to 5s 6d
10-stone half-breds	5s 4d to 5s 6d ..	5s 2d to 5s 4d
12-stone Lincoln	— to — ..	4s 10d to 5s 0d
10-stone Irish	5s 2d to 5s 4d ..	4s 8d to 4s 10d
10-stone Down ewes	4s 0d to 4s 2d ..	4s 0d to 4s 2d
11-stone half-bred ditto	3s 6d to 3s 8d ..	— to —
5-stone Down lambs	6s 0d to 6s 2d ..	— to —
6-stone half-bred ditto	5s 6d to 5s 8d ..	— to —

A small supply of pigs with a better demand ; best small breeds were quoted at from 4s 8d to 4s 10d per 8lb, sinking the offal.

London Central, Monday. — Good supplies, trade bad. Beef : Carcases, 3s 8d to 4s ; hindquarters, 4s 2d to 4s 8d ; roastings, 5s to 5s 4d. Sheep : Ewes, 3s 2d to 3s 4d ; wethers, 4s 2d to 4s 6d ; hindquarters, ewe, 4s 4d to 4s 8d ; wether, 5s 6d to 5s 10d. Pigs, large, 3s 6d to 3s 10d ; small 4s 2d to 4s 6d.

St. Ives (Hunts), Monday.—Beasts 1,132, sheep and lambs 1,440, pigs 412. Beef, 7s 6d to 8s 3d ; mutton, 7s 9d to 9s 11d ; pork, 6s 10d to 7s ; sows 5s to 5s 6d. Fat store cattle good demand Fat and store sheep fair. Fat pigs good trade. Stores fair. Milch cows fair trade ;prices £14 to £22.

FOREIGN CATTLE.

Deptford, Monday.—No market to-day, as there are no arrivals of either beasts or sheep.

Liverpool, Monday.—The supply of cattle was considerably less than last week. Trade fair, prime quality making fully late rates ; others unchanged. Sheep in large numbers. A slow demand for all classes, rougher descriptions lower. Beef, 6½d to 4¾d per lb ; mutton, 8d to 5½d per lb. At market : 1,457 cattle and 8,775 sheep.

FEEDING STUFFS.

London, Monday.—Linseed Cake : Market very firm, and tending dearer. Decorticated cotton cake very scarce, and 2s 6d dearer ; undecorticated as last. Linseed still rising, 9d to 1s up on the week.

English linseed cake	£8 10 0	to	8 12 6	ex mill
American Western linseed cake	7 17 6	to	—	ex quay
Russian oil cake	8 0 0	to	8 5 0	ex quay
Feeding cake, Primix (10 to 12 per cent. oil)	6 15 0	—		ex warehouse
Decorticated cotton cake	7 5 0	to	—	ex quay
Decorticated cotton meal	6 15 0	to	—	ex quay
London made cotton cake (best)	5 5 0	to	5 7 6	ex mill
Egyptian cotton cake (in bags)	5 0 0	to	5 2 6	ex quay
Burton desiccated ale grains (bags included)	4 10 0			on rail, Burton
Rangoon Rice Meal	4 15 0		—	ex warehouse
Russian linseed in bulk, per 416lbs	2 17 6	to	—	ex warehouse
Calcutta linseed in bags, per 410 lbs	8 1 0	to	—	ex warehouse
American linseed, in bulk, per 416lb	2 15 0			

—ROBT. AND JOHN HEWETSON.

SEEDS.

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., write that a quiet feeling just now characterises the seed market. The recent speculative inquiry for red cloverseed has fallen off for the moment, whilst of consumptive sowing requirements there are at present few to be satisfied. It is estimated that the new crop of English red cloverseed will prove scarcely one-fourth of last year's. Meantime, prices all round show considerable steadiness with respect to winter tares and seed rye. As the supply of these exceeds the demand, lower quotations are accepted. For mustard and rapeseed on the other hand the tendency of prices is upwards. Birdseeds continue dull and featureless. Blue peas and haricot beans, although in diminished request, keep firm in value. The Board of Trade Returns give the imports of clover and grass into the United Kingdom for the month of September as 14,573 cwts. value £26,540, as against 14,416 cwts., value £41,487 for September, 1899.

HOPS.

London (Borough), Monday.—Messrs. W. H. and H. Le May, hop factors, 67, Borough High-street, London, S.E., report : There is a decided improvement in the hop market, and all grades have benefited by it. Buyers now realise the absolute shortness of the growth.

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

The trade for fat beast at Islington on the chief market day of the week opened with a show of firmness both in regard to tone and value, but after the wants of the principal buyers were met it became of an extremely dull and dragging nature, sales having to be forced at less money; though towards the finish sellers were willing to accept 2d. per 8lbs. less money, a clearance could not be made, notwithstanding that the supply was much smaller. A few Scotch beasts arrived, thus marking the start of the season, which begins three weeks earlier than last year. Fat butchering cows were in steady demand at the beginning of the week's business, but finished off dull and heavy at less money. Fat bulls, on the other hand, being in short supply, sold firmly at a slight advance on last week's quotations. Very little demand for rough cattle, sales of which were chiefly confined to Thursday. At Deptford, where the supply was shorter, trade ruled firmer and steadier, each market day showing a slight advance in value, more especially on Saturday. The total number of beasts offered for sale on both markets was 5,233—previous week, 5,852—consisting of 1,500 British and 3,733 foreign, these latter comprising 2,694 from the United States, 1,039 from Canada. The following were the top rates paid per 8lbs. (sinking the offal): 90-stone Herefords, 4s. 10d.; 85-stone Runts, 4s. 9d.; 80-stone Devons, 4s. 9d.; 90-stone Dublins, 4s. 4d.; 95-stone Waterfords, 4s. 2d.; 100-stone Lincolns, 4s. 4d.; 110-stone ditto, 4s.; 90-stone States, 4s. 2d. to 4s. 5d.; 85-stone ditto, 4s.; 85-stone Canadians, 3s. 9d. to 4s.; 100-stone fat cows, 3s. 8d.; 100-stone fat bulls, 3s. 4d. to 3s. 6d. There was a shorter supply at Islington in the sheep market, but an increase in the foreign arrivals. These latter met with a slow but steady trade at full value. At Islington trade for wether sheep ruled firm and steady, late rates being maintained. On the other hand, ewes were more difficult to dispose of, besides being easier in price; for best quality lambs there was a good inquiry at last week's quotations. The total number of sheep and lambs penned at both markets was 8,225 (previous week 7,270), consisting of 7,220 British and 1,003 Canadian. Leading pens made per 8lbs. as follows (sinking the offal): 7½ to 8 stone Downs, 5s. 10d.; 8-stone Scotch, 5s. 9d. to 5s. 10d.; 9-stone Downs, 5s. 8d.; 10-stone ditto, 5s. 6d. to 5s. 8d.; 10-stone halfbreds, 5s. 4d. to 5s. 6d.; 10-stone Irish, 5s. 2d.; 12-stone halfbreds, 5s.; 10-stone Down ewes, 4s.; 11-stone halfbreds, 5s. 6d. to 3s. 8d.; 5-stone fat Down lambs, 6s. 2d. to 6s. 4d.; 6-stone halfbred ditto, 5s. 8d. to 5s. 10d. The supply of calves was smaller than usual, numbering only thirty head, for which trade was very dull at fully 4d. per 8lbs. less money, the best being quoted at 5s. 4d. per 8lbs. Bad trade for pigs at less money, top value 4s. 4d. to 4s. 6d. per 8lbs.

Trade in the West.

The stock markets, with only very moderate deliveries, are keeping exceedingly firm, and in some cases more money has been realised for sheep for wintering purposes. Good class ewes are marketing especially well, especially good matching lots, which make from 47s. up to 58s. each, more ordinary lots selling from 35s. to 45s. or 46s. Working lambs are also much wanted at prices ranging from 23s. up to 32s. apiece. Store stock have also benefited in a corresponding ratio. Barreners are worth quite 10s. to 20s. per bullock more, and young stock also commands better prices. We can hardly quote the trade as good for fat stock. There has been a slight reaction in beef, but this is attributable as much to the excessive supply as to anything; 10s. 6d. to 11s. per score is now about the best prices. Mutton, with shorter deliveries, has been a sharper trade, but prices are still about 7d. to 7½d. per lb., and lamb 8d. to 9d. Veal is very dear, and one of the best selling things. Pork is also a very firm trade.

Trade in Ireland.

With a fairly large increase of both cattle and sheep in Dublin market last Thursday, trade started rather sluggishly, the London shippers being the only ones who bought with any freedom, and as the class wanted by them was limited, full prices had to be paid. As the day wore on the dullness experienced at the opening of the market increased, and second quality beef was very hard to place at a fall from 10s. to 15s. Best ox and heifer beef made from 52s. 6d. to 56s., and some extra lots 57s. 6d. to 59s. 6d.; good second class beef, 46s. to 50s.; and inferior, 40s. to 44s. per cwt. In the mutton department there was very little change from previous day. We [illegible] particularly 600 head of sheep. Prime [illegible] of aged wethers and ewes suitable for [illegible] sumption. Dublin victuallers moved very slowly, and consequently late rates were hard to maintain. Inquiry from cross-Channel buyers was fairly active for well-finished hoggets and large fat lambs, and full values realised; but thin inferior sheep neglected. Best wether mutton, 6d. to 6½d.; ewe, 4½d. to 5½d. per lb. Prime veal scarce and worth 7d. to 7½d. per lb.; inferior, 4½d. to 6½d. per lb. Really choice springers and newly-calved cows sold freely at late rates, but inferior kinds hard to sell. Number of cattle in market, 4,652; sheep, 7,807. A good increase in the number of pigs, but sales slow, and a general fall of about 1s. per cwt. all round.

Trade in Scotland.

John Swan and Sons, Limited, give the following as their report on above for the current week:—There have been full supplies of fat cattle on offer this week, with an unusual proportion of the best descriptions. Owing to the excessively bad weather, trade throughout has ruled quieter, and prices for the best cattle 10s., and for secondary about 20s. under previous weeks. Heavy supplies of fat sheep and lambs; these have met a decidedly worse trade, at an average fall of quite 2s. per head. Calves and pigs met a steady demand at previous week's prices. There has been a larger supply of store cattle on offer; trade has been dragging, and while the better class got well sold, a considerable number of secondary two-year-olds and inferior supplies left unsold. A large number of store sheep, many very inferior. Trade quiet, and with difficulty previous prices were obtained. A smaller number of milch cows, and met a good trade at about 20s. of an advance. Quotations: Best beef, 7s. 6d. to 8s. 3d.; secondary, 6s. 9d. to 7s. per stone; mutton, 7½d. to 8d.; secondary, 6½d. to 7d. per lb.

LONDON.

London Central, Wednesday.—Fair supplies, but trade without improvment. Arrivals of beef included 50 tons Scotch, 350 Liverpool sides, 1,200 hindquarters, and 600 forequarters American refrigerated. Quotations: Beef, Scotch, short sides, 4s 4d to 4s 8d; long, 4s 2d to 4s 4d; English, 4s to 4s 2d; American Deptford-killed, 3s 10d to 4s; Liverpool, 3s 10d to 4s; American refrigerated hindquarters, 3s 9d to 3s 11d; forequarters, 2s 6d to 2s 8d. Mutton: Scotch, 4s to 4s 4d; English wethers, 2s 10d to 4s 2d; ewes, 2s 10d to 3s. Veal: English and Dutch, 3s 8d to 4s 4d. Pork: English, 4s to 4s 4d; and Dutch, 3s 8d to 3s 10d per 8lb.

London Central, Friday.—Good supplies met good demand at firm prices. Arrivals of beef included 80 tons Scotch, 450 Liverpool sides, 3,800 hindquarters, and 2,700 forequarters American refrigerated. Quotations: Beef, Scotch, short sides, 4s 6d to 4s.10d; long, 4s 4d to 4s 6d; English, 4s to 4s 2d; American, Deptford-killed, 3s 8d to 3s 11d; Liverpool, 3s 8d to 3s 10d; American refrigerated hindquarters, best, 3s 10d to 4s; forequarters, 2s 9d to 2s 10d. Mutton: Scotch, 4s 8d to 5s; English wethers, 4s 4d to 4s 6d; ewes, 3s 6d to 3s 8d; Canterbury, 2s 7d to 2s 10d; Wellington, 2s 5d to 2s 7d; Sydney and River Plate, 2s 3d to 2s 4d. Veal: English and Dutch, 3s 8d to 4s 4d. Pork: English, 4s 4d to 4s 8d; and Dutch, 3s 10d to 4s per 8lb.

Islington, Thursday.—A fair number of beasts offered for a Thursday's market, being 40 head more than on this day a week ago, and mainly comprised fat bulls and rough descriptions, for which trade was slow. A small supply of sheep penned, but proved adequate to buyers' requirements, trade for both wethers and ewes ruling dull at about late quotations —7½ to 8 stone down wethers, 5s 8d to 5s 10d; 9-stone ditto, 5s 6d to 5s 8d; 10-stone half-breds, 5s 4d to 5s 6d; 10-stone Down ewes, 3s 10d to 4s; 11-stone half-bred ditto, 3s 4d to 3s 6d. Calf trade steady, the best on offer making 5s 6d to 5s 8d. Pigs were in moderate demand. Neat, small, 4s 6d per 8lb, to sink the offal. Total supplies—80 beasts, 1,100 sheep, 30 calves, 100 pigs, and 5 milch cows.

COUNTRY.

Ashford, Tuesday.—Best beef did not fetch more than 11s 6d per score, with limited demand. A few good Sussex cows made 10s 6d per score, but the usual rate for ordinary cows was not above 10s. Wether mutton fetched 4s 8d to 5s per 8lb, and barrens 3s 8d to 4s. Veal sold well at about 5s 8d per stone. Pork 6d cheaper on the week, small roasters making 10s 6d per score.

Basingstoke, Wednesday.—At Raynbird and Sons' sale yard there was a fair attendance of buyers to meet a supply consisting of 47 fat beasts, 47 calves, 458 fat sheep and lambs, 278 pigs, and 58 head of dairy and store cattle, for which the following prices were realised:—Fat beasts, £13 to £19; fat calves, 80s to £5 10s; small, 20s to 50s; fat wethers, 40s 6d to 52s; fat ewes, 34s to 40s; fat lambs, 24s to 51s; fat hogs, 60s to 90s; porkers, 38s to 54s; small, 24s to 36s; store pigs, 11s 6d to 24s; cows, £7 10s to £20 5s. Best quality fat beasts of moderate weights were in good demand; for all other classes the biddings were slow, with prices drooping. Shorthorn steers made up to £19; heifers, £18 15s; and cows, £17. A short supply of fat sheep and lambs were cleared at full prices. Hants down wethers and young ewes made 45s, 43s 6d, 48s 6d, 47s, 46s, 52s, 44s, 52s, 44s, 48s, 42s, 47s, 40s 6d, 45s; 10 months old ditto, 48s, 37s, 45s 6d, 37s 6d, 51s, 45s, 39s, 46s 6d, 38s, 38s 6d; ditto Southdown, 33s 6d; Scotch wethers, 36s 6d; old ewes, 37s, 34s, 38s 6d, 35s, 40s, 36s 6d, 38s, 38s 6d; Dorset ewes, 38s 6d; Southdown ewes, 34s; choice 3 months old sucking lambs, 24s, 34s, 36s 6d, 38s, 35s. With a short supply of dairy cows prices ruled lower, with a slow trade. Store cattle were cleared with a better inquiry. Fat calves were disposed of at late rates. Fat hogs with a larger entry realised firm prices with a ready demand. Fat porkers met a brisk trade at late rates. Store pigs made less money. Ruling values:—Prime quality Devon beasts, 7d to 7½d per lb; ditto Shorthorn ditto, 6d to 6½d per lb; bulls, cows, and inferior ditto, 5d to 5½d per lb; best quality sheep, 8½d to 8¾d per lb; second ditto, 7½d to 8d per lb; old ewes, rams, and inferior ditto, 6d to 6½d per lb; choice fat sucking lambs, 8½d to 9d per lb; fat calves, 4d to 5½d per lb; fat hogs up to 9s 6d; and porkers, 10s 6d per score.

Boston, Wednesday.—Best beef, 8s; cow beef, 6s 6d to 7s per stone; stores, £9 to £13; strong stores, £13 to £15; milch cows, £17 to £20 10s; heifers, £14 10s to £17; calves, 60s to 65s; wether mutton, 7½d to 8d; ewe mutton, 5½d to 6d per lb.; stores, 2s 6d to [illegible] wethers, 15s to 20s; lambs, 30s to 35s.

Braintree, Wednesday.—A brisk trade at Messrs. Bells auction mart. Stock penned: 27 beasts, 276 fat sheep, 67 hogs, 4 in-calving cows, 1 calves and 116 store sheep. Prices: Best, 4s 8d to 5s; and middling, 4s to 4s 6d per stone; pigs, sold to 10s per score.

Calne.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne:—

Prime stores.	Thickness of fat in any part of the back.	Price per sc.
6 sc 10 lbs to 9 sc 10 lbs	2½ in. and under	9s 6d
Under 10 sc 10 lbs	Not exceeding 2½ in.	9s 0d
Under 11 sc 10 lbs	Not exceeding 2¾ in.	8s 3d
Under 12 sc	Not exceeding 3 in.	—

Any pigs outside these limits at their value. Half truck, 12 pigs. Whole truck, 25.—CHARLES AND THOMAS HARRIS AND CO., Limited, Calne, Wilts.

Cambridge, Monday.—The stock exhibited for sale at this market and the prices obtained were as follows:—Beasts, 842; sheep, 984; pigs, 313; horses, 3. Beef, 7s to 8s per stone; mutton, 4s 4d to 5s 8d; pork, 5s 9d to 7s. A much larger show store beasts, slow market, not all cleared. Fat beasts, very little alteration in the trade. Fat sheep a better trade all round. Stores, not so many to hand and all cleared. Fat pigs, a good brisk trade at late rates. Stores, short supply, brisk trade at more money. Hay, straw, and roots short supplies.

Canterbury, Saturday.—Not quite so heavy a supply of sheep, but trade very slow, except for a few of the best breeding sheep and lambs. The best lambs made 24s 6d per head, old sheep from 12s 6d to 22s 6d, and better class 27s per head. Wether tegs 37s 6d, and working ewe tegs 27s to 34s. The demand for horned stock was not brisk, but some cows and calves were sold at from £15 to £17 10s.

Carlisle, Saturday.—There was an exceptionally good show of Irish store cattle on the sands, the supply consisting of between 600 and 700 heifers and bullocks. The attendance of buyers was about the average, and a steady going trade was experienced. The smaller heifers realised from £7 10s to £10 10s, and heifers of the best descriptions changed hands at £15; bullocks were quoted at £18 10s. Young pigs were a small show, and sold slowly at 20s to 24s each.

Dorchester, Saturday.—Large supplies of store cattle, and one of the best trades for some time was experienced for milch beasts. The best made from £17 10s to £23 10s; others sold well from £13 10s to £15; barreners, £25 to £30 pair; cows, £12 10s to £18 pairs; in-calf heifers, £18 10s to £21. Good demand for fat beasts. Fat heifers sold from £17 10s to £19 10s; cows, £14 5s to £15 10s; steers, £16 15s to £19. Small supply of sheep. Down ewes made from 38s to 42s; Loon wethers, 41s to 43s 6d.

Dublin, Thursday.—Demand slow for all classes of cattle. Choice finished bullocks made last week's rates but all other descriptions were more difficult to realise and prices still show a falling tendency. Quieter trade in the sheep department at barely late rates, some middling and inferior lots remaining unsold. Cattle (best), 31s to 34s per cwt. Middling and inferior meated sorts, 27s to 30s per cwt. Mutton, 5½d to 6¾d per lb; extreme 7d per lb.—GANLY, SONS, AND CO.

Glasgow, Wednesday.—Supplies of cattle and sheep less this week. Prices steady. Top Scotch cattle scarce, 68s; top Irish, 66s per cwt. Top mutton, 8½d; secondary, 7d to 7½d; top lambs, 8½ per lb. Dead meat quieter owing to milder weather; best Scotch beef, 5¾d to 6d; States, 5½d to 5¾d; Canadians, 5¾d to 5½d per lb.

Hereford, Wednesday.—Return of stock brought to the cattle market this day:—Bullocks and cows 460, calves 51, sheep and lambs 2,104, pigs (fat and sows) 26, sucking pigs 44, pigs (stores, not more than ten) 177, pigs (stores, more than ten) 65, horses 9, colts 1. Prices of stock: Best beef, 6d to 7d per lb; wether sheep, 6½d to 8d per lb; ewes, 5½d to 6d per lb; veal, 9d per lb; lamb, 8½d per lb; pork, 4½d to 5d per lb; bacon, 4d to 5d per lb.

Ipswich, Tuesday.—Messrs Robert Bond and Sons report a short supply of fat cattle, which again sold remarkably well, the attendance of buyers being large. The top price reached was £25. Fat sheep were not so numerous; trade was much the same, shearlings making up to 63s. A good entry of store sheep were penned, making up to 38s. A large entry of calves which made rather less money. Fat swine were in excellent demand, and in some cases higher prices were obtained. Stores sold without alteration. This being a special sale of grazing cattle, 40 cows and heifers were penned, including 22 red polls, making up to £20. There was a fair attendance of buyers round the store cattle ring, and prices corresponded with those of last week. Some pure Shorthorns made up to £9 15s. At the second Michaelmas sale of horses held at drill hall, 106 animals were catalogued. A capital trade was experienced for cart horses and colts, nearly all changed hands. Numbers at sale and market:—Beasts 913 calves 61, sheep 2,370, pigs 1,193, horses 154.

Leeds, Tuesday.—To-day's supply of cattle compared with last Tuesday shows a decrease of 37, comprising a good selection of home district and North of England stock, together with a large number of useful Irish animals. Best qualities were in fair request, but middling and inferior lots were not so easily disposed of, business generally ruling slow. The choicest home-fed heifers and bullocks made 6¾d to 6¾d per lb, and a pen of exceptional quality were reported to have realised slightly more than the latter figure. The best of the Irish cattle sold at 6¼d; good useful beef, 6d; and inferior and cow beef, from 5d per lb. There was a considerable reduction in the number of sheep offered, 1,550, against 1,930 last week. The demand was generally without improvement on recent markets, both prime and second qualities ruling slow at about late rates. The best small shearlings realised 36s; heavy and large sheep, 7d to 7¼d; ewes, etc., 5d to 6d per lb. Calves show an increase on last week. The best veal lots made up to 7¾d per lb. Dairy cattle were only a small entry, and the moderate business passing was at about recent prices. Good milkers made from £15 to £20. Numbers at market—cattle 561, sheep 1,550, calves 19.

Leicester, Saturday.—Only moderate supplies of stock and after the heavy transactions at the fair business sluggish at easier rate. Milch cows, £15 to £20 each; bullocks, £9 to £14 per head. Young stock and sheep were slow trade.

Lincoln, Friday.—Good supply; absence of demand. Best milch cows, £20 to £22; secondary, £17 to £19. Some good two-year-old steers fetched £12 12s to £15 15s. Young stock sold at from £5 to £8. Sheep were penned in extraordinary numbers. Best lambs, 32s to 35s; middling sorts, 20s to 24s; cull ewes, 28s to 30s; young ewes, 37s to 42s. Trade on the whole very slow. Same remark applies to business at pig market. Suckers realised 13s to 18s, and stores, 25s to 50s.

Newcastle, Tuesday.—A slightly smaller show of cattle than a week ago, the numbers being 2,025, against 2,292. Trade was slow and heavy, but prices were not quotably lower. Prime heifers made 7s 9d to 8s; prime steers, 7s 6d to 7s 9d; second class animals, 6s 6d to 7s; coarse and inferior, 5s to 6s 6d per stone, sinking the offal. Sheep and lambs were a larger show—5,114 against 7,967. Trade was dull. Prices:—Small, 8d; large fat, 7d to 7½d; ewes 5½d to 6d; tups, 5d to 6d; lambs, 6d to 6½d per lb. Calves numbered 64 against 80 last week, and prices showed no change at 5d to 9d per lb.

Newcastle, Tuesday.—Slow trade prices with buyers. Numbers:—Cattle [illegible], sheep and lambs [illegible], calves 64, pigs, none. Prices:—Long-fed beasts, 7s 6d to 8s; short, 6s to 7s; cows and heifers, 6s to 7s 6d per stone; mutton, 5d to 8d; lamb, 6d to 8½; veal, 5d to 9d per lb.

Newport, Wednesday.—The supply was not quite so large as last week, but was [illegible] Trade was [illegible] Prime [illegible] Best wether mutton, 7½d to 8d; ewes, 6½d to 6¾d; lamb, 7½d to 8d; veal, 6½d to [illegible] per lb.

Norwich, Saturday.—The supply of stock consisted mostly of [illegible] Trade was [illegible] Prime [illegible] Best beasts were [illegible] at 7s 6d to 8s per stone. Store sheep and

lambs were in pretty good supply; trade was dull at last week's prices, lambs making 28s to 36s, and keeping shearlings 40s to 50s per head. Fat sheep were quoted at 8s 6d to 9s and 9s 6d per 14lb.

Ripon, Thursday.—Wheat has a dull tone, and a light trade is being done. A fair attendance. Wheat, English, new, 28s to 30s per qr; wheat, English, old, 31s 6d to 32s 6d; ditto foreign, 31s to 35s; barley malting, 24s to 28s; ditto grinding, 23s to 24s; oats, old, 25s to 26s; ditto new, 17s to 19s; maize, round, 26s to 27s 6d; ditto flat, 23s 6d per qr; beans, old, 1s per stone.

Romford, Wednesday.—There was a fair supply all round, and trade was about up to the average. Best fat beasts made 4s 4d to 4s 6d per stone, and middlings 3s 10d to 4s; calves, 4s 8d to 5s 2d; best sheep, 5s 4d to 5s 8d; middlings, 5s 2d to 5s 4d; small porkers, 4s to 4s 4d; large hogs, 3s 6d to 3s 10d.

Salford, Tuesday.—The supply of cattle was about the same as last Tuesday. Primo animals met with a better demand at late rates, but trade for medium and inferior was slow, and prices tended in favour of buyers. There was little difference between the number of sheep and lambs penned to-day and the supply of last week. Choice quality of both were in good demand at the prices ruling last market day, other kinds being slow of sale at easier prices. A smaller supply of calves, and a better trade at late rates. Quotations:—Cattle, 5d to 6½d; sheep, 6d to 8½d; lambs, 7d to 8½d; calves, 5½d to 7½d per lb. At market—Cattle, 2,468; sheep and lambs, 7,864; calves, 125.

Sheffield, Tuesday.—The show of milch beasts was larger than last week, and a very fair trade was done, the best qualities making from £17 to £23 10s; secondary, £13 to £15.

Shrewsbury, Tuesday.—Fairly good trade all round. Larger supplies of cattle and pigs. Quotations:—Beef, 6½d to 7½d; mutton, 7d to 8½d; and veal, 7½d to 8½d per lb. Porket pigs, 9s to 10s; and bacons, 8s to 9s per score. Cows, with calves, up to £23. Hay, up to £4. Number offered:—34 rams, 676 cattle, 83 cows with calves, 2,992 sheep and lambs, 85 calves, 35 fat, 177 porket, and 326 store pigs.

Spalding, Tuesday.—Owing to the election, many of the usual buyers did not attend, and trade was dull, beef being decidedly lower, the top not being more than 7s 6d per stone. Cows sold well, but stores were a poor trade. In the sheep market there was a fair supply, and the best realised 8d per lb.

Stockton, Wednesday.—There were on offer 237 cattle, 3 calves, 551 sheep, 250 lambs, and 332 pigs. Larger show of cattle, but trade was slow, at 7s 6d to 8s per stone for the best, and 6s to 6s 6d for rougher kinds. Calves, 7d; young sheep and lambs, 8d; ewes, 6d; and tups, 5d per lb.

Taunton, Saturday.—Fairly good supply. Moderate attendance. Rather quiet trade.

Thame, Tuesday.—There was a full supply of stock at market, but the trade was rather dragging, except for the best qualities, which maintained their former good prices. Mr. Bond's sale comprised 91 fat beasts, and a few down calving heifers, 246 fat sheep, 144 fat and weaning calves, and 190 fat and store pigs. Fat bullocks made £16 to £19; fat heifers, £14 to £16 12s 6d; down calving heifers, £13 to £14 7s 6d; fat wethers, 48s to 57s; fat ewes, 36s to 47s 6d; fat calves, £3; to £4 15s; cow calves, 22s to 71s; bull calves, 18s to 60s; fat pigs, 9s 6d per score; stores a better trade.

Wakefield, Wednesday.—There was a small attendance of butchers and a larger supply of beef—1,637 fat beasts against 1,454 last week—and this caused the beef trade to be of a slow and dragging character. Choice beef, which was scarce, made 6½d per lb, useful Irish animals, which were freely offered, 6½d, and inferior qualities 5d to 6d. There was a much lighter show of sheep than last Wednesday, only 2,487 being penned against 2,877. Notwithstanding the light supply the mutton trade ruled slow, and late prices were unchanged. Choice small and young sheep sold at 8d to 8½d per lb, good strong sheep 7d to 7½d, and ewes and tups 5d to 6d. The veal trade was by no means brisk; fat calves changed hands at 6d to 7½d per lb. A good show of milch cows, but a poor attendance of buyers, and prices £1 per head lower. Good milkers made up to 20 guineas each, inferior £13 to £18.

Wakefield, Wednesday.—Rather a better show of beef, but the trade passing was very slow even at a reduction of a farthing per lb. Best qualities made 6½d, other kinds from 5d. Quiet trade in mutton, about 400 less being penned; best qualities, 8d to 8½d; fat and heavy animals, 7d to 7½d. Numbers at market:—Beasts, 1,637; sheep, 2,487.

Worcester, Saturday.—There was a fair supply of beasts and sheep. Trade quiet, without quotable change in values. Best beef, 6½d to 7d; inferior, 5½d to 6½d; wether mutton, 7d to 8d; ewes, 5d to 6½d; and veal, 7d per lb. Pork pigs, 9s; and bacons, 9s 6d to 10s per score.

York, Tuesday.—Good show of cattle. Trade for both beef and mutton met a better demand than for the last two weeks. Beef made 7s to 7s 9d per stone; shearlings, 7½d to 8d per lb. Ewe mutton was still only slow to sell. Pork pigs in good demand at 7s per stone. Numbers sold—Beasts 203, calves 9, sheep and lambs 532, pigs 88.

York, Thursday.—The market was considerably affected by clashing with the annual cattle fairs at Hull and Malton. Very few store cattle, either English or Irish, were on offer, and prices were about the same as last week. Although this was one of the weekly markets held during this month, there was a fair number of sheep offered, which sold slowly. North country ewes, 40s to 48s; gimmers, to 46s; lambs, 29s to 36s; Masham ewes, 36s to 52s; lambs, 18s to 24s; shearlings, 38s to 42s; twice crossed shearlings, 42s to 48s; twice crossed lambs, 27s to 33s; Southdown ewes, 38s to 45s.

FOREIGN.

Deptford, Wednesday.—Beast supplies 723, a decrease of 1,097 as compared with last Wednesday's figures, and comprised 307 United States and 416 Canadian. A good demand prevailed, and trade was firm at 3s 11d to 4s 2d for the former, and 3s 6d to 3s 9d for ranch of good quality of the latter. 1,003 Canadian sheep met a slow sale at 4s to 4s 2d per 81b to sink the offal.

WOOL.

London, Tuesday.—The fifth series of London sales of colonial wool commenced to-day, with catalogues comprising 11,571 bales out of an available total of 366,000 bales. There was a large attendance and fair competition. Prices for Australian merino, fine crossbred, and for Capes show a fall of 15 per cent. from July closing rates, while low crossbreds command former rates or are but slightly easier. The list was closed on the 14th ultimo, when the fresh arrivals amounted to 251,321 bales (219,924 bales Australasian and 31,397 bales Cape). Deducting what has been forwarded direct, but adding the wools held over from last series, the total available amounts to 340,000 bales. As at present arranged, the series will last until the 10th November.—HELMUTH SCHWARTZE AND CO., 3 and 4 Moorgate Street Buildings, E.C.

London, Tuesday.—The fifth and concluding series of public sales of Colonial wool for the current year commenced this evening, after the long interval of eleven weeks. The series as arranged at present will terminate on the 10th proximo, although the customary curtailment will undoubtedly be made. Three catalogues were submitted, and jointly totalled 11,571 bales, which comprised the following:—1,583 New South Wales and Queensland, 1,148 Victorian, 165 Tasmanian, 554 West Australian, 392 Cape, with the heavy proportion of 1,773 consisting of New Zealand. A good attendance of buyers was assembled from all parts, and competition on the part of the home trade was carried on with increased spirit than attended that of last sales, but continental representatives, to a great extent, played the part of spectators so far as bidding was concerned. In regard to currencies, the course was favourable to buyers, the following alterations being discernable on comparison with rates current at the close of last sales. Australasian and South African merinoes 10 to 15 per cent down, fine crossbreds 10 per cent. lower, and medium and coarse ditto unchanged to exceptionally 5 per cent easier. The total net available quantity for these auctions amounts to 366,000 bales, included being 160,000, which represents the accumulation of stock held over from previous sales. The following form the total:—97,000 New South Wales, 35,500 Queensland, 18,000 Victorian, 7,500 Tasmanian, 15,000 South Australian, 5,000 West Australian, 122,000 New Zealand, and 33,000 Cape and Natal. Queensland greasy combing marked Nive Downs sold 7½d to 8½d; Victorian scoured ditto Clyde, 1s to 1s 7d; clothing of the same mark, 1s 2½d to 1s 4½d; lambs, 9d to 1s 4½d. Victorian—greasy combing, Strathkellar, 7d to 7½d; comeback, 8d; clothing, 7d. New Zealand—greasy combing, Uover J, Mulholland, 7d to 8d; clothing, 7d.

London, Wednesday.—At public sale this evening two catalogues were brought forward, and jointly amounted to 12,546 bales, which comprised the following:—4,103 New South Wales and Queensland, 2,078 Victorian, 798 West Australian, 16 Tasmanian, 4,107 New Zealand, 1,382 Cape and Natal, 19 Jamaica, and 24 Spanish. A full attendance of buyers was assembled, and good competition prevailed, particularly on the part of the home trade section, and although no appreciable change can be recorded in values, slightly more regularity was discernible. New South Wales scoured combing, marked A. Tobin and Sons over Wingadee, sold 1s 2½d to 1s 5½d; clothing, 1s 5d; greasy combing, Myall Creek over New England, 8½d to 9d; clothing, 8½d; combing Kallara, 6½d to 7d; clothing, 6½d to 6¾d; pieces, 6d to 7d. Queensland—greasy combing, Walltown over Darling Downs, 8d to 9d; clothing, 7¼d to 8½d. Victorian—greasy combing, M. M. and Co over Burrabage, 7d to 8½d; clothing, 7d. New Zealand—scoured combing, Balmoral, 11½d to 1s 3½d; pieces, 1s 1d to 1s 2d.

London, Thursday.—At auction this evening 13,391 bales were brought forward by Messrs. Chas. Balme and Co. and comprised the following:—5,241 New South Wales and Queensland, 1,942 Victorian, 288 South Australian, 165 West Australian, 13 Tasmanian, 4,262 New Zealand, 1,489 Cape and Natal, and 23 Buenos Ayres. A full assembly of buyers was present, and competition ruled active, being more general than on the past two evenings, and as a result opening rates were fully upheld. New South Wales—greasy combing, marked Gunnee, sold 8¾d to 9½d; pieces, 7½d; bellies, 6d to 7¾d; scoured combing, T.E, and Co. over E in circle and Spring Vale, 11d to 1s 1½d; clothing, 6¾d to 1s; combing ditto over Flood Vale, 11d to 1s 3d; clothing, 1s to 1s 4½d. Queensland—greasy combing, D.S.W. over Kilcummin, 7¾d to 9d; clothing, 16¾d to 7½d; Queensland scoured combing, Durham Downs, 1s 3½d to 1s 5½d; lambs, 1s 2d to 1s 3½d; pieces, 1s 3½d. Victorian—greasy combing, Quamby, 8¾d to 10½d; pieces, 5½d to 8¾d; lambs, 6d to 10d. New Zealand—greasy combing J B over R in diamond, 7½d to 8½d; clothing, 6½d. Cape—snow white, Waverly Mills, 1s 2½d to 1s 5½d.

London, Friday.—Wool, English, per packet of 240 lb—Fleeces, Southdown hoggs, £8 to £11 10s; half-bred hoggs, £7 to £8 10s; ditto wethers, £6 10s to £8; Kent fleeces, £6 to £7; Southdown ewes and wethers, £8 to £11 10s; Leicester ditto, £6 to £7. Colonial, per lb: Victorian, fleece, superior, 1s 4d to 1s 5d; scoured good, 1s 5d to 1s 5½d; scoured average, 1s 3d to 1s 4d; greasy average to fair, 9d to 10d; New South Wales, scoured average, 1s 1d to 1s 2d; greasy average, 7d to 8d; South Australian, greasy average, 5½d to 6½d; New Zealand, scoured average, 1s 2½d to 1s 3d; greasy average, 7½d to 8½d; Cape, scoured superior, 1s 1d to 1s 5d; fleece average, 7d to 8d; greasy average, 5½d to 6d; Natal, scoured, 1s to 1s 1d; greasy average, 6½d to 7d. Crossbreds, greasy, Victorian, good to superior, 9d to 10d; New Zealand, fine, 8d to 9d; ditto medium, 7d to 8d; ditto coarse, 6d to 7d.

London, Saturday.—At auction this afternoon one catalogue was brought forward, comprising 11,186 bales, being made up as follows:—3,822 New South Wales and Queensland, 325 Victorian, 562 Tasmanian, 5,998 New Zealand, and 479 Cape and Natal. Good competition was experienced at fully late prices.

Bradford, Thursday.—The market is strengthened by the fact that the brokers are not withdrawing wools at the London sales, in spite of the heavy drop. A rather better tone is noticeable in regard to strong wools, but other sorts are unchanged. Mohair and alpaca steady. Business is poor in yarns, both for home and export. The piece trade is rather favourably affected by the change in American cotton.

Canterbury, Saturday.—Short supplies, and very little trade doing. Prices fairly steady, as under:—Kent fleeces 6d; lamb wool, 4d to 4½d; half-breds, 6½d to 7d; downs, 8d to 10d per lb.

Leicester, Saturday.—The opening of the London wool sales has had a beneficial effect on the local trade. It has resulted in a considerable fall in merinoes, and easier rates for fine crossbreds. Inferior sorts are depressed and irregular. The inquiry for cottons is checked by high prices. In the hosiery trade Government contracts are keeping a good deal of machinery fully employed. There is also a good demand for lambs' wools and fancy yarns.

FEEDING STUFFS.

London, Thursday.—Linseed.—The market has continued firm, and prices have improved slightly for old crop Calcutta, and considerably for new. Plate, however, is offered more freely. Calcutta spot London, 60s; near 60s; September-October and October-November, 60s; April-June, 48s 9d. Hull firm. Calcutta April-June, 50s. Azov, Black Sea, September-October, 56s 9d; October-November, 56s 3d. La Plata, December-January, 51s 6d; January-February, 50s 9d. To the Continent Bombay is quoted March-May, 52s. Calcutta March-April, 51s 6d; April-June, new crop 50s 6d. La Plata December-January, 51s; January-February, 51s. Linseed cakes continue firm. London made, £8 10s to £8 12s 6d. Russian, £8 to £8 5s ex dock. American Westerns at £7 17s 6d to £8. Cotton cakes firm. London made, £5 2s 6d to £5 5s; Egyptian, £5 to £5 1s 3d. Rapeseed is firm with a fair demand. Brown Calcutta to London October-November offers at 45s. To the Continent we quote: Yellow Guzerat, October-November, 50s 9d; March-May, 47s 9d. Yellow Cawnpore, October-November, 50s; March-May, 45s 6d. Brown Cawnpore, October-November, 47s 6d; March-May, 42s 9d. Brown Calcutta, October-November, 45s 6d; April-June, 41s 6d. Ravison to Hull, passage, 31s; November-December 33s 6d. Cottonseed meals with a moderate demand, prices rather easier. Warehouse seed, £7 12s 6d. First half October, £7 10s; October, £7 7s; November-January, £7. Hull quarter Spot and passage £7 12s 6d; October, £7 5s; November-January, £7 2s 6d. Cargoes, November, £7 5s 9d asked.—THE PRODUCE BROKERS COMPANY, LIMITED.

Mark Lane, Monday.—Linseed Cakes: The market during the past week have been poorly attended, with very little business passing, while supplies come to hand slowly and values are slightly easier. Russians are a slow sale at 1s 3d per ton under last week's prices. Americans remain same and firm on spot and ex steamer parcels to arrive are offering unchanged. English are nearly held, but find a slow sale. Cotton Cakes: The demand is not large, but with small stocks of Egyptians, and only a limited quantity on passage, prices are not quotably lower. London made cakes are in fair request, and a trifle dearer on the week. Decorticated: Stocks are very low, and the small quantity remaining on hand is held at 5s per ton advance on last week's price. Meal is also scarce and dear. Maize germ meal: At the present ruling high figure buyers are only filling their immediate wants and with several resellers on the market, values are again the turn cheaper. Rice meal: Parcels of Rangoon in warehouse move off quietly, while for early arrival the price is unchanged.

—PINNOCK BROS., Mark Lane.

Hull, Tuesday.—To-day the demand for wheat is very limited, and business can only be done at a decline of 1d to 2d per qr from last Tuesday's prices for both home-grown and foreign. Good malting barley is steady request, full prices while common sorts meet a slow sale at late rates, quoting 3d to 6d per qr cheaper. Oats in fair demand at late last week's prices except for inferior, which are easier to buy. Beans quite as dear. Maize firmer for both Oct. and round and 3d per qr higher on the week. Linseed.—The arrivals are 50 qrs from Hartlepool, 500 qrs Koningsberg, 1,000 qrs New York, 912 qrs Odessa, 9,394 qrs Petersburg, 505 qrs Riga; total 13,599 qrs. Throughout the week the market has been strong, and prices daily moving upwards. Calcutta, nothing offering on the spot; Sept.-Oct. and Oct.-Nov. to London has been sold at 60s 3d; shippers price 61s; new crop April-June to Hull, Black Sea, 56s 9d Sept.-Oct., Oct.-Nov. 56s. Petersburg, afloat 55s. Riga and Libau, 55s. Oct.-Nov. shipment. Azoff at 55s 6d asked, with buyers at 55s. River Plate, Dec.-Jan., 52s; first half Feb. 51s 6d, Jan.-Feb. 51s. Cottonseed.—This article improved further in value after our last issue, but since end of Last week there has been more disposition to sell the later positions, and not much business passing. A needy buyer paid £7 15s for old crop on spot, while real business done in new crop per "Castello," due in a few days, the following boat "Urbino" making up to £7 13s 9d, which still quoted and sellers same. £7 12s 6d was paid for first half October, and £7 to all Dec. month, but there are now sellers of same at 5s per ton less. Nov.-Jan. was moderately dealt in at £6 18s 9d to £7, but £6 16s 3d now most obtainable and Feb.-March sold at £6 15s. Oil seed cakes.—A steady market all last week, enquiries and orders are very scarce. Hemp, no change.—KEIGHLEY MAXTED AND CO.

LIVE STOCK.

OUR ILLUSTRATIONS.

The Jersey cow Buttercup III. is the property of and was bred by Mr. Antony Gibbs, Tyntesfield, Bristol. She is a fawn, 8 years 4 months and 1 week old, her sire being Sir Peter 5394, and her dam Buttercup, by Gordon 5190. At the Dairy Show last week Buttercup III. won the premier award in the Jersey class, and in the English Jersey Cattle Society's butter test was awarded a certificate of merit.

Magpie, a pure Holstein heifer, also a first-prize winner at the Dairy Show, was bred by and is the property of Messrs. Rumbal and Son, Upper Clapton Dairy Farm, Upper Clapton. Magpie, who is 2 years and 10 months old, was first in the class for heifers not eligible to compete in any other class.

STOCK AND SHOW NOTES

By Herdsman.

A revised prize schedule for the Royal Dublin Society's Winter Show, which will be held on December 11th and two following days, has now been issued. Prizes are slightly ahead of those of last year. In money they will reach to close on £700, and with the cups, medals, and special prizes, amounting in value to £300, the prizes all over will tot up to £1,000. This year's exhibition will, it is expected, show an improvement in the number of entries compared with those of last year, when the total was 1,933, made up of infed and outfed cattle, calves, fat sheep, and swine, butter, cream, cheese, and honey, farm produce—grain, roots, collections of potatoes, farm and garden produce, poultry, and eggs. At the coming show there will be an exhibition in the latter class of eggs preserved for several months by a patent process, which is certain to excite much interest. Entries close at single fees on Saturday, November 10th, and at double fees on the 16th of the same month. A good many, altogether from the Irish provinces, have been already received, and they are coming in fairly. Owing to the prevalence of cattle and sheep disease, no English or Scotch stock will be entered, but from these quarters a liberal display of roots, grain, and poultry is expected.

The show of dead poultry, held in connection with the Smithfield Club's show at the Royal Agricultural Hall, Islington, will take place again this year, the dates being Tuesday, Wednesday, and Thursday, December 11th, 12th, and 13th. There are forty-one classes, and in more than half of them there will be a fourth prize, the first prize in the majority of cases being £2, the second £1, the third 10s., and the fourth 5s. These class prizes are supplemented by numerous special and champion cups and medals offered by the Corporation of the City of London, the Poulters Company, the Mercers Company, the Drapers Company, the Haberdashers Company, the Poultry Club, the National Poultry Organisation Society, and the Royal Agricultural Hall Company. This will be the seventh annual show, and it is to be hoped that it will prove as successful as have its predecessors. Tuesday, November 27th, is the last day for entries, Mr. A. B. Charlton, 12, Hanover Square, London, W., is the secretary.

Mr. J. E. Platts's herd of Red-Polls at Cheadle, Cheshire, is, with the exception of a few exhibition animals and the yearlings, to be sold by auction on Friday next, in consequence of the disposal of this estate. For the convenience of buyers the animals will be sold in the Drill Hall, Ipswich, the auctioneers being Messrs. Robert Bond and Sons. The catalogue comprises thirty-four cows, twenty-one heifers, thirteen bull and heifer calves, and four young bulls, the remainder of the herd being retained for transference to the estate recently acquired by Mr. Platt in Bedfordshire. As is well known, Mr. Platt has for many years been one of the most prominent exhibitors of Red-Polls, and has been exceptionally successful, a long list of honours having been won at all the principa of honours having been won at all the principal shows. The herd to be offered on Friday was established by selections from deep milking strains, and has frequently been replenished by purchase of the best specimens of the breed, one of the most recent additions being the bull Champion 5370, which was bought at the sale of the late Mr. J. J. Colman's herd for the record price of 320gs., and has been in use in the herd. The sale will commence at two o'clock.

At a recent special meeting of the Black-faced Sheep Breeders' Association, the question of the damage done to the reputation of Black-faced flocks and their wool by the use of pitch oil and dips of a kindred character was discussed, and the following resolution passed:—"That it would be an advantage to sheep-breders if the Government would take steps to prevent deleterious dips being placed on the market." This met with the approval of members present at the annual general meeting held on Monday. The accounts, it was stated, showed a credit balance of £17 6s. 3d.

A special meeting of the directors of the Glasgow Agricultural Society was held in the secretary's chambers on Wednesday to consider representations made by several owners of stallions that the show should be held earlier than February. After fully considering the matter, it was unanimously agreed to abide by the decision arrived at at last meeting—viz., that the show should be adjourned, and that it should be held in the beginning of February. A sub-committee was appointed to meet with any exhibitors and explain matters more fully if necessary.

In the month of September 11,780 tons of British meat were sold in the London Central markets; also 4,261 tons of foreign meat, 6,803 tons of American meat, and 7,615 tons of Australian and New Zealand meat. The American meat was classed as colonial. In the Metropolitan cattle markets in the same month there were sold 8,262 head of cattle, 49,625 sheep, 270 calves, and 477 pigs; and in the Foreign Cattle Market there were disposed of 11,784 head of cattle received from the United States and 3,368 received from Canada, the latter country contributing also 1,979 sheep. As compared with the same month last year the supply fell off to the extent of 3,500 tons of meat, while there were 10,000 fewer sheep sent to the metropolis.

An announcement of the implement trials, to be held by the Royal Agricultural Society in connection with their show, at Cardiff next June, has been issued. First and second prizes of £40 and £20 are offered for portable oil engines, not to exceed 15-horse power, and the same prizes for agricultural locomotive oil engines, not to exceed 20-horse power. For a small ice-making apparatus, suitable for a dairy, a prize of £15 is offered; and it may readily be imagined that such an invention, to produce ice cheaply, would be an invaluable acquisition to dairy-farmers.

The dairy show was a wonderful spectacle, according to a description given of it by the *Daily Mail*. The "young gentleman" who wrote it could not have had any experience (which that journal is reported to regard as unnecessary), or his experience has been so great that it bewilders an ordinary agriculturist. The *Mail* tells us that—

> It was a very joyful noise that went up to the sunny roof of the hall yesterday afternoon. Rows of cows holloed, and whistled, and chanted for the unburdening of their souls; cocks crew; ducks protested to the full measure of their bills. But there was no need to be unhappy, for there was hay, and mash, and corn, and grits for all and to spare. There was much going to and fro of sad-eyed men in gaiters and hazel-sticks; and here and there one fancied one detected a lurking dairymaid. There was much brushing of silken coats, much frizzing and plaiting of tails.

Whistling and chanting cows is good. Men going to and fro in hazel-sticks is remarkable. The lurking dairymaid is inappreciative, if not spiteful. The *Mail* juvenile should be careful, or those buxom damsels may lurk no longer, but take revenge by putting him across a butter worker, and showing him how a rude boy should be treated, using their "beaters" and "Scotch hands" in the operation. But what "stuff" to give to *Mail* readers! What can be their impression of a dairy show formed upon such material? Alas, for modern daily journalism!

The unreserved sale of Shire horses belonging to Messrs. W. and J. Thompson, of Desford Hall, Leicester, will take place on Thursday, the 25th inst. Forty-six animals will be offered, and of these thirty-eight are three years old and under, and these young fillies and colt foals are principally by the good horses that have found a home at Desford, namely, Hitchin Conqueror, Sopwell Duke, Stonewall, Eastoft Lad, Desford Vulcan Chief, Cotheridge Swell, etc. These sires and their stock are so well known and appreciated that further remarks as to the quality of the selection now to be sold are needless. The sale will commence at one o'clock, and will be conducted by Messrs. Sexton, Grimwade and Beck.

CATTLE.

Sale of Pure-bred Shorthorns at Tillycairn.

The most sensational sale of Shorthorn cattle ever held in Scotland took place yesterday at Tillycairn, when there were offered the year's crop of bull calves from the celebrated herds belonging to Mr. Duthie, Collynie, who has well been called the prince of Shorthorn breeders, and Mr. Marr, Uppermill. These annual sales take a foremost place in Shorthorn circles, but this year the success was unprecedented, a fact which was due not only to the great local demand, but to the large attendance of buyers from Canada and the United States. Mr. Campbell, Harthill, took out at 300gs. the nine-months-old calf from Collynie, Silver Mist, by the Inverquhomery bull Silver Plate, and of the old Missie family. Another of the Missie family, Conqueror's Crown, entered from Uppermill, was purchased by Mr. Simmers, Whiteside, at 190gs.; while Mr. Ward, Ohio, gave 230gs. for Spicy Marquis, from the Maud family, by the Bapton Manor bull Spicy Robin, which as a calf cost Mr. Marr 250gs. One of Mr. Duthie's lot, Silver Bell, by Silver Plate, and out of Bright Belle, dam of the £1,200 bull, Brave Archer, was purchased by Mr. Harrison, Gainsford Hall, Darlington, at 270gs. There was great competition for the ownership of the Collynie March calf, Primrose Pride, a strong, beautifully-covered roan by Pride of Morning, and out of the great breeding cow Scottish Primrose, by Scottish Archer. Started at 100gs., the price ran up to 350gs., at which figure he was taken out by Mr. Joliffe, Stratford-on-Avon. Mr. Law, Mains of Sanquhar, who was one of the runners-up for this bull, took out at 200gs. the Collynie bull Scottish Crown, of the Missie family. The highest price of the sale, however, was 355gs., given by Mr. Mills, Ruddington Hall, in opposition to the representative of the Prince of Wales, for the Collynie six-months-old calf Violet Victor, by Silver Plate.

The following were the animals sold:—

		Gs
MR. DUTHIE'S.		
Golden Sunset	Mr. Tait (Craichie)	41
Prince Lovely	Messrs. Wolf and Son (Kansas)	50
Silver Mist	Mr. Campbell (Harthill)	300

1898	19 head	£76	4 2
1899	16 ,,	116	18 10
1900	13 ,,	126	3 2

Shorthorn Sale at Newton.

On Wednesday, at Newton, Aberdeenshire, Messrs. Macdonald, Fraser, and Co. disposed of some valuable drafts of Shorthorns from the noted herds of Mr. Gordon, of Newton; Mr. Wilson, Pirriesmill, Huntly; and Captain Grahame Stirling, of Strowan. There was a fair attendance of breeders from north and south, and good prices were realised, though not up to the high standard of the Collynie sale on the previous day. From the Newton herd the two-year-old heifer Diamond Queen, by Star of Morning, was bought by Mr. Mills, Reddington Hall, Nottinghamshire, at 160gs. Mr. Duthie, Collynie, secured at 52gs. the Sittyton Clipper heifer calf Camelia, by Cornerstone; while for bull calves the highest price was 81gs., given by Mr. Wright, Knockton Heath, Lincolnshire, for Champion Star, another Sittyton clipper, by Chrystal Star. From the Pirriesmill herd, Mr. Cameron, Balnakyle, took out a number of the best animals. This included the yearling heifer Eliza 17th, by Prince of Sanquhar, at 60gs., and Beatrice 8th at 115gs. The highest-priced bull calf, Franz Joseph, by the Uppermill bull Golden Star, was bought for Mr. Smiley, Ireland, at 50gs. In the Strowan lot the highest price was 54gs., given by Mr. Morrison, Fingask, Fraserburgh, for Strowan Buttercup 17th, by Star of Dawn. The averages of these herds were as follow:—Newton: Four cows, £33 6s. 9d.; two two-year-old heifers, £108 3s.; six heifer calves, £36 15s.; six bull calves, £28 14s.; two bulls, £59 6s. 6d. Pirriesmill: Six yearling heifers, £55 16s. 6d.; fifteen bull calves, £23 7s. 7d. Strowan: Three two-year-old heifers, £51 16s.; two heifer calves, £27 16s. 6d.

Sale of Shorthorns at Sanquhar, Forres.

A number of pure-bred Shorthorn cattle belonging to Messrs. A. W. and A. M. Law, Mains of Sanquhar, and Chas. E. Law, Holl, Keith, were sold at Sanquhar, Forres, on Thursday, in the presence of a large attendance of breeders and buyers. Messrs. Law have made a name for themselves in agricultural circles, and their Shorthorns have taken a leading place all over England and Scotland in recent years. Sixty-three animals were exposed on Thursday, the prices realised ranged from 13gs. to 150gs., the latter figure being paid by Mr. Dudding, Riby Grove, for Winsome Beauty III., a two-year-old roan heifer, and winner of several first prizes. A sum of 120gs. was paid for Lady Douglas, a red two-year-old heifer, and a similar sum for Zoe Sixth, also a red heifer, the latter finding a purchaser in Mr. H. Mackay, Elgin. Among the other purchasers were Colonel Johnston, Elgin; Captain Stirling, Fairburn; Mr. Duthie, Collynie; Mr. Marr, Uppermill, Tarves, etc. The animals averaged about £50, the proceeds of the sale, which was conducted by Messrs. Macdonald, Fraser and Co., being £3,096.

Sale of the Overthwaite Shorthorns.

The entire herd of pure-bred Shorthorn cattle, the property of Mr. William Atkinson, was sold by auction on the 5th inst. at Overthwaite, Milnthorpe, by Messrs. John Thornton and Co. The weather was most inclement, rain falling heavily, but the north-country breeders and farmers came prepared for a wet day and a good sale. The young stock were specially good, and the older cows, with their excellent udders, and striking dairy properties, were much sought after, and readily made between 30gs. and 40gs. each. Mr. J. Colman, of Gatton, paid the highest price (71gs.) for Hawthorn Gem, a roan yearling heifer, whilst Lord Brougham and Vaux purchased for 50gs. Brilliant Chief, the first prize bull at the Lunesdale Show this year. Ninety-four head were sold, and realised £2,441, or nearly £26 each.

The following were the principal prices:—

Sale of Black-Polled Cattle in Essex.

A small draft from the well-known herd of Aberdeen-Angus cattle belonging to Col. W. N. Tufnell was sold by Messrs. John Thornton and Co. last Thursday, at Langleys, near Chelmsford. The sale of this choice herd, which has been most successful in the show-yards during recent years, only attracted a small company of breeders and local farmers, but the animals met with a ready sale, and made fair prices. Several nice heifers were purchased by Mr. F. Cookson for his herd in Hampshire, and also by Mr. G. Hudson, to take into Sussex.

We give below a sale list:—

COWS, HEIFERS, AND CALVES. Gs

Valetta of Blooms 19923, c Dec., 1891, s Tinto 7987
Mr. W. Dan
Vaal, heifer calf, c March, 1900, s Prester 15885
Mr. W. Dannatt 8

Mansell's Shrewsbury Store Stock Sale.

The first October sale took place at Shrewsbury on Friday, October 5th, when upwards of 1,200 cattle and 400 sheep were pitched for sale. The sale ring was well lined with buyers from all the Midland counties and from Norfolk and the south-eastern feeding districts. The sale opened, as usual, with the sheep, which included some exceptionally good Clun ewes and wethers, also a consignment of some useful Scotch sheep. An adjournment to the cattle ring was made, and Mr. Alfred Mansell opened the business with some pertinent remarks. Biddings were brisk, especially for Shorthorn and polled bullocks and polled Angus crosses, notably some polled Angus crosses bred by Lord Ashtown, which were much admired, and made up to 37s. per cwt. The following are the prices realised:—

West Highland bullocks: £9 5s.
Shorthorn bullocks: £16 5s., £16, £15 5s., £15, £13 7s. 6d.
Shorthorn heifers: £15 10s., £14 5s., £14, £13 12s. 6d.
Hereford bullocks: £15 15s., £14 5s., £13 10s., £13 2s. 6d., £13, £12, £11 15s.
Hereford heifers: £14 10s., £13 5s., £12 17s. 6d., £12 5s.
Hereford barrens: £11 12s. 6d., £10 17s. 6d., £10 5s.
Hereford yearlings, £9 12s. 6d., £8 12s. 6d.
Shorthorn yearlings: £10 5s., £10 2s. 6d., £9 15s., £9 7s. 6d., £8 5s., £8 2s. 6d., £8.
Irish Polled Shorthorn bullocks: £15 12s. 6d., £14 10s., £14 7s. 6d., £14, £13 15s., £13 5s. Black Polled bullocks: £12, £11 12s. 6d., £11, £10 15s., £9 15s. Black Polled heifers: £14 10s., £14, £13 2s. 6d., £13, £12 17s. 6d., £12 7s. 6d., £12 5s. Blue grey bullocks: £12 12s. 6d., £12 7s. 6d.
Irish horned bullocks: 16 10s., £16 5s., £14 15s., £14 12s. 6d., £13 12s. 6d., £13 10s., £13 2s. 6d.
Irish horned heifers: £15 12s. 6d., £14 5s., £13 17s. 6d., £12 15s., £12 5s., £11 15s.
Irish cross-breds (Hereford and Shorthorn): £15 2s. 6d., £13 12s. 6d., £12 10s.
Welsh bullocks: £8 5s., £8, £7 17s. 6d., £7 12s. 6d.
Welsh heifers: £10 10s., £9 5s., £8 12s. 6d., £7 17s. 6d.
Cross-bred bullocks: £13 7s. 6d., £12 15s., £12 5s., £11 17s. 6d., £11 10s., £11 2s. 6d., £10 15s., £10 2s. 6d.

This firm will hold their next sale on Thursday, October 25th, for which date a good entry of forward condition cattle has been received.

Sale of Aberdeen-Angus at Peterborough.

The sale of black polled Aberdeen-Angus cattle, belonging to Colonel Brocklehurst, of Ransborough, Oakham (who is now in South Africa), at Peterborough Repository, on Friday, was very poorly attended, due no doubt to the fact that elections were taking place in the district. Messrs. John Thornton and Co. conducted the sale, which was a disappointing one, the top figure being but 20gs., paid by Mr. F. Cookson for Ransborough Amaryllis. The other chief prices were as follows:—

Outbreak of Foot-and-Mouth Disease in Staffordshire.

A serious outbreak of foot-and-mouth disease has occurred on an isolated farm near Lichfield, Staffs. On Wednesday, Mr. Harry Oliver, F.R.C.V.S., of Tamworth, accompanied by Mr. A. C. Cope, chief veterinary officer of the Board of Agriculture, visited Brook Haye Farm, tenanted by Mr. Thomas Tideswell, and found evidence of the disease in two milking cows. All the cattle on the farm will be slaughtered, and probably those on an adjoining farm.

HORSES

Sale of Show Horses at Crewe.

Six show horses, owned by Mr. George Tyson, of Halifax, were sold by Messrs. Manley and Sons at Crewe on Wednesday. The well known Lady Wiles and Sir George were put up as a pair, and were knocked down at 1,000gs. to Mrs. Batt, Elgin Avenue, London. Love Better was secured by Miss Cunliffe, London, for 210gs.; Mr. Buerley, Didsbury, gave 205gs. for Hector Macdonald; Lord Walter was sold to Mr. Gaskell, Wilmslow, for 100gs.; and Bay Leaf fetched 100gs., the purchaser being Mr. Anderton, Cadley. The total for the six animals was £1,695, or an average of £282.

Horse Sale at Glasgow.

A sale of carriage, harness, and cart horses, vanners, cobs, and ponies was held on Tuesday afternoon by Mr. Vine at his horse bazaar, Glasgow, the catalogue containing about 120 animals. The majority of the horses showed remarkably well, being of good substance, suitable ages, and fashionable colours. The attendance of buyers was scarcely so large as usual—a fact due to dirty weather and the big yearly sales coming forward, but trade was of a satisfactory character for all classes throughout. Carriage and draught horses experienced the best demand, and realised fairly high prices. Cobs, ponies, and vanners met a rather stiffer trade. Carriage horses of the best class realised up to 40gs.; secondary, 12gs. to 18gs.; and inferior, down to 6gs.; best cart horses, 35gs.; secondary, 12gs. to 20gs.; inferior, 5gs. to 11gs.; vanners, to 30gs. and down to 4gs., according to style, substance, and action; best cobs, to 25gs.; secondary and inferior, 4½gs. to 12gs.; ponies, 5gs. to 18gs.; and lorry animals, 6gs. to 37gs., all according to substance and action.

Sale of American Horses at Glasgow.

A [illegible] of American and Highland coaching horses was held by Messrs. Macdonald, Fraser and Co., Limited, at Glasgow on Wednesday. There were fifty-five animals catalogued, consisting principally of [illegible] and draught horses, while there were also [illegible] of vanners and coaching horses included. There was a good attendance of buyers forward from [illegible] country, farmers and contractors being [illegible] All the horses were of an extra [illegible] trade was brisk throughout. Harness [illegible] realised up to 110gs.; best [illegible] cart or Clydesdale horses, to 55gs.; secondary, 20gs. to 30gs.; inferior, 12gs. to 18gs.; vanners, to 42gs. and down to 10gs.; best coaching horses, to £55; secondary, £39 to £44.

Sale of Hackneys near Aberdeen.

A sale of Hackneys and roadster horses was held at Oldmill Farm, near Aberdeen, on Thursday, Mr. J. Farquhar, Old Echt, being the auctioneer. Some fine well-bred animals were included in the list of fifty-seven horses entered for sale, but the bidding was unusually slack, and only in one or two instances were satisfactory prices obtained. Lavender, the roan filly which won first prize as a two-year-old roadster at the Royal Northern Show, was bought for 29gs., by Mr. Stephen, Park Road, Aberdeen, who also purchased for 30gs. Oldmill Gipsy, a dark brown filly, which was first as a two year-old at the Royal Northern last year. Confidence Queen, a four-year-old black mare, was bought by Mr. Bannochie, Aberdeen, for 34gs. Sir Gavin, a dark bay gelding, a successful exhibit at Aberdeen shows, was sold for 37gs. to Mr. Sim, Muirton. Dr. M'Hardy, Cullen, bought to Mr. William Wisely's mare Daisy for 30gs. Mr. W. M'Kenzie, Linnhead, Foveran, gave 31gs. for General French, a chestnut gelding belonging to Mr. James Cruickshank, Kentore. Mr. Grant, Methlick, gave 37gs. for Minnie II., the first at the Royal Northern Show this year. Chestnut Belle (10770), a grand four-year-old, 15.1 hands, belonging to Mr. John Spring, Skene, and bred by Mr. Gavin Hadden, Dalmunzie, was bought by Mr. Thompson, Brecon Hill, Cults, for 63gs. A fine pair of bay mares, the property of Mr. David Davidson, Queen's Road, Aberdeen, was purchased by Mr. Littlejohn, Laurencekirk, for 100gs.

NOTE.—The figures for the current Year are approximate only

Navan Fair was held on Monday, and was a very large one, composed chiefly of first and second class polled bullocks. The demand was bad, prices being in buyers' favour, and a large number of animals remained unsold. There was, however, a fair demand for springers. Prices: Calves, first class, £5 10s. to £6; yearlings, first class, £8 to £9; second class, £7 to £7 10s.; two-year-olds, first class, £12 to £13 10s.; second class, £10 to £11 15s.; three-year-olds, first class, £14 7s. 6d. to £16; second class, £11 5s. to £12; springers, first class, £16 to £18 5s.; second class, £12 10s. to £14 5s.

The Fair at Manorhamilton, co. Leitrim, on Monday was on averages a good one, and a good demand was experienced for heifers, but bullocks did not sell well. Thin animals were very hard to sell. Prices: Calves, first class, £5 15s. to £6 5s.; second class, £4 to £4 3s. 4d.; third class, £2 16s. 8d. to £3 3s. 4d.; yearlings, first class, £8 6s. 8d.; second class, £6 10s. to £7 5s.; third class, £4 10s. to £5 5s.; two-year-olds, first class, £11 to £12 10s.; second class, £8 10s. to £10; third class, £6 15s. to £7 2s. 6d.; three-year-olds, second class, £12 15s. to £14; springers, first class £16; second class, £12 10s. to £15; third class, £8 5s. to £10

SHEEP.

Sales of Kentish Rams.

Mr. Arthur Finn's.

Three of the most important sales of Kentish rams of the year took place in Ashford Market on Tuesday, when consignments of ram tegs from the flocks of Mr. A. Amos, Mr. Arthur Finn, and Mr. H. Rigden were disposed of, while there were also sales of rams from flocks of lesser note. In the case of the three names mentioned the consignments were second ones of the year. Messrs. Reeve and Finn sold forty-five of Mr. Arthur Finn's Westbroke ram tegs. These were sold at from 4½gs. to 12gs., and the whole consignment realised 278½gs., or an average of barely £6 10s. per ram. Taking both the first and second consignments together Mr. Finn has realised £460 8s. 6d. for sixty-five ram tegs, an average of a fraction above £7 1s. 8d. per teg. Tuesday's buyers and prices were as follows:—Mr. E. Finn, 12gs., 11½gs., 8½gs., 7½gs., 7gs., 5½gs.; Mr. W. T. Hinds, 8½gs., 6½gs. (twice), 5½gs.; Mr. Skinner, 8½gs., 6½gs., 5½gs. (twice); Mr. H. Rigden (Ashford), 8½gs., 7½gs., 7gs.; Mr. Rickard, 6½gs. (twice); Mr. G. Brann, 5½gs., 5gs. (four times), 4½gs. (six times); Mr. Overy, 5gs. (three times); Mr. A. Brown (for Lord Hothfield), 7gs.; Mr. J. H. Monins, 6½gs.; Mr. Featherstone, 5½gs., 5gs.; Mr. George Ottaway, 7gs.; Mr. G. Hamilton, 6½gs., 5½gs. (twice), 5gs.; Mr. W. Wimble, 5½gs.; Mr. Godfrey, 5½gs.; Mr. Cornes, 5½gs.

Mr. H. Rigden's.

Messrs. Reeve and Finn also disposed of thirty-nine pure-bred Kent ram tegs from Mr. H. Rigden's (Lyminge) flock, the prices ranging from £2 to £8 15s. per head, and the whole realising £204, or an average of a little over £5 4s. 7d. per teg. The two consignments now disposed of by Mr. Rigden this year, in all numbering 113 tegs, have realised £645, or an average of barely £5 14s. 2d. per teg. The buyers and prices on Tuesday were as follows:—Mr. J. Mead, £8 15s., £8 10s., £7. £5, £4 10s.; Mr. F. Collard, £4 15s.; Mr. J Leeds, £5; Mr. Overy, £4 15s., £4 10s.; Mr Honess, £4 5s. (twice), £4 2s. 6d.; Mr. E. Finn £8 15s., £8 10s.; Mr. Marsland, £4 5s. (twice); Mr. Brakefield, £6 10s.; Mr. Reeve, £8 5s., £6 5s., £5 10s., £5 5s.; Mr. Roberts, £4 5s.; Mr. Piper, £7 5s., £4 15s.; Mr. H. Rigden (Ashford), £5 10s. (twice), £4 10s.; Mr. Collins, £4 5s.; Mr. J. Church, £4 5s. (twice); Mr. Tanton, £4 5s. (three times), £4 2s. 6d.; Mr. Bunn, £2; Mr. G. Ottoway, £4 2s. 6d.; Mr. Cheeseman, £4 2s, 6d.; Mr. Maylarn, £4 2s. 6d.; Mr. J. Pearson, £5 7s. 6d. A number of two-year-old rams from Mr. Rigden's flock realised up to 5gs. per head, and were bought by Messrs. Sutton, C. F. File, J. File, M. Seath, Prebble, Terry, Kingsmill, Smith, and J. Mead.

Mr. A. Amos's.

Messrs. W. and B. Hobbs sold thirty of Mr. Alfred Amos's ram tegs, this also being a second consignment. Prices ranged from 5½gs. to 10½gs., and the thirty realised a total of 159gs., giving an average per head of a little under £7 6s. The two consignments together numbered eighty ram tegs, realised a grand total of 678½gs., and averaged just over £8 18s. 1d. per head. Tuesday's buyers and prices were as follows:—Col. Alexander, 9½gs. (twice); Mr. G. Hamilton, 10gs., 9½gs. (twice), 9gs., 8½gs. (twice), 6½gs.; Mr. P. Collard, 9½gs., 9gs., 8½gs., 8gs. (three times), 7gs.; Mr. M. Seth, 10½gs., 7½gs., 6½gs., 6gs.; Mr. A. Mummery, 9gs.; Mr. H. Clements, 9gs.; Mr. Constable, 8½gs. twice, 6½gs.; Mr. Gambrill, 6gs.; Mr. Tomkin, 6½gs., 6gs., 5½gs.; Mr. Roberts, 5½gs.

Messrs. F. D. Brockman and Darrell Blount's

Messrs. W. and B. Hobbs also disposed of a number of ram tegs from the flocks of Mr. F. D. Brockman and Mr. Darrell Blount. Mr. F. D. Brockman's tegs (ten) sold at from £3 to £5 10s., and averaged £4 1s. per head, the buyers being Messrs. J. Missing, D. Mace, and T. Vickers; while Mr. Darrell Blount's tegs (fifteen) sold at from £3 10s. to £7, and averaged £4 16s. 8d. per head. Mr. Blount's rams were bought by Messrs. H. Hills, J. G. Benton, Brakefield, G. Bunn, D. Mace, Prebble, and J. H. Monins, the last-named gentleman and Mr. Mace each buying at the top figure.

Sale at Strood.

At Mr. H. M. Cobb's annual sale, which took place at Strood on the 5th inst., there were nineteen rams from Mr. Warwick Stunt's flock, and for these the demand was particularly slack, £7 15s. being the best price made to Mr. T. Holland, Mr. C. Lake paying £5 15s., Mr. J. Pye £5 for one and 75s. each for two others, whilst Mr. W. [illegible] Miskin purchased at £4. Those sold numbered ten, for an aggregate of £45 5s., or an average of £4 10s. per head. Mr. F. Baker, from Manor Farm, Frindsbury, had a fine lot of rams. These were only sold at home prices, but the demand was so [illegible] from being brisk. £13 10s. was made for the best animal, a real good typical Kent ram, which was secured at this by Mr. T. Holland, who also took another £6 5s. Mr. Ridgeway, from Essex, took three at £7 15s., £6 5s., and £6.; Mr. W. Miskin purchased at £7 5s., £6. £5. £4 10s., and £3 15s.; Mr. Long, from Essex, took two at £7 and £6; Mr. Brook took two

at £6 5s. and £6. The others ranged from this price down to 75s., the whole thirty being sold at an average of £5 8s. 2d.

Sale at Canterbury.

A consignment of rams and ram tegs from the well-known registered flock of Kent sheep belonging to Mr. T. Wooton, of Tile Lodge, Sturry, was disposed of by Messrs. G. W. Finn and Sons at Canterbury on the 6th inst. A few tegs sold at 4gs. per head, but the majority realised between 6gs. and 8gs. per head; but others fetched up to 12½gs., the twenty-five sold realising altogether 147gs. and averaging a little under £6 3s. 6d. per head. Messrs. Millen also disposed of some ram tegs at from £2 10s. to £6 5s. per head.

A Welsh Sheep-breeding Experiment.

Professor Winter, of the Agricultural Department of the University College of North Wales, has forwarded us a leaflet giving particulars of an experiment, with the object of ascertaining the most suitable cross for Welsh mountain ewes for the production of fat lambs, carried out at Lledwigan Farm during the past year.

Seventy-nine Merionethshire ewes, purchased in October, 1899, were divided into three lots and marked with numbered ear tags. Lot 1, consisting of twenty-nine ewes, ran with a Wiltshire ram, a white-faced horned sheep (similar to the Dorset horned sheep) which for some years has been extensively used in North Wales for crossing with mountain sheep. Lot 2, consisting of twenty-seven ewes, ran with a Shropshire ram, and Lot 3, consisting of twenty-three ewes, with a Leicester ram. The rams were turned in on October 3rd, and remained with the ewes until the end of November. Some of the ewes proved barren or cast their lambs, and a few lambs died after birth. There was, however, no difference between the various lots in this respect.

The Wiltshire-cross lambs were dropped between February 28th and March 30th, the Shropshire cross between March 3rd and April 3rd, and the Leicester cross between March 1st and April 7th. Every lamb was marked with a distinctive mark at birth. The ewes were grazed on the same pasture after the removal of the rams in December, and, except for about three weeks during the severe weather in the spring, received no artificial food.

The lambs were sold at the beginning of July on the understanding that they were to be removed as soon as they become ready for the butcher, the whole to be cleared by the end of August. At this time there were twenty-six of the Wiltshire cross, twenty-four of the Shropshire cross, and twenty of the Leicester cross. On July 9th, thirty-five lambs went to Manchester. Of this number, sixteen were of the Leicester cross, fourteen of the Wiltshire cross, and five of the Shropshire cross.

On August 6th a second draft of nineteen was selected, and the remainder were weighed on September 5th. Three tables giving particulars of each draft appear in the leaflet, and on adding the figures together we find that twenty-six Wiltshire cross lambs averaged 70.4lb. live weight, twenty-four Shropshire cross lambs 66.4lb. live weight, and twenty Leicester cross lambs 64.4lb. live weight.

In breeding lambs for the butcher the first consideration is to get them really fat. Then, provided the lambs are of good quality, the heavier they are within certain limits the higher the price obtained. Further, lambs which have, so to speak, lost their bloom never sell so well as those possessing the characteristic appearance of fat lambs. It is also very important to have lambs ready for the butcher early in the season, as prices usually become lower as the summer advances. Where the lambs are cleared off early the ewes may be fattened and sold at a better price than can be obtained in the late autumn, when they become almost unsaleable.

On looking at the results of the experiment from the standpoints enumerated above, it is seen that the advantage rests with the Wiltshire cross. They not only weighed heavier, but they handled better and had a better appearance than either of the other crosses. Further, the bulk of them were ready for the butcher early in the summer, and would have produced a considerably higher price than the Shropshire and Leicester crosses, if they had been sold separately. The Leicester crosses fattened quickly, but did not weigh as well as the Wiltshires. The Shropshire crosses were slower in fattening but attained greater weights than the Leicesters.

A similar experiment will, says Professor Winter, be carried on during the coming year, and in addition to the Wiltshire and Shropshire, a Southdown ram will be used.

Leicester October Fair.

This fair took place on Thursday, and was well attended by buyers and dealers from all parts of the kingdom. Sheep were a very large delivery and the bulk were in very good condition. Trade ruled fairly active at good prices. Lamb hogs changed hands freely at slightly advanced rates for choice qualities. Messrs. Hincks and Shakespeare sold 1,300 ewes and lambs, the lamb hoggs making 30s. to 39s. 6d. per head for choice lots, and medium 23s. to 28s. Breeding ewes realised 46s. to 56s. per head; and theaves 48s. to 54s. The same firm sold 147 rams, but the demand was not keen. Lincoln long wool rams made £4 4s. to £8 8s.; Shropshire rams, £4 10s. to £8 10s.; lambs, £3 to £6 6s.; and Oxford lambs, £3 3s. to £5 5s. each. Oxford rams, by private sale, made £6 to £10 per head; and ram lambs £3 3s. to £6 10s. A large business was done. Agricultural horses were scarce, and good colts made £30 to £40 per head.

The Dairy Show: A Corner of the Hall.

Corby Fair.

Corby fair, which is considered to be the most important fair in South Lincolnshire, was held on Monday, and was attended by dealers and agriculturists from all parts of Lincolnshire and adjoining counties. About 6,000 sheep and lambs were penned, for which there was a slightly improved trade. There was a good show of breeding sheep, and prices remained firm. Theaves made 35s. to 50s.; young ewes, 38s. to 44s.; culled ewes, 25s. to 36s.; and store lambs, 24s. to 35s. each. Several lots of rams were offered by auction, but owing to the lateness of the season no very fancy prices were realised. About 600 head of horned stock were also exhibited. In-calvers met with a good demand; cows, to £21; heifers, £15 to £17 10s.; two three-year-old bullocks, to £15; young beasts, £6 to £10. Only the best sorts changed hands.

Castleton Tup Fair.

This annual fair was held on Monday. A very large number of buyers attended from various parts of the North Riding, and a fair number of animals changed hands. In the afternoon an auction sale was held by Mr. M. Peirson, of Loftus. There was a very good attendance, and competition was fairly keen. Moor tups realised £1 1s. to £1 17s. 6d.; Scotch ewes, for breeding, 16s. to 19s. odd; gimmer lambs, 9s. 9d. to 12s.; tup lambs, 7s. 9d. to 10s. each.

THE DAIRY SHOW.

Cattle, Cheese and Butter at Islington.

The Dairy Show opened on Tuesday in weather that is seldom experienced at the time of the year. The attendance on the Agricultural Hall, as might be expected, was very oppressive, and the heat was much felt. The attendance at the show appeared to have been hardly up to the average, but the tickets off is not great, as the time was the most favourable of large numbers visiting the show. On Friday the Lord Mayor and Lady Mayoress paid a visit to Islington, her ladyship distributing the prizes to the successful competitors in the butter-making contests.

On Wednesday a meeting of the British Dairy Farmers' Association was held under the presidency of Lord Wenlock. The annual report showed that the British Dairy Institute at Reading was increasing both in the number of students and in its usefulness. A number of the county councils had sent students during the past year, and the Board of Agriculture have made a grant to the Institute. Lord Trecastle was unanimously chosen chairman for the ensuing year, and among the vice-presidents elected were the Marquis of Ripon and Lord Wenlock.

The following are the entries in the various sections:—

Cattle.

The cattle classes were more numerously filled than usual, and, as a consequence, the animals were much crowded and scattered about the hall some cows and heifers being fixed amongst the cheeses, whilst the bulls were mixed up with dairy utensils and other exhibits. The quality of the stock was on the whole satisfactory, though no especial features were present either as regards exceptional winners by inspection or in the results of the butter tests and milking trials. As has been the custom from its commencement, the Dairy Show officials give priority of place to the

Shorthorns,

and of these there was certainly a very good lot, both of pedigree and non-pedigree cows. In the pedigree class Lord Rothschild won first, Lady Henry Bentinck second, and Capt. Duncombe third, by inspection, with very useful cows. In the milking trials, however, Lady Bentinck's cow, which is certainly a thorough dairy cow, turned the tables upon her opponent, and came in first, Mr. J. T. Hobbs being second with a cow unnoticed by inspection, and Lord Rothschild came in third with a cow reserved in the inspection class. In non-pedigree cows Mr. J. F. Spencer won the first and second inspection prizes with two thoroughly good and typical dual purpose cows, and Lady Henry Bentinck was placed third. The milking prizes again went very differently, Mrs. Bonest being first, and also winning the Barham Challenge Cup with a cow unnoticed by inspection, and rightly so, too, for if the Shorthorn is to continue as a dual purpose breed, such type as the champion milker at Islington must be discarded, an undoubted dairy cow but quite as much of a milking machine and as little of a general purpose cow as a Jersey. The milk yield of this cow was just upon 70lbs. per day. The second prize was won by Mr. D[illegible] who was also reserved for the Challenge Cup. This cow at the Tring Show, it will be remembered, produced the extraordinary quantity of [illegible] of butter in twenty-four hours. The [illegible] prize were to a Lincoln cow of Mr. [illegible] Shorthorn heifers were [illegible] quality, however, was good. Lord Rothschild, Capt. Duncombe, and Mr. A. Henderson had the best animals the latter exhibiting [illegible] and Capt. Duncombe first. Bulls of this breed were very good this time. Mr. G. T. King's first, Lord Rothschild's second, and Mr. [illegible] being very evenly good, [illegible] we consider that they [illegible] trial or butter test winning cows.

Jerseys.

[illegible] exhibitors made [illegible] any breed in the milk. The quality [illegible] Jersey cows, Dutch and other [illegible] good, and Island-bred heifers and bulls very various, with a [illegible] sprinkling of inferior ones. The best cows in [illegible] Mr. [illegible] and Lass of Jersey 2nd, and Lord Rothschild's

Sultane, in the order named. The last-mentioned cow, however, came to the top in the milking trials, followed by Dr. Watney's Queen Bess of Ruthven and Lord Enfield's Gloaming, the latter a very fine, good cow. Jersey heifers were very numerous. In the English-bred class, Lady Rothschild had an excellent first in Carol, and also a very good third, the two being divided by a level, well-bred, and milky-looking heifer of Mr. Perkins's. The quality of the first heifer was especially fine, and she was reserved for the Blythwood Challenge Bowl, which was awarded to Mr. Gibbs's Buttercup. Island-bred heifers mustered a very large contingent, and whilst the best of them were up to the average of years, the tail end of the class were very plain and in many cases with ill-shaped bags. Mr. McMullen was given the premier position in these, Mr. Spencer Evans second, and Mr. Miller Hallett third. A good number of others were h.c. or c.

The Jersey bull class was filled very strongly, and amongst them several really first-class bulls. Col. Hankey obtained the first prize, Lord Rothschild second, and Mr. Gibbs third. Capt. Fraser, Mr. Dixon, and one or two others were also h.c. for very nice bulls.

Guernseys.

made a very fair show, the cows having very good bags in several instances, but in the milking trials and butter tests they did not come out as satisfactorily as might have been expected. Mr. H. M. Ozanne came in for the first and third prizes by inspection, the Honble. Mrs. A. Baillie Hamilton dividing these two for second place. The first cow is now some thirteen years old, but a great milker. The third-prize cow was at the top in the milking trials, a c. cow second, and Mr. Hambro's reserve third. Guernsey heifers were a little mixed, and could not be called a first-rate lot. Mr. E. A. Hambro carried off both first and second prizes with straight, milk-like heifers, with good bags under them. Mr. Fitzwalter Plumptre was placed third. Only two bulls of this breed were shown, Mr. Hargreaves having the best of them, and being awarded one of the medals. This bull was shown in the mixed class.

Red Polls

were shown in better trim than we recollect every having seen them at the Dairy Show. Breeders, however, were deprived of a good deal of the effect such a nice lot of animals would create by having them in such divided lots, the twelve or thirteen entries present being in three different companies, and the single bull of the breed shown in the mixed class. Of the cows, Mr. Platt's Bud 2nd was placed first by inspection, Lord Rothschild's Ladylike 2nd second, and Mr. A. J. Smith's Fanny 2nd third. The milking trials again resulted very differently, Lord Rothschild's Duchess 1st being first, the second prize winner holding her position, and an entry of Mr. A. J. Smith's that escaped notice by the eye being third. The heifers of this breed showed signs of great milk production. Lord Rothschild's Hastoe Red Rose was accounted best, and the others in the class were all h.c., shown by Mr. Platt, Mr. A. J. Smith, and Lord Rothschild. The single bull of the breed was shown by Mr. A. J. Smith.

Ayrshire

breeders have for many years been rather lax in forwarding stock to the Dairy Show, and this year the class was cancelled, only one or two of the breed appearing in the mixed breed classes.

Kerries and Dexters

made a very creditable show, though they were not very numerous. The Duchess of Newcastle carried off the money in the Kerry class with some very good cows, and showing fair milk vessels. The Express Dairy Company had also a couple of very useful entries that were reserved and h.c. Of Dexters the best were shown by Mrs. Leatham and Mr. E. S. Woodiwiss; Mrs. Paisley and Mr. B. de Bertodano also showed very typical animals. In the milking trials the two breeds competed together, the Duchess of Newcastle's second prize Kerry being being first, and Mrs. Leatham's first prize Dexter second. One or two very useful Dexter bulls were shown, Mr. Woodiwiss getting a medal for Redmarly.

Other Breeds.

Cows not eligible to compete in any of the classes mentioned consisted of several very good animals, Welsh, Ayrshires, and cross-breds being shown. By inspection the prizes went to Mr. Merry's Ayrshire, Mr. Wimlett's Shorthorn cross, and a blue-grey of Mr. J. F. Spencer's. The milking prizes were won by a black-and-white cross of Mr. Birdsey's, a brindle cow of Mr. Merry's, and Mr. Spencer's blue-grey.

Heifers of this section contain several very useful Holsteins of Messrs. Rumbal and Sons, one of which obtained the prize, and a very level Kerry of Captain Mansell's was reserved. In the bull class of the mixed breeds, in addition to the Guernseys, Red Polls, and Dexters mentioned, Mr. John Evans had a splendid Lincoln red that was awarded one of the medals.

Groups.

A class for the best group of three females was instituted this year for the first time, and proved a very interesting feature of the show. As is customary when different breeds are competing, each judge appeared to hang out for the breed he was appointed to judge. At the close, however, the first prize very deservedly went to three beautiful Lincoln red cows of Mr. John Evens's, the second to three of Lord Rothschild's Red Polls, and the reserve to three very good Jerseys of Mr. Mutton's.

Butter Tests.

On the average the butter yields were satisfactory, though there were no sensational yields produced, and the quality of most of the lots appeared to be very good for the time of the year.

Shorthorns had the best of it as regards quantity, Mrs. Bonest's challenge cup winner making 2lbs. 10⅜oz. Owing to points, however, this cow was only second, Mr. Dawes's famous cow being first with 2lbs. 5¼oz. after being 104 days in milk.

The Jersey prizes won were: Gold medal by Lord Enfield's Gloaming with 2lbs. 2½oz. after being in milk 157 days; silver medal by Mr. David Mutton's Brighton Queen with 2lbs. 3oz. after milking 103 days; and the bronze medal to Lord Rothschild's Sultane 4th, with 1lb. 12oz. of butter after being in milk 257 days.

Of the other breeds or crosses Lord Rothschild's Red Poll produced 1lb. 14oz. after twenty days in milk; Mr. Spencer's blue-grey 1lb. 9⅜oz. after sixty-eight days; Mr. Birdsey's Welsh cow Pansy, 1lb. 7oz. at twenty-one days after calving; and Mr. Fitzwalter Plumptre's Guernsey, 1lb. 8¾oz. after milking 147 days.

Goats.

Goats as usual formed a feature of the show, but the classes were not particularly attractive to the public apparently, as few visitors were found in the locality in which the goats were stalled. The most successful exhibitor in this section was Mr. B. Hook, who won two first prizes in addition to carrying off the Lord Mayor's cup for the best goat in the show, whilst the names of the Baroness Burdett-Coutts, Mrs. J. Dawson, and Mr. R. Walter also appear as winning high honours.

Cheese.

As usual, the keenest interest centred around the Cheddar classes, as it is here that the men of Scotland try their level best to strip the laurels of the West of England makers, and this year proved no exception to the rule. There were twenty-eight entries in the class for four Cheddars, Irish or Scotch, but the general quality was scarcely up to previous years' standards. The heat of the hall on Monday was decidedly against the very rich exhibits from the West, and firm curds on departure from home were found to be most decidedly loose when cut in the Agricultural Hall. The hard makes of the North benefitted by this change of temperature, as it somewhat mellowed their rather harsh curds. First prize went to Mr. Hugh Hunter, Ayrshire, for a true and carefully made cheese. It was as clean a cutter as the most fastidious factor could desire, but it lacked flavour; second prize went to Messrs. R. and C. Tucker, Steeple Ashton, Wilts, for a cheese that, whilst richer, scarcely cut so well. Mr. W. J. Roe, West Rennard, Somerset, was placed third for a nice type of cheese. Then came in a man frae Scotland with about as hard a Cheddar as one could desire for fourth place. Mr. Herbert Tucker, who has rather been off his luck this season, had to be content with fifth prize. Reserve was taken by Mr. A. Osborne, of Mappowder, Derset, the highly commended mention being the sole reward of a Kilmarnock maker. Cheddar truckles did not make a large entry, but the quality was fairly good. Mr. T. C. Candy secured an easy first with the most perfect cutting cheese in the show. They were well matured, and this placed them well ahead of that well-known winner Mr. W. W. Keel, who took second prize with young cheese that showed a very considerable amount of acidity. Mr. Geo. Lester, of Martock, Somerset, was placed third, thus keeping the Scotch exhibits out of the mentions.

Stiltons were not nearly up to the mark of previous years, many of the exhibits lacking the much desired maturity, whilst others were decidedly salt. Mr. Henry Morris easily secured first with a cheese that was nicely blued at one end, whilst there was scarcely a vein of blue at the other. Mr. E. T. Moore was second, with Mr. A. W. Hurst rather a close third.

In the Cheshire class the judge gave the greatest satisfaction with his awards. To do this was no inconsiderable matter, as, apart from a couple of exhibits, the class must be set down as a very ordinary one, the cheese, as a rule, not being rich, and some of them desired to test the binding strength of the bandages. Had it not been for these some of the cheese could not possibly have held together. First prize was taken by a really splendid Cheshire of fine quality and fat, but slightly inclined to be tight in the curd. Mr. William Burnett followed this up with a very good one.

Double Gloucester appears to be one of the dying makes of cheese, its name, and not its character, only being left. It was therefore really surprising to find a true Double Gloucester in the class. Messrs. C. Harris and Son, Slimbridge, supplied this one, rich but very pale curd of nice flavour, though a trifle loose through heat, as showing how these classes are used as makeshifts. The second prize went to Mr. C. Candy, Shepton Mallet, Somerset; third to Mr. James Pearce, Glastonbury; and reserve to Mr. N. J. Sims, Bruton; and some of these cheese cut with all the characteristics of a Cheddar.

The Single Gloucesters were a thin lot in quality as well as in shape. First was secured by the Executors of the late George Harris, Cam, Glouces-

tershire, for a cheese showing a lot of quality, clean and well made, but a trifle loose on cutting. Mr. C. W. Prout was second, and after this much more quality was desirable throughout the class. The Council did well in cancelling the class for Leicesters, and if the Lancashires continue on the same lines these may profitably be dispensed with also. There were four entries, and only one of these received a prize, the others being weak cheese with far from a weak flavour.

Well may we ask what is a Caerphilly. Is it to be made of Cheddar curd, or is it to have and continue the former distinctive character of its own. At the Frome Show the judge selected a real Welsh-made Caerphilly for first prize, whilst at the Dairy Show all the best Caerphillys seemed to be of Somersetshire make, and the only credit for Wales was a commended card. Mr. Frederic House, Bridgewater, took first for a very pleasant-eating cheese, Mr. Jesse E. Hawking, Burnham, being a very close second.

In the Wiltshire class there was only one genuine Wiltshire in the lot. This one, which was made by Mr. Samuel Jefferys, Calne, was a very typical specimen; it was of a deep red colour, clean-cutting, and very firm in the curd.

Wensleydales constituted the poorest class of this choice make that has been seen for years. The judges only awarded one prize, and this exhibit of Mrs. John W. Spensley's cut perfectly white.

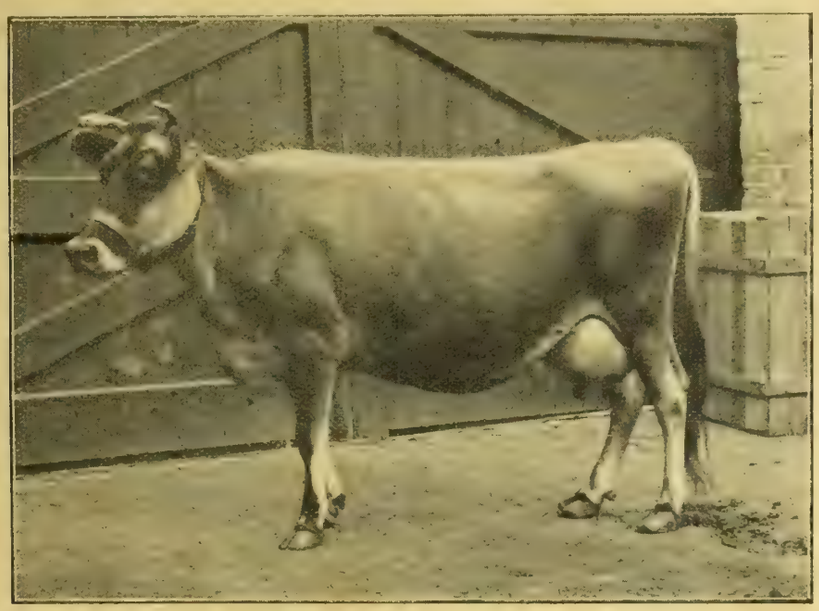
The students at the British Dairy Farmers' Institute made a very fair entry. Miss Annie Barnett received a silver medal for her cheese of Cheshire make. The cream cheese class made a very large entry, but the all-round quality could not be considered as being of the highest order of merit, and the lady judges did not add to the general advancement of the class by their selections. Miss M. K. Harris, Dorset, secured first. Soft cheese was even worse than cream cheese, and the indifferent specimens shown bore ample testimony to the fact that it will be a long time before the chief Continental makes of soft cheese will be ousted from our markets. There was one matter of satisfaction, that was that the judge was not expected to eat and digest his borings in search of the winner in the class for cheese made from machine skimmed milk. These would have been handy to the War Office—the cheese might have been used for cannon balls, and the borings for bullets. A facetious critic remarked that there would be an excellent market for them as brake blocks when leather runs short. The first prize was taken by a Glasgow firm. The cheese fair, as usual, attracted a very good entry, and subsequently some very satisfactory prices were realised in the Cheddar section. Here Mr. T. C. Candy's twenty cheeses confirmed his success in the truckle class; they were firm and clean cutting, and very uniform in flavour. Mr. A. Osborne followed up his Frome successes by securing second and third with cheese of firmer texture, yet lacking the necessary mellowness; fourth was won by one of Mr. Candy's former pupils, Mr. F. W. J. Crocker, Dorset; whilst that well-known Dorset winner Mr. Henry White had to be content with being fifth. Then a few of the novice honours were allowed to go to Scotland, Mr. Thomas Wither, Stranraer, taking reserve, and Mr. David Hood highly commended; the other highly commended mention went to Mr. Herbert P. Tucker, Wiltshire.

The class of Stiltons or Wensleydales in the cheese fair competition was neither a large nor an attractive one, the judge only awarding two out of the three prizes offered. Mr. Henry Morris was an easy first with a better cheese than he had in the Stilton class proper; being young it was scarcely even moulded. The cheese, as a whole would scarcely be considered as approaching the high level reached in some previous years.

Butter.

Though the entries of butter fell off somewhat, still the general quality would compare favourably with previous years. The dairy students of the B.D.F.A. only mustered ten entries in their class, a most inadequate number, but it was of a generally good quality. Miss C. M. B. McDuff, Blenheim Dairy, Woodstock, leading the way.

There was a large entry in the class for butter perfectly free from salt, the produce of Channel Island cattle and their crosses. The first prizes were won by the Earl of Rosebery, whose exhibit was soft but of nice flavour; Miss M. K. Harris, Dorset, whose sample cut holey, and Lord Poltimore, whose exhibit was of superb quality; seconds went to Miss Abbis, whose butter was sweet though high coloured; S. F. Berry for a nice grained butter with a strongish flavour, and to Lord Rothschild, whose exhibits were rather soft. All three of the thirds had a most decided tendency to sourness, a most undesirable feature in prize butter. The class for butter slightly salted, made from similar breeds of cattle to the preceding class, brought out a more marketable type of butter. The Earl of Rosebery again secured one of the firsts with a creamy, beautiful sample, Mrs. Charles Hayes's first being also very nice and creamy flavoured, Lord Poltimore's being excellently made. As regards the seconds, Mr. W. G. M. Townley made a splendid butter with a nice salty sprackness. Mr. E. Abiss' exhibit was very rich and deep coloured, Mr. A. F. Somerville's being also a trifle salty. The thirds in this class were also very good.



Mr. A. Gibbs' Jersey Cow "Buttercup III.," First Prize Inspection Class, Certificate of Merit, Butter Test.

The class for butter perfectly free from salt made from Shorthorns and other crosses brought out a most undesirable lot of sour and strong butters, even one of the first prize selections being quite sour on the first day of the show, the judges withholding another first. Lord Poltimore's exhibit stood far and away at the head of the class, the Hon. A. Holland-Hibbert's taking the other first. Mr. Henry Landon's second prize lot was creamy, but the other two second prize lots had a most decided tendency to acidity, and it seemed rather strange that a nice creamy exhibit like that of Mrs. Hayes should only secure a third in this class.

In the class for slightly salted, made from Shorthorns and crosses, two of the firsts were again sweet and the other one sour, whereas all the three seconds were very nice and of even quality, whilst a couple of sours found their way in amongst the thirds. The scalded cream class did not attract an overlarge entry, the Duke of Marlborough winning with a well-made firm butter, the Earl of Rosebery being second, and Lord Rothschild third. The Irishmen are determined to hold their position in the Agricultural Hall, and yearly their butter becomes much more uniform, though this is gained by a general increase of insipidness or lack of flavour. Of really bad or strong samples there were remarkably few. Nearly all the prizes in this section were taken by Irish co-operative societies, the Irvinstone being very successful.

The fancy butter classes are again gaining in numbers, but it can scarcely be said in artistic skill as well. Many of the competitors think that by colouring their butter they improve its appearance, whereas by so doing they make the petals of flowers appear thick and also to lose their lightness and semi-transparency. The first prize in the class for fancy or ornamental design in butter, with foliage or other extraneous decoration, was won by the Sussex Dairy Company with a handsome epergne of roses and ferns; but why introduce pods of peas? Mrs. R. Giddings took second with a very neat and well-made exhibit. Amongst the other exhibits was a model of Hornsey Church, stained-glass windows and all; and another showed a medallion of Lord Roberts mounted on a charger. If this was to be taken as a correct representation of "Bobs," he has been to the wars indeed on a charger that has literally gone to pieces, especially about the legs, one of the hind legs being evidently copied from human instead of equine anatomy. The class for fancy butter without extraneous decoration was marred by the sun shining full on the exhibits, and amongst these a desire for moulded, as against hand work, was very apparent. The prize-winning floral harp, the work of Mr. Townley's dairymaid, was far and away the best in the class, and this makes her first for three years in succession. It appears a pity that the Council have struck out the conditions under which the butter was made in various classes, this information to be made by the exhibitor. By its means the value of dairy crosses could be seen, and the stead advancement of the separator or other methods of dairying shown.

Bacon and Hams.

Pigs are directly connected with dairy farming, as consumers of its bye-products, but they could not be accommodated at the Dairy Show, so their cured carcases were allowed to represent them, and the entry of these was nearly twice as large as it was last year. The classes were well filled, the chief prize-winners being the Wiltshire Bacon Factory, Trowbridge; Mr. John Wyatt, of Redfield, Bristol; and Mr. Joseph Smith, of Cummersdale, near Carlisle. The Lord Mayor's cup for bacon was won by the smoked exhibit of Messrs. Bowyer, Philpott, and Payne, and that for hams by the York hams shown by Messrs. John Adamson and Co., Aldgate.

Bread.

Skim milk bread was remarkably well represented.

Honey.

There was an excellent show of honey, though the entries in some of the classes were not so numerous as on former occasions. Mr. J. P. W. Lightfoot succeeded in taking the first prize for twelve jars of medium coloured extracted honey, and the first prize for twelve sections of heather honey. The silver medal given by the British Beekeepers' Association for an exhibit of articles of food or medicine, in which honey is an ingredient, was won by Mr. F. Walker, of Gerard Street, Derby, whose exhibit was both interesting and instructive.

New Inventions.

The implement division was well filled, as usual, but there was a striking lack of new inventions. There were a few improved machines and other dairy appliances, but nothing that could be described as an absolute novelty. In the competitive classes for dairy vehicles, Messrs. Day and Monk, of Clapton; Hayes and Son, of City Road; and Vipan and Headley, of Leicester, were the most successful exhibitors. The cart for dairy farmers' use, with which Messrs. Vipan and Headley gained a first prize, is a model of what is required.

One of the most remarkable in the new invention class was the cream separator, the Little Gem, shown by Messrs. Vipan and Headley, of Leicester, which gained a gold medal at the Pau Exhibition.

Silver medals for new inventions were granted to Messrs. Allan and Barker for an oil engine, and to Messrs. Thomas Bradford and Co. for a new pattern Anglo-Hibernian churn for butter factories.

Roots.

Considering that the root crops are this year better than they have been for some time, the number of entries in this department was rather disappointing, the total being 129, against 139 last year and 149 in 1898. The quality, however, was very good, there being many mangolds and turnips of immense size. The first prizes for six specimens of long mangolds and six specimens of globe mangolds were both taken by Mr. J. Perry, of The Grange, Oswaldkirk, York. Mr. J. Reid, of Mid Sanquhar, Ayr, took the first prize for swede turnips, and Mrs. C. McIntosh, Havering Park, Romford, was successful in gaining the chief honours for the collection of roots for cattle feeding.

Poultry.

There was a very large collection of poultry and pigeons, though the entries, owing to the restricted space at the disposal of the Society, were hardly so numerous as in previous shows. The champion cup, given by the Lord Mayor for the best pen of Minorcas, Andalusians, and Leghorns, was carried off by Mr. A. Tucker, of Brampford Speke, Exeter; and the champion cup given by Spratts for the best pen of Plymouth Rocks, Wyandottes, and Orpingtons was won by Mr. J. Partington, of The Woodlands, Lytham.

First-class representatives and agents required throughout the United Kingdom for the sale of "Molassine." Write for particulars to the "Molassine" Co., Ltd., 5, Mark Lane, London, E.C.—[ADVT.]

Cambs; 2, Mr. A. Joyce, Railway View, Stockbridge, Hants; 3, Mr. C. H. Poulton, Aspenden, Buntingford, Herts; 4, Mr. H. F. Beale, Royston House, Andover; 5, Mr. Joseph Boyes, Lion Hotel, Bridge Street, Cardiff; hc, Mr Gideon Spearman, Colesbourne, Andoversford, Glos.

Class 70.—Twelve jars of medium-coloured extracted honey (other than heather honey), 1lb. each approximate weight: 1, Mr. J. P. W. Lightfoot, Pickering Bee Farm, Pickering, Yorks; 2, Mr. George W. Kirby, Salisbury House, Longwell Green, near Bristol; 3, Mr. W. W. Drewitt, Westwood Farm, Normandy, near Guildford; 4, Mr. H. W. Seymour, 53, Market Place, Henley-on-Thames; 5, Mr. John Smart, 43, East Street, Andover; hc, Mr. John Seabrook, Longfield, Kent.

Class 71.—Twelve jars of dark-coloured extracted honey (other than heather honey), 1lb. each approximate weight: 1 and 2, Mr. H. W. Seymour, 53, Market Place, Henley-on-Thames; 3, Mr. F. J. Hall, Claremont, Trent Valley Road, Lichfield, Staffordshire.

Class 72.—Twelve jars of run heather honey, 1lb. each approximate weight: 1, Mr. George W. Kirkby; 2, Mr. William Sproston, Shugborough, Great Haywood, Staffordshire; hc, Mr. John Berry, The Apiary, Llanrwst, N. Wales; c, Mr. J. P. W. Lightfoot.

Class 73.—Twelve jars of granulated honey of 1889, or any previous year, 1lb. each approximate weight: 1, Mr. John Hookway, 28, Martin's Building, Wellington, Somerset; 2, Mr. John White Lewis, Water Works House, Farnham, Surrey; 3, Mr. P. B. Govett, Tideford, St. Germans, Cornwall.

Class 74.—Twelve sections of honey, 1lb. each approximate weight: 1, Mr. W. Woodley, Beedon, Newbury; 2, Mrs. A. M. Woodley, World's End, Newbury; 3, Mr. A. Canning, Ownham, Wickham Heath, Newbury; 4, Mr. Jabez Sopp, Crowmarsh, Wallingford; hc, Mr. Harry Wood.

Class 75.—Twelve sections of heather honey, 1lb. each approximate weight: 1, Mr. J. P. W. Lightfoot; hc, Mr. Matthew Smith, Townhead Farm, Thornhill, Dumfries-shire.

Class 76.—Display of comb and extracted honey, of any year, not less than 84lbs, nor more than 112lbs. in weight: 1, Mr. W. Woodley; 2, Mrs. A. M. Woodley; 3, Mr. R. Brown, Flora Apiary, Somersham, Hunts; hc, Mr. H. W. Seymour, 53, Market Place, Henley-on-Thames; c, Mr. A. Canning, Ownham, Wickham Heath, Newbury.

Class 77.—Wax, not less than 3lb., the produce of the exhibitor's apiary: 1, Mrs. H. H. Woosnam, Rora, Bickinton, Newton Abbot; 2, Mr. H. W. Seymour; hc, Mr. John Berry.

Class 78.—Wax, not less than 3lb., the produce of the exhibitor's apiary; extracted and cleaned by the exhibitor or his assistants; to be shown in marketable cakes of uniform weight, suitable for the retail trade: 1, Mr. John Berry; 2, Mr. George W. Kirby; 3, Mr. A. Canning.

Class 79.—Interesting and instructive exhibit of a practical nature, connected with bee culture, not mentioned in the foregoing classes, including articles of food or medicine in which honey is an ingredient: 1, Mr. Francis Walker, 64, Gerard Street, Derby; hc, Mr. H. W. Seymour.

NEW AND IMPROVED INVENTIONS.

Class 81.—Any new invention relating to the dairy industry, or one showing distinct and practical improvement, not eligible for competition in any other class, and not previously exhibited at the Dairy Show: Silver medals: Messrs. Allan and Barker, Ltd., The "A. B." Gas and Oil Engine Works, Taunton, the "Infant" "A. B." oil engine, price £40; Messrs. Thomas Bradford and Co., 140, 141, 142, 143, High Holborn, W.C., a new pattern Anglo-Hibernian churn for butter factories, fitted with the following important new improvements: The bearings of the churning dash being carried outside the churn, and thereby rendering it impossible for the lubricant to come in contact with the cream; another improvement is a new sluice outlet, which has a much greater capacity, and therefore empties the churn of both the butter, and also the buttermilk with great rapidity, and entirely avoiding any damage to the grain of the butter, churning capacity, 150 gallons per hour, price £40.

VEHICLES FOR CONVEYING MILK, ETC.

FOR MAKERS ONLY.

Class 82.—Van, for wholesale or station purposes, to carry twelve churns of 17 imperial gallons: 1, Messrs. Day and Monk, High Road, Clapton, London, N.E.

Class 83.—Van, for retail sale or delivery (four-wheeled), to carry two churns of 17 imperial gallons: 1, Messrs. Hayes and Son, 197, 199 and 201, City Road, London; hc, Messrs. Day and Monk, High Road, Clapton, London, N.E.; c, Messrs. Street, White and Co., 18, 20, 21, and 23, Park Mews, Kilburn, N.W.

Class 84.—Cart, for retail sale or delivery (two-wheeled), to carry one churn of 17 imperial gallons: 1, Messrs. Day and Monk; 2, Mr. William Vincent, Reading, and at Arborfield Cross; r and hc, Messrs. Hayes and Son; c, Mr. William Vincent.

Class 85.—Perambulators and hand-trucks, to carry one churn of 17 imperial gallons: 1 and 2, Messrs. Day and Monk; r and hc, Messrs. Street, White and Co.

Class 86.—Vehicle designed for dairy farmers' use, not only for the purpose of conveying milk from farm to station or factory, but for taking calves, pigs, etc., to market: 1, Messrs. Vipan and Headly, Church Gate, Leicester.

ROOTS, ETC.

Class 87.—Six specimens of long mangolds, drawn from a crop of not less than two acres: 1, Mr. John Perry, The Grange, Oswaldkirk, York; 2, Mr. T. Chettle, Manor Farm, Reading; r, Mr. F. Warwick, farm manager, Walthamstow Urban District Council.

Class 88.—Six specimens of Globe, Tankard, or Intermediate mangolds, drawn from a crop of not less than two acres: 1, Mr. John Perry; 2, Mr. Wilberforce Bryant, Stoke Park, Slough.

Class 89.—Six specimens of swede, any variety, drawn from a crop of not less than two acres: 1, Mr. John Reid, Mid Sanquhar, Ayr; 2, Mr. John Perry; r, Mr. Wm. Maxwell, Sparnel Bank, Galston, N.B.

Class 90.—Collection of roots, etc., for cattle feeding in winter: 1, Mrs. C. McIntosh; 2, Mr. John Perry; r, Mrs. C. McIntosh.

BUTTER MAKING CONTESTS.

Class 91.—Butter-making contest, open to those who have never won a prize at any show: 1, Miss D. H. Patterson, Tunstall, Sunderland, co. Durham; 2, Miss Ella Street, Somersham, Hunts; 3, Miss Mary F. Hunter, British Dairy Institute, Reading; r, Mr. S. W. Everett, Barford Hill Dairy, Barford, Warwick; c, Miss Elsie L. Johnson, Selborne, Hants; Mrs. Crawford, Cox House Farm, Norton, Stockton-on-Tees.

Class 92.—Section A.—Butter-making contest, open to students who have attended classes at the British Dairy Institute: 1, Miss E. Follett, Easton Royal, Pewsey, Wilts; 2, Miss Hilda C. Abbiss, Home Farm, Flitwick, Beds; 3, Miss Agnes Jones, Blaennant Farm, Kelybebyll, Pontardawe, South Wales; r, Mrs. W. Green, Etchingham Dairy Co., Etchingham, Sussex; c, Miss E. T. Rowe, British Dairy Institute, Reading; Miss Mary F. Hunter; Miss M. R. McDuff, British Dairy Institute, Reading; Miss Elsie L. Johnson, Selborne, Hants.

Class 92.—Section B. Butter-making contest, open to students who have attended classes at the British Dairy Institute: 1, Mr. S. W. Everett; 2, Miss C. M. B. McDuff; 3, Miss Jane Garbutt, Asylum Farm, Tooting, S.W.; r, Mr. A. Warren, Melsbury Farm, near Wells, Somerset; c, Miss Lillian Hobbs, 29, Dorset Road, Merton Park, Surrey; Mrs. N. Comer, Surrenden Dairy, Pluckley, Ashford, Kent.

Class 93.—Section A.—Butter-making contest, open to women only: 1, Miss Annetta H. Smith, 7, Shandon Street, Edinburgh; 2, Miss Hilda C. Abbiss; 3, Miss M. E. Gordon, The Warren Farm, High Ashurst, Mickleham, Dorking; r, Miss E. T. Rowe; hc, Miss M. R. McDuff; c, Mrs. W. Green.

Class 93.—Section B.—Butter-making contest, open to women only: 1, Miss Emmie Woolfe, Hungerford House, Madeley, near Newcastle, Staffs; 2, Mrs. N. Comer; 3, Miss Ella Street; r, Miss Mary Leighton, Halloughton Grange, Whitacre, Birmingham; hc, Miss E. M. Cox, Pwlpen, Christchurch, near Newport, Mon.; Miss Gertrude L. Lawrence; c, Miss C. M. B. McDuff; Miss Jessie Stubbs.

Class 93.—Section C.—Butter-making contest, open to women only: 1, Miss Isabel A. Cable, Bagshot Park, Bagshot, Surrey; 2, Miss Lillian Hobbs; r, Miss Harriet Stubbs; hc, Miss Frances Mary Stubbs; Miss Isabella Rutherford, Summside Farm, Gateshead-on-Tyne; c, Miss Edith Fry, High Street, Chippenham, Wilts; Miss Alice Maud Mary Smith, Rydon Mills, Woodbury, Exeter; Miss Bessie F. Brown, Colton Mains, Dunfermline, Fife.

Class 94.—Section A.—Butter-making contest, open to men and women: 1, Miss J. S. A. White, Hardings Farm, Greensted, Ongar, Essex; 2, Mrs. W. Green, Etchingham Dairy Co., Etchingham, Sussex; 3, Miss Hilda C. Abbiss, Home Farm, Flitwick, Beds; r, Miss E. T. Rowe; hc, Mrs. T. Miles, Elm Farm, Holwell, Sherborne; c, Miss Nellie M. Smith.

Class 94.—Section B.—Butter-making contest, open to men and women: 1, Miss C. M. B. McDuff; 2, Miss Jane Garbutt; 3, Miss S. Hargreaves, Lightfoot House, Broughton, Preston; r, Mrs. J. Gooderham, The Heywood, Diss, Norfolk; hc, Miss Ella Street; Miss Isabella Rutherford; Miss Gertrude L. Lawrence.

Class 94.—Section C.—Butter-making contest, open to men and women: 1, Miss K. Baynes, Broxted Hall, Dunmow, Essex; 2, Miss Fanny Wilbore, Hawthorn Cottage, Wetley Rocks, Stoke-on-Trent; 3, Miss Jessie Stubbs; r, Miss Mary Leighton; hc, Miss Frances Mary Stubbs; Miss K. Austee, The Dairy, Malmesbury; Mr. S. W. Everett; Miss Bessie F. Brown, Colton Mains, Dunfermline, Fife; c, Miss Emmie Woolfe; Miss Elizabeth Cook, Passen Arms, Wrumarleigh, Carstang, Lancs; Miss E. A. Smith, Hill Farm, Sibton, Yoxford; Miss Mary Haggett, "Tunlake," Ditcheat, Evercreech, Bath; Miss A. L. Cook, Ashford Farm, Ashford, Middlesex; Miss Ella Wyse, Ridley Farm, Tarporley, Cheshire; Miss Harriet Stubbs; Miss M. Ada Bear, c.o. Mr. Gage Harper, Mason's Bridge, Raydon, Hadleigh, Suffolk; Miss Edith Fry; Miss Lillie Ryder, Home Farm, Creswell, Stafford; Mr. George Goddard, stockman to Hon. Mrs. Baillie Hamilton, Burley Lodge, Ringwood, Hants; Miss A. C. Coles, Home Farm, Easton Neston, Towcester; Miss Maria F. Wallator, Haddocks Farm, Bewdley, Worcs.

Class 95.—Butter-making contest for first prize winners of 1900: 1, Miss E. Woolfe; 2, Miss E. Street; 3, Miss K. Baines; r, Mr. S. W. Everett; hc, Miss E. Follett; c, Miss J. S. A. White.

Class 96.—Champion butter-making contest, open to winners of first prizes in the preceding classes or at the Dairy Show of 1898 or 1899; champions of any year excepted: 1, Miss M. K. Harris, Brownsell Farm, Stourton, Caundle, Stalbridge, Dorset; 2, Miss Annie B. Walker, Dog Kennel Farm, Hitchin, Herts; 3, Miss E. Woolfe.

MILKERS' CONTESTS.

Class 97.—Milking contest, open to men over eighteen: 1, Mr. John Byers, Great Hollanden Farm, Underriver, Sevenoaks; 2, Mr. J. G. Dawson; 3, Mr. A. B. Little, Paxcroft Farm, Tiverton; vhc, Mr. William Drake, Park Farm, Romford; hc, Mr. John Turner, Cockerhurst Lodge Farm, Woodcote Heath, Surrey; Mr. John Nesbet; Mr. J. L. Chalmers, Holmwood Farm, Sutton, Surrey; Mr. W. Mote, Southend Farm, Leighton Buzzard; Mr. George Cosgrove, Home Farm, Sunningdale Park, Ascot; Mr. James Thomas Cogger.

Class 98.—Milking contest, open to women over eighteen: 1, Miss M. R. McDuff; 2, Miss M. Wilson, Holly Bush Farm, Merton, near Axminster; 3, Miss Mary Nesbet, Great Parndon, Ingatestone Essex; vhc, Miss Edith Dyer, Mitchell Brotton, Sandbach, Cheshire; hc, Miss D. H. Patterson; Miss Emily Thomas, Glanyrynys, Llangendeirne, Kidwelly; c, Mrs. Eyre, Great Holmbury Farm, Dorking; Miss S. Hargreaves, Lightfoot House, Broughton, Preston; Mrs. N. Comer, Surrenden Dairy, Pluckley, Ashford, Kent; Miss Margaret S. [illegible], Long Ditton, Surbiton.

Class 99.—Milking contest, open to women under eighteen: 1, Miss Jessie Nesbet, Great Parndon, Ingatestone, Essex; 2, Miss Grace White, Hardings Farm, Greensted, near Ongar, Essex; Miss Dorothy [illegible], Great Parndon, near Dover; Mr. Thomas C. Nesbet, Great Parndon, Ingatestone, Essex; r, Mr. William Smith; c, Mr. Joseph [illegible], Coppeswich Hall, Ipswich; Mr. Lloyd, Rook Barton, Hatch Dunmow, Essex.

Shire Horse Show and Sale at Worcester.

The Worcestershire Shire Horse Society was formed about a year ago to improve and encourage the breed of cart horses in the county. Already there are over 100 members of the Society, and upwards of 200 applications have been met. The Society went in for really fashionable blood, regardless of cost, and the wisdom of their policy was demonstrated at the first show of the Society, held on Tuesday. The quality of the stock for show and entered for sale was of good quality and a most promising lot. There were 200 entries. The largest class was that of town mares and geldings suitable for town work, four years and upwards; this class numbered eighty. There were thirty three-year-old fillies and geldings, and forty one and two year old fillies and geldings. Other classes for colt foal, filly foal, and foal by the Society's horses brought up the total entry to 200. The show all round exceeded the expectations of the auctioneers, Messrs. F. Lloyd and Sons, and Mr. Lloyd offered to give a 15-guinea cup—if he sold another year—for the best horse in the show. Mr. Frank Lloyd remarked that the trade in geldings was better than at Wrexham the previous week. There was a good attendance of buyers throughout the day, and most of the animals were sold.

In the class for geldings or mares, suitable for town work, of four years old and over, there were some capital animals, and the black gelding, five years old, belonging to Mr. John Powell, of Lower Wick, is a horse of the right stamp. Mr. Edwards, of Liverpool, bought the gelding for 80gs. The second prize horse was a bay gelding of Mr. W. P. Pope's, of Leigh, and is five years old, has a record as prize winner at Madresfield and Ledbury, Kingston and Wiltshire, and was knocked down for 98gs. The third prize horse, a black gelding, belonging to Mr. Pope, of Lulsley, a strong and weighty animal, was bought in at 78gs. The best of Mr. W. S. Carless's geldings went for 63gs. In the class for three-year-old fillies and geldings, promising to make town horses, there were about thirty entries, and the show, on the whole, was excellent. First prize was given to Mr. S. Bennett, Spetchley, for a blue roan gelding, sire Brigand 2nd. The second prize horse, a roan gelding, owned by Mr. S. Phelps, ran the first very closely. It appears that on the previous night the animal caught cold, and therefore was not in good condition for showing, although it has excellent feet, legs, and joints. Mr. Phelps' horse was placed before Mr. Bennett's at Evesham and Leicester, but the bidders followed the judges, Mr. Green, of Studley, paying 85gs. for the prize-winner, compared with the 74gs. paid for the second. The third prize horse, belonging to Mr. William Stallard, is a very useful grey gelding, which took second prize at Madresfield

Cross-bred and other Breeds than Jerseys or Shorthorns.

this year. The bidders did not follow the judges here, 60gs. being the highest bid for Mr. Stallard's horse, and 64gs. for Mr. Hutchinson's entry, which received the reserve ticket. For Mr. Barneby's highly commended gelding 57gs. was paid.

The yearling and two-year-old fillies and geldings were a most creditable class for a first show. The first prize was given to Mr. W. S. Carless' bay colt by King Holt, but in the opinion of the buyers the second animal, Mr. B. Hutchinson's two-year-old filly Eckington Gem was the better animal, she being knocked down, after spirited competition, to Mr. Hall, of Bedford, for 160gs.; whilst Mr. Carless' colt went at 57gs. to Mr. Edwards, Liverpool. The third prize winner was also a two-year-old filly by Elector, belonging to Mr. Thomas Griffiths, and bred by Mr. W. Stallard. She was sold to Mr. Green, of Ombersley, for 65gs. The Shire colt foals were a fair class. Mr. Darlington was first with a promising bay foal by Lord Byron of Batsford, which fetched 36gs. The second prize went to Mr. A. Green, Ombersley, for a foal by Bar None William, which was first in the class for foals by the Worcestershire horses. He was knocked down for 25gs., only half a guinea more than was bid for the third prize winner in the open class and second in the Worcestershire class, a black colt by Bar None William, belonging to Sir Harry Vernon. Earl Beauchamp's grey colt by Madresfield Thumper was reserved in the colt class. Mr. J. Heynes, jun.'s bay colt foal by Buscot Harold, first at the Worcestershire and Herefordshire Show in 1897, was not noticed by the judges, but was sold for 88gs.

The fillies were a better class than the colts. Mr. Darlington took first prize with Clevedale Real Gem, by Brilliant 6th, one of the Cannock horses. This filly, which was second at Moreton-in-the-Marsh and an easy winner at Worcester, was sold to Mr. Rowland for 76gs. The second prize was won by Mr. Jno. Newton Jones with a bay filly by Bar None William, which was third in the Worcestershire class; 29gs. was the price realised for her. The third prize winner, Mr. J. Pope's, by Laughing Conqueror, is a better looking animal, and would have been awarded second prize but for a slight rupture. She was bought by one of the judges for 25gs. Mr. Jas. Nott's filly by Hartington 2nd, which took the reserve ticket, fetched 34gs.

Prize List.

Gelding or mare, suitable for town work, four years old and over: 1, Mr. J. Powell, Lower Wick; 2, Mr. W. P. Pope, Brocamin, Leigh; 3, Mr. J. Pope, Lulsley; r, Mr. W. T. Barneby, Saltmarshe Castle; hc, Mr. H. W. Hill, Brockhill Court, Shelsley; c, Mr. John Powell.

Three-year-old fillies and gelding, promising to make a town horse: 1, Mr. S. Bennett, Spetchley; 2, Mr. S. Phelps, Birlingham, Pershire; 3, Mr. William Stallard, Malvern Link; r, Mr. B. Hutchinson, Eckington; c, Mr. H. Crank, Martley; Mr. W. Downs, Oakley, Droitwich.

Gelding, colt, or filly, one or two years old: 1, Mr. W. S. Carless, Worcester; 2, Mr. B. Hutchinson, Eckington Gem; 3, Mr. T. Griffiths, Wadborough; r, Mr. T. H. Wythes, Droitwich; hc, Mr. Jos. Wythes, Crowle; c, Mr. A. Green, Ombersley.

Shire colt foal: 1, Mr. William Darlington, Clevelode; 2, Mr. A. Green, Ombersley; 3, Sir Harry Vernon, Hanbury Hall; r, Earl Beauchamp, Madresfield Court; hc, Mr. John Powell; c, Mr. W. S. Carless.

Shire filly foal: 1, Mr. W. Darlington; 2, Mr. J. Newton Jones, Redditch; 3, Mr. J. Pope, Clerkenleap; r and hc, Mr. Jas. Nott, Redditch; c, Earl Beauchamp.

Foal by the Worcestershire Shire Horse Society's horses: 1, Mr. A. Green; 2, Sir Harry Vernon; 3, Mr. J. N. Jones; r, Mr. W. S. Carless; hc, Mr. William Darlington; c, Mr. Morgan, Sneachill, Spetchley.

Coleshill Farmers' Club.

The eighth annual Shire Horse and Foal Show of the Coleshill Farmers' Club took place on Wednesday. In the number of entries there was no falling-off from last year, and in the general average of quality the show was the best the Club has had, though the leading animals exhibited were not so exceptionally fine as were one or two on that occasion. The colt foals were again a strong class. Mr. William Neale came first with a bay by the well-known sire, Moorland Paxton, a big, strong, upstanding foal, remarkable for quality as well as for size; Mr. Thomas Clayton being second with a nice, compact bay colt. The filly foal class was large, and quite up to the average in quality. Mr. Neale took the first two prizes, and one of his colts, a brown by Moorland Paxton, made the owner the holder of the Coleshill Challenge Cup. In the yearling geldings, a small but very good class, Mr. Dugdale was first with an exceptionally good red roan horse, while Mr. Neale was second with a stylish black colt, a son of Moorland Paxton. Among the yearling fillies, another good class, was the chestnut which last year, as a colt, won for Dr. Wall the challenge cup. This filly, sired by Willington Boy, on Wednesday won first prize in the filly class, and was placed second in the competition for the medal for the best Shire mare or filly. The second and third prizes went to Mr. Neale. The first prize for two-year-old geldings was won very easily for Mr. Charles Sprigg, of Drayton Bassett, by a bay son of Coleshill Carbon, and a smart, useful animal, the bay colt shown by Mr. A. Ibbotson, of Elmdon, being placed second. In a small class of two-year-old fillies, Mr. Charles Sprigg won the first, and Mr. J. Steadman, of Meriden, the second prize. The first prize in the brood mare class and the silver medal for Shire mares went to Dr. Wall for a bay, Hazlewood Baroness, sired by Dunsmore Bounding Willow. The second prize in this, the highest class of the show, was taken by Mr. W. Milner, of Solihull, with a bay Woodfield Diamond, sired by Hobbling Squire, who was hardly so big as the first prize mare. The third prize went to a bay shown by Mr. Sprigg.

For a hunter class there was a very good competition for the special prizes offered by Mr. P. A. Muntz, M.P., for foals by any of his horses that were standing at Coleshill in 1899. The colt shown by Dr. Wall in the general competition took the first prize in this class, the second going to a bigger colt, but not so good a mover, shown by Mr. D. W. Phillip, of Whitacre, and the third to the filly which took the third prize for Mr. Dugdale in the general filly class. A good class of foals also came out for the prizes offered for Mr. W. Neale, Mr. J. Parker Toone, of High Cross, Rugby, taking first prize, Mr. C. W. Gater, of Burbidge, Hinckley, second, and Mr. W. Townshend, of Gilson Hall, third. Mr. S. W. Hughes's prizes were won by Mr. W. W. Burdett, of Astley, and Mr. W. Wakefield, of Atherstone. A good class was that of geldings foaled in 1896 or 1897, owned by the exhibitor for six months before the date of entry. A very good black, the son of Dunsmore Forest King, standing quite 17 hands, with excellent legs, a good mover, took the first prize for Mr. S. Arnold, of Maxstoke; while Mr. C. Thornton, sen., of Curdworth, took the second with a very useful brown by the same sire, and Mr. Mark Wright came third with a grey sired by Dunsmore Bounding Willow.

There was a good show of roots, fruit, and dairy products, the roots, especially the mangolds, being the best that have been seen here. The first prize for butter was taken by Lord Norton, that for cheese by Mr. G. Coley, and that for fruit by Mr. D. Wall. Prizes for roots, etc., were taken by Mr. W. Townshend, Mr. W. Perkins, Mr. J. S. Dugdale, Mr. W. C. Ash, Mr. S. Arnold, Mr. G. Ward, Mr. F. Ford, Mr. A. Dale, Mr. L. Willday, Mrs. Ester Ibbotson, Mr. G. D. Willmot, Mr. J. H. Rymond, and Mr. J. Higgins (who won three first prizes).

Newport Cheese Show.

The annual cheese show promoted by the Newport (Monmouth) Corporation was held in the Provision Market, Newport, on Wednesday. There were four classes and ninety-one entries, which is a slight increase upon last year's total. The judges were Mr. J. Long, of Mountain Ash, and Mr. T. Lloyd, of Aberdare. These gentlemen spoke highly of the general excellence of the exhibits, the quality of the cheese being, in their opinion, a great improvement as compared with the previous show. This improvement was particularly marked in the local classes. At the conclusion of the judging the Mayor of Newport entertained the exhibitors and officials to luncheon in the Town Hall.

The prize list was as follows:—

Pitch of not less than 1cwt. and not more than 2cwt., and not fewer than twelve cheese to the cwt. (restricted to farmers in the county of Monmouth): 1, Mrs. Williams, Gilwern, Pontthir; 2, Mr. J. Williams, Barn, Llanwern; 3, Mrs. A. Hawker, Alit Farm, Llantrissant.

Single cheese of not less than 10lb (open to the farmers of Monmouthshire), prizes the gift of Lord Tredegar: 1, Miss Llewellyn, Lower Garn, Caerlon; 2, Mr. M. E. Watson, Samson's Court, Goldcliffe.

Pitch of not less than 2cwt., not more than 4cwt., and not fewer than twelve cheeses to the cwt. (open): 1, Mr. G. E. Puddy, Blackford, Weston-super-Mare; 2, Mr. J. Board, East Pennard, Shepton Mallet; 3, Mr. E. Washer, Berrow, Burnham; vhc, Mr. F. House, Huntspill, Bridgwater; hc, Mr. F. C. Harris, Slimbridge, Gloucester; c, Mr. W. W. House, Huntspill, Bridgwater.

Single cheese of not less than 20lb, and not more than 40lb weight (open): 1, Mr. W. W. House; 2, Mr. J. Neale, Brookend, Berkeley; 3, Mr. E. Dibble, Brean, Burnham; vhc, Mr. F. House; hc, Mr. F. C. Harris; c, Mr. C. B. House, Downside, Shepton Mallet.

The fruit crop in North Shropshire is very abundant. At Market Drayton, on Wednesday, the best damsons could be purchased at the low price of 1s. per bushel of 90lb., while second and third rate qualities fetched 4d. and upwards for the same quantity.

Bridgnorth St Luke's Fair, which is the oldest statute cattle fair in England, being established in 1226, takes place on the 29th of this month, and at it Messrs. Nock, Deighton, and Kirkby will dispose of about 700 head of store cattle and 1,000 head of store sheep, pigs, and calves. The sale, which will be conducted on the live weight basis, will commence at 10.30 a.m.

Malton Michaelmas Stock Fair.—At this fair on Thursday a good amount of business was done in both cattle and sheep. Cattle were a good quality throughout, and there was a fair demand for the better qualities. Three parts beef were dear, ranging from £13 10s. to £15 per head; strong two-year-old bullocks made £9 10s. to £12 10s., extra lots, £13; yearlings, £7 to £9; Irish cattle, £7 to £12; and a few useful cows to £14 per head. About 400 rams were penned. A moderate trade at rather less prices resulted. Some good Leicester flocks averaged about 6gs. per head, the range being 7gs. to 10gs. Horse trade quiet, except for good foals.

SOCIETIES.

Leominster.

Councillor Bright presided over the annual general meeting of the Leominster Agricultural Improvement Society at the Town Hall on the 5th inst. The balance-sheet showed that the Society had no funds, but it was free from debt.

Mr. Bach said the balance-sheet showed that they were clear for 1899 and for the cottage garden classes for the present year. The position was simply this: no debts, no funds.

The Chairman said the next business was to consider whether the Society should be continued.

The Secretary stated that the Society started in 1893. Some hedging competitions were held at the late Mr. Bright's farm, at Eaton. Mr. Bright promoted the competitions, and he (the speaker) was appointed secretary. A dinner was held after the competitions, and it was found that there was a balance in hand. It was decided that an agricultural improvement society should be started. The receipts in 1893 amounted to £76 17s. 6d., and the profit of the season's working came to £17 19s. 11d. That amount was placed in the bank. The following year the receipts were £71, and a balance of £2 10s. was banked. The proceeds in 1895 were £67 15s., but in 1896 there was a big falling off owing to the starting of the Eardisland, Dilwyn, and Pembridge Society. The subscriptions only amounted to £43 14s. 6d. In 1897 they amounted to £56 17s.; in 1898, £46 12s. 6d.; and in 1899, £48 1s. 6d. Since the Eardisland and District Society had started, a society had been formed at Mortimer's Cross, and that had further reduced their subscriptions. At the present time the receipts were not sufficient to meet the expenses and they had been compelled to take from the bank money that was deposited in 1894. He had been £20 out of pocket. He had had considerable difficulty in collecting the subscriptions during the present year, as there had been so many calls on the tradesmen. They would either have to reduce the prize money or work harder at the subscriptions.

Mr. G. Griffiths thought it was useless to attempt to hold the show, unless they could get more money. They lost £11 on the previous year's working. Other societies had started in the neighbourhood, and these had stopped their progress a good deal. He proposed that they should discontinue the competitions for the present year. Mr. Philip Bach seconded.

Mr. A. C. McNish thought it was not intended that the Society should lapse altogether.

Mr. H. Bach remarked that the present management committee had completed their term of office, so that the Society would practically cease to exist.

Mr. G. Griffiths said he would propose that the Society be discontinued.

Mr. W. A. Notley seconded, and the resolution was carried.

A vote of thanks was given to the secretary on the proposition of the chairman, and the meeting terminated.

Shropshire and West Midland.

A meeting of the council of the Shropshire and West Midland Agricultural Society was held in the lower room of the Music Hall, Shrewsbury, on the 6th inst. Mr. J. Bowen-Jones presided. It was unanimously agreed that the hon. director, Mr. W. E. M. Hulton-Harrop, be nominated president for the ensuing year.

A letter was read from Mr. W. L. Browne, regretting inability to attend. He had, he said, heard an expression of opinion from North Shropshire and Cheshire farmers that Whitchurch should again be visited by the show if that town could meet the requirements of the society.

Mr. Southam said he had heard similar expressions of opinion from farmers around Whitchurch. Some, however, thought the show was fixed permanently for Shrewsbury; he had, however, endeavoured to point out that the society was willing to go elsewhere if their rules were complied with.

Mr. Butler Lloyd pointed out that with their great outlay of capital on the Shrewsbury ground, to go elsewhere would mean a considerable loss in interest on that capital.

The Chairman said he thought it a dangerous thing to go from Shrewsbury without something definite before them.

Mr. Alfred Mansell said it should be set out definitely in their next annual report that the society was prepared to go elsewhere providing its terms were complied with; that, he said, would give towns an opportunity of making a definite offer.

The Chairman agreed that the suggestion was a good one; he thought that they had better not make a change this year, now that they were consolidating, but try and see what they could do again. It was agreed that the next show should be held on Wednesday and Thursday, June 12th and 13th.

Mr. Alfred Mansell suggested that the council should offer prizes to young men for judging stock. Such a competition, he said, would encourage young farmers to come forward to judge stock. He saw that such competitions were held in Canada. If

it were adopted he should be glad to give a first prize.

The Chairman said it was very good of Mr. Mansell to make the offer; the suggestion was quite worthy of consideration, and should be put on the agenda for the next meeting.

Cheshire.

A meeting of the Cheshire Agricultural Society was held at Crewe on Monday afternoon, Mr. Joseph Hill, Smethwick Hall, Congleton, presiding. Various protests arising out of the recent show at Congleton were considered. Mr. W. Blockley protested against Mr. B. Dutton taking third prize in the heavy cheese class. He stated that Mr. Dutton took the first prize at Macclesfield in 1898, and was prohibited by rule from competing again in the same class for three years. Mr. Dutton, however, pointed out that at Macclesfield he competed in Class 1, and at Congleton in Class 2. Several members said that the classes were practically the same, but divided for exhibitors' convenience. It was decided by five to three not to accept the protest.

Mr. Isaac Brown, of Ridley Hall, Tarporley, objected to Mr. F. Miller, of Birkenhead, taking first prize in the bull class. The objection was sustained by ten votes to one, on the ground that the bull had not been in the exhibitor's possession for the time required by the rules. Mr. A. J. Solley, of Congleton, objected to Mr. W. S. Billington and Mr. C. Bibbey taking prizes for young stock in Class 23. The objection related to the ages of the stock. It was, however, not sustained.

The Secretary submitted the annual report for the year, which stated that the show at Congleton proved in every way a great success, both financially and as an exhibition. The adverse balance with which the year commenced had been wiped away, and the Society now has a credit balance of £84 1s. 6d. The gate receipts at Congleton were the highest ever taken at one day's show, and the entries would also have been considerably over the average if the regulations of the Board of Agriculture had not prevented a show of pigs.

Hereford Herd Book.

The quarterly meeting of the council of the Hereford Herd Book Society was held at Hereford on Thursday, under the presidency of Sir James Rankin (the president). Mr. Turner proposed, and Mr. Tudge seconded, that Sir James Rankin be re-elected president, and this was unanimously agreed to. Mr. H. F. Russell was also re-elected vice-president. The President moved that a committee be appointed to consider the question of the union of the Hereford Herd Book Society and the Hereford Cattle Breeders' Association, and to report to this council as to the best means to be adopted for carrying this resolution into effect, if recommended. Mr. Smith seconded. The motion was carried, and a committee was appointed of Messrs. J. W. Smith, H. J. Bailey, A. P. Turner, H. R. Hall, and L. L. Moore, with the president and vice-president.

"Mark Lane Express" Diary.

October.

15. Sale of pure bred Dutch Cattle, belonging to Messrs. Rumbal and Sons, at Pond Green Farm, Walthamstow, Essex.

25. Sale of Store Stock, at Shrewsbury, Smithfield.
26. Sale of Shire Horses, at Peterborough Repository.

Barley and Wheat Stacks Burnt at Beccles.—On Wednesday afternoon, a stack of wheat straw, and another of barley straw, standing in a field belonging to Mr. N. W. Pells, of Beccles, were observed to be on fire. The fire brigade were at once apprised, but their efforts to save the straw were unavailing, and both stacks were destroyed. It is supposed the fire was someone's wilful act.

Agricultural Education for Women.

The second annual meeting of the Lady Warwick Agricultural Association for Women was held at Stafford House, St. James's, on Friday afternoon, the Countess of Warwick presiding. There was a large attendance of ladies and gentlemen interested in the scheme.

Miss Edith Bradley, the organising secretary, read the report of the Committee, which stated that the Association was formed by Lady Warwick to help in organising and directing the large amount of agricultural work now undertaken by women. The scheme had, since its inception, developed in every direction, and had now the comprehensive title which embraced as its sub-divisions (*a*) the Lady Warwick Hostel at Reading; (*b*) the Lady Warwick Agricultural Association, with its registry to bring employers and employed together; (*c*) the *Women's Agricultural Times*; (*d*) the Warden's Farm; and (*e*) the Marketing Department. For the successful accomplishment of the work of the Association it was necessary to obtain the co-operation and support of patrons and associates, but at present a falling off had to be recorded in the number of both patrons and associates. It was, however, encouraging to find that since the beginning of July there seemed to be a revival of interest in the work of the Association. The registry had been the means of bringing together employer and employed, posts having been found for nine hostel students and for four other qualified ladies. The registry was, therefore, of use, and the methods on which it was conducted were satisfactory. It was hoped that the marketing department would develop into a co-operative society, and it was already slowly but surely growing in that direction. (Hear, hear.)

Lady Warwick, who was received with applause, congratulated the Association on the progress and steady enlargement of its scope. They were meeting with great success at the hostel; an ever-increasing number of good posts were at the disposal of trained women in horticulture, dairying, poultry work, and bee-keeping, and she was convinced that the further development of the Association would lead to sound results. There were numerous openings now for ladies to start together in market produce; but a thorough practical training was absolutely necessary. No amateur could hope to succeed without training herself in sound business methods, and she would never advise anyone to compete in the business world without that thorough training. In fact, amateurishness was no use in that organisation. (Hear, hear.) She invited associates and patrons to supply definite practical information, as far as possible, based on their own experience, such as to price, position of good localities for poultry-rearing, market gardening, private dairies, apiaries, etc. In her opinion, the registry would be of great value both to employers and employed in the future. So far they had not found many good positions vacant in dairy work, but there were useful openings for ladies with capital to start dairy farming and creameries. There were also splendid openings in poultry work, both for posts and in running poultry farms, and she strongly advised women to train in this direction. We were miles behind other countries in poultry rearing. There was a constant demand for poultry and eggs, and, so far, that demand was never satisfied by home produce. In Ireland, under Mr. Horace Plunkett's splendid co-operative organisation, this poultry question was solving itself and making rapid strides, but we wanted, in this country, millions of chickens, ducks, turkeys, and eggs. As to horticulture, there was an ever-widening field of labour thrown open to trained women. There were good and well-paid posts waiting for women as good gardeners, as forewomen in glass-houses, or in sole charge of small gardens, while to those who had capital, farms of market gardening were open for specialising in fruit and flowers, vegetable or mushroom growing, all of which would be productive of a certain income. In addition to these occupations, bee-keeping was a profitable source of additional income. Having spoken of the success of the Warden's Farm at Reading, Lady Warwick concluded by urging women to train, train, train; and to be thorough, whether they grew a cabbage, milked a cow, or crammed a chicken. (Applause.)

A discussion followed in relation to the openings for women trained in the lighter branches of agriculture—(a) as gardeners, fruit and flower growers, or market gardeners; (b) as dairy women; (c) as poultry rearers; and (d) as beekeepers; much practical information being offered by the several speakers.

The report of the committee was adopted, and the thanks of the meeting were conveyed to Lady Warwick for presiding, as also for her continued interest in the work of the Association. A similar compliment was paid to the Duke of Sutherland for allowing the meeting to be held in the stately Staircase Hall of Stafford House.

Chester Horse Fair.—The October statute fair is usually one of the largest of the year, and attracts trade from all parts of the country, but the fair held on Thursday presented no special features. The show of horses was for the most part a very ordinary one, and the demand quiet, except for good lots. Prices were irregular, but were about the same for the leading classes as at the previous fair.

Imports of the Cereal Year.

The quantities and values of the principal articles of agricultural produce imported during the cereal year are given in the September number of the *Journal* of the Board of Agriculture. It is noticeable that the total value of the various articles rose up to some £9,000,000 more than in the previous year. This is due chiefly to higher values, especially of articles of animal produce, and it is probable that as regards quantity the United Kingdom was not more dependent for these commodities upon foreign supplies in 1899-1900 than in 1898-99. The receipts of live animals for food have been somewhat affected by the prohibition to import live animals from Argentina in consequence of the outbreak of foot-and-mouth disease in that Republic. Mainly as a consequence of this the total number of cattle show a decrease of 50,000 head, and sheep of nearly 240,000 head, as compared with the cereal year 1898-99. Fresh beef and mutton were received in increased quantity, particularly the former, of which we imported over half a million cwts. more than in 1898-99, two-fifths of the increase coming from the United States. As regards mutton, the changes are only slight. Salted beef and pork came in smaller amount, but there was a decided increase in the class of meat unenumerated. Both bacon and hams came in reduced quantities, but in both cases the value was increased, so that the country is estimated to have paid £1,000,000 more for about 150,000 cwts. less of these forms of pig-meat. In the case of bacon, Canada has sent over half a million cwts., or some 100,000 cwts. more than in 1898-99, but this was not sufficient to counterbalance the decline from the United States and Denmark. The Canadian quota of hams similarly increased at the expense of the United States.

Dairy Produce

—butter, margarine, cheese, fresh and condensed milk, and eggs—all came in slightly larger quantities; while the intrinsic values were also slightly higher, except in the case of fresh milk and cream, which was materially reduced. Of butter, Denmark sent very slightly less than in the earlier year—viz., 1,444,500 cwts. as against 1,469,000 cwts. The principal changes were, however, in the consignments from the more distant countries, the United States showing a considerable decline, and the Australasian Colonies as considerable a rise. United States cheese came in larger quantities, and another growing contributor was Australasia, which doubled its quota. The cheese imported was valued at nearly 6s. per cwt. more than in 1898-99.

Food Stuffs.

The total imports of wheat and wheat flour amounted in grain to 22,155,753qrs. as compared with 23,060,136qrs. last year. The largest proportion of wheat (in grain), viz., 31,530,000 cwts., or almost half the total, came from the United States, this representing, however, a decline of 6,578,000 cwts. from 1898-99, while the Argentine contribution has been 18,116,000 cwts., a rise of almost 11,000,000 cwts. on the year. Canada comes third on the list with 6,261,000 cwts., just over her contribution of 1898-99. Australasia sent 3,531,000 cwts., and Russia only 2,819,000 cwts., one-third of which, it may be noticed, came last August. From neither Roumania nor Chili has any wheat whatever been received during the past cereal year; and from India all but 9,000 cwts. out of a total of 1,545,000 came prior to 31st December last. Barley shows a considerable falling off, due to the comparative failure of the Russian consignments; the United States on this occasion occupying the premier position as a supplier of this grain. The imports of oats increased considerably, this augmentation coming from Russia, whence we derived over 9,500,000 cwts. as compared with less than 4,000,000 in 1898-99. Most of the maize, as is generally the case, came from the United States, though the shipments from the Argentine Republic exhibited a considerable advance over the previous year.

Among other imports, the only item calling for special mention is wool, the quantity of which fell by nearly 70,000,000lbs., while its value increased by over £1,100,000.

Messrs. Dicksons' (Chester) 1900-1901 catalogue of forest and ornamental trees, evergreens, and other hardily grown nursery stock, has just come to hand. Unlike many of its contemporaries it is not illustrated, but the descriptions will give one a good idea of what the plants listed are like.

The first meeting of the Council of the Lincolnshire Agricultural Society since the summer show was held at Lincoln on Friday, Sir John T. Reid presiding. The Finance Committee reported that the income over the expenditure of the year was about £500. The dates fixed for the Peterborough and Brigg meetings next year were confirmed, and it was resolved, with a view to avoid clashing, that the resolution passed on the Spalding show ground should be reconsidered at the next meeting. The place of meeting for 1902 is to be determined upon at the February meeting.

SEPARATE LIST OF FARMS.

Auction dates are fixed as may be required. London office: 69, King William Street, E.C. Country offices: Bromley, Kent; and at Beckenham.

MESSRS. CRONK'S LIST of FARMS, containing particulars of numerous Farms in Kent, Surrey, Sussex, and elsewhere, to be obtained gratis at their offices, or will be sent by post on receipt of a stamp. Properties inserted free.—12, Pall Mall, London, S.W., & Sevenoaks, Kent.

FARMS, ESTATES, MILLS, BUSINESSES, ETC.

KENT.—TO BE LET, a FARM of about 250 acres, within eighteen miles of London, and between two stations on the London, Chatham, and Dover Railway and the South-Eastern Railway, at one of which is a siding for manure.

The Farm comprises about 170 acres of good fruit-growing land, about eighty acres of pasture land, and two acres of orchard, together with an excellent farmhouse in good repair, situated about the centre of the farm and adjoining a good road, and ample new farm buildings in good condition, including bullock lodges, stables, barns, wagon lodge, granary, and oasthouse, and also cottage accommodation and new fruit pickers' houses.

Water is laid on to the farm and farm stables, and a perfect water supply provided.

An offer to take a portion of the farm would be entertained.

For particulars, apply to Messrs. MEYNELL and PEMBERTON, 30, Old Queen-street, Storey's Gate, Westminster, London, S.W.; or to Mr. WELLARD, Eynsford, Kent.

WANTED, PREMISES (with water power) suitable for Paper Works; must be within reasonable water carriage of London.—Send full particulars to "MILLS," c/o Barker and Co., 2, Castle Court, Birchin Lane, London, E.C.

SEEDS, PLANTS, ETC.

200,000 AUTUMN SOWN CABBAGE PLANTS. Fidler's Early Eclipse, the earliest and best spring cabbage in cultivation, 3s. 1,000; Wheeler's Imperial and Early Offenham, 2s. 6d; spring sown Scotch Kale and Sprouting Broccoli, 3s.; white spring Broccoli, 4s.—W. HORNE and SONS, Cliffe, Rochester, Kent.

SEED POTATOES.—Early, mid-season, and main crop varieties: Challenge, Conquest, British Queen, and Up-to-Date. All of excellent quality and shape, and exceptionally heavy croppers, grown specially for seed from select stocks. Special quotation for autumn delivery. Illustrated descriptive catalogue and prices on application to "Manager," Earl of Rosebery's Home Farm, Dalmeny Park, Edinburgh.

SEED WHEAT.—Standard red and Squarehead. Heavy cropping varieties of fine quality, grown specially for seed from select stocks. Prices moderate. Samples, with illustrated descriptive catalogue of seed grain, on application to "Manager," Earl of Rosebery's Home Farm, Dalmeny Park, Edinburgh.

SEEDS, PLANTS, ETC.

BIBBY'S

"CREAM EQUIVALENT" for CALVES.

An Ounce of Fact is worth a Ton Theory.

A STRIKING FACT.

In our Spring number of "Bibby's Quarterly we reproduced the photographs of two groups of Calves which are now being reared at the Hornby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.

One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."

We asked our readers to tell us which of these groups were fed on New Milk, and the Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the "Cream Equivalent" fed Calves as having been fed on New Milk.

We think the above striking FACT speaks volumes for "Cream Equivalent."

The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.

SOLE MANUFACTURERS:—
J. BIBBY & SONS,
Exchange Chambers, Liverpool.

HUSK OR HOOSE IN HEIFERS, CALVES & SHEEP

No time should be lost in attacking the above fatal disease at the onset, and for this

DAY, SON, & HEWITT'S "BRONCHOLINE"

is without doubt the most effectual medicine extant, if given on first symptoms. It allays Bronchial irritation, destroys the parasites, soothes the lungs, and gives strength to overcome the malady. A well-adjusted dose acts as a capital *preventive*, and is equally invaluable for Tapeworms.

Price 7s. 6d. per ½-doz box.
Sold also by the half-gallon and gallon, at greatly reduced rates.

THE GASEOUS FLUID.

Unmatched for Fret, Colic, or Gripes in Horses, Diarrhœa, Scour, Debility, &c. Hoven or Blown Cattle and Sheep instantaneously relieved. For Coughs, Colds, Chills, and all weakly animals.

SILCOCK'S CALF MEAL

CALF REARING.

To rear Calves economically and profitably use SILCOCK'S SOLUBLE CALF MEAL. Thousands of Calves are reared on it annually; it is a true milk substitute, is very easily digested, dissolves at once in water, gives least trouble in preparing, does not scour, is very economical in use as one pint makes one gallon of thick gruel, and it lets curds for cake feeding. It contains about 80 per cent. of soluble feeding digestible ingredients, while in milk, butter-milk, and whey the figures stand at 12½ and 6 per cent. respectively. With the minimum of cost and trouble SILCOCK'S CALF MEAL gives the maximum results. Use SILCOCK'S SOLUBLE CALF MEAL feed regularly, in right quantity and at correct temperature and you will have little trouble in rearing paying calves.

Price, 12 6 *per cwt., carriage paid 5 cwt. lots*, 12/-.

R. SILCOCK & SONS,
Poulton-le-Fylde, Lancs.

PEDIGREE STILL PREDOMINANT.

The remarkably high prices realised for the Shorthorn bull calves of Mr. Duthie and Mr. Marr in Scotland, recently, gave a gratifying surprise to the fraternity of leading breeders of pedigree cattle, proving, as it did, that the Argentine prohibition will not have that serious influence on the fortunes of the foreign trade which pessimists declared to be inevitable. According to what we hear, a great many were inclined to be pessimistic about the Scotch auction just before it took place. Averages would be sure to decline immensely compared with those of the last two years, it was said, and wagers were freely offered that the Collynie one would not be more than 80gs. Instead of this we find that it largely exceeded the average of 1899, which was £123 18s., whereas at the dispersal last Tuesday week Mr. Duthie's average amounted to £150 8s. 6d. The increase in the Uppermill realisations are also equally noteworthy, being from an average of £116 18s. 10d. to £126 2s. 2d. Of the thirteen Uppermill calves nine made a hundred guineas and over, the highest figure being 230gs. Ten of the nineteen Collynie calves realised three figures, six bringing over 200gs. and three 300gs. and over, the premier price reaching to 355gs.—rather a good one for a bull calf.

The result is all the more gratifying, as it indicates that the United States and Canadian breeders are again on the alert to secure the choicest cattle this country can supply them with. Some may think that this is only for the strain of the Shorthorn breed most fashionable at present; but that would be incorrect, for Americans just now are very keen after what they deem to be the most valuable strains of Herefords, and some tolerably high-priced animals have crossed the Atlantic from England recently. In fact, the number of cattle of all breeds exported during the past nine months ending with September, despite the refusal of Argentina to have any more for the present, exceeds both in number and value those exported in the corresponding period of last year; the number is stated to be 2,272, compared with 2,201, and their value £100.790, against £88.581. Sheep, it is true, have fallen off considerably in the number exported. Still, 4,443, valued at £48,099, may be considered a sufficient magnitude of trading for British breeders to be congratulated on. Last year the number of sheep exported in the first nine months was 5.796, the value of which was £55.914.

Should the refusal of the Argentine Republic to receive sheep from Great Britain last for any material length of time, it will probably prove a serious matter for the Lincoln men. Flockmasters of several other breeds were also hoping to increase their returns by catering for the Buenos Ayres ram market, but blighted enterprise devoid of pecuniary loss is a very slight matter compared to actual sacrifice of a highly lucrative course of trading. The Lincoln breeders have had a tolerably good innings, and, although bowled out for the time being, their fielding most likely will only be short; besides which, in times past they were accustomed to realise big prices for their rams from other countries. New Zealand was known to take them at [illegible] long before the Argentine demand sprung up. "The wind bloweth where it listeth," and it may not be long ere we shall find other countries possessed of numerous flocks sorely in need of being improved by the employment of British pedigree rams.

Every year at ram sales and fairs large numbers of the Hampshire and Oxfordshire [illegible] comes are caught up for export to Germany and France. The United States and Canada have always exhibited a preference for Shropshires and Southdowns, but some of the Notts. [illegible] Longwools, causing Cotswolds to have been extensively bought in the past, but in recent years a great many Kent rams have crossed the At-

lantic. Almost every successive year brings some improved process or means for preserving meat perfectly fresh for lengthy periods, and as these come into general use all countries having large flocks capable of improvement require pedigree rams of the right sort that they may make their mutton saleable in the best markets.

There could not possibly be a greater mistake, however, than to regard British pedigree stock-breeding as chiefly dependent on export demand for success. Proof to the contrary will be found in the fact that since Shire horse breeders have lost their chief export, market prices for the best bred stallions and fillies have been far higher than ever. Stallions are not reared so generally as before perhaps, but there is abundant compensation for this in the high rates of geldings fitted for heavy dray work.

Similarly there is, and will be for many years to come, an urgent home demand for pure-bred bulls to raise the character of the bulk of the cattle reared by farmers in general. Unless this be done, successful competition with foreigners in the supply of beef cannot possibly be maintained. Some of our largest landowners are so well aware of this that they not only provide their tenants with the right kind of sires, but inaugurate estate shows, that by emulation the tardy and non-enterprising may be stimulated into action. The Council of the Northumberland Agricultural Society has deemed it to be one of its chief duties to place stud bulls at convenient stations all over that county for the service of its members, and as the need for this kind of thing becomes more urgent there will be a much greater strain on pedigree herds to supply a sufficient number of bulls than has yet been experienced. And such large demands will only cease when all ordinary herds have been improved off the face of the ground by the regular, perpetual use of pedigree bulls. The object is a formidable one certainly, but "a bull is half a herd," so that after it has commenced in earnest exchanges would be exceedingly rapid.

Taken altogether, the prospects of stock-breeding are far from discouraging. There are interests, not adverted to above, for which present circumstances are directly favourable instead of the reverse. The war has given a fillip to the breeding of cavalry horses and ponies. The high prices vanners and quick-trotting street horses have recently brought will no doubt cause occupiers of light soils to follow the example of those who till heavy ones, and by working mares cause them to breed foals as well. The latter produce dray horses, but the former could breed and rear vanners.

SAMPLES.

By a Man of Mark Lane.

The Monmouth Corporation has decided to present the freedom of the borough to Lord Llangattock, in recognition of his great generosity to the town. The last recipient of the honour was Lord Nelson, in 1802.

During the past week I have received some leaflets dealing with Indian crops from the Department of Land Records and Agriculture of Madras and also Bengal. From the former two have come to hand, and they are the first reports on the indigo crop and the sugar cane crop of 1900-1901. With regard to the indigo it is stated that, owing chiefly to the small area sown with the crop in the Kistna district, and the limited area sown in the Carnatic, the total area reported to have been sown this year is only slightly greater than last year. In the Deccan districts the area is rather below the normal, chiefly in Cuddapah, as in Kurnool it is fully as great as the average for recent years. The total area for the Presidency, 157,000 acres, is, however, only about two-thirds of the average of previous years, though considerably greater than the area reported at the corresponding date in 1898.

In some places the rainfall of July stimulated comparatively extensive sowings; in other places the rainfall has been unfavourable for sowing; but the principal causes restricting the area are the high prices ruling for food grains and the fall in the price of the dye. The reports received show that, at the end of August, the crop was in fair condition, but almost everywhere needed rain. Since the reports were made up good rain has fallen in almost all the localities where the crop is largely grown.

The area planted with sugar cane—46,900—is smaller than last year, and about ten per cent. less than the average of recent years. The cause of this is given as owing partly to the deficient supplies of irrigation water in many of the smaller works at the beginning of the current agricultural year, and to the existence of disease in the cane in parts of the Gódávari delta. The condition of the standing crop is generally reported to be fair, and with the recent general improvement in the season may be expected to do well on the whole.

The leaflets received from the Bengal Department are the final report on the jute crop and a preliminary forecast of the *bhadoi* crops of Bengal for the year 1900. The report on jute gives approximate estimates of the area and outturn of the crop up to the middle of September. Almost the whole of the jute crop of Bengal is grown in the twenty-six districts from which returns are received by this Department. It was shown in the preliminary forecast that, although the area under jute was rapidly recovering from the low figure to which it fell in 1898, it had not yet reached the normal figure, and was still smaller than the areas cultivated in the years from 1893 to 1897. Further inquiries made since the issue of the first forecast have disclosed some additions to the area then reported, but it would appear that the impetus given to extension by the high prices of 1899 has been checked by the rise in the price of rice. The total area now under jute is 2,043,400 acres, as compared with a normal area of 2,164,400 acres and areas of 1,624,400 acres in 1898 and 1,961,800 acres in 1899.

It is estimated that, in a normal year, the average outturn of jute amounts to three bales per acre. On the normal area as now shown this would amount to about 65 lacs of bales, as the outturn of a 16-anna or normal crop. It may be anticipated that the present crop will give an outturn of about 60 lacs of bales, as compared with an estimate of 61 lacs of bales in the first forecast. This represents about 92 per cent. of a normal outturn, or what would ordinarily be termed a 15-anna crop.

The preliminary forecast of *bhadoi* includes all kinds of the crop, both food crops, such as *aus* paddy, maize, and cereals, and non-food crops, such as jute, indigo, and cotton. The character of the season has not been altogether favourable to the *bhadoi* crops of the province. On the whole, the rainfall has been insufficient and badly distributed, but has not failed so badly as to seriously jeopardise the prospects of any of the crops.

The total normal area of the Province under *bhadoi* crops now stands at 16,395,700 acres against 16,495,000 acres reported last year. It is obvious, however, that the areas returned under this head are still too high in many cases, and frequently represent a maximum rather than the normal area. According to the district estimates, the total area under the different kinds of *bhadoi* crops this year is 15,786,200 acres as against the revised estimate of 15,596,800 acres of last year. The increase of 189,400 acres is partly accounted for by the fact that a much greater area has been put under Indian corn this year, last year's season having been especially unfavourable for this crop. The decrease of 96,500 acres in the area under *bhadoi* paddy is due to some paddy lands having been planted with jute this year, owing to the high prices prevailing in the jute market during the past twelve months.

Taking all the *bhadoi* crops together, it is seen from an appendix appended to the note that out of the forty-five districts in the province only four (Saran, Hazaribagh, Manbhum, and 24-Parganas) anticipate an outturn above the normal, while four others (Dinajpur, Malda, Angul, and Ranchi) expect a normal outturn. In eleven districts the outturn is expected to be 90 per cent., or between 90 and 100 per cent., while in twelve others it is expected to be between 80 and 90 per cent. Ten districts have returned an estimated outturn of between 70 and 80 per cent., and the rest forecast an outturn varying between 60 and 70 per cent. of a normal crop. The district officers' estimates show an outturn of 88 per cent. of a normal crop as compared with a 67 per cent., as finally estimated last year.

The outturn of these crops has, says Mr. G. C. Dutt, the assistant director of the Department, been clearly under-estimated in several districts, and I anticipate that an outturn of 92 per cent., for all the *bhadoi* crops taken together will in all probability be harvested.

"The Baltic has removed to 190, Bishopsgate Street Without" is the announcement on the doorway of the house in Threadneedle Street, wherein the Old Baltic Coffee-house—the headquarters of the merchants and brokers trading in tallow, oil, seed, and suchlike commodities in London—has for long been located. The names of "Dickie Thornton" (so well remembered also at Lloyd's) and Jeremiah Harman are inseparably connected with this place, and the Russian trade in the first half of the century, but the associations of the building itself are of yet greater fame, for in the early years of the last century this house was built for the notorious South Sea Company—the great bubble of that age—and has until quite recently retained the title of "The Old South Sea House."

The premises are now in process of demolition, and in a few days the long façade of red brick and stone, with its three tiers of windows and central doorway, long ago blocked up, but still substantially the same as in the palmy days of the famous swindle, will be no more. Already the window sashes and some of the stone sills have been removed, while the interior portion is gone. Formerly the house was fronted by iron railings, but these have long since been removed, and a lower series of windows inserted to light the basement. The bitterness and loss occasioned by the bursting of this gigantic bubble, which beggared so many, has long ago entirely passed away, leaving but a record of popular delusion behind, and even among the ruins of the red building there is scarcely need for a passing sigh.

In contradicting certain erroneous figures published by the Press as to the condition of beetroot culture in Russia, the *Journal de St. Pétersbourg* for the 10th ult. states that according to official statistics the area planted with beetroot amounted to 1,319,932 acres on 1st July, 1900, showing an increase of 9.3 per cent. over the area on the same date of last year, which was 447,365 dessiatines. In 52 per cent. of the total area the state of the crop was reported as very satisfactory, against 48.1 per cent. in 1899, and in 32.5 per cent. as satisfactory, against 32.8 per cent. last year. In every respect, therefore, the present year is so far more satisfactory for the beetroot industry than its predecessor.

An illustration of the existence of disguised, as well as open, sugar bounties in France may be gathered from the production returns of that country for the year 1899-1900. The total quantity of beetroot worked up (says the *Financial News*) was 7,394,475 tons. The supposed yield of sugar, estimated at 7.75 per cent. for taxation, was 573,071 tons, but the actual yield, calculated in refined sugar, was 822,377 tons, or 11.12 per cent. The difference (249,306 tons) between the quantity on which duty was paid and that produced represents the quantity that escapes taxation in France. This profit forms the indirect bounty that, added to the direct bounty, enables producers to sell their surplus to England under cost price. As France consumes only about half her own and colonial production (the latter being some 100,000 tons), it follows that upwards of 450,000 tons can be exported.

The *Statist* reminds us that the Money Lenders Act of 1900 comes into force at the end of this month. As no business is carried on without money-lending in some form or other, business men will naturally want to know how far it concerns them. By the Act a money-lender is anyone who makes (or who hopes to make) money-lending his business; but pawnbrokers in pawn broking, friendly societies, companies specially incorporated by Act of Parliament for the purpose, bonâ-fide bankers or insurance offices, or any corporation specially excepted by the Board of Trade, are not within its provisions. There

are also excepted persons bonâ-fide carrying on any business, not having money-lending as its primary object, who in the course of their business and for the purposes of it lend money.

"Not infrequently a man of business (adds the *Statist*) sees an opportunity of employing money he cannot at the time use in his own business by lending it to others, and it would be hard if such a transaction were to turn him into a 'money-lender'; and yet, as he would be lendnig money otherwise 'than in the course of his business and for the purpose of it,' he could not claim that he came within the exceptions. Probably anyone who in this way occasionally lent money would not be liable for not registering himself as a money-lender; but, on the other hand, if the transaction were harsh and unconscionable, the Court would most likely decide that for the purpose of enabling the transaction to be reopened and relief given he must be considered as a money-lender."

Our contemporary thinks it necessary to caution those persons who, while carrying on a totally different business, at the same time act as money-lenders, to register as such, or they will run the risk of the penalties the Act provides for those who do not. The fact that they were carrying on another business as well as that of money-lending will not excuse them. The register, when it is inspected, will be interesting, and may be surprising also."

The receipts on account of revenue from the 1st of April, 1900, when there was a balance of £3,517,047, to the 13th of October, were £53,982,811, as against £53,489,945 in the corresponding period of the preceding financial year, which commenced with a balance of £8,919,173. The net expenditure was £98,200,000, as against £60,976,754 to the corresponding date in the previous year. The Treasury balances on October 13th, 1900, amounted to £1,841,657, and at the corresponding date of 1899 to £2,323,084.

AGRICULTURAL POLITICS.

By a Lobbyist.

What will be the strength of the agricultural party in the new House? Perhaps I should have preceded this question with the interrogation, Will there be an agricultural party? Well, I believe there will. What, then, I repeat, will be its strength? I frankly confess that my anticipation is that the men directly interested in agriculture will be more numerous in the new Parliament than they were in the last. The old men we have still with us. Mr. Jeffreys, Major Rasch, Mr. Strachey, Mr. George Lambert, Mr. Ailwyn Fellowes, and the like have all been returned, and their number has been added to. All the men whom we desired to see in the House will not be there. For instance, Mr. Adeane, than whom no man was more capable of voicing the necessities of agriculture, has not been sent to St. Stephen's by the farmers of South Hunts. Still, the Agricultural Band—I hope this description will not be thought indecorous—will be larger.

The unfortunate fact is, however—and I am bound to emphasise this after a careful review of the elections—that these agriculturists will go to the House pledged to nothing. Not a single agricultural question has had prominence in the contest. The further amendment of the Agricultural Holdings Act Amendment Bill, over which the Radicals prated so tumultuously when the measure was passing through Parliament, has not even been broached during the contest. "You remember that famous osier-bed clause?" remarked a successful candidate to me. "Well, though mine is a market gardening constituency, in a large measure, I never even heard it mentioned." This is the secret and the lesson of the election. You never heard a single agricultural question even dulcetly breathed. Yes, it is an unfortunate fact that the new agricultural party will go to St. Stephen's a body of inchoate and disunited atoms.

My readers will remember that I was very anxious that Colonel William Woods, a Hampshire country gentleman, should be returned to the House. Well, I had this week a conversation with the Colonel—who, by the way, has failed in his attempt—as to the attitude of the towns towards the agricultural problem. He assured me that it had not touched them one whit. During his campaign he was not questioned upon it, or questioned even upon a point having the remotest connection with it. Was he not even asked how he would relieve the terrible overcrowding of our larger towns? "Not," replied the Colonel in effect, "so far as this overcrowding affected the condition of our villages." Yet the Colonel fought a characteristic Lancashire town, which—and, mark you, this is the more serious side of the situation—has been recruited from the country. No, the towns care not for the villages, and the villages are indifferent to their own weal.

Are we about to see the small holdings question made a political business? This is an enigmatic question, so I will enlarge it. In Norfolk the Radical candidates informed the electorate that they had established an association whose purpose was to enable labourers to secure small holdings, or, rather, to own small holdings, by the easy purchase system. They are to become peasant proprietors, as the townsman becomes the owner of his furniture—by the payment of monthly instalments. This was made an argument for the support of these candidates. Now, I am anxious that agricultural questions should have a just significance in agricultural districts, but I am not anxious that the settlement of any phase of the agricultural problem should be made the occasion of a bribe. This must make for the abasement of agriculture, as it must make for the demoralisation of the electorate. If the villagers have to be cozened into an interest in themselves it will be bad for the villagers and bad for the villages. Baits like this small holdings dodge had much better be renounced.

Another Norfolk incident is the theme of this note. If landlords seek to coerce their tenants to their way of thinking they will do a very considerable ill-turn to landlordism. I am not going to lisp the hedge-asertion of extrseme Radicals and land nationalisers, and declare that landlordism is on its trial. It is not. Landlordism has not yet been brought to the bar of public justice. However, if landlordism seeks to make men bow the knee to whatever professions it advocates, then it will hasten the day of trial. A peer has no right—I place it thus highly—to turn a man from his farm because that man happens to hold different views as to the way in which he should have his soul saved or should exercise his vote or should sing a hymn. The holding of a farm does not mean the peer-possession of a man's mind and heart. I need not emphasise these views. A landlord lets his farm for income's sake, and for naught else. There is not a man in Norfolk who will fail to know what these remarks mean. The peer who coerces in the way I indicate is in danger of bringing discredit on his order. And our English peerage is a great order.

THE DAIRY.

Midland and Agricultural Dairy Institute.

Opening of Extension by Mr. Walter Long, M.P.

The Right Hon. Walter H. Long, M.P., President of the Board of Agriculture, visited Kingston, Nottinghamshire, on Tuesday, for the purpose of opening a new block of buildings, the erection of which has been necessitated by the transference from the Nottingham University College to the Midland Agricultural and Dairy Institute—as it will henceforth be known—at Kingston of the classes established there a few months ago for the benefit of the students attending the agricultural courses of the Institute. The Institute itself was opened five years ago, and has had a very prosperous career, no fewer than 800 students having passed through its courses. The extension consists of two chemical laboratories, a natural science room, woodwork and iron workshops, a hospital to accommodate thirteen male students, and a residence for the manager, the whole having been built at a cost of £1,200. There was a large and fashionable gathering at Tuesday's ceremony, which took place in a marquee in the Institute grounds, and during the afternoon many of the visitors were conducted through the various departments of the Institute.

Mr. T. Cope, of the Leicestershire County Council, occupied the chair, and in opening the proceedings said it was five years ago since the Duke of Devonshire opened the Institute, and thus inaugurated the work which they had since been prosecuting. That afternoon they were honoured by the presence of Mr. Walter Long—(applause)—who had come to wish them God speed in their new departure. They had now added another word to their name. They were no longer simply the Midland Dairy Institute, but the Midland Agricultural and Dairy Institute. (Applause.) Looking back over the past five years he thought they had very good cause to congratulate themselves upon their success. In the first place upwards of 800 students had passed through the courses of instruction at the Institute, and he was pleased to say that at the present moment there was a full complement of students taking advantage of the education they were able to offer. (Hear, hear.) There were two main causes which had rendered this success possible. One was the way in which various classes on the different County Councils had co-operated for the benefit of one class—the agricultural class. The other was the co-operation among the various Councils without which they could not have done anything like what they had done. Another factor was the excellent staff they had been so fortunate to secure. Having eulogised the work of Mr. Dunstan and Mr. Blackshaw, and of all the other members of the staff, Mr. Cope alluded to the keen interest taken in the institute by Lord Belper, and his cordial co-operation since the work was begun five years ago. It was to him that the idea of extending the usefulness of the institute first suggested itself, and he hoped that the counties interested would make thorough use of the additional opportunities given them. They had endeavoured to make their teaching as practical as possible. He knew full well that farming was what might be called a somewhat "lean trade." They did not generally get very fat at it, and that was one reason why he thought that no opportunity should be lost by the farmer of improving his position. The speaker concluded by expressing the hope that the success which they had experienced during the past five years would continue.

Mr. J. R. Dunstan (secretary of the Notts Technical Instruction Committee) then submitted a report, which showed the number of students who had received instruction at the institute during the five years to be 620. The amount of milk dealt with during that period had been 600,000 gallons. Fifty-three tons of butter had been manufactured, and close upon 130 tons of cheese. The stock on the farm when the work commenced consisted of four horses, 28 horned stock, and 16 pigs; to-day they had 8 horses, 56 cattle, and 93 pigs. The agricultural department at the University College was established in 1894, and the 117 who had attended the courses there brought the total number of students up to 737. On behalf of the staff, Mr. Dunstan thanked the governing body for their unvarying kindness.

Mr. Long's Speech.

The Right Hon. Walter Long, M.P., then addressed the gathering, his reception being of a most enthusiastic character. He had been asked, he said, to say a few words to the assembly in connection with the ceremony in which they had met to show their interest, namely, the opening of the additional buildings which had been provided for the instruction to be given in that institute. He need hardly say that he accepted the invitation conveyed to him by Lord Belper with the greatest possible goodwill and gratitude, because in the position he had the honour to occupy, as the Minister responsible for the agricultural affairs of the country, it was especially gratifying; and it was very helpful when they found that those who were connected with agriculture, who were conversant with its difficulties, and who had a practical knowledge of the obstacles which presented themselves in the way of success, did not invariably turn to Parliament, or to a Minister, or to any other outside source for help, but put their own heads together, and their own hands into their own pockets—which was not always the rule in this country—(laughter)—to provide such assistance as would enable their industry to be more prosperously conducted in the future. Therefore, it was a very gratifying task indeed to one in his position to be allowed to take part in a ceremony of that description. Might he say in the first place that he had been permitted, by the kindness of Lord and Lady Belper to visit that morning their institute, and to see what were the arrangements made there for the instruction of those who attended it? What struck him most in connection with the buildings was their practical character. The temptation that too often proved too strong for those who started an institute like that was to build what were called model buildings, to make the buildings a sort of fancy show place, where at all times they might go and take their friends without being aware of the fact that a cow was being milked or that a pig was being fed. (Laughter.) That was not practical agriculture. (Hear, hear.) In their buildings they had kept in mind the practical necessities and practical difficulties not only of occupying, but of owning, land, and if in an institute like that they were to be carried away by the temptation to which he had referred, and to make their buildings ornate and beautiful to the eye, more like a German toy in a shop than a real farm, they would not, he ventured to say, be helping agriculture as a whole. (Hear, hear.) They might, it was true, instruct their students in ornate buildings as well as they could in buildings like those which they had erected, but it was not only in instructing students that the good of an institute

like that was to be found. If they were going to really help agriculture it would be by setting an example which could be followed by practical agriculturists in the district in which they worked, and if they were going to set that example they must work on lines which they could follow. It was because those buildings were essentially practical in design that he had ventured to refer to this characteristic.

Like everybody connected with agriculture he was familiar with the difficulties to which the chairman had alluded. He knew that when science first came to the aid of agriculture the farmer asked the question: "Who is coming to teach me? Does he think he knows better how to cultivate my farm than I do, who have lived upon it all my life, and my predecessors before me?" And on the other hand the scientist said: "Who is this perverse individual who closes his eyes and shuts his ears to what we are able to do for him, and believe the rule of the thumb is good enough for the industry with which he is connected?" Each was prepared to find fault with the other. Each was prepared to take the beam out of the other's eye; but he did not think either realised what the position of the other was. But those times had gone by. (Hear, hear.) The scientist and the practical farmer joined hands. Each had realised that he had something to learn from the other, and the two together had learned that it was by the combination of science with practice alone that success could be attained. Science had taught a great deal of value to them, and in a few sentences he would indicate to them what seemed to him to be some of the directions in which an institute like that might lead a farmer to conduct his business better. What were some of the objects they wished to attain? They wanted to be quite certain that they had got the right stock on the right soil, that they were giving that stock the right food in the proper quantities so as to be able to produce either milk or meat in the most economical manner. In a word, they wanted to be able to produce at the lowest possible price. Was it not to science that they must turn if they were to solve these problems satisfactorily? The farmer had realised what a gigantic industry was the one in which he was engaged, and how much he had to learn if he was going to prosecute it in a successful manner. Might they not ask themselves what was meant by scientific agriculture?

The prevalent notion was that practical agriculture meant the farming carried on by the practical farmer, and scientific agriculture farming as conducted by the students in the study. Nothing could fall more short of the truth than that. They knew now that scientific agriculture was practical agriculture, aided by accurate knowledge of the great facts connected with agriculture as an industry, and it was after all only by the possession of accurate knowledge that anybody could be a good judge of work. Science meant accurate knowledge of the different problems of agriculture—the different work that was going on in the earth; the different results produced by the combination of various soils and manures; the different results produced by different feeding. He was confident that the farmers of this country, as a body, had by this time realised that they had a good deal to learn; that they were bound to take advantage of opportunities such as those provided at that institute; and he believed, further, that there was evidence in the country already of the practical advantage it derived from such knowledge as could be acquired there. Proceeding, the right hon. gentleman said they were told that agriculture in this country had been brought to a lower state than it used to enjoy by competition. What, after all, did competition mean? It surely only meant that they had somebody who was able to put on the market an article which he could sell at a lower price than they themselves could. This was one of the difficulties they had to overcome. They had got to learn how they could put the best article on the market at the lowest price they could to yield a profit. Could they do so by the old methods without the knowledge they obtained in schools of instruction like that in the interests of which they were that afternoon assembled? He believed they could do it if they learned what were the causes which led to a large amount of produce being valueless. By bringing science to the aid of practice they would be able to overcome some, at all events, of the difficulties which had hitherto stood in the way of agriculture, and would be able to obtain the results they desired.

He had been a farmer all his life. He was a small farmer now, but he would not say whether he had prospered or failed. (Laughter.) At any rate he knew that he had still a great deal to learn. Agriculturists were after all not very different from any other class of the community, and however much they knew there still remained much for them to learn. As in everything else—and he believed more in agriculture than in any other industry—there was a immense advantage to be gained by accurate knowledge of the work they had to do, of the land they had to cultivate, the crops they had to grow, and of the animals they wished to bring to perfection. There was nothing which commanded their admiration and wonder more than the results of the mysterious forces of Nature. Whatever men might do, whatever changes there might be in the world, whatever advancement there might be in science or general knowledge, there was that vast machine going on producing her marvellous results, and by means which, even at the end of the nineteenth century, they knew but little. As their industry was more closely connected with nature than any other, it behoved them to learn accurately so far as they were able what were the causes of nature which led to these great results. In conclusion, the speaker said it had given him the greatest pleasure to be present at the ceremony. It would be impertinent for him to speak of the work of the institute, having had but a passing glimpse of it; but facts and results spoke for themselves. He heartily congratulated the governing body on their past record, and wished for the institute a still more prosperous future. It was only by bringing to their aid every particle of knowledge they could acquire that they would be able to conduct successfully a trade surrounded by so many difficulties. Agriculture was the greatest of their great national industries. It had prospered, and, he believed, would prosper again. (Loud applause.)

Subsequently Mr. Long distributed the certificates gained by the students, the awards being read out by Mr. Blackshaw, who mentioned that three students entered the National Dairy Diploma Examination, and that all were successful.

Lord Belper, in moving a vote of thanks to Mr. Long, said they could not have had a more suitable man to perform the ceremony. One reason he interested himself in the institute was that he delighted in having so near his own home, and on his own land, an institution which he thought was of great benefit to the farmers of the district. Having attempted himself for some years to do a little in the way of farming on those very premises, it was a source of great satisfaction to him that they should be devoted to such a useful purpose. That their attempt to combine practical and scientific education had been successful was proved to some extent by the fact that the majority of the students were the sons and daughters of farmers who had recognised that they could get practical help in their own work from the instruction given at that institute. The fact that India, South America, and Australia were represented there showed at least that the work of the institution was not unknown beyond the counties directly interested. He hoped that shortly there would be a field in South Africa sufficiently large for any of the instruction that was given in institutions of that character to find fruitful ground. The extension had been made at very small cost, and they were buildings which would be eminently suitable for the instruction they intended to give in agriculture. That would be the only institution in the country in which were combined a high-class teaching of dairying and an adequate instruction in agriculture. (Hear, hear.)

Mr. R. H. Ashton seconded the resolution, which was carried, and in briefly acknowledging the vote, Mr. Long thanked the assembly for their cordial welcome.

Bath and West and Southern Counties Society.

The third draft (sixty cheeses, weighing nearly 50 cwt.) of this year's cheese made during the month of June at the Cheese School carried on by the Bath and West and Southern Counties Society for the Somerset County Council, at Vale Farm, Batcombe, Evercreech, has just been sold to Messrs. Hill Bros., of Evercreech, at 68s. per cwt. of 112lbs. 5,960 gallons of milk made 5,889lbs. of green cheese, which when sold weighed 5,466lbs., showing a shrinkage of about 7¼ per cent. Since the opening of the school on April 1st last, thirty-six students have attended it. The school closes for the season on October 31st.

"Mark Lane Express" Diary.

October.

23 Sale of Hackneys and Harness Horses, belonging to Mr D. Mitchell, at Millfield, Polmont, N B.
23 Sale of Shorthorn heifers, at Ipswich.
23 Clayeross Ploughing Association, at Clayeross.
23 Show and Sale of Shire, Clydesdale, and other heavy horses, at York Horse Repository.
23, 24, 25, and 26. Concluding days of the Brewers' Exhibition at the Royal Agricultural Hall, Islington.
24. Sale of Mr. W. Lawson's stud of Hackneys, at Blackpool.
24. Sale of Farm Stock, belonging to Mr. J. J. Barrow, at Holmwood, Langton, Tunbridge Wells.
25 Sale of pure bred Shorthorns and Aberdeen-Angus cattle, at the Agricultural Hall, Aberdeen.
25 Sale of Lincoln Red Shorthorns, the property of Mr. C. H. Stafford, at Fledborough, near Newark.
25 Gravesend and Rochester Agricultural Association's Show, at Gravesend.
26 Sale of Messrs. W. and J. Thompson's Shire Horses, at Desford, Leicester.
26 Sale of Store Stock, at Shrewsbury Smithfield.
26. Sale of Shire Horses, at Peterborough Repository.
26 Sale of pedigree Large and Middle White Pigs, the property of Mr. C. S. Marsh, at Purwell Dairy Farm, near Hitchin.
29 Sale of Store Stock, at Bridgnorth St. Luke's Fair.
29 Sale of pedigree Hackneys and Harness Horses, at York Horse Repository.

Surveyors' Institution.—The first ordinary general meeting of the session 1900-1901 will be held on Monday, November 12th, when the president, Mr. John Shaw, will deliver an opening address. The chair will be taken at eight o'clock.

LETTER TO THE EDITOR.

New and Old Breeds of Wheat.

Sir,—If you will allow me, I should like to notice some mis-statements in the letter of Mr. John Francis Beddall in the MARK LANE EXPRESS of October 15th.

The Square Head was not grown on clover ley, but after a crop of beans, and the White Monarch was grown after a clover ley.

The statement that "everyone knows that clover is the very best preparation for a wheat crop" only holds good on some lands, and on all strong wheat-growing soils there will be a larger return of wheat after a crop of beans than if the preceding crop had been a clover ley.

I am afraid the experience of Mr. Beddall is as limited as his assertions are incorrect.

I have grown the Square Head wheat for many years, and I have given Mr. Scholey a testimonial. I also reported favourably of the White Monarch, as it appeared just before harvest, and I wrote to Messrs. Gartons at the time, and I have been told an extract from my report appeared in one of their circulars. Mr. Scholey is a perfect stranger to me, and I have never seen him. I have met Mr. T. R. Garton once, as he was good enough to make an appointment with me at Rugby in September last, when he fully explained his system of cross fertilisation, and I am sure he is doing a great work, and I believe he will be able to very much improve the cereals, and he has my best wishes for his complete success. I have this autumn sown in the same field the Red King and White Monarch wheats of Messrs. Gartons, and the Square Head of Mr. Scholey, and the two first are in the centre of the field, with the Square Head all round them, and after next harvest I shall venture to send you a full account of the result, with the hope that you may think it worth inserting in the MARK LANE EXPRESS.—I remain, your faithfully,

HENRY H. CAVE.

Estate Office, Rugby, October 19th, 1900.

Princess Christian Visits Reading College Poultry Farm.

On Friday afternoon her Royal Highness the Princess Christian of Schleswig-Holstein, who was accompanied by Lady Jeune and Mr. Sydney Peel, paid a visit to the poultry farm belonging to Reading College at Theale. The Princess was received at The Chestnuts by Mr. and Mrs. Edward Brown and family, by Mr. H. J. Mackinder, principal, and Mr. Francis H. Bright, registrar of Reading College. Her Royal Highness takes great personal interest in the development of the poultry industry, as evinced by the fact that she is on the committee of the National Poultry Organisation Society, and is president of the Windsor and Maidenhead branch of that society.

The various operations carried on at the farm were followed, and the college students were seen engaged in their regular duties. These include the rearing of ducks and chickens, both by natural and artificial means. The ranges of houses containing breeding stock were inspected, and the different systems of housing adopted were explained by Mr. Edward Brown, as was the fattening of fowls for killing. Princess Christian expressed herself as highly pleased with the fine stock of ducks on the farm, and her great satisfaction with what she had seen, asking many questions respecting the Reading College, which she hopes to visit on another occasion. After a tour of the establishment the Princess and her party honoured Mrs. Brown with their company at tea.

New Agricultural Patents.

Specially compiled for the MARK LANE EXPRESS by Mr. G. D. Howard (Hughes, Son, and Co.), Patent Agent, 38, Chancery Lane, London, W.C., of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

17,345.—P. J. Parmiter, of Ansty, Salisbury, for an invention for "A machine for flat hoeing and singling turnips and other roots."

17,370.—J. H. Heath, of Chancery Lane, London, for an invention for "An improved stand for use when sharpening the knives of reaping and mowing machines."

17,636.—J. E. Rasome, of Chancery Lane, London, for an invention for "Improvements in machines for turning the swath of grass and other crops."

Patents Sealed.

12,318.—F. H. P. P. Onam, of The Hawthorns, Lordship Lane, Tottenham, for "Weeds, destroying, digging machines, agricultural."

12,319.—B. Jackle, of Locherhof, Rottweil, Wurtemberg, Germany, for an invention for "Improvements relating to thrashing or crushing machines."

12,329.—C. Harper, of Woodbridge, near Guildford, Western Australia, for an invention for "Improvements relating to thrashing machines."

12,536.—J. Barugh, of Kerikeriroa, Waikato, and W. K. Elder, of Auckland, both in Auckland, New Zealand, for an invention for "Improvements relating to agricultural ploughs."

By Lupulin.

Home Notes.

The Borough.

The persevering firmness of growers is gaining its reward, in the steady improvement of the tone of the market, in the increased demand, and in the consequent solid advance in values which has been established. And a more satisfactory feature is to be found in the strength of the position, which creates unquestioning confidence in the continuance of the upward movement. In fact, all is going well for holders of hops, and all sections of the trade (except the brewers) are pleased. The grower will get a reasonable profit on his produce, the factor's commission will increase with the rise of prices, and the merchant's opportunity of enlarging his margin is more open. It is, therefore, to the interest of us all to encourage the present advance, and the firmness to which I would exhort growers will be really of service to each division of the trade through which hops are bound to pass before they arrive at their ultimate destination.

There is now a grand opportunity for testing the strength that arises from unity. Supplies are getting short, as so many of the smaller growers have been sold, and many of the more important planters are sitting beside their hops. Confidential association would do wonders to-day, and under its influence the market's progress would be rather by "leaps and bounds" than by steps. Perhaps the slower rate of progression is safer, but it is in any case absolutely sure, and as both sellers and buyers are looking in the same direction and expecting the same thing, there is no doubt that the climax of much higher prices is not far off.

Foreign Notes.

Nuremberg.

The feature of the week has been an increased demand, with corresponding general activity in business. Brewers are not buying as freely as might be expected, and the chief trade is being done in medium qualities suitable for export, but the effect of this movement is felt throughout the market, resulting in an advance of quite 10s. per cwt. Stocks in the hands of dealers have sensibly diminished, and sales have considerably exceeded the arrivals. There are those who consider that this decided upward movement cannot be supported, but will be soon replaced by reaction. The arguments in favour of this view are founded upon the indifference manifested by brewers, who in the midst of the recent and present excitement have stood aside apparently unconscious of what is going on. It is also stated that their attitude of abstention from the market may be explained by the industrial crisis affecting the labouring classes in all countries, by the competition with beer of wine, cider, and other beverages in some districts, and by the increased cost of coal and the enlargement of general manufacturing expenses. I cannot accept these reasons as having any permanent importance, their influence can only be temporary, and when this has passed the consumption of beer will be resumed, as it is so well established as the most necessary as well as the least costly of beverages for every beer-drinking people. Instead of reaction, I am more inclined to anticipate development of the present movement towards higher values for hops, as I am satisfied that sooner or later brewers will again be prominent as buyers, especially when they realise the limitation of available supplies.

Uehlfeld.

The new crop of hops is generally of good colour and excellent quality. Two-thirds of the growth of the district are sold at full prices, but growers are not pressing sellers, and are holding back for advanced offers.

Kindingerland.

The greater part of the crop having been disposed of, the trade has become quiet, the market being denuded of supplies.

Wurtemberg.

The arrivals at Rottenburg market are small, and high prices being asked business is rather quiet. Growers are not willing to sell unless at their own estimates.

Weilderstadt.

Nearly the whole of the growth has passed out of first hands, growers being able to realise the prices demanded, which ranged from 70s. to 90s.

Vienna.

The crop in Eastern Styria turned out a fair average in quantity, and the general quality is satisfactory. In Southern Styria the colour and quality are described as excellent, and buyers being anxious to secure the hops active business resulted at full prices. Some growers are still holding in expectation of better remuneration. The harvest in Freistadt was late, owing to drought, and the yield is one third less than last year.

Keiff (Russia).

The hop crop has yielded about two-thirds of last year, and only totals 7,000 pouds, or about 2,600 cwts. The quality is good, and sales were made in September at 15 roubles (30s.) per poud of 40lbs., but in consequence of crop reports from Bavaria the value fell to 12 roubles (24s.), and this figure now represents the current price, being equal to about 67s. 6d. per English cwt.

Munich.

Business has been comparatively quiet recently, the arrivals for the week ending October 13th being about 45,000 and the sales not reaching 23,000 kilos. The stocks in the hands of dealers are fairly considerable, and there is apparently some inclination to force sales, as quotations are now reported a shade easier than the currency of last week.

Burgundy.

The hop market is very firm, with a tendency towards improvement in values. Business is, however, limited, only a few transactions being reported.

Belgium.

The firmer tone spoken of last week has been accentuated during the past few days, and the markets both speculative and actual are decidedly stronger. The realisation of the short crop, coupled with the determination of growers to be sufficiently remunerated for it, is convincing buyers that they cannot have their own way this year. Prices are therefore gradually creeping up to the figures quoted at the opening of the season, and I am prepared for a further substantial movement in the same direction within the next few days.

America.

That the local consumption of hops must be increasing is proved by the official returns of internal revenue from fermented liquors in the U.S.A., the revenue for August last being nearly 850,000 dollars, or over 10 per cent., in excess of the corresponding month in 1899. This fact, taken in connection with the acknowledged shortage of the year's crop, explains the steady advance in value which is evident in every hop-growing state. Offers by dealers to growers are rising, the current quotations of New York State being now 16½ to 17 cents, these being met by growers with comparative indifference. On the Pacific coast a smaller production is developing, and although figures are being raised very cautiously, they are certainly progressing, and a currency of 20 cents is now looked for as within the range of possibility.

The New York market remains in the meantime rather quiet, but dealers who have secured stocks are not pressing them off, preferring to wait for further developments, and, as they expect, increased profits.

The quality of the new growth, both in New York State and throughout the Pacific Coast, is generally reported as being good, free from disease, and well harvested.

(For Hop Market Reports, see page 527-529.)

All official reports and notices of the National Association of English Hop Growers will be printed in the Mark Lane Express, *which will also contain all current information likely to be of interest and benefit to the members of the society.*

To Hop Growers.—Users of Wire Work should buy the Best English Galvanised Steel Hop Strand, made by Rylands Bros., Ltd., Warrington, Lancs. For prices, &c., apply to their London office, 86, Leadenhall-street, E.C.; or their Sole Agent for Kent and Sussex, Mr. Edward Ball, 3, Newsteadroad, Lee, S.E.—[Advt.]

THE GARDEN.

Any hopes of a fine autumn that may have been cherished are now dashed rudely to the ground. Anything worse than the weather experienced here since the commencement of October could scarcely be imagined. According to an old weather saying, there are always nineteen fine days in October, but so far we have only had one (the 4th) really fine, and as this is the 15th the month will have to look sharp to make up the tally. It rains almost incessantly, both day and night, the squally showers being varied with falls of hail and sleet, and the sun is almost invisible.

The ground is so sodden with rain that scarcely anything can be done in the open ground, and we have had to watch for a few fine hours now and then to get up the last of the late potatoes. Those grown in "lazy beds" are on the whole much more firm, sound, and free from disease than the produce of the level ground, the sunk alleys between the beds draining the latter thoroughly, and rendering them much drier than the open quarters. Even a batch of Abundance—usually a very "soft" variety, and sadly liable to disease—from such beds is remarkably sound and good, and cooks capitally.

Scarlet runners, as well as French beans, are practically over with us; there has been no frost here, but the recent storms quite wrecked the rows, almost stripping the plants of leaves and finishing them up for the season.

Weather permitting, next month will be the right time to make a sowing of peas and beans (broad) for the earliest crops next season. It is, of course, useless to sow seed of either in the autumn except on a fairly light, warm, and well-drained soil, and in a somewhat sheltered position. Even then there is always a certain amount of risk attached to the practice, but with a not too severe winter the plants will survive, as a rule, and afford not only earlier, but also more abundant crops, especially in a dry season, than those sown in the spring. The ground should be well worked (dug or ploughed) before sowing and at the same time a liberal dressing of manure should be given. The question of the most suitable varieties for this sowing will be dealt with in another article.

While on the subject of peas, by the way, it is worth while to remark that a variety that has afforded excellent results during the season now just over is Autocrat. This is a late variety of the Ne Plus Ultra class or race, growing about 3ft. in height, and though slightly taller than Omega, is decidedly superior to this last in every other respect. As a late pea it is almost unequalled, good, well-filled pods having been gathered up to within a few days ago, in spite of the cold and wet weather, while from other districts it is reported as having withstood a good deal of drought better than any other variety. This is worth "making a note of," as Captain Cuttle would say.

Raspberries. Healthy young canes of this very useful and popular fruit may be planted at any time now—that is, wherever the soil is fairly light and warm, but on heavy or damp land I would rather plant in March. Unlike most other fruits, the raspberry usually thrives best on soil of this description, a good, rich, or deep clayey loam suiting it to perfection. If planted on light soil the only way is to trench the ground deeply and manure it well previous to planting, and never to omit the annual mulch of [illegible] manure over the roots [illegible] this being best done towards the end of April or in May on very light or warm soils rather earlier, perhaps.

Roses of the Hybrid Perpetual [illegible] comparatively hardy classes may be planted at any time now, and probably the sooner the better. Except in the warmest localities, and where a rather light and free soil prevails, the choice tea-scented kinds will be better left till next spring, however, the end of March or early in April being the best time. I will endeavour to give a brief selection of the best varieties in my next—the list of names is always increasing.

Begin planting Dutch bulbs—hyacinths, tulips, narcissi, etc.—as soon as possible, not forgetting the showy ixias and sparaxis.

PRACTICE WITH SCIENCE.

West of Scotland Agricultural College.

The internal alterations in the dwelling-house at 6, Blythswood Square, Glasgow, which has been acquired by the governors of the West of Scotland Agricultural College, are now completed, and the winter classes have been commenced. For a number of years agricultural classes were carried on in the Glasgow and West of Scotland Technical College in John Street, but under a scheme formulated by the Scotch education authorities this department was combined with the dairy school at Kilmarnock, and given the title which it now bears. Last summer the governors, who are elected by the Town Council, the University, the Technical College, and the Highland and Agricultural Society, secured the commodious private residence forming No. 6, Blythswood Square, and within the last two months this house has been adapted to the purposes for which it is intended to be used.

The building consists of three floors and basement. There are three lecture rooms, a botanical and a chemical laboratory, and reading, cloak, and refreshment rooms. The laboratories are on the upper floor, and large windows in the roof afford each of them plenty of light. The class-rooms are fitted with the necessary appliances, and arranged according to a well-considered scheme. The accommodation is scarcely as large as the governors desire, but when sufficient funds are available additions will be made at the rear of the existing building. The premises are lit throughout by electricity, and special attention has been given to the ventilation.

The introductory lecture was delivered in the college on Wednesday night by Professor A. N. M'Alpine. Mr. J. Watson Stewart presided, and among others present were Councillor Dr. Dougan and Principal Wright. The Chairman, in the course of his introductory remarks, said that a large amount of educational work had been carried on in connection with agriculture and its cognate subjects by the Glasgow and West of Scotland Technical College, but there had been a feeling that some special effort should be made to promote agriculture in a way which could not be expected of the Technical College, which, on account of the various industries in the city, had so many claims upon its resources. Some of the counties in the south and west of Scotland took the initiative in the matter, and through their action the Scotch Education Department called a meeting of those interested in order to devise a method whereby effect might be given to the feeling which had sprung up. The result was that there was now an Agricultural College, a separate institution, in which the instruction given would, he was sure, enable the students to pass any examination in agriculture, however stiff it might be.

Professor M'Alpine, whose subject was "Profitable Crop Plants," pointed out the various ways in which weeds and parasite fungi interfered very materially with the profits from crop-growing. The action of the soil germs had been understood only within the last few years, and the lecturer showed how farmyard manure was, in the first place, merely food for them—food which the germs so changed that it became suitable for the sustenance of the farmers' crops. Lime was applied to the soil in order to render it favourable for germ life, and by favouring germ life the fertility of the soil might be raised to a higher standard than before, and the yield of the crops correspondingly increased. The points which science had specially to deal with in connection with successful cropping were: The weed destroyers, the preventives of plant diseases, the fulfilment of the conditions necessary for active germ life in the soil, the best grass and clover mixtures, etc. Due attention ought also to be paid to selection of the best and most suitable varieties of potatoes, corn, etc., for the varieties in the markets of the present day were much more numerous than formerly, and afforded much larger scope for choice and for skill on the part of the farmer. The lecturer advised all farmers to have their grass and clover seeds tested and guaranteed as to germination and purity. The opinion was expressed that the seed-seller should be compelled by law to give a guarantee with the seed as is already the case with manures and feeding stuffs.

Monmouthshire Chamber of Agriculture.—An important general meeting (the second for the new division for Bedwellty Union-District) will be held on Thursday next, October 25th, at 2.30 p.m., at the Angel Hotel, Maesycwmmer. Business: (1) To elect new members and other routine matters. (2) To receive "Statement of Legislation required in the Agricultural Interest" which was sent to the various Parliamentary candidates in this county. (3) To receive report of Cattle Diseases Committee of Central Chamber. (4) To receive communication from secretary of Central Chamber re damage to crops by sparks from railway engines. (5) To consider "The Report of the Royal Commission on Local Taxation" (is issued). (6) To consider "Agricultural Insurance." Subjects 5 and 6 are to be discussed at the next meeting of the Central Chamber in London.

Agricultural Returns for the United Kingdom.

Acreage under Crops and Grass; and Number of Horses, Cattle, Sheep, and Pigs as returned upon the 4th June, 1900, and 5th June, 1899, in each Division of Great Britain, with Particulars for Ireland and Total for the United Kingdom.

FARM PROSPECTS.

Bucks.

In this district I consider that the wheat is below an average crop. Barley about 3qrs. Peas below. Beans not much grown; winter ones good, spring below the average. Roots: Mangels good; swedes not so good as mangel, but above the average of years. Seeds below average, but hay well got, especially aftermath clover. Catchy weather for harvest.—R. C. (October 15th).

Hunts (South).

The weather now reminds one more of spring than the early approach of November fogs; the birds even after to be deceived into a belief that pairing time is at hand, since they attempt to render early morning pleasant with their vigorous notes. Many of us who have finished wheat sowing would welcome a good rain to solidify the land and furnish moisture to the languishing roots, which will now take up a light crop. The mangolds will be of good quality, but the kohl rabi and swedes may be hard and sticky. The threshing machines are proving how utterly fallacious were the prognostications of those who reported nearly an average crop of corn. Two-thirds of a crop would be nearer the facts.—S. S. (October 20th).

Leicester.

I cannot say that farming prospects are very satisfactory to the occupier. Rents in most instances have been adjusted to the times, so we do not hear so much dissatisfaction as we did a few years ago. We had an exceptionally fine harvest. The thrashing machines give a disappointment of the produce of at least one quarter per acre. This means the rent of one acre that produces it without any increase of expense. Prices of all kinds of grain remain very stationary. We are having a very fine time for all farming operations. Turnips fairly good, also mangolds and pastures; these matters will make up for the deficient hay crop. Stock is selling fairly well. In our market we see the Black-faced sheep taking the place of the Longwools. I suppose our taste is becoming more refined. It is meat to roast now; forty years ago, we must have the pot on, and make some broth; these are things of past days, and I am afraid no better for all classes.—W. C. (October 19th).

Middlesex.

The weather for the past month has been all that could be wished, almost spring-like, mild and open, and the grass growing, with no frosts even to affect the tender plants in the gardens. We in the Harrow district have also had frequent showers, which were much wanted. The only trouble is that all the ponds (which are so much depended on in this neighbourhood) are still quite dry from the excessive drought of August, so that much rain is needed. Hay and straw continue a slow trade, so there is the usual grumbling. A word about the

Coun'ry Farmers' Labour Difficulties,

of which we hear so much. These are greatest in the close parishes, where game is so strictly preserved, and the gamekeepers are the terror of the neighbourhood. Young men can scarcely live there and enjoy their freedom, keep a dog, or go for a Sunday morning's walk without being suspected, and get often falsely charged, and are sometimes deprived of their liberty for a while on the oath of a gamekeeper before, perhaps, the parish clergyman, himself a county magistrate, who does the bid or the wishes of his patron lord, with whom he never refuses to dine. If the lord, who owns, perhaps, every cottage in the village, made it more his business to visit his cottages, and see that the cottagers could keep a pig and had more home comforts, and provided ample allotments upon which the young men could vie with each other for the prizes to be offered at an annual show, all would work better, and we should hear less of cottages being vacated by whole families for the better wages now earning (here in greater London especially), and of which I am often an eye-witness. We read in the papers of cottages being empty and gardens running to waste, and this leads me to what results to the young man who leaves his village home for the better wages of the towns. He soon marries the smart, well-dressed servant, a young family follows, and you find them located in "a flat" (two and sometimes three small rooms upstairs) at seven to ten shillings a week and no taxes, so that the last state of the young man (who should never have been tempted away from his village home) is worse than the first. The remedy, therefore, rests often with the country squire, although I have no sympathy with the farmer, who tries, and often succeeds, in renting and underletting cottages to the labourers, over whom he acts the tyrant at an increased rent.—F. K. (October 19th).

North Devon.

Wheat, a good average; barley, 95 per cent.; oats, 100; potatoes, 60; roots, 100; grass, 90. Wheat sowing forward; gone in well. Late potatoes one-half poor. Apples small and keeping bad. All stock healthy, and selling at fairly good prices. Agricultural prospects fairly good.—J. H. (October 18th).

West Somerset.

The drought with us cannot be said to have broken, and although occasional rains have just kept the roots going and brought away the forage crops there has at no time been enough for the grass lands, which are very bare and brown. It is now too late to hope for much growth this season, and sheep will be drawing on the winter supply of roots earlier than usual. There has perhaps never been so much of the corn crop threshed by this time of the year before, for which the weather has been favourable. The same tale is coming on all hands,

A Very Disapointing Yield,

about two sacks per acre less than last year, whilst prices for both wheat and barley are below expectations. As these were in no way beyond necessities it is difficult to see where any profits are to come from, at the same time our chief outlay in labour and feeding-stuffs seems continually on the rise. This I think must result in still more of the lower grades of arable land going down to grass, as at least one means of saving expenses.—S. K. (October 17th).

Harvest Notes.

The potato harvest, which is now being vigorously prosecuted in the Fen district of Lincolnshire, is turning out very unsatisfactorily, and it is estimated that scarcely half an average crop of eatable potatoes will be secured this year. The deficiency is said to be owing to the dry season, which prevented a proper development of the tuber. Disease has also made havoc with some crops.

On Sunday last the somewhat rare spectacle was witnessed throughout Strathearn and Strathallan and other districts of Perthshire of many farmers busily engaged carting in their long-exposed grain crops. Much of the grain has been damaged, and no little of it destroyed, by being exposed to wet and stormy weather. Hundreds of acres have been in stook for about a month, and the pecuniary losses to many agriculturists must be very heavy.

There has come to hand from the Canadian Department of Agriculture a catalogue of fruit trees under test at the Experimental Farm, at Agassez, British Columbia. This catalogue, which was compiled by the Director of Experimental Farms, Mr. W. Saunders, LL.D., F.R.C.S., F.L.S., and the superintendent of the farm, Mr. T. A. Sharpe, will give those interested in fruit growing, both in Canada and elsewhere, some idea of the great work which has been done by the Canadian Government during the past ten years in bringing together so large and valuable a collection, thus laying the foundation for an accurate and extensive acquaintance with the large fruits of temperate climates throughout the world.

Messrs. Cassell and Co., Ltd., are now issuing in fortnightly parts "The New Book of Poultry," by Lewis Wright. This is not merely a revised edition of Mr. Wright's famous work, but it has been entirely rewritten, and in it the author gives the public the benefit of his latest study of both British and American poultry matters. Among the special features claimed for this work are: The authorised standards of perfection settled by the Poultry Club have been secured for it; a series of portraits showing the alterations that have taken place in recent years in the various breeds; an account of the great American poultry farms; and a description, illustrated by means of coloured and other plates, of the many new varieties of poultry which have been produced during recent years. The work will be completed in thirty parts, and will contain thirty coloured plates, fifteen full-page illustrations, and numerous small ones. As it is published at sixpence, it is within the reach of all, and should help to make poultry keeping even more popular (and profitable) than at present.

Agricultural Hiring in Berkshire.—The great annual hiring and pleasure fair at Newbury, an important agricultural centre, was held in the spacious market square and adjacent corn and canal wharves on Thursday. The exhibitions were of an elaborate and attractive kind, and khaki or war element formed a prominent feature of the photographic and other representations. Judging from the diminishing attendance of country folk it may be concluded that these statute fairs are now used much less than formerly for the purpose of hiring agricultural servants, who, as a rule, experience little or no difficulty in securing continued or fresh engagements near their homes, and frequently through the medium of newspaper advertisements. As a matter of fact, agricultural labour in Berkshire, as in other counties, has become remarkably scarce, and it is really with the greatest difficulty that farmers have now to carry on the work incidental to their holdings. At the fair last year's wages for all classes of agricultural servants were fully maintained, and in some cases even exceeded.

THE WEATHER.

Monday (October 15th).—Rather a strong north-westerly wind was blowing in Scotland and in the North of England, and the temperature was low over the whole of Great Britain. Rain, sleet, and hail had fallen over a large part of the country, and the rainfall measurements were large in parts of Scotland in the morning, being the result of the fall in the preceding twenty-four hours. There was a slight frost in places during Sunday night, and the mid-day temperatures were very little above fifty degrees in any part of the kingdom. There was a slight ground frost in London early in the morning, and the highest temperature during the day was fifty-four degrees.

Tuesday (October 16th).—Cloudy and dull weather was experienced over nearly the whole of our islands, and fog or mist was reported in many places. Rain was measured in the morning in the Northern and Western districts, as the result of the fall since Monday, and the fall was large in parts of Ireland. Rain again fell during the day at many places in the West. Frost occurred over a large portion of the kingdom during Monday night, and at Nairn the sheltered thermometer fell eight degrees below the freezing point. A southerly wind had spread over the entire country, and a brisk rise of temperature occurred. In London the sky was very clear throughout Monday night, and the exposed thermometer, on the grass, in the southern suburbs indicated seven degrees of frost. The day was dull and misty, and the highest temperature was fifty-two degrees.

Wednesday (October 17th).—A considerable rise of temperature occurred over Great Britain, and the weather was again quite mild. Rain was measured in the morning, as the result of the fall in the preceding twenty-four hours, over the entire country, but the amounts were small in the southern districts. Slight rain fell in places during the day. The winds were mostly light, the direction being westerly over the southern portion of the kingdom, and south-easterly in the north. The mid-day temperatures touched 60deg. in the south of England. Slight showers were experienced in London during the morning, but the after part of the day was very fine, and the thermometer rose to 64deg.

Thursday (October 18th).—The weather varied considerably in different parts of the country, and in the South of England the conditions were mostly fine. Rather heavy rain was measured in the morning at the Scotch stations as the result of the fall since the previous day, and smaller amounts were measured in other parts of the kingdom. The barometer had risen over our islands, and a light north-west wind had become general. The temperature was not very different from the average for the season, but the changes were decidedly irregular. The morning was very fine in London, and the highest temperature was fifty-five degrees; but slight rain fell in the afternoon.

Friday (October 19th).—High barometer readings spread over our islands from the Atlantic and merged with the anticyclone which previously occupied north-west Europe. The weather was in consequence more settled, although there was still a good deal of cloud in most parts of the country. Slight rain was measured in the morning in the northern and eastern districts as the result of the fall since the previous day, but scarcely any rain fell during the day. Ground frost occurred during Thursday night over the inland parts of England and Ireland, but at many of our coast stations the sheltered thermometer did not fall below 45deg. A light northerly wind was blowing over the entire kingdom. The midday temperatures were rather low, and not generally much above 50deg. In London the weather was dull but dry, and the highest temperature was 54deg.

Saturday and Sunday (October 20th and 21st).—The anticyclone continued to influence the weather during the two days over the entire country, and cold northerly winds prevailed generally. The night temperatures were low, and ground frosts occurred in many parts of the kingdom. The days also were cold, and in many places the highest temperatures scarcely touched fifty degrees. The weather continued very dry and cold in London, and there was a slight ground frost in the southern suburbs on Sunday morning, while the thermometer throughout the day did not exceed fifty-one degrees, the highest reading on Saturday being similar.

Death of Mr. Nathaniel Stilgoe.—We regret to have to announce that Mr. Nathaniel Stilgoe, of Adderbury, who has been in indifferent health for some time, died on Monday, aged seventy-five. Mr. Stilgoe was a widely known and highly respected agriculturist, and was a prominent breeder of Oxford Down sheep. He was for very many years a member of the Banbury Agricultural Association, in which he ever took much interest, being a member of the committee and assisting the association in many other ways. The deceased gentleman was also a member of the committee of the Oxford County Agricultural Society, and had rendered it yeoman's service for years. He was always one of the stewards of the yard at the shows.

CORN MARKETS.

LONDON.

Mark Lane, Monday.—Malt: A quiet trade. Samples of new are coming to hand. Barley: Grinding, 3d per qr dearer. Malting firm, with a good demand. Wheat was 6d per qr cheaper on the week. Oats declined about 3d per qr. Maize advanced 6d per qr. Flour: 3d to 6d per sack lower.—NIXON, GOWER, AND CO.

Mark Lane, Wednesday.—Home-grown wheat comes up in better supply and in good condition, and farmers still prefer country markets, white being absolutely unsaleable. Fine red, 31s 6d to 33lb del vered. American descriptions, although offering at last week's decline, also failed to elicit response, and stocks on hand continue heavy. Granaries continue well-stocked respecting flour, and the market moves very slowly, but holders were not disposed to entertain lower offers. American first patents quoted at 25s 6d to 26s 6d; second ditto, 22s 6d to 23s 6d; first bakers about 21s to 22s; and second, 19s to 20s; Hungarian up to 29s 6d; Australian patents, 22s to 23s per 280lb; English whites, stone 21s 6d to 22s; roller, 22s to 22s 6d; Cascadias, 24s to 24s 3d; town household, 25s 6d; and whites, 28s 6d per sack, being the decline established last Monday by the London Millers' Association. Scarcity of maize on hand and the small quantity being shipped tend to stimulate this cereal, sellers being very indifferent to-day, while demanding higher rates. American mixed, 21s 6d ex ship and 22s paid landed; Odessa, 26s 6d ex quay. Grinding barley maintained and Persian more firmly held. Arrivals of oats continue to show a diminution, and demands, although few, were only met at fully late prices respecting American, while Russian sorts have been further advanced.

Mark Lane, Friday.—Country Exchanges still take most of the home-grown wheat. Fine white here rules at 32s, and red of similar sample at 31s, delivered up, 63lb, quotations being 6d easier since last Friday. Stocks of American descriptions continue excessive, but in view of the present situation holders refuse to accede to concessions. Consumers of flour were indisposed to pay previous rates, but no definite change occurred, despite the entire absence of business. American first patents quoted at about 25s 6d to 26s 6d; second ditto, 22s 6d to 23s 6d; first bakers', 21s to 22s, and second, 19s to 20s; Hungarian up to 29s 6d; Australian patents, 22s to 22s 6d per 280lb. The London Millers' Association made no alteration at this afternoon's meeting. Grinding barley steady, and Black Sea in better supply than of late. Flat maize rather dearer landed, and held for 22s 3d, ex ship being quoted at 21s 3d. Round corn firm. Odessa, 26s 6d ex quay. The market for beans and peas remains unaltered.

COUNTRY.

Ashford, Tuesday.—Trade very slow for wheat at a slight reduction on last week's rates. Other things were practically unaltered.

Banbury, Thursday.—Wheat (white), 30s to 31s per qr; wheat (red), 29s to 29s 6d per qr; beans (new), 28s to 30s per qr; oats (new), 18s to 20s per qr; oats (old), 16s to 18s per qr. Wheat in small supply and trade very quiet.

Boston, Wednesday.—A small attendance and a slow trade. Wheat, 27s to 28s; malting barley, 25s to 30s; grinding barley, 22s 6d to 23s; oats, 16s to 18s; peas, 50s to 60s; beans, 28s to 28s 6d; maize, 23s.

Braintree, Wednesday.—Average supply of wheat, prices falling 6d per qr on the week. Red wheat made from 29s to 32s, white wheat 33s to 34s. Barley same as last week.

Bristol, Thursday.—There has been a moderate trade since our last. There was a fair quantity of English wheat offering at to-day's market, farmers having to submit to a reduction to sell. Foreign 3d to 6d lower. Grinding barley, maize, and oats, without change. Flour very slow trade.—GRACE BROTHERS.

Cambridge, Saturday.—Our markets are still scantily supplied with wheat, and, although trade is dull, prices are fairly well maintained. Rain is wanted. At this market to-day we had a moderate supply of wheat in first-rate condition, and trade was dull at last week's rates. Wheat—red, 29s to 31s; and white up to 31s per 504lb. Barley in smaller supply, and prices are unchanged. Beans, steady trade.

Canterbury, Saturday.—Wheat rather dull and prices scarcely maintained. Secondary barleys are easier. Oats firm. Ruling prices:—White wheat, 30s to 33s; red, 29s to 32s; malting barley, 28s to 35s; grinding, 21s to 24s; white oats, 18s to 21s; black, 16s to 20s; peas, 30s to 32s; tick beans, 30s to 32s; mazagans, 27s to 29s; flat maize, 22s to 23s; round ditto, 27s to 28s per quarter; winter tares, 6s to 6s 6d per bushel.

Chester, Saturday.—The quality of English grain, of which there were a good number of samples offering, was generally poor, and lower prices had to be accepted to effect sales. Oats are also threshing out badly and lower quotations: Wheat, white and red, 4s to 4s 3d per 75lb. Grinding barley, 3s to 3s 6d per 64lb. Beans, 4s 3d to 5s 8d per 80lb. Oats new, 2s 2d to 2s 4d; old, 3s 2d to 3s 7d per 46lb. Indian corn, 11s 6d to 11s 9d per 240lb.

Chichester, Wednesday.—There was an average attendance, but the tone of business generally was quiet. Wheat was in moderate supply, and trade was steady at reduced prices. Maize was rather dearer.

Colchester, Saturday.—There was a small supply of wheat to-day. Trade was slow at barely last week's prices. Of barley there was a good show, and best samples fetched full prices; lower quality was neglected. Beans, peas, and oats little offering, and fully as dear.—FRANCIS AND CO.

Dorchester, Saturday.—Large quantities of English wheat offering, which met with a dragging trade at 1s per quarter less money. Foreign, 6d per quarter cheaper. Malting barley in heavy supply. Grinding barley firm, and other feeding stuffs quiet.

Glasgow, Wednesday.—There was a small attendance at our Corn Exchange to-day. Wheat quiet at a decline of 3d per boll on the week. Flour dull, but quotably unaltered. Indian corn quiet, and 3d per boll cheaper. Grinding beans quiet and unchanged. Canadian peas dull, and 1½d to 3d per boll under last week's price is being taken. Foreign and home oats steady. Barley firm. Oatmeal firm. Bran and thirds quiet, but unchanged.—GIBSON AND CLARK.

Hereford (Wednesday).—A considerable attendance, and large quantity of grain on offer. English wheats met with a slow demand at slightly below last week's values. Barley trade still very disappointing. Oats steady. Maize unchanged. Beans a turn in sellers' favour. Peas nothing doing. Vetches dull. Wholesale prices:—Wheat, white, 3s 6d to 3s 8d per bushel; red, 3s 5d to 3s 7d; barley, 3s to 3s 9d; oats, 2s 3d to 3s; beans, 3s 3d to 4s; maize, 2s 8d to 3s 2d; vetches, winter, 4s to 6s, and spring 3s 6d to 5s.

Ipswich, Tuesday.—Fair supply of wheat, trade quiet at barely last week's rates. Reds, 29s to 31s; white, 31s to 33s. Good supply of barley, trade for all descriptions at fully late rates. Oats a turn dearer. Maize steady. Beans and peas firm.

Leeds, Tuesday.—The trade has not been able to resist the persistent weakness in the American markets and heavy shipments. In consequence there is a distinctly easier feeling; holders being compelled to reduce prices 6d per qr, at which reduction all kinds of wheat meet only a limited demand. There is an improved inquiry for Yorkshire barley, but prices obtainable are not satisfactory. Maize, 3d dearer. Beans and oats slow.—DUNNS AND CO.

Leeds, Friday.—With a further decline in American and other foreign wheats and prospects of heavy supplies, Tuesday's reduced prices are with difficulty maintained, a slight reduction having to be made to do business. Maize fully realises late rates. Beans, peas, oats, barley, and flour slow sale and weaker in value.

Leicester, Saturday.—Good average attendance, with moderate supplies of home grown wheats. Trade rather slow at 29s to 32s per 36 stones. Barley in fair demand. Fine oats firmer.

Lincoln, Friday.—Fair supply of new wheats, trade slow, at barely late rates. Reds, 27s to 28s. Whites, 28s to 29s. Foreign, dull. Good show of barley, prices ranging from 25s to 34s. Oats a dull trade, at less money. No change in maize, peas, and beans.

Liverpool, Friday.—Wheat quiet, with a moderate extent of business. Winter wheats ½d lower, other sorts firm and unchanged. Flour steady, no change in prices. Maize.—Owing to sharp declines in America, dealers are buying only for immediate needs; and mixed American, whilst extremely scarce, shows a loss of ½d from Tuesday. The demand for European and Plate is also slow, and prices slightly favour buyers. Barley.—Californian is in poor demand, and 9d per qr lower. Chilians are firmly held, but high prices check business. Feeding sorts have a slow trade at a decline of ½d. Beans.—Quiet trade at about unchanged prices. Peas.—Quiet trade at last market day's prices. Oats.—English oats meet a steady trade, without change in price. Foreign kinds in moderate demand at Tuesday's values. Oatmeal.—Only a quiet trade passing, but prices are steady at last market day's figures. Oilcake.—There is only a moderate demand for cakes, and prices remain on about the same level as last Tuesday.—SEGAR AND TUNNICLIFFE.

Maidstone, Thursday.—Rather a better attendance than might have been expected, as yesterday was the October fair for hops, cattle, etc. Wheat was in moderate supply, and the demand slack, so that to push sales 3d to 1s per qr reduction had to be made. Barley trade is not active, and some less rates allowed for the article. Oats are inclined to lower cost. Beans and peas are scarce and realise rather more money then of late. The best round sorts of maize are too high for much use; the rough and common about the same figure as last week. Winter tares are unsaleable and drop in quotations. There is no alteration in rye, hemp, brank, sergo, or millet.

Manchester, Thursday.—Trade throughout the week has been quiet, and prices in most sections are favouring the buyer. American wheats are lower by about 1d per cental, and English by 3d to 6d per qr. Flour has declined 6d per sack since last Thursday. No new feature can be mentioned with regard to beans, peas, or oats. Indian corn commanda full rates, say ½d advance on the week.

Newark, Wednesday.—Wheat a quiet trade at less money. Oats were dearer, and there was only a small show. Of barley there was only a fair show, prices being in buyers' favour. Beans made recent prices.

Newcastle-on-Tyne Saturday.—Wheat and flour neglected, and the turn favouring buyers. Malting barley a slow sale and disappointing, varying from 23s to 27s for ordinary quality. Old oats steady, new drooping. Beans and peas no change. Maize is a wonderful feature, and prices maintained.

Newcastle-on-Tyne, Saturday.—Wheat at our to-day's market favoured buyers. Maize steady at last week's prices. Oats a good sale at late rates for fine qualities. Common sorts, however, were difficult to sell, therefore lower prices had to be accepted. Beans and peas firm. Barley a fair demand, and last week's prices maintained. Flour no change.—JOSEPH POLLARD AND CO.

Newport (Mon.), Wednesday.—Wheat quiet, and 6d to 9d cheaper on the week. Maize firm, and unchanged in price. Slow sale in barley, and price unchanged. Oats firmly held at last week's figure. Fines, 24s 6d. Offals dearer.

Northampton, Saturday.—Good attendance of farmers and buyers. Supply was good, but millers were not disposed to operate but for immediate wants, unless at lower prices. A limited trade was done at about last week's quotations, and, in a few cases, 6d to 1s more was realised. Barley trade same as last week. White wheat, 30s to 32s; red wheat, 27s to 30s; old, 30s to 32s; barley, 26s to 30s; grinding barley, 22s to 23s; oats, 17s to 22s; old, 24s; beans, 28s to 31s; old fine, 36s; peas, 28s to 36s; flour, 23s to 26s.

Norwich, Saturday.—Only a small supply of wheat at our market to-day, with a slow trade at last week's quotations. Barley a good show, with no appreciable alteration in price since last week. Wheat, red, 30s to 30s 6d per qr, weight 63lbs. per bushel imperial. Barley, 26s to 28s for average sorts; fine lots rather more. Corn Inspector's return for the week ending October 15th, 1900:—Wheat, 2,988-2, 28s 9d; barley, 11,024-7, 26s 2¼ d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat in good supply; trade ruled quiet at last week's rates. Barleys: Fine samples were dearer, being scarce, while inferior parcels, which formed the bulk, were difficult of sale. Oats in less supply, and 6d to 1s higher. Beans, but few offering and values fully maintained.—ROBERT HUBBLE.

Oxford, Saturday.—Wheat slow trade and 6d to 1s lower to sell. Barleys, a good quantity showing; best qualities in good demand, secondary dull trade. Oats and beans steady.

Peterborough, Saturday.—We have again had a small supply of wheat and a slow trade without any quotable change in prices. Middling barleys still very dull, and best qualities firm. Oats rather dearer.—THOMAS HILL AND SON.

Plymouth, Thursday.—There was an average attendance at our Corn Exchange to-day, but with very little business doing. The prices for maize are unaltered. Wheat is quiet. Barley and oats are firm.—ORLANDO DAVIS AND CO.

Reading, Saturday.—At the Corn Exchange to-day the wheat trade ruled quiet, and prices generally were about 1s per qr below those of last week. Barley, on the other hand, sold freely at somewhat advanced rates. No change occurred in the value of other descriptions of corn.

Ripon, Thursday.—Moderate attendance. The show of barley is large, but of inferior quality. Wheat, English, new, 27s to 29s per qr; wheat, English, old, 31s to 32s; ditto foreign, 31s to 35s; barley malting, 24s to 28s; ditto grinding, 23s to 24s; oats, old, 25s to 26s; ditto new, 17s to 19s; round maize, 26s to 27s 6d; flat maize, 23s 6d per qr; beans, old, 1s per stone.

Romford, Wednesday.—The wheat trade showed a decline of fully 6d per qr from last week's prices. There was a good supply. Red wheat made 29s to 30s 6d, and white wheat 30s to 32s per qr.

St. Neots.—There was again but a very limited quantity of wheat offering, and this alone prevented prices from falling, as trade was very dull. A fair supply of malting barley, for which as yet there is little inquiry, and many samples remained unsold.—ELGOOD AND SON.

Salisbury, Tuesday.—There was a particularly good supply of wheat at the Corn Exchange, but to effect sales holders had to accept 6d less money on the week. Best malting barley sold well. Little or no inquiry for secondary or inferior grain. Oats and beans firm. The quotations were:—Wheat, new, 27s to 32s; ditto old, 30s to 34s; best samples of barley, 32s to 36s; ditto secondary, 26s to 30s; oats, black, 17s to 20s; ditto, white, 19s to 36s; beans, 32s to 36s.

Sheffield, Tuesday.—Trade slow. Former prices asked for wheat, but needy sellers had to take 6d per qr less. Indian corn firm at full prices. Other things at same prices. Quotations:—Wheat, white, 33s to 33s 6d; red, 32s to 33s; new, 31s to 32s per 504lb; oats, old white, 26s; ditto, new white, 17s 6d to 19s; ditto old black, 22s; ditto new black, 16s to 17s per 336lb; peas, grinding, 32s to 34s; ditto blue, 36s to 70s per 504lb; beans, Egyptian, 33s; ditto, English (new), 31s 6d to 32s per 532lb; barley, grinding, 23s 6d to 24s 6d; ditto malting, 27s to 35s per 448lb; Indian corn, small old, 29s to 30s; ditto American mixed, 23s 6d to 24s per 480lb.

Spalding, Tuesday.—Wheat again dropped 6d per qr, selling at 27s. Oats were a slow trade, at 15s to 17s per qr. Barley sold at late rates. Beans, peas, and other articles firm and unchanged.

Stockton, Wednesday.—There was a fair quantity of English wheat showing, which made 29s to 30s per qr. During the week the trade in foreign wheat has been rather depressed owing to heavy arrivals. Millers are buying very sparingly, and only for immediate requirements, and a reduction from 6d to 9d took place. Maize 3d to 6d dearer. Oats unchanged. The malting barley shown was only of moderate quality, and made 24s to 26s per qr.

Sunderland Saturday.—Small supplies from farmers, and there is no alteration to note in value of wheat, barley, or oats from last week. Arrivals: Coastwise, wheat, 600 qrs; foreign wheat, 1,786 qrs; foreign barley, 4,160 qrs.—E. and F. RICHARDSON.

Taunton, Saturday.—Wheat sold very slowly at barely last week's prices. For malting barleys of the best qualities prices were firm, but secondary qualities were rather easier. Beans and oats unaltered.

Wakefield, Friday.—We have an average attendance at our market to-day. Wheat meets with a dull sale at about 6d per quarter under last week's rates. The finest qualities of barley are alone inquired for, and to a nominal extent. No alteration in feeding stuffs.—MICHAEL SANDERSON AND SON LIMITED.

Wakefield, Friday.—The market for wheat is extremely inanimate, millers simply buying to supply immediate requirements, and prices must be called 6d per qr lower. All good qualities of barley met a fair demand; common proves very unsaleable. Maize, beans, and oats slow and unchanged.—DUNNS AND CO.

Winchester, Saturday.—Wheat in fair supply, which met a slow trade at 6d to 1s reduction on the week. Barley steady at late rates. Oats firm. Maize unaltered. Flour quiet and lower to sell.—FEAR, COLEBROOK AND CO., LD.

Wisbech, Saturday.—A limited supply of grain. Wheat quiet at 6d a qr decline. Red, 28s 6d to 29s 6d; old, 30s 6d. Oats firmer, new 17s to 19s; old up to 24s. Barley, 25s to 28s. —JAMES FLETCHER.

Wolverhampton, Wednesday.—A large attendance, but business was quiet. Quotations:—English wheat, old 13s to 13s 6d per 216lb; oats, old 15s to 16s, new 10s to 11s; beans, old 14s 6d to 15s 6d, new 12s 6d to 13s 6d per 196lb; maize, 24s 6d to 25s 6d per 480lb.

Worcester, Saturday.—Market well attended, but there was only a slow trade for wheats, with an easier tendency in values. Barley sold at late rates, and oats were more firmly held. Maize favoured buyers. English wheat, white, 29s to 30s 6d; red, 27s to 29s.

Worksop, Wednesday.—An excellent attendance and an exceptional show of wheat, of which best qualities sold well, secondary kinds being difficult to dispose of. Quotations were not materially changed. Old white made 31s to 32s; old red, 30s to 31s; new white, 28s to 29s; new red, 27s to 28s per qr; best malting barley, 30s to 32s; secondary, 28s to 29s; grinding barley, 23s to 25s; old white oats, 25s to 27s; old black, 24s to 25s; new white oats, 18s to 20s; new black, 17s to 18s; flat maize, 24s to 25s; round, 28s to 29s; flour, 1s 2d to 1s 3d per stone; fine sharps, £6 to £6 15s per ton; barley meal, £6 13s 4d to £7; bran, £5 10s to £6 5s.

York, Saturday.—Farmers offered but little wheat, and prices remained without change. The average prices of grain for the week, according to the official return, has been:—Wheat, 28s 7d; and barley, 23s 11d per qr.

FOREIGN.

The Antwerp wheat market has been quiet, but prices have been pretty well maintained. The young wheats are reported to be coming up well in the French country districts, and with a few more fine days, autumn field work will have been, carried through in a satisfactory fashion. Wheat has continued to be offered sparingly upon the French country markets; on the other hand, the milling trade has persistently refused to concede any advance. The wheat trade has shown no activity in the French ports, except at Marseilles, where rather more transactions have taken place to meet the requirements of local consumption. Wheat has shown little or no improvement on the Paris market, although the supplies brought forward have been restricted. Flour for consumption has remained without change in the French capital. Disposable wheat has shown a weak tone at Konigsberg and Dantzic. Wheat has been quiet at Berlin; transactions with delivery at a future date have exhibited a downward tendency. Ibrail advices do not report any improvement in wheat; at the same time there has been some increase in business. As regards the Odessa wheat trade, an increase in supplies from all quarters and favourable weather for sowing have exerted a depressing influence upon prices. The quantity of wheat now en route for the Continent is returned at 1,215,000 qrs, as compared with 1,420,000 qrs at the corresponding date of 1899. The total of 1,215,000 qrs representing the quantity of wheat now en route for Europe, is made up as follows:—France, 110,000 qrs; Belgium, 330,000 qrs; Holland, 320,000 qrs; Germany and the North, 140,000 qrs; and Italy, Spain, etc., 315,000 qrs.

Hamburg, Saturday.—Weather rainy and boisterous, with night frost. Trade quiet, but prices not materially lower. There is no pressure of stock. The imports during the week amounted to 6,824 tons wheat, 5,148 tons rye, 11,508 tons barley, 5,955 tons maize. Fine dry Saal wheat continues in scanty supply, and is firmly held at 28s 3d to 28s 6d; dry Holstein and Mecklenburg at the same price; common quality at 25s to 27s per 504lb. f.o.b. Fine River Plate and Hard Winter 2 is offering at 29s to 30s per 480lb. Rye quiet. 9 10-15 South Russian is held at 22s 3d to 22s 6d per 480lb, c.i.f. Good Saale barley is selling at 32s to 34s, fine at 35s to 37s, and choice lots are held at 38s to 40s, f.o.b. Fine Bohemian, to arrive per barge, 34s to 36s; Moravian and Slovakian, 30s 6d to 41s 6d per 448lb, f.o.b. Feeding barley firm at 18s 3d to 18s 6d per 400lb, c.i.f. Mixed maize near at hand is selling at 21s; November shipment, 20s 3d; December shipment, 19s; January-March, 18s 9d per 480lb, c.i.f., but the demand is not brisk.—JOHN TATLOCK.

POULTRY AND PROVISIONS.

Smithfield, Saturday.—Supplies large, trade slow. From Yorkshire: 20 to 60 coil. Lincs, 25 to 32 4d; Beds, 24 to 28 3d; Surrey, 28 to 28 6d; Kent and Welsh, 24 to 26; hens, 1s 6d to 1s 9d; turkeys, 9d to 10½d per lb; ditto, 3s 6d to 4s 6d; country ducks, 2s to 2s 6d; Bordeaux pigeons, 9d to 1s; rabbits, 5d to 6d; wild rabbits, 3d to 4d; hares, 1s 6d to 1s 8d each. Australian, 2s to 2s 6d per dozen; pheasants, 1s 6d to 2s 6d; young partridges, 2s to 3s 6d; old, 1s 8d to 2s; young grouse, 1s to 1s 6d per brace; hares, 2s 3d to 2s 6d; leverets, 1s 6d to 2s 3d; rabbits, 1s 3d; pintail, 1s 6d; widgeon, 1s; teal, 8d to 10d; woodcocks, 2s 3d; snipe, 7d to 9d; golden plover, 1s 6d to 1s 9d; blackbirds, 5d to 6d each.

Liverpool, Saturday.—Bacon: The demand has ruled very quiet, and although some concession is made to prevent especially of fancy cuts, dealers show no disposition to operate except for immediate needs, and the market rules dull with a declining tendency. We quote: In the wood: Lincolns, 20lb to 28lb, 47s 6d to 51s; 28lb to 36lb, 46s to 48s; 36lb to 40lb, 44s 6d to 46s; long middles, 44s 6d to 49s; long middles, rib in, 18lb to 22lb, 50s to 56s; clear bellies, 14lb to 16lb, 49s to 52s; 16lb to 20lb, 48s to 50s. Staffords: Clear cut (lean off), 25lb to 30lb, and Yorkshire cut, 33lb to 38lb, 43s to 45s; clear middles (lean off), 40lb to 44lb and Yorkshire cut, 40lb to 45lb, 43s to 44s; singed Wiltshire Canadian, 45lb to 54lb, 50s to 51s; American, 14lb to 20lb, 46s to 50s; short clear backs, 12lb to 16lb, 43s to 45s; 16lb to 20lb, 43s to 44s; fat backs (export), 32s to 34s; long middles, 34lb to 40lb, 43s to 45s; 40lb to 45lb, 42s to 44s; heavy clear middles, 45lb to 50lb, 42s 6d to 43s 6d; short middles, (rib in), 15lb to 24lb, 47s 6d to 50s. Shoulders, square cut, 12lb to 14lb, 37s 6d to 40s; 14lb to 16lb, 36s 6d to 40s; New York cut, 11lb to 13lb, 33s to 34s 6d per cwt. Hams moderately in value, with limited inquiry. Light weights are scarce. We quote choice long cut, 8lb to 12lb, 48s to 53s; 14lb to 16lb, 47s to 51s; short cut and A.C., 10lb to 12lb, 47s to 48s; 12lb to 14lb, 46s to 51s; 14lb to 16lb, 43s 6d to 46s per cwt. Lard quiet and easier, American cables coming lower. We quote pails and kegs, 38s to 39s; prime Western, 37s 6d to 38s 6d per cwt. Beef without any special feature. We quote extra India mess, 70s to 75s; Plate and Packet, 65s to 67s 6d per 304lb. Pork steady at recent currencies. We quote finest prime mess, 70s to 75s per barrel. Cheese.—The market rules steady, but with higher cables importers show more firmness, and refuse to make sales except at some advance over last quotations, but dealers do not respond. We quote finest Canadian, coloured, late makes, 54s 6d to 55s 6d; white, 54s 6d to 55s 6d; States coloured, 53s 6d to 54s 6d; white, 53s to 54s. Lower grades, where full cream, sell readily from 46s to 52s, but skims and half-meats are dull, offering from 18s to 35s per cwt. Butter.—There is more inquiry, but with free offerings from all sources there is but a little improvement in the market, which rules firm. We quote, to-day, fancy Canadian creamery, in boxes, 101s to 105s; finest States, 94s to 100s; finest ladles and imitation creamery, 80s to 86s; finest Danish, 110s to 118s; Australian, 104s to 108s; Irish creamery, 104s to 108s; Cork firsts, 91s; seconds, 87s; thirds, 81s per cwt.—Hopkins & Hopkins.

Newport, Wednesday.—Fair attendance, moderate demand, and good supply. Quotations:—Cartpattles 52s to 58s; fancy dairies, 59s to 62s; singles, 42s to 45s; doubles, 58s to 60s; Cheddars, 56s to 58s; truckles, 54s to 60s.

BUTTER.

Tuesday.—Bedale: 1s 4d to 1s 6d per roll of 24oz. Gainsborough: 1s 2d to 1s 4d per lb. Settle: 1s to 1s 1d per lb. Sheffield: 1s 3d to 1s 4d per lb. Spalding: 1s 1d per lb. Stone: 1s 2d to 1s 3d per lb.

Wednesday.—Barnsley: 1s 3d to 1s 4d per lb. Boston: 1s 1d to 1s 3d per lb. Colne: 1s 2d per lb. Goole: 1s 2d per lb. Hereford: 1s 2d to 1s 4d per lb. Keighley: 1s 3d per lb. Kirbymoorside: 10d to 11d per lb. Knaresborough: (wholesale), 1s 6d to 1s 7d; (retail), 1s 7d to 1s 8d per roll of 24oz. Louth: (wholesale), 1s 1d per lb. Market Drayton: 1s 2d to 1s 3d per lb. Market Weighton: 1s per lb. Masham: 1s 3d to 1s 5d per roll of 24oz. Northallerton: 1s 3d to 1s 8d per roll of 24oz. Stockton: 1s to 1s 2d per lb. Uttoxeter: 1s 1d to 1s 3d per lb. Whitby: 11d to 1s per lb. Worksop: 1s 4d per lb.

Thursday.—Brigg: 1s 1d to 1s 2d per lb. Driffield: 1s per lb. Penistone: 1s 3d per lb. Ripon: 1s 5d to 1s 6d per roll of 24oz. Scarborough: 1s 3d per lb. Wetherby: 1s 3d to 1s 4d per lb.

Friday.—Chester: 1s 4d per lb. Derby: 1s 2d per lb. Easingwold: 1s 1d to 1s 2d per lb. Grimsby: Danish and Swedish, 114s to 120s per 112lb; Dutch, 110s to 112s; Canadian, 108s to 112s, per cwt. Helmsley: 10d to 11d per lb. Leeds: Danish, 117s to 123s per 112lb; Irish creameries, 106s to 110s; York lump, 15s to 16s per stone; ditto long rolls, 1½lb, 1s 9d to 1s 11d; fresh butter in 1lb prints, 1s 2d to 1s 3d per lb. Leyburn: 1s 4d to 1s 5d per roll of 24oz. Lincoln: 1s 2d per lb. Nantwich: 1s 4d per lb. Otley: 1s 5d to 1s 7d per roll of 24oz. Sandbach: 1s 6d per lb. Stockport: 1s 4d per lb. Stratford-on-Avon: 1s to 1s 3d per lb. Whitchurch: 1s 1d to 1s 2d per lb.

EGGS.

Tuesday.—Bedale: 8 or 9 for 1s. Gainsborough: 9 for 1s. Settle: 9 or 10 for 1s. Sheffield: 8 or 9 for 1s. Spalding: 10 for 1s. Stone, 9 or for 1s.

Wednesday.—Barnsley: 7 or 8 for 1s. Boston: 8 or 9 for 1s. Colne: 2s 2d per score. Goole: 10 for 1s. Hereford: 8 to 10 for 1s. Keighley: 8 for 1s. Kirbymoorside: 10 or 11 for 1s. Knaresborough: 8 or 9 for 1s. Louth (wholesale): 9 for 1s. Market Drayton: 8 to 10 for 1s. Market Weighton: 11 for 1s. Masham: 10 or 11 for 1s. Northallerton: 8 or 9 for 1s. Stockton: 9 or 10 for 1s. Uttoxeter: 2s 6d and 2s 8d per score. Whitby: 10 for 1s. Worksop: 2s 6d per score.

Thursday.—Brigg: 10 to 12 for 1s. Driffield: 13 for 1s. Penistone: 8 for 1s. Ripon: 8 for 1s. Scarborough: 9 for 1s. Wetherby: 8 or 9 for 1s.

Friday.—Altrincham: 6 for 1s. Derby: 8 for 1s. Easingwold: 9 or 10 for 1s. Grimsby: Australian, 8s 6d to 9s 6d; Russian, 5s 6d to 7s 6d; Danish, 8s 6d to 9s 6d; Irish, 6s to 7s 6d per 120. Helmsley: 9 or 10 for 1s. Leeds: Yorkshire, 11s 6d to 12s 6d per 120; Irish, 10s to 11s; Danish, 8s 3d to 9s 9d; Austrian blues, 6s 6d to 6s 11d; ditto reds, 5s 3d to 5s 11d. Leyburn: 8 or 9 for 1s. Lincoln: 8 or 9 for 1s. Otley: 8 or 10 for 1s. Stratford-on-Avon: 2s 2d to 2s 11d per score. Whitchurch: 8 and 9 for 1s.

COLONIAL DAIRY PRODUCE.

London, Friday.—There has been a fair demand for Australian butter, but prices have not advanced. Choicest quality is making 104s to 106s per cwt., but there is a shilling or two more for a fancy brand. Finest is making 100s to 102s per cwt. Other descriptions are dull and buyers are indifferent. There is no change to note in prices.—W. WEDDELL AND CO.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The Government pamphlet issued on Saturday is an anticipation of the formal Blue Book in December, and witnesses to the vigilance with which the Agricultural Office endeavours to meet the wishes of farmers and traders. There are officials of other Government departments who might do worse than serve a few preliminary years at Whitehall Place. The figures now before us include Ireland, the Isle of Man, the Channel Islands, and Scilly. The various quaint survivals of autonomy in the three last instances cause no trade inconvenience, but the agricultural Home Rule which Ireland somewhat dubiously "enjoys" is a statistical snare. The returns for Great Britain issued in later August are made up into returns for the United Kingdom by many—perhaps most—journals adding in Irish returns for the previous year. This, in the case of wheat, pulse and rye does not matter materially, and in the case of hops not at all, for Irish hop-gardens are in the position of Irish snakes. But barley, oats, and green crops returns are materially affected. Present "authentic" returns of areas cultivated are for the United Kingdom :—

	1900. Acres.		1899. Acres.
Corn crops	8,707,391	..	8,803,599
Green crops	4,301,774	..	4,274,063
Total	13,009,165	..	13,077,662

In other words, there is still a reactionary movement going on in the agriculture of the United Kingdom as a whole, and since 1899 an area of 68,497 acres has been lost to the twelve "progressive" crops of wheat, barley, oats, rye, beans, peas, potatoes, turnips, swedes, mangolds, cabbages, and tares. The tendency to turn land into pasture and to reduce the expenditure of labour and capital thereon is slackened, but is not, as many had hoped to see it, reversed. At present, autumn sowings of wheat and rye almost certainly show an increase, but we are compelled to conclude that the gain will be on the area devoted to other leading crops and not on the pastures or the fallows.

Threshings are proceeding rather faster than the markets can take the produce, and a downward tendency has manifested itself in English wheat, oats, and rye. In the case of barley the maltsters are coming to the rescue, and the sales are up to the deliveries. There is a scarcity of finest types of grain this year, whether wheat, barley, or oats, and after the over-average quality and weight of the 1898 and 1899 crops the relapse into the ordinary is felt. There is, however, no reason to suppose that the three chief cereals are in quality inferior to the average of the last quarter of a century, while the average of the three minor cereals —rye, beans, and peas—is in quality above the mean. The threshings are fully confirming the idea that all the chief crops are about 5 per cent. below the yield of an average year in bulk, and in the case of oats 10 per cent. is frequently the deficit in England, south of the Trent. The good yields of oats in Scotland, Ireland, and the English north-west probably balance this, but in Ireland the good yield per acre is now found to be itself balanced by a decline of no less than 31,000 acres in the area devoted to oats.

The imports of wheat into the United Kingdom last week were as follows :—

	Qrs.
Foreign wheat	313,000
„ flour	156,000
Total	469,000

The sales of English wheat being estimated at 158,000qrs., the total sales of breadstuffs were :—

	Qrs.
Supplies	627,000
Wants	567,000
Surplus	60,000
Stocks October 15	2,702,000
Stocks October 22	2,762,000

The following particulars throw light on the recent movements in flour :—

Flour Imports.		
September 1	83,200	sacks
„ 8	135,500	„
„ 15	189,500	„
„ 22	190,990	„
„ 29	243,160	„
October 6	191,840	„
„ 13	187,480	„
Seven weeks	1,221,670	„

In the same period of 1899 sales of foreign flour were 1,381,040 sacks, and in 1898 sales were 1,098,692 sacks. It will be seen that the trade thus far in the present cereal year has been a fair average, neither much above or much below the mean.

There are on passage to this country.—

Sacks.	1900.	1899.
American	316,000	344,000
Hungarian	30,000	36,000
All other countries	25,000	20,000
	371,000	400,000

The quantities of wheat on passage may thus be divided :—

	Qrs.
From California	960,000
America	385,000
Argentina	275,000
Australasia	250,000
Russia	110,000
All other Countries	30,000
Total Oct. 20, 1900	2,010,000
„ „ 1899	1,690,000
„ „ 1898	1,150,000

America in the flour returns includes California, and in the case of wheat the shipments from California are so large that a separate heading is used. The trade "lumps together" under "Russia," the supplies on passage from Roumania, Bulgaria, and European Turkey, and sacrifices "national" susceptibilities to everyday convenience in a manner that we fear many "national" politicians find it hard to forgive.

The imports of spring corn last week were good of maize and barley, but small of oats. The actual quantities were: Maize, 221,000 qrs. ; barley, 243,000 qrs. ; and oats, 118,000 qrs.

The supplies on passage include 540,000 qrs. of maize and 642,000 qrs. of barley, but oats can only be guessed. Russia has shipped 1,519,000 qrs. in the last six weeks, and America 576,000 qrs. If we reckon half these supplies as intended for British ports and half as already arrived, we shall get 523,750 qrs. as on passage. Of course this is a very *ad captandum* method, but it is better than no figures or estimates at all.

The barley on passage consists of 365,000 qrs. malting and 277,000 qrs. feeding, and these trades are so distinct that distinct returns would be a boon to operators.

The market for oilseeds is undergoing a certain change. As the new Egyptian crop of cottonseed is getting nearer to delivery the price on spot in England is receding. A maximum of £8 per ton was reached early in the month, but considerably less is now taken. Linseed shows a defeat of England by the Dutch, which should be brought to the attention of Dr. Clark. The Dutch samples are fetching more than the English, which are wont to top the market. About 62s. is commanded by the best samples from Holland, while hardly any English gets into 60s. per quarter. Some good Turkish linseed is on offer at 56s., and the other sorts are given in detail in our quotation lists.

Recent Mark Lane sales have included such varied staples as La Plata Sorghum at 23s.; Canadian Buckwheat at 27s. 6d.; Rubsen at 49s.; American Dari at 23s. 6d., and Torrified Barley at 23s. per qr.

THE BALTIC.

The London Corn Trade Association are revising their printed forms for contracts. Any suggestions addressed to the Secretary, 2, Lime-street Square, E.C., will be laid before the revisors if received before the 31st inst. The port of Swansea has determined to be enrolled among the harbours where vessels of all draughts can enter at all tides. The freights to such ports are apt to be very "preferential," and Swansea will doubtless find the investment worth while, though the sum, £1,500,000, is heavy.

Wheat cargoes were fairly steady from the 16th to the 18th, but the 19th and 20th were weak days, and the prices accepted thereon favoured buyers. The sales have embraced :—Californian, at 31s. 3d. ; Walla Walla, at 30s. 3d.; Manitoba, at 32s. 6d. ; No. 1 Northern at 31s. 9d. (17th), 31s. 6d. (18th), and 31s. 3d. (20th) ; No. 2 Hard Winter, at 30s., arrived, and 28s. 6d. for Nov. shipment ; fine Australian at 31s. 6d. ; New Zealand, arrived, at 29s. 6d., and for Nov. shipment at 31s. 3d. ; Roumanian at 28s., and Russian Taganrog at 29s. per qr.

The arrivals of grain and seed laden vessels at ports of call since last review have been seven, as will be seen by the following table :—

Cargo.	Total.	Argentina.	California.	Chili, Australia and N.Z.	Sundries.	Total last week.	Total since Jan. 1, 1900.	Total same time 1899.

THIS DAY'S MARKETS.

MARK LANE, MONDAY.

[First Report.]

English fine new wheat made 32s. 6d. to 33s. to-day for seeding purposes, but ordinary samples both of white and red were the turn in buyers' favour. Some good wheat from Poland *viâ* the Baltic is to hand at 30s. per 504lb. It is strong and serviceable red wheat. Long berry New Zealand, at 31s. 3d. to 31s. 9d., had a fair sale, and short berry, at 29s. 3d. to 30s. 3d., was also looked after. American made 32s. for good red winter, 31s. for hard winter. The market was written by some firms as "weaker," but it is difficult to average a common tendency among a dozen sorts. White, generally speaking, was weaker than red. Maize made fully 23s. for sound yellow, but most samples were from slightly damaged cargoes. Flat was dearer for prompt supply, but dull for November delivery. Barley was a bigger and better trade in all malting and brewing samples, and there was an appreciably larger attendance alike of maltsters and of farmers from the eastern counties. The best touched 38s., and with common Persian at 18s., the remarkable range of a sovereign per quarter was presented. Oats were steady at previous full rates. Beans were firm for English, 6d. lower for foreign. New Canadian peas at 30s. sold fairly well.

(*For Close of Market see foot of Column.*)

CLOSE OF THE MARKET.

By Telephone, 2 p.m.

The market closed with a good demand for landed samples of maize, feeding barley, oats, and pulse, but grain not out of the vessel was rather neglected owing to the lightermen's strike. Wheat was a quiet trade, but rather better at the close than the opening. All sorts of oilcake favoured sellers; in fact, 2s. 6d. per ton advance may be quoted for the chief kinds.

THE FLOUR TRADE.

MARK LANE, Oct. 22nd.

London makes to-day were steady, with a somewhat improved sale at the 6d. decline admitted on the 15th. Country flour with very good supplies was again the turn in buyers' favour. American flour was offered at a range of from 20s. 6d. to 21s. for good baking grades up to 26s for ordinary best patents and 27s 6d for Star. Hungarian takes up value where American ceases, and carries it 4s. further; 27s. 6d. to 31s. 6d. was the range. French is out of favour. The price of American maize flour is 16s. 6d. to 17s. per sack, while maize cones fetch from 17s. 8d. for the commoner American up to 19s. 3d. for English-made from American corn. Rye flour fetches 20s. per sack for best, but only 15s. for the next grade. This is a great difference, but inferior rye is a very suspected article, and where badly sprouted or suffering from ergot it undoubtedly is a danger. Malt cooms make 85s. per ton for Norwich and 70s. for Hampshire consignments. The latter are not delivered up to town. Malt screenings at London breweries are offered at 56s. to 58s. per ton.

LONDON TERM MARKET.

This market is held twice a day, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made:—

WHEAT.—		Oct.	Dec.	March.
		s. d.	s. d.	s. d.
Oct. 15	noon	6 8	6 9	6 11
	4 p.m.	6 8	6 9	6 11
Oct. 16	noon	6 8	6 9	6 11
	4 p.m.	6 8	6 9	6 11
Oct. 17	noon	6 8	6 9	6 11
	4 p.m.	6 8	6 9	6 11
Oct. 18	noon	6 8	6 9	6 11
	4 p.m.	6 8	6 9	6 11
Oct. 19	noon	6 8	6 9	6 11
	4 p.m.	6 7	6 8	6 11
Oct. 20	noon	6 7	6 8	6 11
To-day	noon	6 7	6 9	6 11

A few sales for June delivery have taken place at 6s. 11d. per cental. Maize is unsettled, 4s. 6d. per cental asked for prompt delivery, 4s. 2d. accepted for December, 3s. 11d. for January, and 3s. 10d. for February.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States.

The Term Market (while the "Baltic" is rebuilding) is temporarily situated at the Great Eastern Hotel, No. 190, Bishopsgate-street, ground floor.

HOPS.

London (Borough), Monday.—Messrs. W. H. and H. Le May, hop factors, 67, Borough High-street, London, S.E., report: There is still a good trade doing with prices in sellers' favour, a very large proportion of the growth has now passed into consumers' hands.

GRAIN AND FLOUR FACTORS' REPORTS.

Flour.—A steady trade at unchanged prices, both on spot and to arrive.—T. S. MEDILL, Mark Lane.

There is no change to note in the position of the wheat trade. Business is much impeded by the lightermen's strike, and values are mostly unaltered. Barley and maize unchanged, except for landed lots which are about 6d. to 9d. dearer, owing to scarcity. Oats are about 3d. dearer. W. P. WOOD AND CO., Mark Lane.

The market for milling offals is about the same as last week, and bran maintains the advance of 2s. 6d. per ton. Middlings and pollard are slow at the full prices asked by the trade, and buyers refrain unless able to purchase at less money. American and other feeding flour on the spot remains unchanged. The trade on the whole (except bran) may be written slow.—RICHARD DOGGETT, Mark Lane.

Our market continues very quiet, but all farm seeds are firmly held. There is some fine red clover on the Continent, but it is confined to limited districts, and prices seem likely to be maintained above English level. There is rather more inquiry for winter tares. New spring are now offering, but at prices much above buyers' ideas. Rye grasses are firmer. Birdseeds neglected. Blue peas and haricots firm.—JOHN PICARD AND CO., Mark Lane.

Wheat trade steady, prices maintained. Flour held firmly at late rates. Maize, grinding barley, and oats are 3d. per quarter dearer.—COVENTRY, Mark Lane.

Offals—The demand for bran and feeding stuffs at the moment is poor. Values practically unchanged. Weather milder.—GREENHILL BROTHERS, Belfast, October 20.

Flour: There has been a dull trade all the week in flour, with prices irregularly 6d. down. Grain: Indian Grain is 3d. per boll lower. Foreign oats are a shade better. Canadian pease are 3d. easier on spot. Beans and barley dull. Mill stuffs: Bran is pressed for immediate delivery. Thirds are unchanged.—MCKINNON AND MCDONALD, Glasgow, October 20.

Wheat quiet with a moderate extent of business. Winter wheat ½d per cental lower, other sorts firm and unchanged. Flour steady, no change in prices. Maize.—Owing to sharp declines in America dealers are buying only for immediate needs, and mixed American, whilst extremely scarce, shows a loss of ½d per cental from Tuesday. The demand for European and Plate is also slow, and prices slightly favour buyers. Barley—Californian is in poor demand and 9d per qr. lower. Chilians are firmly held, but high prices check business. Feeding sorts have a slow trade at a decline of ¼d per cental. Beans—Quiet trade at about unchanged prices. Peas—Quiet trade at last market day's prices. Oats—English oats meet a steady trade without change in price. Foreign kinds in moderate demand at Tuesday's values. Oatmeal—Only a quiet trade passing, but prices are steady at last market day's figures. Oilcake—There is only a moderate demand for cakes, and prices remain on about the same level as last Tuesday.—ROSS T. SMYTH, Liverpool, October 20.

THE BALTIC, MONDAY, 1 p.m.

STATE OF TRADE.

Wheat is 3d. cheaper for cargoes on passage, and also for near futures, but dates in 1901 are firm. Maize cargoes are firm for round, steady for yellow, dull for flat. Barley and oat cargoes are hardening.

BUSINESS DONE.

WHEAT.—Argentine, 30s, just sailed; Argentine, 29s, February shipment; Duluth, 32s 3d, ion passage; No. 2 Hard Winter, 28s 6d, on passage; Calcutta, white, 33s, April shipment; No. 1 Northern, 31s 6d, November shipment; Manitoba, 31s 9d, November shipment; Taganrog, 28s 9d, November shipment.

BARLEY.—Nicolaieff, 18s 6d, November shipment.; Persian, 16s 9d, on passage; Kustendje, 18s 6d, November shipment; Californian, 26s, on passage.

OATS.—Vologda, 13s 9d, prompt shipment; Canadian, 14s 6d, prompt shipment.

MAIZE.—Galatz, 22s, November shipment; Argentine, 21s 3d, on passage; American, 19s 9d, November shipment; American, 18s 9d, January shipment.

BEANS.—Saida, 29s 6d, prompt shipment.

LINSEED.—Calcutta, 51s 9d, May shipment; Bombay, 54s 9d, April shipment; American, 59s, prompt shipment; Azoff, 58s 9d, prompt shipment.

COTTONSEED.—Egyptian, £6 17s 6d, December shipment.

SEEDS.

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., write that a quiet feeling now characterises the trade for field seeds. The recent speculative activity, more particularly in red clover-seed, has disappeared for the time being, whilst no consumptive wants have, for the moment, to be met. Meantime, values all round keep fairly steady. In mustard and rapeseed the tendency continues upwards. Winter tares, although in rather better request, show no improvement in price, whilst for rye the inquiry is limited. Canary and hempseed are both alike dull and neglected. Blue peas and haricot beans command former terms.

CATTLE.

Metropolitan Market, Islington
Monday, Oct. 22nd, 1900.

	British.	Total.	Oct. 23rd, 1899.
Beasts	2,060	2,060	1,570
Sheep and lambs	7,430	7,430	7,[illegible]
Calves	10	10	[illegible]
Pigs	70	70	[illegible]
Milch cows	80	80	75

Quotations per 8lbs (sinking the offal).

ENGLISH.

	Inferior.	Second	First.
	s. d.	s. d.	s. d.
Beasts	3 0 — 4 1	—	— —
Sheep	3 2 — 5 2	—	— —
Lambs	5 4 .. 5 8	..	6 0
Pigs	3 0 .. 4 2	..	4 10

Milch cows, per head, £16 to £22.

British arrivals include as follows:—Scotland, 11; East Counties, 32; Midland, Home and Western Counties, 1,[illegible]; Devon, 50; Ireland, [illegible].

The supply of beasts on offer to-day showed an increase of 590 beasts compared with Monday last, the majority of which, however, were of middling descriptions, best qualities being scarce, sold readily; prices unaltered. Trade for other grades was dull, and sales had to be forced at less money, and are not expected to clear. Amongst the Irish arrivals were 12 shorthorns, a few only were disposed of when the report left.

The following are top quotations per 8lb. (sinking the offal):—

	To-day.	Oct. 23rd, 1899.
Scotch	4s 10d to 5s 0d ..	— to —
Devons	4s 9d to 4s 10d ..	4s 6d to 4s 8d
Herefords	4s 8d to 4s 10d ..	4s 6d to 4s 8d
Runts	4s 7d to 4s 9d ..	4s 5d to 4s 7d
Lincolns	4s 4d to 4s 6d ..	3s 10d to 4s 2d
Irish	4s 3d to 4s 5d ..	4s 0d to 4s 2d
Fat cows	3s 8d to 3s 10d ..	3s 8d to 3s 10d

There was a slight increase in the number of sheep and lambs compared with last Monday. The supply included 250 Scotch, 820 from the Eastern Counties, and 2,100 from Ireland. The few lambs on offer of best quality were lean in prime. For wethers there was a steady demand, late rates being maintained. Ewes were more difficult to dispose of even at a reduction of 2d per 8lb.

Undermentioned quotations are at per 8lbs. (sinking the offal), and are for the best of each class penned:

	To-day.	Oct. 23rd, 1899.
7½ to 8 stone Downs	5s 10d to 6s 0d ..	5s 6d to 5s 8d
9-stone ditto	5s 8d to 5s 10d ..	5s 4d to 5s 6d
10-stone half-breds	5s 4d to 5s 6d ..	5s 2d to 5s 4d
12-stone Lincoln	5s 0d to 5s 2d ..	— to —
10-stone Irish	5s 2d to 5s 4d ..	4s 10d to 5s 0d
10-stone Down ewes	3s 10d to 4s 0d ..	3s 10d to 4s 0d
11-stone half-bred ditto	3s 4d to 3s 6d ..	— to —
5-stone Down lambs	5s 10d to 6s 0d ..	— to —

The supply of pigs was small, and met with little enquiry; best small breeds made 4s 8d to 4s 10d per 8lb.

London Central, Monday.—Good supplies, trade slow. Beef: Carcases, 3s 9d to 3s 10d; hindquarters, 4s 2d to 4s 6d; rostings, 5s to 5s 4d. Sheep: Ewes, 3s to 3s 4d; wethers, 4s 2d to 4s 6d; hindquarters, ewe, 4s 4d to 4s 8d; wether, 5s 6d to 5s 10d. Pigs, large, 3s 8d to 4s; small, 4s 2d to 4s 4d.

St. Ives (Hunts), Monday.—Beasts 166, sheep and lambs 1,382, pigs 414. Beef, 7s 3d to 8s 3d; mutton, 7s 7d to 9s 11d; pork, 6s 8d to 7s. Fat beast good demand. Stores fair. Fat and store sheep fair. Fat pigs good demand. Stores fair. Milch cows fair show, prices £14 to £22.

FOREIGN CATTLE.

Deptford, Monday.—Beasts, 1,496. To-day's supply compared with last market day showed a slight increase, and consisted of 793 from the United States, and 703 from Canada, the latter consisting of ranche cattle, for which trade was rather slow, but, nevertheless, at higher rates. For States beasts there was also a firmer sale at an advance of 2d per 8lb, this being due to the short supply combined with the favourable weather and light consignments on the sea. The best States made from 4s 6d to 4s 7d per 8lb, offal given in, to dress about 720lb; seconds, 4s 3d to 4s 4d. Best Canadians quoted at 4s, and second ditto 3s 9d. No sheep on the market. The following were the numbers on offer on the corresponding day last year, with the current top rates:—Beasts, 1,314, 4s 2d to 4s 4d per 8lbs to dress about 720lbs; sheep, 1,[illegible], 4s in the wool, to dress from 68lbs to 72lbs.

Liverpool, Monday.—There was a larger supply of cattle in market to-day. Demand good and prices firmer, particularly for finished qualities. Fewer sheep on offer, prices firmer for best descriptions; other qualities unchanged. Beef, 6½d to 4½d per lb; mutton, 8½d to 5½d per lb. At market: 1,830 cattle and 7,116 sheep.

PROVISIONS.

London, Monday.—The arrivals from Ireland last week were 3,201 bales bacon, and from foreign ports 8,354 bales bacon. The high prices of bacon having considerably reduced consumption, the market last week was easier, goods offering at 3s to 4s less than previously. On Friday official rates were 2s to 3s lower, and the market closed quiet. Irish, 60s, 64s to 67s; Danish, 60s, 64s to 67s; Canadian, 56s, 60s to 62s. Butter was generally in better demand and prices slightly advanced. Danish firm at 118s to 120s; Colonial, 100s to 110s; Canadian, 100s to 104s. Lard, active demand; Irish, 50s to 58s; American pails, 40s to 44s.

FEEDING STUFFS.

London, Monday.—Linseed Cake: Market 2s 6d dearer owing to scarcity of supplies, which are likely to be very small for two or three months. Decorticated cotton cake: Stocks exhausted, also of meal; ordinary cotton unchanged. Linseed 2s dearer on the week.

English linseed cake	£8 10 0 to 8 12 6	ex mill
American Western linseed cake	8 0 0 to —	ex quay
Russian oil cake	8 0 0 to 8 5 0	ex quay
Feeding cake, Samuelson's S.P.F. (10 to 12 per cent. oil)	6 17 6 —	ex warehouse
Decorticated cotton cake	None	ex quay
Decorticated cotton meal	None	ex quay
London made cotton cake (best)	5 5 0 to 5 7 6	ex mill
Egyptian cotton cake (in bags)	5 2 6 to —	ex quay
Burton decorticated ale grains (bags included)	[illegible]	on rail, Burton
Rangoon Rice Meal	[illegible]	ex wharf
Russian linseed in bulks, per 416lbs	2 [illegible] to 2 1[illegible]	ex warehouse
Calcutta linseed in bags, per 410 lbs	3 2 0 to 2 3 0	ex warehouse

—ROBT. AND JOHN HEWETSON.

Destructive Farm Fire in Cheshire.—A fire broke out here on Tuesday night on the farm premises of Mr. John Wardle, at Appleton, Cheshire, and damage to the extent of several hundreds of pounds was sustained.

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

At Islington on the chief market day of the week there were fat beasts of both prime and second quality to deal with more late, especially for the very choicest Scotch, Devons, and Herefords, as well as runts, these maintaining last week's quotations, but any below this description finished off dull and dragging at a slight decline in value with a difficulty in clearing the same remark applying to Shorthorns and Irish, the latter arriving in shorter numbers. For fat heifers and cows and bulls, there being more demand, rates were firmer, partly also due to a shorter arrival. Rough cattle were in better request. At Deptford the supply was shorter, with an upward tendency in value, no cattle being on sale on Monday, which has not been the case for several weeks. The total number on sale at Islington was 1,640, as against 1,500 during the previous week. The following were the top rates paid per 8lbs. (sinking the offal):—80 to 90-stone polled Aberdeens, 5s.; 90-stone Herefords, 4s. 10d.; 85 to 90 stone hunts, 4s. 9d. to 4s. 10d.; 100-stone Lincolns, 4s. 4d. to 4s. 6d.; 110-stone ditto, 4s. to 4s. 2d.; 90-stone Dublins, 4s. 6d.; 100-stone Waterfords, 4s. 2d. to 4s. 3d.; 85-stone States, 4s. 4d. to 4s. 5d.; 80-stone Canadians, 3s. 8d. to 3s. 9d.; 100-stone fat cows, 4s.; 100-stone fat bulls, 3s. 6d. to 3s. 8d. The trade for sheep was firmer in regard to value; this remark also applies to ewes, except on Thursday, when but little business was transacted owing to the decline of the season for lambs, the best of which, however, were steady in price. Best pens made per 8lbs. as follows (sinking the offal): 7½ to 8-stone Downs, 6s.; 8-stone Scotch, 5s. 10d. to 6s.; 9-stone Downs, 5s. 10d.; 10-stone ditto, 5s. 8d.; 10-stone half-breds, 5s. 6d.; 12-stone ditto, 5s. 2d.; 10-stone Irish, 5s. 4d.; 10-stone Down ewes, 4s. 2d.; 11-stone half-bred ditto, 3s. 8d.; 5-stone fat Down lambs, 6s. 2d.; 6-stone half-bred ditto, 5s. 8d. Calves were in very short number, only 30 head, trade for which was very dull and dragging, the best only making 5s. 8d. per 8lbs.

Trade in the West.

Despite fairly good deliveries of both fat and store stock the tendency of prices is undoubtedly upward. At Wimborne on Tuesday beef and mutton brought more money, beef again touching 11s. 6d. to 12s. per score for well-finished steers and heifers; whilst mutton was quite in sympathy, good class ewes as well as wethers making 8d., whilst lambs in some exceeded 50s. apiece (or 9½d. to 10½d. per lb.). Really choice calves ran up to nearly £7 apiece (or quite 8d. per lb.), and seconds as well as rearers were equally as dear. Pigs of nice weights are hardening throughout the district, and it is very difficult now to purchase porkers for less than 10s. (more if anything), and 9s. to 9s. 6d. for baconers. Milch beasts are steadily going up almost everywhere, heifers with their first calves bringing £17 up to £23 apiece, and barreners £24 to £30 per pair. Store sheep, especially working lots, are in very general demand at higher prices, as the result of the improved keep prospects everywhere.

LONDON.

London Central, Wednesday.—Fair supplies, but with the exception of veal and pork which were firm, trade ruled slower. Arrivals of beef included 50 tons Scotch, 450 Liverpool sides, 1,600 hindquarters, and 600 forequarters American refrigerated. Quotations: Beef, Scotch, short sides, 4s 6d to 4s 10d; long, 4s 2d to 4s 6d; English, 4s to 4s 2d; American, Deptford-killed, 3s 8d to 3s 11d; Liverpool, 3s 8d to 3s 10d; American refrigerated hindquarters (best), 4s; seconds, 3s 4d to 3s 8d; forequarters (best), 2s 9d; seconds, 2s 6d to 2s 8d. Mutton: Scotch, 4s 8d to 5s; English wethers, 4s 2d to 4s 6d; ewes, 3s 4d to 3s 6d. Veal: English and Dutch, 4s to 4s 8d. Pork: English, 4s 4d to 5s; and Dutch, 4s to 4s 4d per 8lb.

London Central, Friday.—Good supplies but trade slow. Arrivals of beef included 100 tons Scotch, 600 Liverpool sides, 3,500 hindquarters, and 2,200 forequarters American refrigerated. Quotations: Beef, Scotch, short sides, 4s 4d to 4s 8d; long, 4s 2d to 4s 4d; English, 4s to 4s 2d; American, Deptford-killed, 3s 8d to 3s 11d; Liverpool, 3s 8d to 3s 10d; American refrigerated hindquarters, best, 3s 8d to 4s; seconds, 3s 2d to 3s 6d; forequarters, 2s 8d to 2s 10d. Mutton: Scotch, 4s 8d; English wethers, 4s to 4s 4d; ewes, 3s to 3s 4d; Canterbury, 2s 7d to 2s 10d; Wellington, 2s 6d to 2s 8d; Sydney and River Plate, 2s 5d. Veal: English and Dutch, 3s 8d to 4s 4d. Pork: English, 4s to 4s 4d; and Dutch, 3s 4d to 3s 8d per 8lb.

Islington, Thursday.—Beast supplies good for a Thursday's market, and although chiefly consisting of fat bulls and rough descriptions met with moderate support. Sheep pens only moderately filled, but the demand for both wethers and ewes was of a quiet character, prices however, remaining without essential change from last Monday. 7½ to 8-stone Down wethers, 5s 10d to 6s; 9-stone, 5s 8d to 5s 10d; 10-stone, ditto, 5s 4d to 5s 6d; 10-stone Down ewes, 4s to 4s 2d; 11-stone half-bred ditto, 3s 8d. Calf trade steady, the best on offer making 5s 6d to 5s 8d per 8lb, to sink the offal. Total supplies 170 beasts, 980 sheep, 25 calves, 160 pigs, and 5 milch cows.

COUNTRY.

Ashford, Tuesday.—Best beef sold rather better than last week, prime steers fetching fully 12s per score. There was [illegible] with regard to mutton, which varied [illegible] ewes at 5s or 5s 2d for best Kent and [illegible]. Pork was relatively dearer than [illegible] trade keeping in the case of roasters fully 10s 6d per score. Very little doing in veal or lamb. The demand for rams was not very keen.

Basingstoke, Wednesday.—At Raynbird and Sons' sale yard there was a large attendance of buyers to meet a supply of 55 fat beasts, 92 calves, 591 fat sheep and lambs, 353 pigs, and 148 head of dairy and store cattle, for which the following prices were realised:—Fat beasts, £11 10s to £22 10s; fat calves, 80s to £6 15s; small, 20s to 55s; fat wethers, 42s to 59s; fat ewes, 28s to 45s; fat lambs, 22s to 46s; fat hogs, 64s to 79s; porkers, 42s to 56s; small, 25s to 40s; store pigs, 12s 6d to 18s; dairy cows, £10 10s to £23. Prime quality fat beasts of moderate weights are enquired for and fully maintain their value. Half fat and low quality animals are worse to sell and make less money. Shorthorn steers made up to £19 5s; heifers, £16 5s; cows, £17; Devon steers up to £16 15s; polled Scotch steers £16 10s; ditto two-year-old heifers, £16; Welsh beasts, £18; a pure red poll bull, £22 10s, etc. A good show of fat sheep and lambs and buyers numerous with a brisk demand, all the pure lots were cleared at an advance in many instances. Old ewes and inferior sheep in less demand and prices lower. Hants down wethers and young ewes made 52s, 49s, 45s, 55s 6d, 46s, 52s, 53s 6d, 55s 6d, 50s, 48s, 46s 6d, 44s, 42s, 40s; 10 months old ditto, 44s, 46s, 47s 6d, 39s 6d, 42s, 35s 6d, 37s 6d, 35s, 47s 6d, 36s, 57s 6d, 50s; Southdown, 33s 6d; old ewes, 39s, 26s, 39s, 30s 6d, 34s 6d, 30s, 31s; Dorset ewes, 36s 6d; Southdown ewes, 33s 6d; rams, 59s, 49s, 57s, 42s, 55s, 50s; 3 months old sucking lambs, 36s 6d, 33s. There was a large supply of dairy cows and heifers on offer mostly of excellent quality; prices ruled brisk with a good enquiry. Store cattle met an indifferent sale with a slow trade. Fat calves were cleared at slightly higher prices than those of last week. The pig trade throughout was firmer, good quality porkers and hogs being in demand at more money. Store pigs also showed an advance on quotations of last week. Ruling values:—For pure Devon and polled Scotch beasts, 7d to 7½d; ditto Shorthorns, 6d to 6½d; bulls, cows, and inferior beasts, 5d to 5½d per lb; best quality sheep, 8½d to 9d; second ditto, 7d to 8d; old ewes, rams, and inferior 5½d to 6½d; choice fat suckling lambs, 8½d to 9d per lb; fat calves, 6d to 9d per lb; fat porkers, 9s to 11s per score; hogs up to 9s score.

Boston, Wednesday.—Stores, £14 10s to £16 10s; useful beasts, £12 to £14; milch cows, £18 to £21; heifers, £15 10s to £17 10s; calves, 55s to 60s; best beef, 7s 9d to 8s; cow beef, 6s 9d to 7s 6d per stone; mutton, 7½d to 8d; ewe mutton, 5½d to 6d per lb; stores, 28s to 34s.

Braintree, Wednesday.—A very much improved trade was found at Messrs. Ball's auction mart. Numbers penned: 37 beasts, 179 fat sheep, 75 hogs, 410 pigs, and 8 cows. Prices: Beef 5s, and mutton 5s 8d per stone; pork, 10s per score.

Calne.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne:—

Prime stores.	Thickness of fat in any part of the back.	Price per sc.
6 sc 10 lbs to 9 sc 10 lbs ..	2½ in. and under.. ..	9s 0d
Under 10 sc 10 lbs	Not exceeding 2½ in. ..	8s 6d
Under 11 sc 10 lbs	Not exceeding 2¾ in. ..	7s 9d
Under 12 sc	Not exceeding 3 in. ..	—

Any pigs outside these limits at their value. Half truck, 12 pigs. Whole truck, 25.—CHARLES AND THOMAS HARRIS AND Co., Limited, Calne, Wilts.

Cambridge, Monday.—The stock exhibited for sale at this market and the prices obtained were as follows:—Beasts, 870; sheep, 844; pigs, 423; horses, 18. Beef, 7s to 8s per stone; mutton, 4s 4d to 5s 8d; pork, 5s 9d to 7s. A good show store cattle, but trade slow. Fat beasts a good supply, with very little alteration in the trade. Fat sheep a fair trade all round. Stores, only a few lots to hand, trade not brisk. Fat pigs, a good brisk trade all round. Stores not so good as last week. Hay, straw, and roots short supply.

Canterbury, Saturday.—Plentiful supply of stock, but trade was slow. Rough lambs ranged from 13s to 15s, and some very strong half-breds from 23s to 28s. Old Kent ewes were selling at from 10s 6d to 19s 6d, and younger animals of good class from 27s to 32s. One large run of ewe tegs realised from 29s 6d up to 36s, and a lot of good one-lamb ewes from 32s to 41s. Several useful lambs were disposed of at from £2 15s to £5 5s per head.

Carlisle, Saturday.—The supply of Irish store cattle was larger than for some weeks past, the last of the Hempton Fairs being always a popular one. About 700 heifers and bullocks were shown, the bullocks being of a superior description. Fair attendance of buyers, and steady trade at £7 10s to £8 10s for small heifers; and up to £15 10s for heifers of the best description; bullocks, £8 10s to £13 10s. Young pigs a small show; quiet trade, at 21s to 22s each.

Chichester, Wednesday.—Fair supply of fat stock, which met with a quiet demand without material alteration in values. Store sheep were in much larger supply than at the last market, and business was somewhat slow, but prices on the whole were well held.

Dorchester, Saturday.—There was a large entry of cattle, for which a much improved trade was experienced. Heifers and calves sold well from £16 15s to £18; cows and calves, £11 10s to £14 10s; barreners, £10 to £11 10s each; in-calf cows, £8 15s to £10 10s; in-calf heifers, £10 15s to £13 15s; fat cows, £12 to £15; fat heifers, £16 5s to £18. Sheep in good supply. Down ewes sold well from 40s 6d to 45s; horn ewes, 41s 6d to 42s; horn lambs, 25s.

Dublin, Thursday.—Prime finished beef—bullock and heifer—in good demand at fully late rates. Inferior and thinly meated descriptions, of which the market was mainly composed, difficult to exchange, and prices still favouring buyers. With a little more life in the sheep department a fair clearance was effected at last week's full prices. Cattle (best), 30s to 32s per cwt. Exceptional, 33s 6d per cwt. Other descriptions, 26s to 29s per cwt. Mutton, 5½d to 6¾d per lb; extreme 7d per lb.—GANLY, SONS, AND Co.

Dumfries, Wednesday.—Large supplies of beef, with a fair demand, making up to 37s 6d per live cwt; horned bullocks, to £17; polled bullocks, to £20; Highland bullocks, to £22; Galloway bulls, to £21; do. bullocks, to £22; horned heifers, to £16; polled heifers, to £15.

Gainsborough, Tuesday.—Good show of calves, and some splendid animals on offer, but trade was only moderate, prices ranging from 33s to 42s per head.

Glasgow, Wednesday.—Supplies shorter, and trade slow. Prices are steady. Top Scotch cattle, 61s to 68s per cwt; secondary, 62s to 64s; top Irish, 60s; top mutton, 8d per lb; secondary, 7d to 7½d; good lambs, 7½d to 8d. Dead meat quiet sale, and values easier. Best Scotch beef, 5¾d to 6d; best States, 5½d to 5¾d; Canadians, 5¼d; home cows, 4¾d to 5d.

Hereford, Wednesday.—Return of stock brought to the cattle market this day:—Bullocks and cows 3,478, calves 194, sheep and lambs 2,044, pigs (fat and sows) 25, sucking pigs 73, pigs (stores, not more than ten) 192, pigs (stores, more than ten) 252, horses 331, colts 340, donkeys 2. Prices of stock: Best beef, 6½ to 7d per lb; wether sheep, 6½d to 8d per lb; ewes, 5½d to 6d per lb; veal, 9d per lb; lamb, 8½d per lb; pork, 4½d to 5d per lb; bacon, 4d to 5d per lb.

Ipswich, Tuesday.—Messrs. Robert Bond and Sons report a short supply of fat cattle, which met a very brisk trade up to £23. Fat sheep were not numerous, but realised up to 69s; fat lambs made up to 41s 6d. Several calves were offered; those for weaning made up to 63s; those for killing made up to 70s. Fat and store swine were short, and met an excellent trade at high prices. This being the annual sale of pedigree swine, some young boars, 7½ months old, made up to £6 15s; gilts, up to £5 5s. This being the third annual sale of grazing cattle, 28 steers and heifers were forwarded, making up to £12 15s. A consignment of Jersey heifers sold well up to 21 guineas. A good red poll cow and calf made up to £21. Numbers at sale and market:—Beasts 1,000, calves 56, sheep 2,125, pigs 1,485, horses 23.

Leeds, Tuesday.—The supply of fat stock in the market to-day shows a slight reduction on the week, and comprised an average number of North of England cattle, a large number from Ireland, and a few pens of Scotch. For the primest cattle a fair selling trade was done, but for secondary and inferior business was slow. The choicest heifers and bullocks fully maintained last week's full rates, realising 6½d per lb, good beef made 6d to 6½d, and cow and inferior beef from 5d. There was an improvement in the number of sheep offered, the entries showing an increase of 610 compared with last Tuesday. Owing to the increased supply business generally ruled slow, only the choicest small shearlings meeting with an ordinary inquiry. Secondary and inferior sheep were bad to sell, a number remaining unsold at the close. Choicest small shearlings made last week's full quotations, viz., 8d to 8¾d, large and heavy sheep 7d to 7¾d, ewes and tups 5d to 6d per lb. A very small number of calves were on sale. The best veal animals realised up to 7¾d per lb. A moderate supply of dairy cattle met with a quiet demand, but prices remained without any change. Good milkers obtained £15 to £20. Numbers at market—Cattle 539, sheep 2,160, calves 8.

Leicester, Saturday.—Full supplies of stock in excellent condition. Fair attendance of buyers, and choice qualities in good request; secondary lots flat. Milch cows, £14 to £28 per head; bullocks, £11 to £16. Sheep in fair demand and prices steady.

Lincoln, Friday.—Trade very flat. Best milch beasts, £20 to £22; common lots, £15 to £17. Prices for store beasts about as last week.

Newcastle, Tuesday.—Rather dull market. Recent prices. Numbers:—Cattle, 2,203; sheep, 6,704; calves, 54; pigs, 546. Prices (sinking the offal):—Beef, 5s to 8s; pork, 5s to 9s 6d per stone; mutton, 5d to 8d; veal, 5d to 9d per lb.

Newport (Mon.), Wednesday.—Very fair trade; good supply. Quotations: Best beef, 6½d; seconds, 6d to 6¼d; cows, 5½d to 6d; wether mutton, 7¼d to 7¾d; ewes, 6¼ to 6¾d; lamb, 8d; veal, 7d to 7¼d.

Norwich, Saturday.—The supply of store cattle here today was considerable. A fair amount of business was passing at late rates. Fat beasts, which were in good supply, also made former terms, being quoted at 7s 6d to 8s per 14lb. Store sheep, which were freely offered, were dull. Hoggets were quoted at 35s to 40s; and keeping shearlings at 40s to 45s per head. Fat sheep made 8s 6d to 9s and 9s 6d per 14lb.

Preston, Wednesday.—Good attendance and supplies. Though cattle were harder to buy, prices were practically unaltered from last week, and the same remark applies to mutton. Calves sold badly. Beef—Heifers and bullocks, 6d to 6¼d; cows and bulls, 5¼d to 5¾d. Mutton—Hoggs and lambs, 7¼d to 7¾d; tups and ewes, 5d to 6d. Calves, 5¼d to 6¾d. At market—235 cattle, 1,800 sheep, and 87 calves.

Romford, Wednesday.—There was a very short supply of fat beasts, and trade was a little better. Best animals made 4s 4d to 4s 6d, and middlings 4s to 4s 2d per stone. Sheep in average supply, and trade about the same. Best sheep made 5s 6d to 5s 8d; and middlings, 5s to 5s 2d per stone. Calves in short supply, and trade a little better, at 5s to 5s 2d per stone. A fair demand for store beasts. The pig trade showed a slight improvement.

Salford Tuesday.—There was a larger supply of cattle, but a good demand, and last week's prices were maintained. The supply of sheep was much smaller than last week. There was a slow sale at the prices ruling last market day. A larger supply of calves, and buyers are not very numerous, prices being lower. Quotations:—Cattle, 5d to 6¼d; sheep, 6d to 8¼d; calves, 5¼d to 7¼d per lb. At market—Cattle, 2,724; sheep, 7,186; calves, 152; pigs, 113.

Shrewsbury, Tuesday.—Fairly good trade all round, with larger supplies of cattle and pigs. Quotations:—Beef, 6d to 7¼d; mutton, 6½d to 8¼d; and veal, 7d to 8¼d per lb. Porket pigs, 9s to 10s 6d; and bacons, 8s to 9s per score. Cows, with calves, up to £22 10s. Hay, up to £3 10s; and straw, up to £2 per ton. Numbers offered:—824 cattle, 53 cows with calves, 2,087 sheep and lambs, 93 calves, 70 fat, 139 porket, and 438 store pigs.

Spalding Tuesday.—A very small show of beasts, and good trade, the best making 8s per stone; cow beef, 7s 6d. Stores sold well at late rates, and cows were dear. In the sheep market there was a small show, and late prices were well maintained. Lincoln mutton made 8d, and half-bred up to 8½d per lb.

Stockton, Wednesday.—There were on offer 235 cattle, 655 sheep, and 50 lambs. As compared with last week there was a poor show of best cattle, which met only a slow trade at 7s 6d to 8s per stone; rougher kinds, 6s 6d to 7s per stone; young sheep and lambs, 8d; ewes, 6d; tups, 4d to 5d per lb.

Taunton, Saturday.—Short supply. Small attendance. Rather dull trade.

Thame, Tuesday.—There was a good supply of stock at market except mutton, which came sparingly to hand. Trade all round showed a marked improvement upon late markets, and with a large attendance of buyers a clearance was effected with few exceptions. Mr. Bond's sale comprised 103 fat beasts, and a few stores; 160 fat sheep, 118 fat and weaning calves, 168 fat and store pigs, and 4 horses and colts. Fat bullocks made £16 to £18 2s 6d; fat heifers, £14 to £20 2s 6d; yearling stirks, £7 to £9 5s; fat wethers, 44s to 56s; fat ewes, 35s to 51s fat lambs, 29s to 38s 6d; fat calves, £3 10s to £4 15s; cow calves, 24s to 60s; bull calves, 14s to 51s; fat pigs, 9s 6d per score; porkets, 10s; stores made late prices.

Wakefield, Wednesday.—About an average supply of beef, which met a low trade at prices varying from 5d to 6¼d per lb. Better show of mutton, but the demand was below the supply. Choice small sheep made 8d per lb; inferior, 7d to 7¼d; and ewes and tups, 5½d to 6d. Numbers penned:—Beasts, 1,554; sheep, 2,976.

Wolverhampton, Wednesday.—Beasts: A good supply, very slow trade. Sheep: Fair supply, slow trade. Calves: Small supply, fair demand. Milch cows: Short supply, good demand. Beef 5¾d to 7d, mutton 6¼d to 8¼d, veal 6¾d to 8d.

Worcester, Saturday.—Good supply of cattle and sheep, and a good trade was done at late rates. Fewer calves offered and more demand. Pigs, large entry and better trade. Beef, best, 6½d to 7d; inferior, 5¾d to 6d; wether mutton, 7d to 8d; ewes, 5½d to 6¼d; and veal, 7d to 8d per lb; pork, pigs, 9s; and bacons, 10s per score.

Worksop, Wednesday.—A short supply of good beasts and sheep owing no doubt to the farmers bringing them up to finish; also a less supply of pigs and a slower trade. Best beef realised up to 8s per stone; secondary, 7s to 7s 6d; best mutton, 8d to 9d per lb; ewes and other sorts 4d to 6d per stone; veal, 9d per lb.

York, Thursday.—Fat beasts, 7s 9d to 8s per stone; fat sheep, best, 8d to 8¼d; secondary, 7d to 7¾d. ewes, 5d to 6d; lambs, 9d per lb; pork pigs 6s 6d to 7s per stone. Another large offer of both English and Irish store cattle, and buyers fairly numerous. Owing to the high rates asked, trade was slow and dragging. The chief demand was for two year-old heifers, which made £10 to £12 15s each; three-year-olds, to £16; stirks, £6 to £9 10s. Principal buyers were from the south. Fair supply of calving and milch cows, and steady trade; best to £23 each; ordinary, £14 to £18 10s each. This was the last of the big ewe fairs of the season. There was a fair show of all classes of sheep, which met with a slow demand at barely last week's rates. North country ewes, 30s to 46s; north country shearlings, 38s to 44s; north country lambs, 26s to 33s; twice crossed sheep, up to 48s. Masham shearlings, 38s to 44s; Masham lambs, 18s to 24s; twice crossed lambs, 26s to 31s; cheviot ewes, 22s to 28s; south country ewes, 32s to 40s each.

York, Friday.—Calves, 7½d ; small sheep, 8d ; large ditto, 7½d ; ewes, 6d per lb. Small pork pigs, 6s 9d to 7s ; large ditto 6s 6d per stone.

FOREIGN.

Deptford, Wednesday.—Beast entries totalled 980 head, being an increase of 257 as compared with last Wednesday's figures, and comprised 897 United States and 83 Canadian. Trade was of a very slow character at 4s 1d to 4s 4d, exceptionally 4s 5d, for the former, and 3s 8d to 3s 9d per 8lb to sink the offal for the latter.

Yorkhill, Tuesday.—At the sale of Canadian cattle there were penned in the sheds 414 cattle, landed by the Ontarian (s), from Montreal. Bullocks, as regards quality, were below the average, and were very rough in finish. Only a few of them were prime beasts. The consignment consisted for the most part of ranch cattle. There was a good attendance of buyers, both town and country being well represented. The dead-weight quotations were as follows :—Best bullocks, medium weights, 56s per cwt, and for really choice up to 58s ; second-ary and plainer, 54s to 56s ; best ranchers, up to 54s ; very rough cattle, 48s to 52s ; and bulls, 46s to 50s, according to quality and finish.

WOOL.

London, Monday.—This evening's auctions totalled 11,961 being the joint offerings of two catalogues, and comprised 5,702 New South Wales and Queensland, 1,374 Victorian, 74 South Australian, 565 West Australian, 572 Tasmanian, 2,534 New Zealand, 89 Cape, and 61 Buenos Ayres. A good attendance of buyers was present, and competition ruled brisk, there being no variation in prices, however, from those current recently. Queensland—greasy combing, marked L.D.N., sold 9d to 9½d ; ditto Bowen Downs, 8d ; scoured combing, McW over Rodney Downs, 1s 3½d to 1s 5d ; pieces, 1s 2d to 1s 3½d ; ditto Clavertor. Downs, 1s 2½d to 1s 5½d. New South Wales—scoured combing T.E. and Co. over B in circle, 11d to 1s 2d. New Zealand—greasy Lincoln flat point, 6d to 7½d ; scoured combing, J. Walsh, Botany in heart, 1s 2d to 1s 3d.

London, Tuesday.—At auction this evening two catalogues were brought forward, and together amounted to 13,500 bales, being made up as follows:—2,170 New South Wales and Queens-land, 1,395 Victorian, 740 South Australian, 197 West Austra-lian, 104 Tasmanian, 6,421 New Zealand, 199 Cape and Natal, 2,532 Punta Arenas, and 732 Falkland Islands. Good competi-tion was experienced from a full attendance of buyers, and prices ruled firm at fully the recent level for all descriptions. New South Wales and Queensland—greasy combing, marked J. G. Gringelong, 7d to 7¾d ; pieces, 5d ; bellies, 5d. New Zea-land—greasy combing, two hearts, 6¼d to 8d ; clothing, 6½d to 7¼d ; combing, Dalethorpe, 8d to 8½d. South Australian—scoured combing, H.H. over Cadelgo, 1s to 1s 2d ; pieces, 1s 0½d bellies, 11d.

London, Wednesday.—At auction this evening, Messrs. Charles Balme and Co. brought forward the total of 11,788 bales, comprising 5,141 New South Wales and Queensland, 779 Victorian, 288 South Australian, 3,526 New Zealand, and 2,074 Cape and Natal. A good attendance of buyers was present, and competition ruled keen for desirable parcels. The better sorts of merino and crossbred realised firm prices, but the former of poor quality denoted irregularity. New South Wales scoured combing, marked T. E, and Co. over B in circle, sold 1s 1½d. Queensland—greasy combing Peak Downs, 8d to 9d ; broken, 8d to 8¼d ; bellies, 6d to 6½d ; scoured combing, G. F. Bimerah, 1s 5d ; clothing, 1s 4d to 1s 5d ; necks, 1s 4d to 1s 4½d. New Zealand—Greasy combing Vesta, 5¾d to 7¼d.

London, Thursday.—Two catalogues were offered at public sale this evening, and totalled 13,470 bales, comprising 6,032 New South Wales and Queensland, 2,234 Victorian, 725 South Australian, 3,960 New Zealand, and 519 Cape and Natal. With a full attendance of buyers, good competition was ex-perienced, but merinos and fine crossbreds sold somewhat irregularly. Medium and the coarser grades of crossbreds sold with brisk biddings at fully late prices. New South Wales greasy combing, marked Wellington over Darling Downs, 8¾d to 9d ; clothing 9d ; ewes, B W G, 6½d to 7¼d ; scoured combing, A. Tobin and Sons over Wingadee, 1s 2½d to 1s 5½d ; lambs, 9½d to 11½d ; Victorian—greasy combing, M. M. and Co. over Burraliogie, 6½d to 7¼d ; fleece, 6¼d to 6¾d ; clothing, 6d to 6¾d. South Australian—greasy combing, Allen M'Farlaue, 6¼d to 7¼d ; pieces, 5d to 5¼d ; New Zealand—greasy combing, R W in diamond over Gore, 9d. Scoured combing Kaputone, 7¼d to 11½d ; pieces, 5¾d to 1s 1½d.

London, Friday.—Wool, English, per packet of 240 lb—Fleeces, Southdown hoggs, £8 to £11 10s ; half-bred hoggs, £7 to £8 10s ; ditto wethers, £6 10s to £8 ; Kent fleeces, £6 to £7 ; Southdown ewes and wethers, £8 to £11 10s ; Leicester ditto, £6 to £7. Colonial, per lb : Victorian, fleece, superior, 1s 4d to 1s 5d ; scoured good, 1s 5d to 1s 5½d ; scoured average, 1s 3d to 1s 4d ; greasy average to fair, 9d to 10d ; New South Wales, scoured average, 1s 1d to 1s 2d ; greasy average, 7d to 8d ; South Australian, greasy average, 5¾d to 6d ; New Zealand, scoured average, 1s 2d to 1s 3d ; greasy average, 7¾d to 8d ; Cape, scoured superior, 1s 3¾d to 1s 4½d ; fleece average, 6¾d to 7½d ; greasy average, 5d to 6d ; Natal, scoured, 1s to 1s 1d ; greasy average, 6d to 6¼d. Crossbreds, greasy, Victorian, good to superior, 9d to 10d ; New Zealand, fine, 8¾d to 9½d ; ditto medium, 7d to 7¾d ; ditto coarse, 5¾d to 6¾d.

London, Saturday.—At auction this afternoon Messrs. Du Croz, Doxat, and Co. offered the total of 10,101 bales, comprising 3,931 New South Wales and Queensland, 1,234 Victorian, 15 South Australian, 375 West Australian, 979 Tasmanian, 2,211 New Zealand, 95 Cape and Natal, 1,161 Falkland Islands and Punta Arenas. The attendance of buyers was on a good scale, and competition ruled fair, prices being steady.

Bradford, Thursday.—The tone is unchanged. There is scarcely any business doing in wool, and prices are not im-proved. Bradford remains the cheapest market for the raw material. In the yarn trade, too, there are no encouraging features. Orders from abroad are at prices which spinners will not accept, and little is doing for home trade. In piece trade it is very difficult to keep looms going profitably.

Canterbury, Saturday.— Staplers report a very poor demand for English wool, and do not seem at all anxious for business, even at the low rates now ruling. Kent fleeces 6d, and lamb's wool at from 4d to 5d per lb ; half-breds, 7d ; downs, 8d to 10d ; and locks from 2d to 2½d per lb.

FEEDING STUFFS.

London, Thursday.—Linseed.—Prices have improved con-siderably owing to sellers of American, Azoff and Black Sea seed buying back what they had sold. Calcutta London spot and near, 42s ; October-November, 41s 9d paid ; November-December, 42s ; April-June, 43s 6d. buyers. Hull firm. Calcutta April-June, 51s. Azov, Black Sea, September-October, 38s ; October-November, 37s buyers. La Plata, December-January, 53s 6d ; January-February, 53s. To the Continent Bombay is quoted March-May, 53s 6d. Calcutta, March-April, 52s 6d ; April-June, new crop, 51s 3d. La Plata December-January, 53s 6d. January-February, 53s. Duluth, October-November, sold at 57s 3d to cancel. Linseed cakes continue firm. London made, £8 10s to £8 12s 6d. Russian, £8 to £8 5s ex dock. American Westerns at £7 17s 6d to £8. Cotton cakes firm. London made, £5 2s 6d to £5 5s ; Egyptian, £5 to £5 1s 3d. Rapeseed is firm, but slow. Brown Calcutta to London April-June, 41s 6d. To the Continent we quote : Yellow Guzerat, March-May, 47s 3d. Yellow Cawnpore, March-May, 46s. Brown Cawnpore, November-December, 47s 9d buyers, March-May, 42s 9d, brown Calcutta, October-November, 46s ; April-June, 42s. Ravison to Hull, shipping or shipped, 34s. Cottonseed has had a smart decline chiefly owing to rumours of a projected strike amongst the mill hands in Hull. At the close, however, there is a little more demand and prices have somewhat recovered from the lowest point touched. Warehouse seed, £7 7s 6d. First half, October, £7 2s 6d sellers' ; October, £7 ; November-January, £6 15s accepted. Hull spot, £7 10s, and pas-sage, £7 7s 6d to £7, according to position. October, £6 17s 6d ; November-January, £6 15s. Cargoes, November £7 2s 6d ; December, £7 1s 3d.—THE PRODUCE BROKERS COMPANY, LIMITED.

Mark Lane, Monday.—Linseed Cakes: With only a limited quantity available on spot, and continued small sup-plies, values are quite as dear, at the same time the present ruling high prices check the demand. Russians are still offered at last week's prices. Americans come along slowly, and in some instances a slight advance is asked, especially for near parcels, which are now held at 2s. 6d. per ton ad-vance. English remain in small production, and crushers ask full prices of last week. Cotton Cakes : The demand is small, even for the time of year, but with limited stocks and no pressure to sell, values are without change. Egyptians and London made move off quietly, and are unchanged. Decorti-cated do not offer on spot, but for November shipment £6 15s. would be accepted with meal offering at £6 12s. 6d. in same position. Maize germ meal is again the turn lower in conse-quence of some heavy arrivals, with American offering at 3s. 9d. per ton under last week's price. Rice meal : Landed parcels are firmly held, but some quantity ex ship in near positions has changed hands at 2s. 6d. per ton less money.

—PINNOCK BROS., Mark Lane.

Hull, Tuesday.—To-day the wheat trade rules very dull. Foreign is offered at 6d per qr reduction on the week, without attracting buyers. English meets a slow sale at 6d to 1s per qr under last week's prices. Barley meets a steady demand for best samples, at fall prices ; grinding unaltered from last week. Oats support late rates. Beans remain quite as dear. Flat maize in less supply at 3d per qr dearer ; round sorts un-altered. Linseed.—The arrivals are 75 qrs from Archangel, 60 qr Harlingen, 7,494 qrs Patersburg ; total, 7,629 qrs Linseed con-tinues to harden, and prices have advanced steadily ; first-hand shippers scarcely offer at the moment. Calcutta not offered to Hull, London value about 61s. Black Sea Sept.-Oct. and Oct.-Nov., 57s, nearest value. Petersburg afloat and prompt, 55s. Riga, 54s the quotation. American, 57s reported paid. River Plate, 53s quoted, Dec.-Jan. re-sellers at about 52s 9d, first half Feb., 52s 3d, all Feb., 51s 9d. Cottonseed.—The market has been a declining one all the week, and business most re-stricted, particularly in near positions. Spot, is now, sellers at £7 10s, and by steamers on the way due next week, £7 2s 6d would buy. All October has fallen to £6 17s 6d, and business done Nov.-Jan., also Feb-March, at down to £6 11s 3d, but to-day these months are rather steadier, and £6 12s 6d paid, which still obtainable. Oil seed cakes.—Linseed cakes are 2s 6d per ton dearer. Cotton cakes steady. Hemp, quiet, un-unchanged.—KEIGHLEY MANSTED AND CO.

WATERLOO ROUND FEEDING CAKES, £6 15s 0d PER TON ; WATERLOO ROUND 97 PER CENT. PURE LINSEED CAKES, £9 7s 6d PER TON ; WATERLOO ANGLO SHAPE 97 PER CENT. PURE LINSEED CAKES, £9 5s. 0d. PER TON ; WATERLOO 97 PER CENT. PURE EGYPTIAN COTTONSEED CAKES, £5 17s 6d PER TON. ALL F.O.R. HULL.

HAY AND STRAW.

Whitechapel, Saturday.—Trade ruled steady: Best clover, 85s to 100s ; inferior ditto, 80s to 85s ; specially picked hay, 92s 6d ; good ditto, 80s to 87s 6d ; inferior ditto, 50s to 60s ; mixture and sainfoin, 70s to 90s ; and straw, 25s to 30s per load.

Bristol, Tuesday.—New hay, 60s to 70s ; old clover hay, 75s to 80s ; old meadow hay, 70s to 75s ; straw, 45s to 50s.

Leeds, Tuesday.—The activity in the warehouses for hay and straw is fully maintained, prices still being firm. Quotations :—Meadow hay, 6½d to 7d ; clover, 7d to 7½d ; wheat straw, 5½d ; oat straw, 5d ; rye straw (retail), 7d per stone.

FOREIGN HAY AND STRAW.

London, Saturday.—This week has been again very dull, and little passing. Continental shippers are becoming a little more reasonable, which will bring them in line with our mar-ket, though at present the demand is very small. We quote—Canadian Timothy, clover mixture, 85s ; Dutch, first cut clover, 90s to 92s 6d ; Dutch and French, second cut clover, 92s 6d to 95s ; good Dutch hay, 72s 6d to 75s ; common ditto, 65s ; large bale French wheat straw, 46s 6d ; small ditto, ditto, 43s ; small ditto, French oat straw, 43s. All these prices are per ton, delivered by barge alongside.—FULLER AND PRENTIS.

HOPS.

Canterbury, Saturday.—A large business done during the past week, principally in copper hops, at from £3 to £5 per cwt. In view of the smallness of the crop the market is very firm, and prices are deemed sufficiently high to induce many planters to offer their produce at present. One large growth has been sold at £7 per cwt all round Choice selected parcels are making £7 7s

Worcester, Saturday.—Trade has been much more active this week, and the bulk of the 1900 crop has already been cleared off the market, with the result that there was a con-siderably diminished attendance of planters at market to-day There was a brisk demand for all useful qualities, which sold readily at last week's full rates, and occasionally realised a few shillings advance. Choice samples were held for more money

Worcester, Saturday.—The planters at market to-day were somewhat carried away by the recent advance, and though the holders of really choice hops may be justified, the bulk of the lots are not of this quality, and brewers will not readily take to them at anything like the prices asked. The highest values offering are undoubtedly the best value, and poorer samples are quite neglected. A word should be said for the splendid yearlings which can now be secured on tempting terms. 119 pockets have passed the pitches to-day and 3,172 during the week, making a total of 11,006 pockets up to date.—PIERCY AND CO.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—A [illegible] stalls are [illegible] prices [illegible] were in [illegible] roots, 2s 6d to 3s per cwt ; carrots, 1s 6d to 2s 3d ; turnips, 2s to 3s ; parsley, 1s 6d per dozen bunches ; [illegible] bundles ; celery [illegible] Egyptian [illegible] 5d per case ; Valencia [illegible] Canaries, 10s to 12s per case ; Madeira [illegible] 20s to 22s per box ; French grapes [illegible] Almeria [illegible] English pears, 2s 6d to 4s per bushel ; Californian, 7s to 8s per case ; Normandy [illegible] 1s 3d each ; Valencia [illegible] each ; bananas, 5s to 6s per bunch ; pineapples, 4s to 6s per case ; English walnuts, 4s to 5s per peck. Cobnuts, 12s per bag

POTATOES.

Borough and Spitalfields, Saturday.—Arrivals this morning have been moderate, and the whole trade has been brisk and prices firm. English Beauty of Hebron, 3s 6d to 4s ; Early Puritans, 3s 6d to 4s ; Snowdrops, 3s 6d to 4s ; Reading Giants, 3s 3d to 4s ; Professor Maerkers, 3s to 3s 9d ; Up-to-Dates, 3s 6d to 4s 6d per cwt

MANURES.

Liverpool, Friday.—For basic slag the demand has been very moderate, and the following are the current rates :—Two cargoes at the principal depots :—Some slight inquiry has been experienced for kainit, but other fertilisers in quiet. Feeding stuffs are firm at previous rates, notwithstanding there is a good inclination on behalf of consumers to operate. Nitrate of soda, best quality, 14s guaranteed 95 per cent., paid ; ammonia £28 5s to £28 7s 6d per ton. East India bone meal, in bags, £4 7s 6d to £4 10s per ton ; kainit, prime 23 per cent., in bags, £2 7s 6d to £2 10s per ton ; linseed cake, American thin oblong, prime, in bags, £7 15s to £8 per ton ; ditto, English, prime, in bulk, £8 15s to £9 per ton ; ditto, round, prime, soft and oily, in bags, £8 7s 6d to £8 12s 6d per ton ; cottonseed cake, N.A., decorticated, prime, in bags, £6 17s 6d to £7 per ton ; ditto, English ditto, prime, very soft, in bags, £7 7s 6d to £7 12s 6d per ton ; ditto, English, undecorticated, prime, in bulk, £5 5s to £5 10s per ton ; cottonseed (crushed), 20 to 25 per cent. oil, prime, in bags, £7 7s 6d to £7 10s per ton ; maize germ meal, English, prime, £5 5s to £5 10s per ton ; rice meal, Rangoon, as imported, in bags, £4 15s to £4 17s 6d per ton ; Indian meal, coarse to fine grinding, prime, in bulk, £2 12s 6d per 240lb ; linseed fine bold feeding, in bags, £3 3s to £3 5s per qr, 41 lbs ; N A cloverseed, new red, fair to good, in bags, per cwt ; D N S brand, superphosphate of lime, guaranteed, 25 to 27 sol., in bags, per ton ; ditto, ditto 35 to 38 sol., in bags, per ton nominal ; basic slag, prime quality, guaranteed, 35 to 36 per cent. phos., in bags, £1 11s to £1 12s 6d per ton ; ditto, ditto, 35 to 40 phos., in bags, £1 13s 6d to £1 14s 6d per ton ; ditto, finest quality, guaranteed, 38 to 45 phos., in bags, £1 16s to £1 17s 6d per ton, at the producing depots.—H. JONES LANGAR AND CO.

Winsford (Cheshire), Saturday.— Current prices for salt at the works :—Common white salt, 11s per ton ; fine screened rock salt, 8s 6d per ton ; for truck loads in bulk.—THE SALT UNION, LTD.

Agricultural Imports.

The following is an account showing the quan-tities of certain kinds of agricultural produce imported into the United Kingdom in the week ended October 13, 1900, together with the quan-tities imported in the corresponding week of the previous year :—

Flax Mills destroyed by Fire.—At Kilkel, County Down, on Wednesday, the flax mills belonging to Mr Robert Forsythe, a Liverpool merchant, were entirely consumed by fire and burnt down. A large quantity of flax owned by the farmers in the district was destroyed. A claim for £550 has been lodged in Newry [illegible]

LIVE STOCK.

OUR ILLUSTRATIONS.

The Shorthorn cow Granny, who belongs to and was bred by Mrs. Bonest, of Manor Farm, Mentmore, Leighton Buzzard, was exhibited at the recent Dairy Show in the class for non-pedigree Shorthorn cows, but was not noticed by the judges. In the milking trials, however, she gained the highest number of points—144.1—in her class, and took the first prize and the Lord Mayor's Cup; whilst in the Shorthorn butter test she won the second prize and bronze medal with a total of 42.75 points. Granny is nine years old, and last calved on September 6th.

The Lincoln Red Shorthorn bull, Royal Burton 1996, the winner of the first prize in the class for bulls of any other pure breed than Shorthorn and Jersey at the Dairy Show, is the property of, and was bred by, Mr. John Evens, Burton, Lincoln. Royal Burton's sire was Knight of Chewton 68867, and his dam Dairymaid 2nd by Professor 200.

STOCK AND SHOW NOTES

By Herdsman.

In view of the continuance of outbreaks of foot-and-mouth disease in Great Britain, and the consequent danger of the introduction of the infection into Ireland, the regulations of the Department of Agriculture and Technical Instruction for Ireland prohibiting the importation of all live stock liable to the disease still continue in force. It is thought advisable to bring this information to the notice of parties interested, as difficulties have arisen from ignorance of or inadvertence to the terms of the regulations.

The twenty-fourth annual Christmas show of fat cattle, sheep, pigs, farm produce, etc., of the Norfolk and Norwich Agricultural Association will be held at the Agricultural Hall, Norwich, on November 22nd, 23rd, and 24th. About £700 will be offered in prizes. This sum includes, in addition to the usual prizes, several butter prizes for tenant farmers farming under 100 acres, and not being members of the Association, and garden produce prizes for cottagers and holders of allotments not exceeding thirty roods. The Technical Education Committee of the Norfolk County Council offer several specials for dairy produce exhibited by students who have attended a course of dairy lectures under the auspices of the County Council. October 27th is the last day of entry. Forms, prize lists, etc., may be had of the secretary, Mr. Caleb Barker, East Harling, Thetford.

The foreign demand for our pure-bred pigs still continues, late as is the season. On Wednesday last a quartette of Large White Yorkshires from the herd of Mr. Sanders Spencer, of Holywell Manor, near St. Ives, Hunts, were shipped from London. These pigs were purchased by the owner of one of the best herds of pigs in Belgium, Baron Peers, of Oostcamp, who has had several of Mr. Spencer's pigs on former occasions.

It is stated, on the authority of one of the United States live stock inspectors, that there are more sick pigs arriving in New York for the time of year than at any time within his recollection. Numbers are being condemned.

The Council of the Doncaster Agricultural Society have fixed Wednesday and Thursday, July 3rd and 4th, 1901, as the date of the Society's next exhibition. Mr. George Chafer, the secretary, asks other secretaries to please note this date.

Some weeks ago (the *Scottish Farmer* informs us) three Japanese gentlemen visited the famous herd of Ayrshire cattle at Southwick belonging to Sir Mark J. M'Taggart Stewart, and had some important dealings with the courteous manager of the Home Farm, Mr. Boyd. They purchased no fewer than fifteen females, including a noted prize-winning four-year-old and an equally famous showyard three-year-old. They seemed, however, to have had particular fancy for the two-year-olds, and out of a grand lot of twenty-five they selected a dozen. These included the second and third Royal winners of this year, sired by Queen's Messenger, a bull hired from Mr. Leonard Pilkington. Another was got by Yellow Bob, for which Sir Mark paid £73 as a yearling, while yet another was by the celebrated First Choice, the champion bull of his day, and still an excellent stock-getter, as several of his sons fetched high prices this year. Seven of the lot were by Prince Knockdon, a bull which fetched £83 as a yearling. After an inspection of the yearlings, they picked out a get of Zerooma of Monkland, and half-sister to the champion yearling bull sold by Mr. Boyd to the Japanese Government agents some time ago.

A special sale of pedigree Shire mares, fillies, foals, and geldings will be held by Messrs. Sexton, Grimwade, and Beck at their Repository, Peterborough, on Friday next. A little over a hundred animals will be offered, and they are from the studs of various well-known breeders in all parts of the country. The proceedings will commence at 12.30 sharp.

Mrs. Bonest's Shorthorn Cow, "Granny," Winner of the Lord Mayor's Cup in the Milking Trials, Dairy Show, 1900.

Thorne October Fair.—This fair, held on Tuesday, was poorly stocked, and the quality was rarely first rate. Young stock made £7 upwards, in-calf heifers £10 to £14, and big cattle for feeding £12 to £14. Sheep were not numerous, and the main trade was in small Cheviots, for which 14s. was given. £25 was asked for agricultural foals, but for nag foals there was practically no trade. For farm horses £30 was the top price.

Bakewell October Fair.—This fair was held on Monday, when there was a very large supply of cattle and sheep, but only a few horses and pigs. Many of the cattle were of superior quality, and a brisk business was transacted, though some remained unsold. Superior in-calf and milk giving cows realised from £17 to £21 per head. Second and inferior qualities, including lying-off cows, from £15 to about £17; good in-calf heifers (at hand), from £16 to £17 10s.; inferior qualities, from £14 to £15 15s.; barren cows, from £10 to £15; superior half-meated grazing beasts, from £12 to £16; stirks and steers, from £8 to £11 each; two to three-year-old bulls from £8 to £14 each; yearling calves, £4 to £6 per head; young calves (cows), from £1 to 1 15s. each; ditto (bulls), from 17s. to 28s. each; best heifer beef made from 7s. 6d. to 8s. per stone; inferior and bulls from 6s. to 7s. 3d. per stone. The sheep fair was glutted. Good store ewes realised from 37s. to 44s. each; store wethers, from 36s. to 42s. each; best wether mutton, from 8½d. to 9d. per lb.; fat ewes from 7½d. to 8d. per lb.; hoggs, from 30s. to 34s. each. The pig trade appeared active; young stores realised from 25s. to 40s. each.

CATTLE.

The Age of a Prize Bull.

Prosecution at Birmingham.

A case of considerable interest to breeders and exhibitors of cattle occupied the attention of Messrs. W. N. Fisher and G. Tangye at the Victoria Courts, Birmingham, on Friday. It was a charge against Joseph Gowling, farmer, of Radford, Leamington, of having falsely and fraudulently pretended to William Henry Lythall, secretary of the Birmingham Agricultural Exhibition Society, that a bull known as Cock of the North II. had been born on September 13, 1898, by means of which false representation he obtained a prize of £20.

The case, said Mr. McCardie, for the prosecution, was the first of its kind in Birmingham, and, so far as he knew, in the United Kingdom. The prosecutors, the Birmingham Agricultural Exhibition Society, had brought the prosecution, not for any pecuniary gain, but for the purpose of purging exhibitions of cattle and other agricultural exhibitions of a system of false pretences which they had reason to suspect had been committed from time to time. In March of the present year a show was held under the auspices of the society in Bingley Hall, Birmingham, and it was then that Gowling was guilty of the alleged false pretence.

Mr. McCardie stated the facts leading up to that date. On July 23rd, 1898, the bull calf, which was called Cock of the North II., was born on the farm of Messrs. Taylor and Walton, breeders of cattle in Westmoreland. The date of the birth was entered in the Herd Book. On October 7th, 1898, a sale of cattle was held, and Mr. Gowling bought the calf. Of course, said counsel, if in exhibiting an animal he could get it entered in a younger class it would stand a better chance of winning a prize. He commenced the scheme of changing the animal's age in February, 1899. On the 8th of that month he filled up an entry form and sent it to the secretary of the Shorthorn Society of Great Britain and Ireland. The date of the animal's birth was there entered as August 23rd, 1898. This deducted a month from its age, and enabled the owner to enter it in classes he would not otherwise have been able to compete in. On January 29th of the present year, when the Birmingham Show for March was being advertised, he again altered the age of the animal, giving the date of birth as September 13th, 1898, adding a footnote in the letter to the effect that he had been informed that that was the date. The bull, which competed with younger animals, was awarded the first prize of £20. On March 8th it was sold as a first prize winner for 260gs.

Subsequently a communication from Mr. S. H. Allen, the second prize winner, caused Mr. Lythall to make enquiries, with the result that in May he wrote to Gowling stating that the bull's age had been questioned by Mr. Allen, who had brought the matter before the Council of the Shorthorn Society. To this Gowling replied that there had been several letters between him and the secretary of the Shorthorn Society. He admitted there was a mistake somewhere, but he could not find out where, as he lost the catalogue. It was his son who got information respecting the age of the animal, and he said that the calf was not more than three weeks or a month old when

he got home. There was also a paragraph in a Westmoreland paper to the effect, and he had been trying for some time to find out whether this was correct. He further said he was sorry for the mistake, which was never intended. He was quite willing to return the prize-money, and would take care that nothing of the kind ever happened again. He accordingly returned £20. After the winning of the prize a paragraph appeared in a Westmoreland paper, which described the sale of the animal for 260gs. for America, and added: "Mr. Gowling is teaching the Warwickshire gentlemen what a hard-working Westmoreland farmer is like."

Evidence bearing out this statement was then called.

Mr. Powell, the secretary of the Shorthorn Society, produced the Herd Book, with the entry of the birth of this animal on July 23rd, 1898. The auctioneer who sold it stated that no one who had any knowledge of cattle could have mistaken this for a three-weeks-old calf.

The accused pleaded guilty.

He was committed to the Quarter Sessions for trial, bail being allowed.

Mr. McCardie mentioned that since the case opened he had ascertained that there was a similar prosecution in the country in 1879.

Mr. T. Cross was for the defence, which was reserved.

Defendant was also committed on a charge of obtaining a cheque for 260gs. (the price received for the bull) by false pretences.

Shorthorn Sale at York.

On Tuesday Messrs. J. Thornton and Co. held a sale of pure-bred Shorthorn cattle at the wool sheds in the Cattle Market, York. The catalogue comprised the small entire herd belonging to the late Mr. William Wright, of Wollaton, Nottingham, a large portion of Colonel Brocklehurst's herd removed from Ranksborough, Oakham, and a number of young bulls bred by Lord Armstrong, Sir John Swinburne, and others. There was a large attendance of buyers. The highest price realised by the females was 60gs., given by Lord Middleton for Bride Elect, the property of the late Mr. William Wright. The top figure realised by the bulls was 71gs., which was paid by Mr. Jessop for Sir John Swinburne's twelve month old calf Grand Earl of Waterloo 25th, a youngster full of promise. A number of pure-bred Guernsey cows and heifers, the property of Mr. J. E. Ellis, of Scalby, were also sold, and realised prices ranging from 7½gs. to 23gs. The latter price was given by Mr. Parr for Mayworth, a two-year-old by St. Simon.

The principal prices obtained for the Shorthorns were as follows:—

	Gs.
COWS AND HEIFERS.	
Bridecake (the late Mr. W. Wright's), c 1891 Mr. Charles Williams	25

FIRST-CLASS representatives and agents required throughout the United Kingdom for the sale of "MOLASSINE."—Write for particulars to the "MOLASSINE" CO., LTD., 36, Mark Lane, London, E.C.—[ADVT.]

Sale of Major Oliver's Shorthorns.

The select herd of Shorthorns belonging to Major Oliver, of Hoselaw Mains, was sold by auction at Kelso on the 12th inst. by Messrs. Penny and Kay. The sale attracted a large number of buyers, and the prices obtained were fairly good, the calves meeting the best demand. The highest figure paid was 31gs., this being brought by the roan Music, by the Lambden-bred sire Red Knight. The purchaser was Mr. P. Henderson, Pow Farm, Rumbling Bridge. Madcap, another roan, by Captain Hope, sold at 27gs., to Mr. James Robertson, Morebattle Mains, who also got the red-and-white Maudlin, by the same sire, at 25gs. Faith, a very smart red cow, by Captain Hope, from Lady Linton, by Prince William, was secured by Lord Polwarth at 26gs.; and he also got Lady Priapus, a red-and-white, for 20gs. Mr. James Robertson bought Priscilla, a red-and-white, by Red Knight, at 25gs.; and he also got Lady Linton 3rd, by the same sire, at 14gs. Others sold up to 18gs., and calves sold to 18gs., at which figure Lord Polwarth bought the roan bull calf Sir Carl Carew. A cow belonging to Mr. G. Elliot, Steward, elicited spirited bidding, and sold at 36gs. to Mr. Henderson.

Sale of Shorthorns at Enniskillen.

A number of pure-bred Shorthorns from the herd of the Rev. John Hall, Garvary, Enniskillen, were sold by auction at the cattle depôt adjoining the Enniskillen Railway Station, on the 9th inst., and the sale, which was conducted by Mr. G. F. Graham, of Clones, proved a most satisfactory one. There was a large and representative attendance, local farmers being present in great force, and bidding throughout was brisk, outside breeders claiming nearly all the lots. The following is a list of the sales and purchasers:—

	Gs.
COWS AND HEIFERS	
Grand Ude VI., s Gilton Jubilee Mr. McClintock	14

Sussex Cattle Sale at Haywards Heath.

The annual autumn sale of pedigree Sussex cattle, held by Mr. T. Bannister, of Haywards Heath, took place on the 12th inst., when a well-filled catalogue of very choice stock was offered at the well-known sale yard. There was a large attendance, the best perhaps yet seen at this sale. Trade was also good, every animal being sold, and satisfactory prices were realised. Bulls ranged in prices from 24gs. to 15½gs., with an average of 20gs.; bull calves realising 19gs. down to 8gs., the average being about 12½gs. per head; whilst cows sold at 16½gs. to 8gs., with an average of 13½gs. The heifers brought in the highest price of the day, 32gs., given by Mr. S. A. Hermon, of Staplefield, for Birling Gentility, calved March, 1899, sire Midnight 1563, dam Golden Gentility 6432. The following were the animals sold, purchasers, etc.:—

Galloway Cattle Sales Association.

The fifth annual show and sale of pedigreed Galloway bred and other stock of the same breed under the auspices of the Galloway Cattle Sales Association, took place on a field adjoining Mr. Willet's new station most of Castle Douglas. There was a large attendance, the weather being favourable, but owing to the cattle restrictions in force the Irish contingent of buyers was absent, and it is believed that prices suffered somewhat in consequence. The entries were slightly in excess of last year, the increase being principally in the yearling class. The following were the awards:—

TWO-YEAR-OLD HEIFERS: 1. Mr. John Cowan, Durhamhill, Mrs. Ends III. of Durhamhill 13630, dam Follower 5042, dam Lass V. 13545; 2, Mr. W. M. Neilson of Queenshill; 2, Mr. James Wilson, Tundergarth Mains, Cherry II. of Tundergarth Mains 13[illegible], sire Walter 6550, dam Cherry of Tundergarth Mains 13[illegible], price £45—unsold; 3, Sir Robert Jardine, Bart., of Castlemilk, Lilac of Castlemilk 14091, sire Black Douglas of Castlemilk [illegible], dam Rebel II. of Torbeg 12413, sold at £35, to Mr. William Barbour, Troqueer, who, Messrs. J. and S. Nelson's Lord Hugh, Fancy Queen of Lairdhaugh 12926, sire Queen's Messenger 6558, dam Fancy VIII. of Lairdhaugh 14035—sold at £30 to Mr William Willet, Dromrash, he, Sir Robert Jardine, Bart., of Castlemilk, Maria of Comsnie 14[illegible], sire Hector of Knockbrex 6445, dam Primrose II. 11[illegible]—sold at £34 to Mr. Robert Crofts.

ONE-YEAR-OLDS: 1, Mr. C. Graham Horsfall, Arncliffe Hall, Arncliffe, Yorks, Lady Hazlehall 13649, sire The Pathfinder 3rd 8001, dam Lady Arncliffe Hazlehall 13024—sold at £21 to Messrs. M'Nee, Scroggiehall, Balmaclellan; 2, Mr. R. T. Scott, Drumhumphry, Cowslip 14th of Drumhumphry 15062, sire Cowslip IX. of Tarbreoch 5894, dam Cowslip 5th of Drumhumphry 13[illegible], sold at £19, to Mr. John Wilson, Plunton Mains, Borgue; 3, Mr. James Pender, Mutton Mains—Miss Ird, 15[illegible], sire Donegal 6761, dam Tidy Maid II. of Greenock 14276—sold at £17 10s. to Messrs. Biggar, Carpenham, who Mr. Hunter Gilchrist, Thornhill sold at £22 to Mr. John M'Ewen, Chilpark; c, Mr. J. S. Wilson, Plunton Mains, Borgue—sold at £17, to Mr. T. Graham, Dumfries.

Sale of the White House Herd of Black Polled Cattle.

The sale of the fine herd of Aberdeen-Angus cattle belonging to Mr. F. Crisp, D.L., J.P., attracted most of the southern breeders on Tuesday to White House, New Southgate, when Messrs. Macdonald, Fraser, and Co. offered this choice lot of animals for unreserved sale. The company was a rather small one, but prices were remunerative. Mr. R. W. Hudson bought the two champion prize-winners in the sale at 100gs. each, namely, Lady May of Advie, the champion at the Royal Counties, Essex, and Peterborough Shows this year, and the magnificent bull Governor of Abergeldie, bred by H.M. the Queen, who was the champion male at Winchester. Several of the best cows were purchased by Mr. W. Gale and Mr. E. Hesseldine for their herds in the Eastern Counties, whilst some choice lots were purchased by Mr. L. A. Macpherson to take into Staffordshire. The cows averaged nearly £43 each and the bulls £37 3s. 5d., which must be considered a satisfactory result.

The following is a list of the animals sold, together with purchasers' names, etc.:—

	Gs.

Sale of Easton Park Red Polls.

At Ipswich on Tuesday Messrs. Spurley and Sons sold by auction a number of red polled cattle from the herds belonging to the Duchess of Hamilton and the Trustees of the late Duke of Hamilton. The sale was held in the auctioneers' lower yard, and attracted a good representative company, who gave satisfactory prices for all the best animals. The young stock especially was shown in the pink of condition, and included some promising heifers and bulls, which will probably be heard of again. The entire entry was prominently noticeable for its choice quality, a characteristic for which the Easton Park herd has long been noted. Below are details of the principal lots sold:

The property of the trustees of the late Duke of Hamilton, K.T.

Carol, c April, 1896, s Minotaur ..... Mr. J. Hobbs 9½
Ethel, c December, 1897, s Minotaur ..... Mr. J. Hobbs 9½

Sale of Red Polls at Haverhill.

Thirty head of pure-bred Red Poll cattle belonging to the Hon. W. F. D. Smith, M.P., of Little Thurlow Hall, were brought under the hammer at Haverhill Auction Market on the 12th inst. by Mr. C. Boreham, who stated that the animals were sold owing to the herd having grown too large. Special care had been taken as to the milk yield of each cow in the herd, as was shown by the milk record printed in the catalogue. He stated that only in three instances had Mr. Smith exhibited at a show in each case he was successful. A Red Poll heifer bred from this herd, and exhibited by Mr. Duncan of York, took first prize in her class, and the Reserve Junior Championship at Smithfield Show, 1899; also in 1896, four young bulls were selected from this herd for Argentina; others were purchased for the same place in 1898, and a further batch left Little Thurlow on September 10th, this being the third consignment. There was a good attendance of buyers, and fair prices were realised, the following being the principal:—Troston Willow, c April, 1889, £12 12s.; Juno, c December, 1899, £15 4s. 6d.; Flirt II., c September, 1890, £16 16s.; Undine, c November, 1891, £13 2s. 6d.; Mabel, c April, 1896, £17 17s.; Frida, c April, 1897, £17 17s.; Friston, c May, 1897, £12 1s. 6d.; Lawens, c May, 1897, £14 3s. 6d.; Witch, c July, 1897, £15 4s. 6d.; Judy, c September, 1897, £21 10s.; Dandelion, c January, 1898, £18 18s.; Betsy, c January, 1898, £12 12s.; Rose, c February, 1898, £16 5s. 6d.; Sheilah, c February, 1898, £17 6s. 6d.; Hyacinth, c March, 1898, £13 2s. 6d.; Lily, c March, 1898, £10 10s.; Moyra, c June, 1898, £12 1s. 6d.; Alice, c July, 1898, £11 0s. 6d.; Bluebell, c December, 1898, £11 0s. 6d.; Ancienne, c February, 1899, £14 3s. 6d.; Brownie, c October, 1899, £9 9s.; Primula, c November, 1899, £7 7s.; Dudley (Red Polled bull), c December, 1898, £13 13s.

The chief purchasers were Messrs. C. S. Goodchild, J.P., R. P. Cooper (Frinton-on-Sea), Barrow (Colchester), W. H. Thomas, Goodjohn, Saville (Saffron Walden), J. T. Stockburn (Clare), E. C. Halls (Denham), John Frost (Wickhambrook), Cowling (Clare), D. K. Long (Great Bradley).

Sale of Mr. J. E. Platt's Red-Polls.

At Ipswich on Friday Messrs. Robert Bond and Sons disposed of almost the entire herd of Red-polled cattle belonging to Mr. James E. Platt, of Howbury Hall, Bedfordshire. Mr. Platt, it is necessary to state, has displayed a great interest in the breeding of Red-poll cattle, and it was owing to the sale of the estate in Cheshire, where he had been living, that he felt compelled to dispose of his herd, which included some of the best animals of the kind in the country. To his new place at Howbury, Mr. Platt has transferred a few exhibition animals and yearlings, and it is only for this small number that he has now accommodation. The herd was established from deep milking strains, and had frequently been replenished by purchases of the best specimens of the breed, one of the most recent additions being the bull Champion (5370), which was acquired at the sale of the late Mr. J. J. Colman's herd for the record price of 320gs. Mr. R. B. Bond, who conducted the sale on behalf of the firm, said before proceeding to dispose of the seventy-two animals named in the catalogue, that Mr. Platt had been one of the most successful exhibitors of Red-polls, having achieved exceptional successes in the showyard at the Royal, the London Dairy, and numerous county shows. The auctioneer emphasised the point that Mr. Platt and Lord Rothschild had accomplished more in the matter of promoting the breeding of Red-polls than other breeders. Mr. Platt had also been a consistent and generous supporter of agricultural shows for live stock, while he had heartily supported sales for the disposal of Red-polls.

There was a good company of buyers, not only from the three counties of Suffolk, Norfolk, and Essex, but from the Midlands and other parts of the country, and the bidding, which started well, soon became brisk. Of the seventy-two animals catalogued, there were thirty-four cows of deep milking strains, twenty-one choice heifers, thirteen bull and heifer calves, and four young bulls. The highest prices for cows were given by Mr. Garrett Taylor, of Trowse, who, curiously enough, bought the anima's he himself had bred some years ago. The first of these, Bud II., went for 75gs., and with the bull calf realised 91gs. in all, which was a lower figure than that which the animal was purchased for at the early part of this year, when Mr. Platt gave 115gs. The next best animal also went to Mr. Garrett Taylor, who gave 60gs. for Celia, and 11gs. for its calf. The thirty-three cows averaged £25 15s. apiece, the total amount being £23 3s. as an average price, or £463 2s. for the lot; the three bulls were sold on the average for £28 10s. 6d., or £85 11s. 6d. for all; while the twelve calves made on the average £8 apiece, or £96 in all. The total sum realised on the sale was £1,495 14s., which was very satisfactory, the prices being generally quite up to expectations. A detailed account of the principal prices is given below:

COWS.		Gs.
Gal II., c April, 1890	Mr. Garrett Taylor	32

Sale of Dutch Cattle at Walthamstow.

An important sale of Dutch cows, heifers, and bulls, took place on Monday at Green Pond Farm, Walthamstow, Essex, Messrs. Sexton, Grinwade, and Beck disposing of a number of animals belonging to Messrs. Rumbal and Son. These Dutch dairy cattle have been raised with special regard to their milking qualities, and although scarce in this country, are noted for their growing milk capacity. Amongst the pure-bred Dutch cows and three-year-old heifers, a fresh-calved black-and-white animal fetched 39½gs., and was bought by Mr. Girling. The other prices realised were as follows:—Dutch cows: Black-and-white (imported), Mr. Everard, 18½gs.; black-and-white, in full milk, Mr. Everard, 18gs.; ditto, Mr. Ransom, 20gs.; ditto, Mr. White, 25gs.; ditto, Mr. Martin, 18½gs.; ditto, Mr. Ratcliffe, 22½gs. Three-year-old heifers: Fresh-calved dun-and-white, Mr. Girling, 22gs.; ditto, Mr. Everard, 18½gs.; ditto, Mr. Everard, 23gs.; black-and-white (in-calf), Mr. Girling, 19gs.; dun-and-white (in-calf), Mr. Slater, 18gs.; black-and-white (in-calf), Mr. Slater, 19gs.; dun-and-white (in-calf), Mr. Martin, 19gs. Earl Egerton of Tatton bought for 14gs. a black-and-white two-year-old heifer, whilst Messrs. Slater and Woodiwiss gave 25gs. and 22gs. respectively for dun-and-white two-year-old heifers. The highest price given for cross-bred heifers was 17½gs., given by Mr. White for a four-year-old black-and-white (in-calf). Pure-bred yearling heifers realised good prices, Mr. Woodiwiss giving 15gs. for one animal, and 12gs. and 11½gs. for others. Amongst the pure-bred bulls was Zuidmeer II., a black-and-white, 2½ years old, which went to Mr. Gold for 22gs., a fifteen months' black-and-white was bought by Mr. Ransom at 23½gs., and another by Mr. Slater at 20½gs.

Transactions in Store Stock.

[*From the Irish Department of Agriculture and Technical Instruction.*]

There was a large fair at Midleton, co. Cork, on Monday, at which a good demand prevailed for well-bred cattle, whilst sheep sold well. Prices: Calves, first class, £4 15s. to £5; second class, £4 to £4 7s. 6d.; third class, £3 to £3 12s. 6d.; yearlings, first class, £7 10s. to £8; second class, £6 to £7 2s. 6d.; third class, £4 5s. to £5 15s.; two-year-olds, first class, £10 5s. to £11 15s.; second class, £8 10s. to £10; third class, £6 to £7 10s.; three-year-olds, first class, £14 to £16 2s. 6d.; springers, first class, £14 12s. 6d. to £16 5s.; second class, £12 to £13 15s.; third class, £9 15s. to £11; lambs, first class, £1 6s. to £1 10s.; second class, £1 to £1 4s.; third class, 17s. 6d. to 19s.; over twelve months and under twenty-four months old, first class, £1 17s. 6d. to £2 2s.; second class, £1 11s. to £1 15s. Young pigs eight to ten weeks old sold at from 20s. to 25s. each.

The fair at Strokestown, co. Roscommon, on Tuesday, was a moderate-sized one, but demand was slow, and a large number of young animals remained unsold. The small supply of sheep met a good demand. Prices:—Calves, first class, £2 15s. to £6 5s.; second class, £1 18s. 6d. to £4 18s. 6d. Yearlings, first class, £9 10s. to £10 10s.; second class, £7 to £8. Two-year-olds, first class, £13 10s. to £15 5s.; second class £8 15s. to £12 10s. Three-year-olds, first class, £16 to £16 5s.; second class, £12 10s. to £13 15s. Springers, first class, £18 to £21. Lambs, first class, £1 9s. to £1 12s.; second class, £1 4s. to £1 7s. Over twelve and under twenty-four months old, first class, £2 to £2 3s.; second class, £1 14s. to £1 17s. Young pigs, eight to ten weeks old, first class, sold at from 22s. to 25s.; second class, 15s. to 19s. each.

Tuam Fair, which took place on Tuesday, was smaller than usual, and the demand was very brisk, especially for young ewes suitable for breeding purposes and first-class wethers. A good clearance was effected. Prices:—Lambs, first class, £1 6s. to £1 7s. 6d.; second class, £1 to £1 5s.; third class, 14s. 6d. to 18s. Over twelve and under twenty-four months old, first class, £1 17s. to £1 19s.; second class, £1 12s. 6d. to £1 15s. 6d.; third class, £1 8s. 6d. Two years old and upwards, first class, £1 19s. to £2 16s.; second class, £1 14s. 6d. to £1 18s. 6d.; third class, £1 7s. 6d. to £1 10s.

There was a large fair at Lisnaskea, co. Fermanagh, on Wednesday, composed chiefly of calves, for which there was a good demand. Springers were plentiful,

but demand not so good. Prices:—Calves, first class, £5 5s. to £5 12s. 6d.; second class, £3 16s. 8d. to £4 15s.; third class, £2 15s. to £3 1s. 3d. Yearlings, first class, £7 10s. to £8; second class, £6 16s. to £7; third class, £5 to £5 2s. 6d. Two-year-olds, second class, £7 15s. to £8 15s. Springers, first class, £16 to £17 5s.; second class, £12 5s. to £14; third class, £9 to £10 10s.

HORSES.

Sale of Lord Llangattock's Shires.

The second triennial sale of Shire horses belonging to Lord Llangattock took place at Amberley Court, near Monmouth. The sale, which was unreserved, was conducted by Messrs. Sexton, Grimwade, and Beck, of Peterborough (Mr. Beck wielding the hammer), official auctioneers to the Shire Horse Society. Prior to the sale an open luncheon was served in a marquee to about a thousand persons, at the conclusion of which Lord Llangattock's health was proposed by Mr. Muntz, of Rugby. In doing so, Mr. Muntz referred to the high reputation of the stud, which was conferring inestimable benefits on horse-breeding generally. In reply, Lord Llangattock took occasion to transfer the whole of the credit which the stud had earned to Mr. F. Bonner Darling, M.R.C.S., who had had entire management in his hands since the commencement. The weather during the afternoon was dull, but fortunately the rain held off. There was a distinguished attendance present, and bidding throughout was brisk. The total proceeds of the sale was 9,484gs., or £9,958 4s., giving an average, excluding the thoroughbred, of £226 per horse, which constitutes a record for Shire horse sales.

Below we give details of the lots sold, purchasers, etc.:—

Sale of Seaham Harbour Clydesdales.

The Seaham Harbour Stud (Limited), who recently acquired the famous breeds of Clydesdales, Shetland ponies, etc., from the Marquis of Londonderry, have decided to continue the sales held by the noble Marquis, and the first took place on Tuesday, Mr. E. A. Crow, of Sunderland, being the auctioneer. There was a total of 261 Clydesdale foals, fillies, yearlings, two, three, and four year-olds, brood mares, and geldings, also nineteen Hackneys and ponies, and pony foals, and twenty-seven Shetland ponies. Many of the animals offered were either prize-winners or descended from prize stock, and were of the purest strains. The weather was most favourable, and there was a fairly good company at the ring during the progress of the sale. Previous to the business of the day commencing, luncheon was served, at which Mr. W. Murray, factor to the Duke of Montrose, presided, supported by Mr. R. Brydon, manager of the stud. The total sum realised was 3,915gs., the top figure being 320gs., obtained for a two-year-old Clydesdale colt named Pearl Oyster, by Knight of Corval. A pair of four-year-old geldings went at 205gs., and a two-year-old colt Dawdon Dene—realised 100gs. These were the only three-figure prices obtained for any of the animals. The Hackneys and ponies averaged 31gs., ranging from 14gs. to 50gs.; other Hackneys and ponies made up to 37gs. Shetland ponies fetched up to 20gs. Violent, four years old, believed to be the smallest Shetland pony of its age, was disposed of for 17gs. Below we give particulars of the principal lots in the order as they were sold.

Horse Shows and Sales at Carlisle.

About 300 horses were offered for sale at the two Carlisle marts on Wednesday. Messrs. Harrison sold 260 forward, and the following were the prize-winners and prices: Cart fillies, two years old: 1, Mr. Thomlinson, Jerriestown, 49gs.; 2, Mr. McInnes, Rickerby, 40gs.; 3, Mr. Graham, Keld House, 42gs. Yearling geldings and fillies: 1, Messrs. Richardson, Cumeatch, 37gs.; 2, Mr. Irving, Seafield, Annan, 32½gs.; 3, Mr. Watson, Stonefolds, 24gs. Three-seasoned cart horses made up to 60gs.

At Hetherington's second sale 130 were forward, and the following were the results:—Two-year-old cart fillies: 1, Mr. Davidson, Beaumont, 60gs.; 2, Mr. J. R. Beattie, bid to 37gs.; 3, Mr. T. Pattison, Dykesfield, bid to 47gs. Two-year-old cart fillies: 1, Mr. A. Pearson, Greenholme, 35gs.; 2, Mr. Forster, Hetherside, bid to 30gs.; 3, Mr. John Rickerby, Sandsfield, 31½gs. Foals: 1, Mr. Hind, The Nook, 19gs.; 2, Mr. W. Smith, Long Hirst, Low Row, 18gs.; 3, Mr. Frizell, Oughterby, bid to 18gs. Yearling geldings: 1, Mrs. Graham, Hunley, 32gs.; 2, Mr. R. Bell, Willow Hill, 25½gs.; 3, Mr. D. Beattie, Annan, 29gs.

Sale of Hopetoun and Earlshall Shetland Ponies.

A joint sale of Shetland ponies from two of the best studs in Scotland, took place at Hopetoun House on Thursday, when drafts of the Countess of Hopetoun's stud, and of Mr. R. W. R. Mackenzie's, of Earlshall, Leuchars, were disposed of. As regards the Hopetoun draft, the sale was necessitated by a reduction of the stock in view of the long absence of Lady Hopetoun in Australia; and the Earlshall consignment was sent to Hopetoun for convenience of sale. Both Hopetoun House and Leuchars have long been favourably known for the quality of their Shetland stock, and the animals presented for sale embraced some very pretty mares, fillies, foals, and stallions, which might well enhance the value of any stud. Several of the animals were prize-winners, and all were bred on reliable lines. The weather in the morning was dull and threatening, but there was no rain till near the end of the sale, and what little fell then did not materially inferfere with the comfort of the visitors, who attended to the number of about two hundred, representing breeders from all parts of the kingdom. There were twenty-four pedigree animals sold from Hopetoun, and twenty-two from the Earlshall Stud. Mr. Edward Moir, of Messrs. John Croall and Sons, was the auctioneer, and he got through his business very expeditiously.

Among the principal buyers was the representative of Lady Tichborne, who took some of the best animals to form a Shetland stud at her home in Surrey. Although there was nothing of an exciting nature in the sale, there was a general demand for serviceable ponies, and the foals were also in request at fairly good prices. The best of the Hopetoun lot was the old mare Thora, a beautiful little animal of fine breeding, and with a successful showyard career. She was sold at 37gs. to the Ladies Hope, who also purchased the next highest priced animal from the stud at 33gs. The latter was Princess, a mare bred by Lord Londonderry, and which was second at the Highland Society's Glasgow Show in 1888, first at Dumfries in 1895, first at the Royal Northern Show at Aberdeen in the same year. Mr. Mackenzie had the top price of the sale with his seven-year-old stallion Bonaparte, an animal of great power and substance, and which was first in an excellent class at Glasgow last year. He was secured by Lady Tichborne's representative at 40gs. The twenty-four ponies from Hopetoun realised £285 12s., and the twenty-two ponies from Earlshall brought £255 13s. 6d., the total proceeds of the sale of Shetland ponies being £541 5s. 6d. for forty-six animals.

Below we give particulars of the principal animals sold, purchasers, etc.:—

Sale of Coach and Posting Horses at Glasgow.

Mr. Edward Dicks' annual sale of coach and posting horses took place in the Horse Bazaar, Cattle Market, Glasgow, on the 12th inst. There were 220 animals catalogued, and they all showed well. There was a crowded ring of buyers forward from all parts, and trade was of a very satisfactory character. The ages of the animals ranged from four to twelve years, and they were from 12.2 to 17 hands high. Coaching horses and vanners were in the best demand, and realised high prices. Cobs met a fair selling trade. Coaching horses of the best class realised up to 60gs.; secondary, 20gs. to 38gs.; inferior 8gs. to 14gs.; best vanners, to 50gs.; secondary, 10gs. to 30gs.; inferior, down to 6gs.; best cobs, to 28gs.; and secondary and inferior, 4gs. to 16gs.

On Wednesday Mr. E. Dick had a catalogue of 130 animals, consisting principally of carriage and harness horses, while there were also a number suitable for van and cart purposes, cobs and Iceland ponies. The majority of the horses showed well, being of fair substance, suitable ages, and fashionable colours. There was a large attendance of buyers, and business was keen throughout. Carriage horses experienced the best demand. Cart horses and vanners were also in request, and realised satisfactory prices. Cobs and ponies had a fair selling trade. Carriage horses of the best class realised 40gs.; secondary, 10gs. to 18gs.; inferior, 6gs. to 9gs.; best cart horses, 18gs. to 32gs.; secondary and inferior, 4gs. to 12gs.; vanners, 4gs. to 28gs.; cobs, 4½gs. to 25gs.; ponies, 3gs. to 18gs.; all according to substance, style, and action.

Sale of Hunters at Leicester.

Among a large gathering who witnessed the dispersal of a very full catalogue of well-known hunters, at the Leicester Repository, on Saturday, were the Earl of Shaftesbury, General Sir William Gatacre, Sir Oswald Mosley, and Colonel Chaplin, V.C. The Earl of Shaftesbury's six hunters readily changed hands, the prices being: Kineton, 130gs.; Spatchcock, 175gs.; White Face, 105gs.; Honeycourt, 100gs.; Rugby, 140gs.; and Idlicote, 58gs. Of the late Mr. Wright's stud, Melton made 200gs., and Stokes 105gs. Mr. Hanson's Tempest went for 130gs., whilst Mr. Puckle's Westmeath realised 175gs.

SHEEP.

Sale of Blackfaces at Swaledale.

The annual sale of black-faced sheep, etc., held by Mr. Robert W. Robinson, in Swaledale, on the 14th inst., was very successful, there being between 1,000 to 1,200 for disposal. Black-faced ewes, 22s. to 26s.; gimmer lambs, 16s. 9d. to 18s. 6d.; shearling gimmers, 24s. 6d. to 32s. 6d.; lambs, from 10s. 6d.; Wensleydale tup lambs, £2 15s.; wether lambs, 7s. 9d.; half-bred lambs, 17s. each.

Leyburn Fair.

The show of all classes of sheep at the October fair at Leyburn, held on the 12th inst., was large, and the attendance was up to the average, but trade on the whole ruled slow. Half-bred gimmer lambs made 19s. to 26s., half-bred gimmer and wether lambs (mixed) 18s. to 21s., half-bred ewes 35s. to 43s., half-bred shearling gimmers 35s. to 40s., half-bred wethers 30s. to 35s., Wensleydale shearling tups £7 to £10, secondary ditto £4 to £6, Wensleydale aged tups £5 to £8, good bred ewes 45s. to 55s., good bred tup lambs £3 to £5, good bred gimmer lambs 35s. to 50s., and twice-crossed lambs 28s. to 33s. each.

Malton Michaelmas Fair.

As usual the second day of the above fair (the 12th inst.) was devoted mainly to sheep, of which there was a good show. Shearling gimmers for breeding purposes were dear, best making 50s. to 56s.; secondary, 45s. to 48s.; Leicester ewes to 58s., and crossbreds 40s. to 44s. each. There was a good lot of lambs, and a fair trade was done. Pure Leicesters made up to 40s., useful lots 30s. to 35s. per head; crossbreds, 25s. to 28s.; and north lambs, 22s. per head. Plenty of tups changed hands at £3 10s. to £8 per head; and ram lambs made £3 10s. and upwards.

Outbreak of Pink Eye.—A serious epidemic of pink eye has broken out among the horses at West Elliot colliery, New Tredegar. The disease was first discovered the week before last, when the horses were found to be ailing, and they were immediately brought to the surface and isolated. Since then a number of fresh cases have developed. The chief veterinary surgeon of the company has the cases under his supervision, and every effort is being made to prevent a spread of the malady.

PIGS.

Sale of Large Black Pigs at Ipswich.

Messrs. Robert Bond and Sons' annual sale of pedigree Large Black pigs took place at Ipswich on Tuesday. About fifty animals were catalogued, many of them being of remarkable size for age. The attendance of buyers was large, and a good demand was experienced. Three boars of nice quality, from the Colonial College, farrowed March 22nd, 1900, realised £6 15s., £4 15s., £4 5s. Sixteen boars, bred by Mr. R. B. Bond, all by Sproughton King (123), were well competed for. Three from Sproughton Lass (476), farrowed March 22nd, made £6 10s., £5 5s., and £4 10s. Four bred from prize-winning sows, farrowed February 17th, £4 5s., £3 10s., £3 5s.; others farrowed April 27th, up to £3. Two from Mr. Walter Wrinch, farrowed May 1st, £3. The Colonial College also consigned three well-grown gilts, farrowed March 22nd, which were disposed of at £4 15s. to £4. An in-pig sow from Mr. R. B. Bond realised £5 15s., and two choice gilts, eight months old, from the same consignor, made £5 5s. and £4 10s.; those which were farrowed April 27th reached £3 15s.; those bred in July, by Mr. J. Matthew, from £2 15s. to £2 10s.; Mr. C. F. Marriner's, Mr. Fox Hagger's, and Mr. H. O. Ransom's sold on the same lines. The buyers included Mr. Walter Wrinch, Mr. E. Giles (Essex), Mr. W. Ward, Mr. C. Ling, Mr. E. J. Cheney, Mr. Alfred Stearn, Mr. Fox Haggar, Mr. E. Cooper (Essex), Mr. J. Wainwright (Essex), Mr. Jos. Watkins, Mr. Herbert Smith, Mr. T. Ashford, Mr. C. W. Haward, and others.

Contagious Diseases of Animals.

Total for 41 weeks 1900							76,847	
Corresponding period in							77,185	

NOTE.—The figures for the current year are approximate only.

Leicester October Cattle Fair. Several thousand head of stock were forward at this fair, which was held on the 12th inst. Buyers and dealers were well represented, but while there was a brisk demand for choice lots at good prices, all secondary and inferior descriptions were a dull trade at a decline of 10s. to 20s. per head, and even at this reduction a good many lots were left unsold. Milch cows, £17 to £23; heifers, £12 to £13 10s.; home-bred Shorthorns, £12 to £16; young stock, £5 to £7; Irish Shorthorns, £14 to £17; Irish polled, £12 to £16. Welsh cattle in fair request, but the supplies were extremely heavy, and trade very depressed at £9 to £13 per head. Calves, 20s. to 30s. per head. Sheep and rams were a slow trade.

We are in receipt of a copy of the Worthington Souvenir of the Paris Exhibition. It is a small publication of some fifty pages, on art paper, containing illustrations of every Worthington pump shown in the Exposition by the allied Worthing companies, the collection comprising the largest exhibit of pumping machinery of a single type ever shown in an exhibition. We may mention that the entire water supply of the Exposition is furnished by four Worthington triple expansion High Duty pumping engines, which have a capacity of 40,000,000 imperial gallons a day.

SHOWS.

Cheshire Dairy Farmers' Association.

The Cheshire Dairy Farmers' Association's nineteenth annual show took place in Chester Market Hall on Tuesday and Wednesday, and was well attended on both days. Owing to the Association having increased the number of cheese to be shown in some of the classes, there was quite a record display of cheese, whilst the butter and farm produce were very creditable. Altogether nearly 2,000 cheese were displayed, and this was an advance of about 120 compared with last year, but there was a slight falling off in respect of the actual number of lots shown. The weight of the cheese was 70 tons, against 62 tons last year. Though the show of cheese as a whole was splendid, there were some lots not up to the usual standard, but this was probably due to the fact that the warm weather of September had affected the flavour of some of the riper and softer makes. The judges did not consider that the uncoloured cheese attained that pitch of whiteness which is necessary for Manchester—the best district in England for white cheese. It was noteworthy that the exhibitors in the medium classes were very successful in the colouring of the cheese, being, in fact, more successful in this respect than the exhibitors in some of the superior classes. The Association's gold medal for the best lot of Cheshire cheese in the show was awarded to Mr. T. Shaw, Halton Heath, Cheshire, and tenant of the Duke of Westminster, whose success in winning this and £14 for the best twelve cheese was the more marked, considering that he had not previously won first or second prize at any show in recent years.

Prize List.

CHEESE.

Twelve Cheshire cheese, irrespective of weight; made, owned, and exhibited by any farmer resident within the Association's district, whose occupation exceeds 150 acres: 1, Mr. T. Shaw, Hatton Heath; 2, Mr. R. Bourne, Bickerton; 3, Mr. J. Jones, New Farm, Dodleston; 4, Mr. N. Dale, Brassey Green, Tarporley; 5, Mr. W. Dutton, Brindley Hall, Nantwich; 6, Mr. J. Jackson, Chowley, Handley; r, Mr. T. H. Simcock, Moat Farm, Alpraham; vhc, Mr. J. Bate, Iddenshall Hall, Tarporley; Mr. J. Hulme, Kenwick Lodge, Ellesmere; and Mr. R. Dutton, Old Marton, Ellesmere; Mr. T. Blake, jun., Clay Farm, Bangor-on-Dee; hc, Mr. D. Richards, Belgrave, Pulford; Mr. W. B. Sadler, The Lodge Farm, Holt; Mr. G. H. Willis, Stoke, Stanney; Mr. S. Winward, Broughton, Malpas; Mr. J. Houlbrook, Peckforton Hall, Tarporley; Mr. A. Fearnall, Eccleston, Chester; and Mr. R. Fearnall, Aldford; c, Mr. Dutton, Hoofield, Huxley; Mr. R. Cooper, Ridley Hill, Tarporley; Mr. L. Jackson, Broughton Lodge, Malpas; Mr. W. Evans, Gatesheath Farm, Tattenhall; Mr. R. Bourne, Broxton; Mr. W. Parker, Rodens Hall, Wrexham; Mr. H. Denson, Poulton; and Mr. G. Lea, Oscroft, Tarvin.

Eight Cheshire chese, irrespective of weight; made, owned, and exhibited by any farmer resident within the Association's district, whose occupation is above 100 acres, but does not exceed 150 acres: 1, Mr. R. Davies, Round House, Edge, Malpas; 2, Mr. W. Lee, Woodlake Farm, Tattenhall; 3, Mr. H. E. Cooper, Bickley, Malpas; 4, Mr. J. Featherston, Horton, Malpas; 5, Mr. T. G. Lee, Drogan Farm, Handley; 6, Mr. W. H. Astles, Darnhall, Winsford; r, Mr. H. Rutter, Aldersey, Handley; vhc, Mr. G. Williams, Park Eyton, Wrexham; Mr. J. Hough, Shocklach; hc, Mr. R. Peacock, Hargrave; Mr. J. Gregory, Waverton; and Mr. H. S. Walley, Bickerton Hall, Malpas; c, Mr. W. H. Hobson, Wood Farm, Malpas.

Six cheese, irrespective of weight; made, owned, and exhibited by any farmer resident within the Association's district, whose occupation does not exceed 100 acres and not less than 50 acres: 1, Mr. J. Dutton, Brereton Park, Hargrave; 2, Mr. S. Faulkner, Wrenbury, Frith; 3, Mr. G. Johnson, Horton Green, Malpas; 4, Mr. P. Mottershead, Coddington, Aldersey; r, Mr. J. Jackson, The Elms, Tallern Green, Malpas; vhc, Mr. S. Evans, Woodhouse Farm, Tattenhall; and Mr. J. Williams, Hollin Green, Sound, Nantwich; hc, Mr. T. Greenaway, Burton, Tarporley; Mr. J. Williams, Little Heath Farm, Audlem; and Mr. O. W. Johnson, Hatherton, Nantwich; c, Mr. T. Dale, Lower Farm, Huxley; Mr. W. H. Jackson, Clotton, Tarporley; Mr. J. T. Jones, Brook Farm, Worthenbury; and Mr. J. Rigby, Ebnal Farm, Malpas.

Four cheese, irrespective of weight; made, owned, and exhibited by any farmer resident within the Association's district, whose occupation does not exceed 50 acres: 1, Mr. W. Garner, Tattenhall Lanes; 2, Mr. J. Parry, Oscroft, Tarvin; 3, Mr. S. Edwards, Norbury, Whitchurch; r, Mr. W. Jones, Poulton; vhc, Mr. J. Briscall, Aston Juxta Mondrum, Worleston; and Mr. J. E. Rathbone, Worthenbury; hc, Mr. E. Arden, Kinnerton; c, Mr. H. Greenway, Stamford Heath.

Four coloured cheese of any make, not less than 40lb each; made, owned, and exhibited by any farmer resident within the United Kingdom: 1, Mr. F. D. Pickering, Pigeon House, Handley; 2, Mr. R. Davies; 3, Mr. J. Jones, New Farm, Dodleston; 4, Mr. J. Hough; 5, Mrs. Walley, Frankton, Oswestry; 6, Mr. R. Dutton; r, Mr. B. Dutton; vhc, Mr. G. Dutton; Mr. J. Allwood, Churton; Mr. N. Dale; Mr. J. Noden, The Woodside, Wettenhall; and Mr. W. Jones, Poulton; hc, Mrs. J. Lloyd, Dodleston; Mr. R. Fearnall; Mr. R. Bourne; Mr. J. Williams; Mr. G. Lea; Mr. T. Shaw; and Mr. S. B. Ducker, Upton, near Chester; c, Mr. W. Houlbrooke, Brooklands, Wettenhall; Mr. J. Houlbrook; Mr. H. S. Walley; Mr. C. E. Parton, Haughton, Spurstow; and Mr. S. Lea.

Four uncoloured cheese of any make, not less than 40lb each; made, owned, and exhibited by any farmer resident within the United Kingdom: 1, Mr. J. Jones; 2, Mr. T. G. Lee; 3, Mr. T. Charlesworth, Baddington, Nantwich; 4, Mrs. Peacock, Huxley Hall, Hargrave; 5, Mr. G. H. Willis, Stoke, Stanney; 6, Mr. J. Jackson; r, Mr. T. Lea; vhc, Mr. Thos. Blake; Mr. R. Fearnall; Mr. H. Denson; and Mr. W. H. Edwards; hc, Mr. Jos. Hough; Mr. R. Peacock; Mr. P. Dutton; and Mr. G. Lea; c, Mr. J. Williams; Mrs. Walley; Mr. A. Lea; and Mr. C. F. Hobson.

For farmers who have never won a first or second prize at any agricultural or dairy show since January 1st, 1894; for the best four Cheshire cheese, coloured or uncoloured, not less than 25lb each; made, owned, and exhibited by any farmer residing within the Association's district: 1, Mr. T. Shaw; 2, Mr. R. Fearnall; 3, Mr. G. Dutton; 5, Mr. E. Lewis; r, Mr. T. Lea; vhc, Mr. C. Featherson; Mr. A. Prince; Mr. J. H. Lee; Mr. R. D. Allwood; Mr. F. Benson; hc, Mr. J. Minshall, jun.; Mr. D. Richards; Mr. J. F. Jones; c, Mr. F. Lindop; Mr. S. Winward, and Mr. J. Allwood.

Long Keeping Class.—Exhibits to comprise three cheese made prior to June 16th, 1900; all exhibits to have the Association's brand affixed on each cheese as early as possible after the close of the entry: 1, Mr. R. Dutton; 2, Mr. B. Dutton; 3, Mr. Robert Davies; r, Mrs. M. Denson; vhc,

Mr J. Siddorn; hc, Mr. H. S. Walley; Messrs. Siddorn Bros.; c, Mr. F. D. Pickering; Mr. G. Williams.

BUTTER.

Six half-pounds of fresh butter, slightly salted; exhibitors to be makers and resident within the Association's district: 1, Mr. T. Henshaw, Swanley, Nantwich; 2, Mrs. R. Johnson, Street Farm, Kelsall; 3, Mrs. T. Roberts, Dodleston; 4, Mrs. W. Shaw, Crewe Hall, Farndon; r, Mr. W. Clarke, Aldford; vhc, Mr. W. Lee; hc, Mr. S. Winward, and Mr. G. H. Willis; c, Mrs. J. Platt, Tilston, Tarporley, and Mrs. T. Jackson, Bank Farm, Isycoed, Malpas.

Six half-pounds of fresh butter without salt; exhibitors to be makers and resident within the Association's district: 1, Miss Jackson, Southley, Tarporley; 2, Mr. P. Reade, Swanley, Nantwich; 3, Mrs. R. Johnson; 4, Mr. S. Winward; r, Mrs. W. Shaw; vhc, Mrs. R. Parker; hc, Mr. M. L. Sadler, and Mrs. Jackson; c, Mr. G. H. Willis.

Two pounds of butter made up in pats of 2oz. each, by a farmer's wife or daughter resident within the Association's district: 1, Mrs. France, Bunbury, Tarporley; 2, Mr. W. Clarke; 3, Mrs. J. Hough; r, Mr. P. Reade; vhc, Mrs. J. Okell; hc, Mrs. T. Jackson; c, Mrs. G. Robinson.

Two pounds of butter, made up in half-pounds, and exhibited by any cottage tenant whose annual rent does not exceed £20, resident within the Association's district, and not keeping more than two cows in milk: 1, Mrs. J. Stokes; 2, Mr. T. Henshaw; 3, Mr. J. Vernon, Stapleford, Tarvin; 4, Mrs. Thomas; r, Mrs. Barnes, Alpraham, Tarporley; vhc, Mrs. Huxley; hc, Mr. Jos. Knight; c Mr. W. Woodcock.

Two pounds of butter, slightly salted, made up in half-pounds, and made from milk drawn exclusively from Channel Island cows: 1, Mrs. E. France; 2, Mrs. J. Stokes; 3, Mrs. T. Jackson; vhc, Mrs. James Okell; c, Mrs. Forster.

To the exhibitor of three pounds of butter, made up in most ornamental style for table, in as many pieces as approved by the exhibitor: 1, Mr. S. B. Ducker, Grange Farm, Upton.

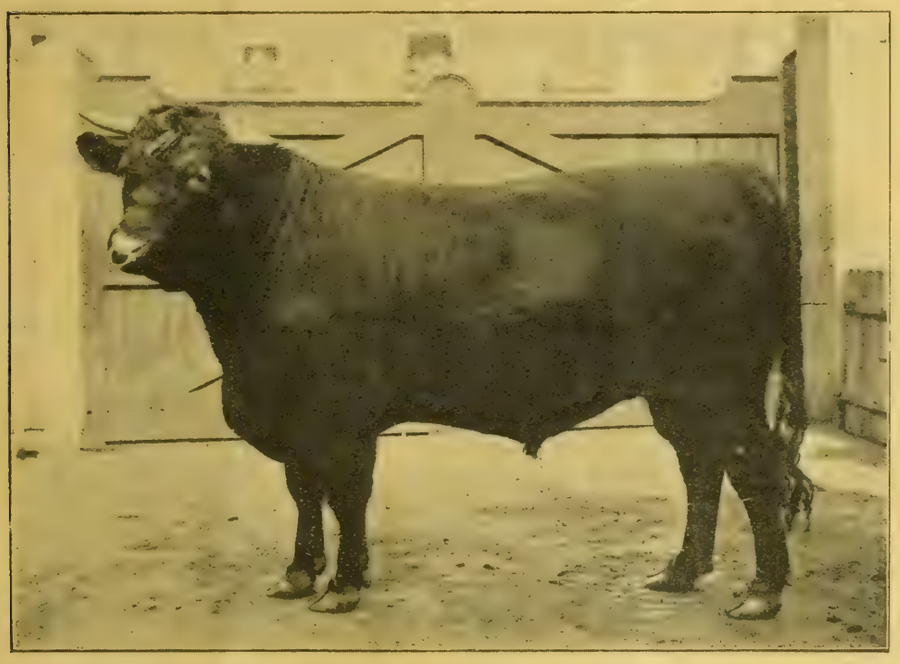
COLLECTION OF FARM PRODUCE.

Collection of dairy and farm produce; bred, fed, and grown on the premises of the exhibitor, consisting of not less than six varieties of produce: 1, Mrs. S. Evans; 2, Mr. T. Salmon; 3, Mr. M. L. Sadler.

HONEY.

Six sections of comb honey, gathered during 1900, approximate weight 1lb. each: 1, Mr. E. Maxwell, 13, Claremont Road, Liverpool; 2, Mr. Owen Dutton, Wimbolds Trafford; 3, Mr. J. Dean, The Acres, Upton; hc, Rev. E. Charley, Ince Vicarage; c Mr. F. Dutton, Huxley.

Twelve jars of run honey, in 1lb. each approximate weight, gathered during 1900 by the exhibitor's own bees: 1, Mr. O. Roberts, Willington Lodge, Tarporley; 2, Mrs. R. Parker; 3, Mr. F. Hewitt, Holmeston Hall, Tarporley; hc, Mr. E. Maxwell.



Mr. J. Evens' Lincoln Red Shorthorn Bull, "Royal Burton." First Prize at the Dairy Show, 1900.

The prizes were distributed in Chester Town Hall on Wednesday afternoon by the Countess of Crewe, who was accompanied by the Earl of Crewe and Lady Annabel Crewe Milnes. There were also present the Bishop of Chester, the Dean of Chester, Mr. Henry Tollemache, M.P., Mr. James Tomkinson, M.P., Mr. W. H. Verdin (Darnhill), Mr. Harry Barnton (Crewe Hill), and Mr. George Barbour, of Bolesworth Castle (chairman of the Council of the Association), etc.

Mr. Henry Tollemache, M.P., proposing a vote of thanks to the Countess of Crewe for distributing the prizes, heartily congratulated the honorary treasurer of the association—Mr. James Tomkinson—on having at last gained the honour for which he had fought so long and so gallantly. (Laughter and applause.)

The Bishop of Chester, in seconding, said Cheshire was the mother of cheese-making, and she was rejoicing with maternal pride, as they all knew, in having been surpassed this year at the London Dairy Show by her daughters and descendants. It appeared that the fair cheese-makers of Shropshire were daughters or descendants of Cheshire, and that their skill had really come to them as daughters of Cheshire. (Laughter.)

The vote was carried with acclamation, and Lord Crewe, in returning thanks, said he believed the Cheshire cheese trade, in spite of the occasional alarms which took place when there was a sudden change in the weather, and there was a lot of early ripening cheese on the market, was now on a very stable foundation indeed, and that they knew now pretty well what was the worst foreign competition could do. (Applause.) He was very glad to know that the class for long-keeping cheese had been very well supported at the show. He did not for a moment suppose that long-keeping cheese would ever oust early-ripening cheese from popular favour. Early-ripening cheese was what was demanded by the big towns, and farmers were bound, of course, to meet that demand; but in view of such alarms as he had mentioned it was a very good thing indeed that there should be some long-keeping cheese, so that the necessity might not occur of casting great quantities of cheese upon a bad market. (Hear, hear.) He believed some people had supposed that the advance of education and the increase of refinement had somewhat discouraged cheese-making among their farmers, and had caused some dislike to that particular work among the wives and daughters of farmers in Cheshire and other cheese producing districts. He did not for a moment believe that or accept it. (Applause.) If it were true it would certainly be a great mistake. He could not conceive why any amount of education or refinement should interfere with their becoming as good cheese-makers as their mothers. (Hear, hear.) A cheese was a work of art, and if ladies could undertake such arts as bookbinding, he could conceive no earthly reason why they should not undertake the art of cheese-making. He should certainly give the palm to cheese-making all the world over in preference to fancy work, and any nonsense of that kind. (Applause.)

The Cheese Fair.

There was a very good attendance of buyers at the cheese fair on Wednesday, at which there was a pitch of 70 tons, and some good prices were obtained. The champion cheese made 110s. per cwt., and other prize cheese made from 80s. to 100s. Cheese that was honourably mentioned realised from 70s. to 77s., and medium lots went down to about 65s. The show prices were about the same as last year, but the demand was hardly so sharp, owing, no doubt, to the very much heavier make which was brought about by a change in the weather in September.

Crewe Shire Foal Show and Sale.

The annual autumn show and sale of Shire foals at Crewe was held as usual in Messrs. H. Manley and Son's Repository on the 13th inst., being the conclusion of a four days' horse sale by these enterprising auctioneers. The show attracted a large company of visitors and compared most successfully with any previous show of young Shires in that locality. The demand also for likely youngsters was keen, and prices for female Shires showing quality and eligible for the Stud Book were unmistakably high, whether of filly foals or older mares. Two open prizes of £3 3s. each were offered by Messrs. Manley for the best filly and the best colt foal respectively. Mr. L. Dodd won the one prize with his really beautiful filly Lady Matchless, by Crofton Matchless, combining plenty of quality with correct shape and great power. She also won Mr. Kenworthy's £5 prize as the best foal by any of his horses, and was reserve for the £15 15s. champion prize offered by the auctioneers for the best female Shire in the show. At the succeeding auction sale she sold for 90gs.

The open colt foal prize was won by Mr. W. Lester with a big, upstanding young horse by Moors Thumper, possessing a lot of bone and very nice feather. This sold for 35gs. The reserve number to him was a smart colt by Kesterton, the property of Mr. P. Allen. Like the previous ones, it is a well-known prize winner, and sold for 30gs. The special prizes of £3 3s. offered by the Crewe Shire Horse Society for the best foal by their horse Monaco were won by Mr. J. Smith's grand-framed, roomy filly, which took first in her class, but was retained at home and not offered for competition, as was Mr. Burston's filly dam Crofton Primrose, the reserve to her, Mr. T. G. Parton's colt foal, which was the winner in his class, selling to 25gs. Mr. Harding's filly by Crofton's Prince won the next prize, offered by Mr. Jackson, for the produce of this sire, and sold for 26gs., Mr. Wheeler's second prize filly making 20½gs.

For the prizes offered by Mr. Kenworthy, the winning filly in the open class was first and the reserve colt in the open class second, and the stylish-looking filly by Carbineer, which won Mr. J. B. Hall's first prize, was reserve in the open class, and sold for 85gs. The best Shire mare or filly in the show, and also the winner of the £15 15s. champion cup for best female, was Mr. J. W. Kenworthy's Stapenhill Queen, by King Charming, a black of immense substance, gay carriage, and a fine mover. She made 95gs. at the auction sale. The prize for the best three-year-old was won by the same owner's Lady Grace, by Apostle, a particularly smart filly, which sold for 92gs.; and the best two-year-old was the Earl of Egerton's Tatton Forester, which, with Messrs. Manley's consent, was disposed of privately for 100gs.

Among other high-priced animals were Mr. R. Whitehead's Lady Salisbury, by Salisbury, a great winner, and here h.c. for the champion cup. She made 94gs. Mr. Kenworthy sold Delamere Lassie for 65gs., and it is noteworthy that the whole of this gentleman's exhibits—ten in number—were sold at good prices. Mr. Shawbrick's mare by Moors Thumper, with colt foal by Dunsmore Combination, made together 100gs. Mr. Christopherson's yearling by Burston Albert, 40gs.; Mr. Platt's mare, 52gs.; Mr. Askew's colt foal by Warton Starlight, a large winner in Lancashire, made 62gs.; Mr. Windsor's Nailstone Royal Ensign filly foal, 32gs., etc.

Scottish National Fat Stock Club.

The following have been selected to act as judges at the National Fat Stock Club's Show, to be held in the Waverley Market, Edinburgh, on Wednesday and Thursday, 5th and 6th December:—Shorthorn cattle, cross breeds, and the president's prizes—Messrs. John Cran, Kirkton, Bunchrew, Inverness; Alexander Beddie, Adziel, Strichen; and Charles Wilson, 19, Castle Street, Edinburgh. Aberdeen-Angus, Galloway, and Highland—Messrs. George Cran, Morlick, Glenkindie, Aberdeenshire; James Biggar, Nethertown of Grange, Dalbeattie; and John Stewart, 337, Dumbarton Road, Glasgow. Extra class and dairy cows—Messrs. David Wright, Springfield House, Halifax; William Harrison, Skibeden, Skipton; and John M'Kay, 46, Union Street, Dundee. Blackfaced, Cheviot, and half-bred sheep—Messrs. James Moffat, Gateside, Sanquhar; J. R. C. Smith, Mowhaugh, Yetholm, Kelso; and Robert Williamson, Tinwald Downs, Dumfries. Crosses and extra class—Messrs. Robert Thomson, 29, Port Street, Stirling; William S. Dods, 38, High Street, Berwick-on-Tweed; and Thomas Wederspoon, St. Leonard's Bank, Perth. Pigs—Messrs. James Hallas, Higher Walton, Warrington; and W. Campbell, 191, Perth Road, Dundee. Swedes, yellow and white turnips, cabbages, and potatoes—Messrs. John Bell, of Balbuthie, Kilconquhar; and James Stenhouse, Turnhouse, Cramond. Grain—Messrs. James Hope, East Barns, Dunbar; and George Maclennan, grain merchant, Edinburgh. Butter-making—Messrs. William Smith, 1, Grassmarket, Edinburgh; and R. J. Drummond, Dairy Institute, Kilmarnock. Referee for champion prizes in cattle and sheep sections—Mr. James Swan, Clifton Terrace, Edinburgh.

The annual root show held by Mr. J. K. King, of the Royal Seed Growing Establishments, Coggeshall, Essex, and Reading, Berks, will take place on Tuesday, November 6th, at Coggeshall. No fewer than thirty-nine valuable prizes are offered for roots and cereals, and for vegetables there are over forty awards, ranging in value from 5s. to £3. There will be a luncheon at 1.45, at which the chair will be taken by the Hon. C. H. Strutt, M.P., who will be supported by several members of Parliament, landowners, and noted farmers. The railway station is Kelvedon, on the G.E.R., and conveyances will meet the trains.

All farm and stock should be given. Messrs. [illegible] in excellent [illegible] advertisement [illegible] back page of this issue. [ADVT.]

BARLEY AND HOPS
AT THE
BREWERS' EXHIBITION.

The twenty-second annual exhibition and market of machinery, appliances, and produce used by brewers, maltsters, distillers, etc., was opened on Saturday at the Royal Agricultural Hall, Islington, and will remain open during the whole of this week. One of the important features of the show is the increased interest manifested in the malting barley and hop competitions, for which an extra number of prizes is offered this year. The total number of entries of barley is 166 English and 10 foreign. The entries in the hop competition are in excess of those of last year, there being 41 samples submitted for judging. The past season, however, has proved unfavourable for hop-growing. In the non-alcoholic beverages section there is a great amount of competition, the entries in the three classes, soda water, fermented ginger beer, and unfermented hop ale amounting to 152.

The inaugural luncheon took place on Saturday under the presidency of Mr. John Billbie, of Billbie, Hobson, and Co., Queen Victoria Street. Mr. A. T. Dale (Dale and Reynolds) sat next to the chairman, on the right, together with Mr. Clare Sewell Read, Mr. Charles Walker (Licensed Victuallers' Central Protection Society), and Mr. H. S. Bishop (Ind, Coope, and Co.), whilst on the left were Mr. H. Stopes, Mr. R. H. Rew (Board of Agriculture), Mr. F. Flinn, M. P. Vilmorin, Mr. A. Probyn, Mr. James, Mr. S. W. Gillard, Mr. Joseph Nolan, M.P. (Sir John Power and Sons, Limited), Mr. John Clayton, Mr. P. F. Nursey, Mr. E. H. Godfrey (Central Chamber of Agriculture), Mr. C. J. Dale, Mr. A. J. Stanton (MARK LANE EXPRESS), Mr. H. Ennals (J. Fison and Co., Limited, Ipswich), Mr. A. Hassall, Dr. John Goodfellow, Mr. T. Ironmonger (National Association of Hop Growers), etc.

In proposing "Success to the Exhibition and Market," the chairman said the reason of his occupying his present position was probably whilst connected with the engineering trade he had consistently shown at the Brewers' Exhibition ever since it was started in 1879. There were various kinds of exhibitions. The first were international, such as we had seen several in the past in London. These were very beautiful and wonderful, but he thought they tended rather to mystify the mind than to improve it. He had just returned a third time from Paris very disappointed because he had not seen more. He was told that the Paris Exhibition was one of the most gigantic failures of the century; there were so many things to see that it was impossible to concentrate one's mind on anything. Then there were exhibitions such as the series which had been held at South Kensington, and though these were very interesting they were of no value from a commercial standpoint. In the Agricultural Hall they were accustomed to trade exhibitions, and in his view such exhibitions were the most beneficial of all. Those who came there from all parts of the country came to see something which would improve their trade. They were not distracted by a lot of side shows. They met there for business purposes, and were glad to meet each other and to compare notes. This exhibition, which had been carefully thought out, had always been ably managed by Messrs. Dale and Reynolds (cheers) who had never spared any personal effort to make it successful. (Cheers.) Those astute managing directors willingly acceded to any suggestion made to them for increasing the usefulness and value of the exhibition. He was pleased to see that the present exhibition was as good as any of its predecessors, and he believed it would prove to be a pronounced success, and the competitions added to the show from time to time were of great value. Barley had been much improved, and he was informed that no less than thirty English counties were represented in the show this year. Hops, too, were well represented, although, of course, hops were produced in only certain restricted districts. Of the mineral water competition no one could fail to see how enormously that trade had grown in the past twenty years, and doubtless the high standard of merit fixed at the show had been of service to the public. (Cheers.)

Mr. Arthur T. Dale, in rising to respond on behalf of his partner and himself, was greeted with loud applause. He thanked those very heartily for the enthusiastic manner in which they had received the toast. The exhibition proper in the great hall would speak for itself. It was a very comprehensive affair, every section being fully represented. There were a number of things shown this year for the first time, and these could be easily found, as they were distinguished in the catalogue by being printed in black letters. He took this opportunity of thanking the judges in the malting barley, hop, and aerated beverage competitions. They were all expert jurors, and their awards were made on a good, sound, solid basis, and on merit alone, and their services were given *con amore*. He was glad that they had with them that day Mr. Clare Sewell Read, Mr. Stopes, Mr. Flinn, and other judges, and they also welcomed M. Vilmorin, who was *par excellence* the head of the seed trade of France. He thanked them for their presence, and said he had no doubt that this year's market would afford as much satisfaction to exhibitors and buyers as any of the long series that had gone before it. (Cheers.)

Mr. R. H. Rew (of the Board of Agriculture) gave the toast of "The Judges." He took the opportunity of pointing out the great advantage to the country of keeping the plough at work. This had certainly been done by the comparative success of barley over wheat, and the show of malting and seed barleys had largely contributed to the successful cultivation of that cereal in this country; coupling with the toast the names of Mr. H. Stopes, Mr. Clare Sewell Read, Mr. Frank Flinn, and Mr. J. B. Ellis.

Mr. H. Stopes, chairman of the judges, in response to the toast, said that British farmers need fear no foreign competition in the matter of barley, for the best was grown in the United Kingdom, and this was due to both climate and soil. About 72,000,000 bushels were used annually, sixty for beer, and twelve for whisky, and nearly 2,000,000 acres were always under cultivation. Mr. Stopes does not mean by this that the English farmer should not be on the alert to improve his crops when possible. As a matter of fact, a good deal of foreign barley is shown at the Agricultural Hall. It comes from Bohemia, Smyrna, Chili, Gaza, and Beyrout. Some of the samples will be tested at the English agricultural colleges, and the results will be of great interest and value to British barley-growers, maltsters, and brewers.

Judges.

*H. Stopes (chairman), 11, Queen Victoria Street, E.C.; Thomas R. Dewar, M.P., distiller (John Dewar and Sons, Limited), 48, Lime Street, E.C.; Thos. Earp, maltster (Gilstrap, Earp, and Co.), Newark; *J. B. Ellis, Walsingham; *Frank Flinn, maltster, Bishop's Stortford, Dullingham, and Newmarket; W. R. Lane, Birmingham; H. Mackeson, brewer and maltster, Hythe; Lewis J. Meakin, maltster (L. and G. Meakin, Limited), Burton-on-Trent; *Clare Sewell Read, 91, Kensington Gardens Square, W.; C. H. Stafford, Hollow Stone, Nottingham; S. N. Thompson, maltster (S. Thompson and Sons), Smethwick; C. Howard-Tripp, managing director Ind, Coope and Co., Limited, Burton-on-Trent and Romford.

The Judges' Note Book.

Each judge had provided for use a handsomely bound note book, containing full particulars and details of the classes, prizes, and conditions. Of the entries no information whatever was given other than the sack numbers which were arranged in the order of the names of the counties placed alphabetically.

These numbers were on the left side of the page, and lines were ruled through to the right margin of the opposite page, which was blank, so ample room for remarks was provided.

The book consists of eighty-four pages of superfine hand-made paper, and has an introduction written by the chairman of the judges which, with permission, is reproduced here:—

Frequent notices of the work done at the Brewers' Exhibition in the interests of barley-growing have appeared in various papers, but it seems desirable this year to record it in more permanent form.

The Brewers' Congress, opened by Messrs. Dale and Reynolds in 1885, in conjunction with the Brewers' Exhibition, initiated a practical type of technical education. The malting and seed barley competition has been fostered with steadily increasing effort and care on the part of the judges. The value and number of the prizes offered and of the classes now shown in this book are proof of the growing influences radiating from this centre. Placed on record in this form they may be of much value and interest to students and historians hereafter.

Incidentally it may be useful to point out that towards the close of the seventeenth century (1697) a tax was laid upon malt, and paid by the maker or maltster irrespective of any other tax, duty, or licence borne by the brewer. This tax varied in the amount paid per bushel from time to time, and there were occasionally slight modifications made of the stringent regulations that hampered the freedom of action of maltsters. As the Malt Tax it continued until its repeal in 1880. The Revenue obtained from malt continued in the form of a beer duty assessed upon the actual yield of the malt, obtained by the brewer. The repeal has been frequently described as a sudden change, but in reality it was the inevitable and slow outcome of the permission given in 1847 to brewers to use sugar as a substitute for malt.

Since 1880 any other material able to take the place of malt (excepting "saccharin" from coal tar) has been permitted to be used, provided the duty assessed by the Excise authorities is paid by the user. So long as malt paid duty, or for nearly two centuries, the chief aim set by brewers before barley-growers to attain in barley for maltsters' use was the amount of extract given out.

The duty as levied upon the extract on the basis of charge being determined by the amount yielded now makes the *quality* of the extract of greater moment than its *quantity*. The *pro rata* cost of duty efficiently checks all economy on duty formerly possible by the greater yield of superfine barleys. Nearly all benefits from improved cultivation now turn on the superiority of the extract and its suitability to meet the existing requirements of brewers.

Owing to the alteration of public taste in beer the persistent reduction of gravity implies, and in many cases compels, the abandonment of the use by maltsters of barleys of defective types.

The aim the judges have steadily kept in view has been to foster agriculture and encourage barley growers to produce the most suitable types of grain. The first consideration has been the endeavour to find what brewers need, then to show how best to secure it, and, not less important, to show clearly what to avoid.

Intelligent growers have followed our awards from year to year with very marked advantage to themselves and to barley growing in Britain, as well as to the benefit of maltsters and brewers.

Our entry forms have been added to from time to time, so that we now get full details of every sample shown in the following very necessary and important particulars:—

Character of soil and subsoil; rotation followed for not less than two preceding crops; quantity and quality of manure used (if any), and the seed sown.

Other information of interest is obtained as to dates of sowing and cutting, quantities grown, and so on. The dressing machinery employed has been subject to inquiry for some years, and prizes are now offered with a view of determining to what extent undue harm by imperfect threshing can be avoided.

It is noteworthy that thus far every sample sent to the Exhibition from its beginning has been weighed. They have all been done by myself, with the same chondrometer, under like conditions, and each year the machine has been adjusted to the actual weight of an Imperial bushel, exactly and carefully measured.

It is to be hoped the high standard of efficiency of machines used, and the quality of grain shown, will be continually raised. The last year of the old century marks much distinct improvement, some of which may not unfairly be attributed to our labours. The very best as yet attained, however, still leaves much room for further development and improvement. Some of our number can remember how much of the barley submitted to us even within the past ten years, either in itself, or through being damaged in dressing, or through the admixture of other material than barley, was totally unsuited to make malt fit for brewers' use. Also we know how much grain is still grown without due regard to brewers' needs. We as judges can all agree, therefore, that the more stringently we do our duty without fear or favour we prove our single aim in inducing our own countrymen to do the best possible for all concerned.

The great industry of barley-growing is of national importance in more than one sense, and in striving to uphold and benefit it we have for fourteen years quietly been doing good service to the State.

H. STOPES.

11, Queen Victoria Street, London, E.C.

* These gentlemen also act as jurors of seed barley

The Barley.

By Hordeum.

The most noticeable feature of this year's exhibition is the utter collapse of foreign competition. Some years ago it looked very much as if our home industry of barley-growing would be unable to hold its own against the giant strides our foreign competitors were making. This was especially notable when champion honours and the bulk of the best awards were given out of the country.

But our growers and merchants, with dogged pluck, persevered, and each year it has grown more evident that steadily progressive improvement in British barleys has not been followed up in the same degree elsewhere. Now a small number of entries gives

A Very Poor Show

from foreign countries. Our own colonies have dropped out also completely, not sending in a single sample, notwithstanding the direct encouragements offer to them last year.

The season proves one of the few when good barleys are sent in from East and West. The oldest inhabitant cannot recall a former year which has produced superb samples from Suffolk, Devon, and Somerset. Yet, in the first six samples of the whole 170 sent in these counties alone are represented, Suffolk with half, or three samples, Devon with two, and Somerset with one.

Still more curiously, any of the six suffer very little in comparison when just alongside a carefully preserved sample of the superb champion of last year from Somerset. Still, there is no doubt that a lot of the samples from Suffolk are very fine, that county being represented by no less than twenty-one exhibits, including

The Champion.

The total awards falling to this sample, as will be

seen from the appended list, are nearly a dozen, but as the grower did not make entry they are divided between the grower, Mr. Pratt, of Melton, and Mr. J. Cooper, Ipswich, who is to be congratulated on the positions taken by all his samples. Other prizes from East Anglia went away to those where the grower also made entry. Still the spoils, even when split up into three, left very substantial shares to each recipient, which should show how desirable it can prove to all concerned to take a good position at the exhibition.

The Technical Class

again proves one of great interest, although only one entry is made by Gartons, Limited, Warrington. This tasteful and well-arranged display is of very great practical and scientific interest and value. It shows clearly the open door that leads to the certain elimination of all the disadvantages in barley complained of by maltsters and brewers. Species will hereafter be led to drop undesirable characters and put on good ones at the will of the cultivator.

Careful selection has done much to improve barleys in a century and a-half. How much, of course, has to be attributed to the same cause in the previous centuries very little evidence remains to show, although there is every probability that the needed information will be forthcoming soon. Now, however, we have reached the much more advanced stage when plants yield to the superior intelligence directing their development at the will and pleasure of the operator.

Other steps, too, are being taken this year in connection with this class of which it is not necessary to speak now other than to point out the steady and direct improvement in the year's show.

The Extended Prize List,

combined with too large a number of judges, has led to delay in publication of the awards, which cannot be too strongly condemned. One of the classes, too, has suffered by reason of the strange action of the Bedford brewers and barley buyers. We shall most probably hear more about this later on. Of the threshing machine prizes it is only reasonable for proper time to be given to examine so many samples with the necessary care before determining the awards. Still, with so many judges available it ought to have been done more promptly, and, again, the mode of exposing the awards given leaves much to be desired.

Full List of Barley Awards.

Annexed is a list of the awards as far as they have been officially made:—

CHAMPION PRIZE, Gold Medal or Plate, value £10 10s

No. in Catalogue.

137. Suffolk barley: Mr. C. J. Pratt, Melton (entered by Mr. John Cooper, Barley Merchant, Ipswich)

"MARK LANE EXPRESS" CHALLENGE CUP.

137. Suffolk barley: Mr. C. J. Pratt, Melton (entered by Mr John Cooper, Barley Merchant, Ipswich)

THE BURTON CHALLENGE CUP (Ind, Coope and Co., Ltd.), Burton and Romford.

137. Suffolk barley: Mr. C. J. Pratt, Melton (entered by Mr. John Cooper, Barley Merchant, Ipswich).

THE JOSEPH FISON CHALLENGE PRIZE, £25 (cash or cup).

137. Suffolk barley: Mr. C. J. Pratt, Melton (entered by Mr. John Cooper, Barley Merchant, Ipswich).

THE ROBERT BOBY, LIMITED, PRIZE (cash or plate), value £10

137. Suffolk barley: Mr. C. J. Pratt, Melton (entered by Mr. John Cooper, Barley Merchant, Ipswich).

THE MUMFORD CUP, value £10.

137. Suffolk barley: Mr. C. J. Pratt, Melton (entered by Mr. John Cooper, Barley Merchant, Ipswich).

THE JOHN H WRINCH SPECIAL PRIZE, value £10.

137. Suffolk barley: Mr. C. J. Pratt, Melton (entered by Mr. John Cooper, Barley Merchant, Ipswich).

Class I.—BRITISH MALTING BARLEY.

137. First prize, silver medal and diploma.—Suffolk barley: Mr. C. J. Pratt, Melton (entered by Mr. John Cooper, Barley Merchant, Ipswich)

32. Second prize, bronze medal and diploma.—Devonshire barley: Mr. J. Carpenter, Pengelly's Farm, Alphington, near Exeter.

37. Third prize, diploma.—Devonshire barley: Mr. P. Paul, Splatford Farm, Kenn (entered by W. H. Scruby and Co., Harlow, Essex)

125. H.c., diploma.—Suffolk barley: Mr. A. E. Gray, Wenhaston, Halesworth.

119. C. Diploma.—Somerset barley: Mr. W. Risdon, Escott, Stogumber, Taunton.

Class II.—COLONIAL MALTING BARLEY (no entries)

Class III.—DISTILLING BARLEY

(Given by T. R. Dewar, Esq., M.P.)

137. Silver cup, value £5 5s.—Suffolk barley: Mr. C. J. Pratt, Melton (entered by Mr. John Cooper, Barley Merchant, Ipswich)

32. Second prize, silver cup, value £2 2s.—Devonshire barley: Mr. J. Carpenter, Pengelly's Farm, Alphington, near Exeter.

37. Third prize, silver tankard, value £1 1s.—Devonshire barley: Mr. P. Paul, Splatford Farm, Kenn (entered by W. H. Scruby and Co., Harlow, Essex).

Classes IV. and V.—FOREIGN MALTING BARLEY (insufficient entries)

Class V.—FOREIGN MALTING BARLEY (two rowed from America).

169. First prize, silver medal and diploma.—Chilian barley: Spillers and Bakers, Limited, Cardiff.

170. Second prize, bronze medal and diploma.—Chilian Barley: Spillers and Bakers, Limited, Cardiff.

Class VII.—FOREIGN MALTING BARLEY (no entries)

Class VIII.—FOREIGN MALTING BARLEY (not two rowed), from the Levant, etc.

167. First prize, silver medal and diploma.—Asia Minor barley: C. Paterson and Co., 30, Great St. Helen's, E.C.

173. Second prize, bronze medal and diploma.—Beyrout barley: Spillers and Bakers, Limited, Cardiff.

171. Third prize, diploma.—Smyrna barley: Spillers and Bakers, Limited, Cardiff.

Class IX.—FOREIGN MALTING BARLEY (no entries).

Class X.—THE CLARE SEWELL READ PRIZES (given by F. and G. Smith, Limited, Dereham).

91. First prize, £10 10s.—Norfolk barley: Mr. J. M. Mallett, Stiff Key.

90. Second prize, £5 5s.—Norfolk barley: Mr. G. B. M. Brown, Manor House, Heacham, near Lynn.

94. Third prize, bronze medal.—Norfolk barley: Mr. A. Rushbrooke, Grove Farm, Roydon, Diss.

Class XI.—EXTRA SPECIAL LONDON BREWING PRIZES

22. First prize, £5 5.—Berkshire barley: Mr. W. S. Shelton, Heywood Farm, Maidenhead.

23. Second prize, £3 3s.—Bucks barley: Mr. J. Horwood, Manor Farm, Drayton Beauchamp.

99. Third prize, £1 1s.—Oxford barley: Mr. F. G. Castleman, North Brook, Kirtlington.

17. H.c.—Berkshire barley: Mr. A. S. Castle, Charlton, Wantage.

Class XII.—SPECIAL SHROPSHIRE PRIZES (insufficient entries)

Class XIII.—THE COLCHESTER BREWING CO.'S SPECIAL PRIZES.

57. Silver cup, value £5 5s.—Essex barley: Mr. R. Scrabrook, Tolleshunt D'Arcy.

91. Silver cup, value £5 5s.—Norfolk barley: Mr. J. M. Mallett, Stiff Key.

137. Silver cup, value £5 5s.—Suffolk barley: Mr. J. C. Pratt, Melton (entered by Mr. John Cooper, Barley Merchant, Ipswich).

Class XIV.—THE EAST SUFFOLK PRIZES (given by Captain Pretyman, M.P.).

126. First prize, £10.—Mr. A. E. Grey, Wenhaston, Halesworth.

Other Prizes subject to confirmation.

Class XV.—THE JARMAN WEST COUNTRY PRIZES.

32. Silver cup, value £2 2s.—Devonshire barley: Mr. J. Carpenter, Pengellys Farm, Alphington, near Exeter.

119. Silver cup, value £2 2s.—Somerset barley: Mr. W. Risdon, Escott, Stogumber, Taunton.

68. Silver cup, value £2 2s.—Hants barley: Mr. H. Reeks, Bockhampton Farm, Winkton.

Class XVI.—THE FLINN SPECIAL PRIZES.

72. Silver cup, value £5 5s.—Herts barley: Mr. R. E. Horwood, Upper Farm, Drayton Beauchamp.

Class XVII.—THE EAST RIDING PRIZES (insufficient entries).

Class XX.—WEST SUFFOLK SPECIAL PRIZES (given by Sir Cuthbert Quilter, Bart., M.P.).

141. First prize, value £10.—Mr. R. J. Thurman, Semer, Ipswich.

128. Second prize, value £5.—Mr. A. C. Kemball, Boxford, Suffolk.

Class XXI.—"MARK LANE EXPRESS" DIPLOMAS FOR SEED CORN.

Bedfordshire.

1. Mr. G. Duncombe, Cople, Bedford.

5. Mr. S. Harrison, Hill Farm, Renhold.

Berkshire.

17. Mr. A. S. Castle, Charlton, Wantage.

22. Mr. W. S. Shelton, Heywood Farm, Maidenhead.

Bucks.

23. Mr. J. Horwood, Manor Farm, Drayton Beauchamp

24. Mr. R. E. Horwood, Upper Farm, Drayton Beauchamp

Devonshire

32. Mr. J. Carpenter, Pengelly's Farm, Alphington, near Exeter.

37. Mr. P. Paul, Splatford Farm, Kenn

Dorchester

46. Mr. W. W. Peel, The Manor Farm, Broadwindsor, Dorset

52. Mr. R. H. Cooper, Wyke, Shaftesbury

Essex

57. Mr. J. Murdoch, (Executor of) Dunthorne Reeve, Essex

Mr. R. Scrabrook, Tolleshunt D'Arcy.

Mr. [illegible], Rochford, Essex

Gloucestershire

64. Mr. A. Day, Clifford Bank, Stratford-on-Avon

65. Mr. A. Day, Clifford Bank, Stratford-on-Avon

Hampshire

68. Mr. H. Reeks, Bockhampton Farm, Winkton

67. Mr. G. G. Lumley, Pamewell, Chesterfield

Herts

72. Mr. R. E. Horwood, Upper Farm, Drayton Beauchamp

76. Mr. J. R. Russell, Westmill, Buntingford

Hunts

78. Mr. F. Christmas, Great Gransden, Sandy

Kent

81. Mr. H. Fitzwalter Plumptre, Goodnestone, near Dover

80. Mr. J. A. Pell, Court Lodge Farm, Horton Kirby

Lincolnshire.

85. Mr. F. W. Shepherd Heywood, Holbeck Manor, near Hornastle

81. Mr. L. J. Briggs, Priory Farm, Stamford.

Middlesex

87. Mr. W. J. Curtis, Hethrow Farm, Heathrow.

88. Mr. W. Merrick, Manor Farm, Shepperton.

Norfolk

91. Mr. J. M. Mallett, Stiffkey.

90. Mr. G. B. M. Brown, Manor House, Heacham, near Lynn

Northampton

98. Mr. J. S. Railton, Evenley, Brackley

95. Mr. J. T. Dickens, Barnack, Stamford.

Oxon.

99. Mr. F. G. Castleman, Northbrook, Kirtlington

100. Mr. J. I. Castleman, Slade Farm, Kirtlington.

Rutland

105. Mr. L. J. Briggs, Belmesthorpe.

104. Mr. W. T. Beadsworth, Tinwell.

Salop.

109. Mr. R. Preece, Cressage House, near Shrewsbury

108. Mr. F. Herne, The Bank Farm, Cleverley

Somerset.

110. Mr. W. Risdon, Escott, Stogumber, Taunton

113. Mr. T. Lovelace, Bosington, Allerford, Taunton.

Suffolk

137. Mr. C. J. Pratt, Melton (entered by Mr. John Cooper, Barley Merchant, Ipswich)

126. Mr. A. E. Gray, Wenhaston, Halesworth.

Surrey

143. Mr. J. Webb, Great Grove Farm, Chertsey.

Warwickshire.

148. Mr. J. W. Lea, Thelsford, Warwick

150. Mr. J. W. Lea, Thelsford, Warwick

Wiltshire

152. Mr. A. Andrews, Little Langford, Salisbury

153. Mr. E. J. Ashford, Little Bathampton, Wylye, Bath

Worcestershire

158. Mr. G. Corbishley, Bricklehampton, Pershore

157. Mr. T. A. Butler, Chapel Farm, Redmarley.

Yorkshire

161. Mr. H. H. Staveley, North Dalton, Driffield.

Class XXII.—TECHNICAL EDUCATION PRIZE FOR AGRICULTURAL SCHOOLS AND COLLEGES

163. Cup, value £5 5s.—Messrs. Gartons, Limited, Warrington

Class XXIII.—THE PERMANENT NITRATE COMMITTEE'S PRIZES.

23. First prize, £25.—Bucks barley: Mr. J. Horwood, Manor Farm, Drayton, Beauchamp.

CLASS XXII.

TECHNICAL EDUCATION CUP.—(For a collection of samples illustrating growth, origin, and cultivation of new varieties, or of samples unfit for malting.)

163.—Gartons Limited, seed growers and merchants, Warrington, Lancashire.

Foreign Entries (10).

Entered by R. Liebmann, 31, Southwark Street, S.E.

CLASS IV.

164.—Sample of Bohemian barley, grown by Hauser and Sobotka, Vienna. Quantity grown, 1,000 qrs; cleaning machinery, own.

CLASS V.

165.—Sample of Smyrna barley, grown by Pierre Aliotti, Smyrna. Quantity grown, 5,000 qrs.; cleaning machinery, own.

166.—Sample of Ouchac barley, grown by Pierre Aliotti, Smyrna. Quantity grown, 5,000 qrs; cleaning machinery, own.

Entered by G. Paterson & Co., 30, Great St. Helens, E.C.

CLASS VIII.

167.—Sample of Asia Minor barley, grown by Ismail Effendi, Kutahieh. Soil, calcareous; subsoil, siliceous; manure, none; sown, February; cut, September; quantity grown, 3,000 qrs.; cleaning machinery, A. Aliotti's.

Entered by Spillers & Bakers, Limited, Cardiff.

CLASS V.

168.—Sample of Ouchac barley. Cleaning machinery, Boby's.

CLASS VI.

169.—Sample of Chilian barley. Seed sown, Chevalier; cleaning machinery, Boby's.

170.—Sample of Chilian barley. Seed sown, Chevalier; cleaning machinery, Boby's.

CLASS VIII.

171.—Sample of Smyrna barley; cleaning machinery, Boby's.

172.—Sample of Gaza barley; cleaning machinery, Boby's.

173.—Sample of Beyrout barley; cleaning machinery, Boby's.

CLASS XXVIII.

For best Sheaf or collection of Sheaves.

174.—King, E. W. & Co., growers, Coggeshall, Essex. Soil, mixed; subsoil, mixed; crops 1899, peas; 1893, peas; seed sown, E. W. King & Co.'s "Gol. Chevalier"; manure, Odam's and farmyard; sown, March 16; cut August 13.

175.—Pedley, J., grower, Great Barford, Beds. Soil, mixed; subsoil, chalk; crops 1899, barley; 1898, roots; seed sown, Webb's "Chevalier"; manure, Joseph Fison & Co.'s; sown, middle March; cut, middle August.

176.—Seabrook, R., grower, Tolleshunt D'Arcy, Essex. Soil, mixed; crops, 1899, mangolds; 1898 Lucerne; seed sown Webb's "Kin. Chevalier"; sown, March 13; cut, August 14.

The Hop Competition.

By Lupulin.

English hop growers have no other such favourable opportunity as that provided annually in this exhibition for comparing and testing the results of their labours and experiments, and for bringing their products under the notice of the consumers, into whose possession their growths must ultimately be conveyed. A large display of our hops, which occupy an equally important position in the brewery with barley, might therefore be naturally expected, but although we find the hop plant figuring conspicuously as an ornament to the official catalogue, it is disappointing to meet with so few exhibits in

one special section. This year there are only 41 entries, and although a small increase has taken place from the exhibition of 1899, it is evident that so small a number cannot be accepted as adequately representing an industry in which nearly 3,000 farmers are engaged in the cultivation of upwards of 50,000 acres of hop land.

It is hardly within my province to discuss here the reasons which may be advanced in explanation of such a meagre result, but I cannot help comparing our section with that of malting and seed barley, which, as stated in the preface to the catalogue, "has for years past formed one of the salient features of the exhibition, and continues to be regarded with the keenest interest." Here we find 166 entries for English growers, and I am not surprised at this result when I know of the special attention that has been given to the competition by competent experts, and when I glance down the long list of prizes offered. In the hop section we ought to secure at least 100 entries, and I believe this could be achieved under conditions similar to those which have brought about the success of the sister exhibition.

But I have rather to deal with the exhibits actually in evidence, and at the outset may say that, taking them as a whole, I am not able to describe them as equal in quality, and attractiveness to those of previous years. There is, with few exceptions, an absence of brightness in the samples, which, by the way, is somewhat emphasised by the unfavourable light to which they are subjected in the Arcade Gallery. Several of the samples are also tied tightly with bands of twine, thus being deprived of all elasticity, and thereby losing one of the chief characteristics sought for. I do not know who can be responsible for this manifest error, but it is clear that no samples can be done justice to under such conditions. The practice of judging from different samples from those placed on the exhibition counters deprives visitors of the advantage of seeing the hops from the same point of view as the judges. Therefore, criticism becomes difficult, and while I have not the slightest reason for the suggestion of any partiality in the judging, it would be most satisfactory to be able to confirm it in each case, which, with such different opportunities of observation, it is almost impossible to do.

The gold medal (the champion prize of the hop world) is awarded to Mr. Sydney Neame, of Selling, for his exhibit in Class 1 (East Kent Goldings, suitable for pale ales). This highly-honoured sample is peculiarly bright, very aromatic, full of condition, smart, and well-finished. But it appears to me to be rather deficient in management, and certainly the cones were more broken than they should be in a perfect sample. In comparison with the samples subamitted by Mr. W. F. Pudge, Bishop's Froome, in Class 6, I venture to suggest that Mr. Neame hardly substantiated his claim to the highest award. Mr. Pudge's hops fully sustain his previous reputation as a painstaking grower and manager. Uniformly whole throughout the bulk (hardly a single cone being broken), of delicate and even colour of palest green graduated to rich primrose, the management and finish showing a bright face and an exceptionally thick side, these samples seemed to me to stand out above all their competitors, and I venture to think that my opinion will be confirmed by many other critics during the week. Hypercriticism might suggest that the hops had been too highly pressed in the pockets, and that therefore they were shown to undue advantage. But, putting this aside as comparatively immaterial, the fact of super-excellence remains indisputable, and I am glad to see that it is recognised by the award to Mr. Pudge of both first and second prizes in his class.

The first prize in Class 2 (Mid Kent pale ale Goldings) is taken by Mr. E. J. Goodwin, Wateringbury, with a fine sample, fairly whole and of good colour.

In Class 3 (East and Mid Kents ordinary) three prizes were awarded. The first to Mr. W. Lillywhite, Thanington; the second to Mr. W. Rogers, Maplescombe; and the third to Mr. R. H. Alexander, Gordhurst. Mr. Lillywhite's is an attractive sample of bold hops, of good greenish colour, showing a thick side.

Three prizes were also awarded in Class 4 (Weald of Kent and Sussex) to Mr. P. Manwaring, Breachley; Mr. A. Roberts, Beckley; and Mr. Gilbert Eames, Midhurst, the last-named also taking first prize in Class 5. The whole of these hops are of good quality, but call for no special remark except that I think a little less drying would have improved Mr. Eames's sample in Class 5, and that a better sample might have been drawn and presented in more attractive form.

I have already noticed the Midland Counties exhibit, and therefore need only mention further in this connection that Mr. J. F. Twinberrow, Suckley, Worcester, carried off the third prize in this class with a sufficiently good sample to encourage him to exhibit next year, when he will doubtless come nearer to the front.

Arriving at Class 8 (Farnham and Country Farnham), in which such splendid specimens were shown, and where the gold medal found a claimant last year, I must confess to disappointment. Messrs. Seward (Weston), Mr. J. Chalcraft (Aldersnapp), and Mr. J. Brigent (Alton), take the three prizes awarded, and although there is not much fault to be found with the quality and management, the hops do not come up to the high standard established by the samples shown in 1899.

The luncheon speeches do not provide me with any copy, as, though the judges of hops were toasted with their *confrères* in other sections, there was, unfortunately, no response by any representative of the industry. Speakers in the interests of barley-growing took credit for the fact that thereby the plough is kept going in England, as the consumption of beer and whisky is annually increasing. But although no word of encouragement and commendation was uttered on behalf of hops, I would emphasise the fact that our industry employs more labour and occupies more capital per acre than any other branch of agriculture, and therefore is deserving of at least equal recognition, especially in a gathering whose *raison d'être* is the promotion of the interests of brewers, the only customers the hop farmer can look for.

Annexed is a list of the judges:—

Hop Judges.

Chairman: Burnett Tabrum, J.P. (Tabrum and Son), London. Factors: D. H. Gaskain (D. H. Gaskain and Co.), London; H. E. Jones (Wests, Jones and Co.), London; Stuart Neame (Wild, Neame and Co.), London; Bertram Noakes (J. T. Noakes and Co.), London. Merchants: C. Oscar Gridley (Cattley, Gridley and Co.), London; Lionel H. Hanbury (Wood, Field and Hanbury), London; J. Hopkins Meredith (J. Hopkins Meredith and Co), Worcester; Edward Webb (E. Webb and Sons), Wordsley, Stourbridge.

SOCIETIES.

Hunters' Improvement Society: The Question of Army Remounts.

Mr. J. C. Straker, M.F.H. (president) occupied the chair at a Council meeting of this Society held on Tuesday at 12, Hanover Square, London, W. On the motion of the President, it was unanimously resolved to tender to Lady Simpson the sincere condolence of the Council with the severe loss which she had sustained by the death of their late colleague, Sir Henry Simpson, who had been a member of the Society since March, 1885—in fact, was one of its original members, and had occupied a seat on the Council by election on three separate occasions.

Finance Committee.

Mr. C. W. Tindall (chairman) presented the financial statement, indicating that the balance at the bank on the current account was £144 13s.; receipts since last meeting, £102 16s. 6d.; arrears of subscription, £44 2s.; accounts for payment, £91 19s. 2d. This report was adopted.

Editing Committee.

Hon. Alexander Parker (vice-chairman) reported that the Committee had accepted the entries of the following mares, which had been inspected by members of the Society in accordance with the rules:—

Mare	Owner.
Alice	Henry Wickham.
Clover	C. Anstee.
Ladysmith	S. Lee Smith.
Polly Glint	Norman Robinson.
Quadroon	Earl of Powis.
Shamrock	John Kerr.
Stackallan	W. T. Bennett.
Sylvia	W. Henry Barber.
Thurese	Mrs. C. A. Keith-Falconer

The various letters and suggestions which had been received from Mr. W. Phillpotts-Williams urging the establishment of a national stud managed by the Hunters' Improvement Society at the expense of the Government had been printed and distributed to the Committee since the last meeting of the Council, and had been considered that day, and the Committee unanimously agreed that the suggestions put forward were not such as the Society could support.

In the discussion following the presentation of this report several members of the Council pointed out that the name of the Society had been publicly associated with the scheme, though this was the first occasion on which the Council could officially disclaim their connection with the suggestions put forward by Mr. Phillpotts-Williams. In their opinion the scheme was unworkable and very expensive.

Horse Show Committee.

Hon Alexander Parker (Chairman) stated that the dates of the 1901 show would be March 12th to 15th. The schedule of prizes had been carefully revised by the Committee, who recommended that there should be a class for thoroughbred colts, three years old, and another class for registered hunter sires, three years old and upwards, with three premiums of £10 each in each class, and £5 to the breeder of the best registered hunter sire. They recommended no alteration in the young stock classes, with the one exception that the two special prizes of £10 should be given for the best colt or gelding and for the best filly respectively. The classes for mares in the riding section should be grouped together, one for four-year-old mares and one for five and six-year-old mares, with a special prize for the best mare in these two classes. The classes for five-year-old mares and geldings, capable of carrying different weights, would be retained.

As strong representations had been made to the Committee upon the practice of covering the horses with canvas during the time that the show was open, the stewards were deputed to enforce the rule, which should in future be printed in red both in the schedule and on the entry form.

The veterinary and judging arrangements would remain the same as at the last show. The Committee had further considered the nomination of judges, etc., sent in by the council, and presented their recommendations thereon.

A statement showing the list of awards of the Society's medals at associated shows during 1900 indicated that they had been distributed as follows:

Scheme A	Gold	Brood mares	26
Scheme B	Gold	Brood mares (one-day shows)	13
Scheme C	Silver	Fillies	53
Scheme D	Silver	Colts, geldings, and fillies	10
Scheme E	Silver	Qualified hunters	13

As regards the arrangements for 1901 the Committee recommended that schemes A, B, and C be continued on the same lines, while to draft the conditions of offer in accordance with the Council's resolution of April 5th last, they suggested that under D an extra silver medal be given for the best hunter colt three years old and upwards, registered in the Hunter Stud Book, and that scheme E should be so worded as to permit the produce of all thoroughbred stallions and registered hunter sires to compete for such medals. This report was adopted.

Army Remounts.

The Chairman presented the following report of the Special Committee, which, after a very lengthy meeting on the previous day, had been drafted for the Council's consideration and approval:—

1. We are of opinion that the Queen's Premium horses in the United Kingdom should be considerably increased under the auspices of the Royal Commission on Horse Breeding, if the Commission see their way to recommend the same.

2. The Government should agree to purchase in each year such animals as they may approve, at three years old off in September.

3. On September 1st the selected animals would become the property of the Government, who would pay the owner £35, and he in return would agree to keep the animal for one year, more or less, at the rate of £10 per annum, the animal to be kept in proper condition. Should the animal die the Government would sustain the loss, but the owner would in that case not be paid for the keep. Should the animal not be kept in proper condition the Government would reserve the right to reduce the amount of £10 paid for keep accordingly. Should a veterinary surgeon be called in the Government would bear the expense.

4. They should determine upon certain shows or other fixed places conveniently situated for the inspection and purchase of such horses (undocked) at the fixed price of £35.

5. Further, the Government should distribute among the farmers of the United Kingdom the cast mares from both artillery and cavalry, free from hereditary disease and suitable for breeding purposes, subject to the following conditions.

6. The mares to remain the property of the Government, being lent for breeding purposes, the Government to pay the service fee to a premium stallion or selected sire, and the Government to have the refusal of the produce at three years old off, all such as pass to be taken at the fixed minimum price of £35 on September 1st in each year.

7. That small prizes of £5, £4, £3, £2, and £1, according to the number of entries, should be given at the country shows for the best remounts at three years off, and that the Government should be able to claim all animals shown in these classes.

8. The Hunters' Improvement Society will be willing to assist the scheme in every possible way, and consider that it would further the object of encouraging the breeding of horses suitable for the Army, and would bring the Remount Department and breeders in direct communication with each other.

9. The Special Committee considered that any scheme of breeding horses or of establishing large remount depots would be much more costly to the Government than the scheme above suggested by the Committee, and further, that whereas Government breeding establishments would discourage farmers in breeding for the Army, the latter would encourage them to do so. The Committee think that unless something of this sort be done that there will be fewer and fewer available horses bred every year in this country, and in case of war breaking out there would be no remounts obtainable at hand, when, perhaps, there might be difficulties in getting them from over the seas.

The Chairman said that the Committee had been carefully constituted at the meeting of the Royal Show at York, and was fully representative of the military and tenant-farmer interests on the Council, with the result that the report now presented, after a meeting lasting the whole of yesterday, was eminently practicable, being beneficial to the producer—the tenant-farmer—while providing the Government with a scheme enabling them to secure an adequate supply of remounts at a minimum of trouble and expense. The advantages claimed for these suggestions were:—

(a) The Government would be brought in direct contact with the tenant farmer.

(b) Who would receive the full price for his animal.

(c) With the opportunity of securing one of the small prizes, enhancing the value of the animal to him.

(d) By utilising the existing shows for the inspection and purchase of these remounts the necessity for creating any new machinery for bringing the horses together would be obviated, and would save the Government any trouble in the matter.

(e) Lastly, but most important, the scheme would enlist the sympathy and support of the British tenant farmer in the production of suitable remounts upon which the Government could draw at a moment's notice in the event of our being involved in a big Continental war.

The Secretary was instructed to convey the suggestions to the Secretary of State for War through the Inspector-General of Remounts.

Medals at National Shows.

On the motion of Sir R. D. Green-Price it was unanimously resolved to offer two gold medals for the best hunter filly not exceeding three years old, exhibited at the 1901 shows of the Royal Agricultural Society of England and the Highland and Agricultural Society of Scotland, and two gold medals for the best hunter filly not exceeding three years old, and for the best two-year-old colt by an Irish regis-

tered thoroughbred stallion out of a mare registered in the Hunter Stud Book, exhibited at the summer show of the Royal Dublin Society.

General Meeting in Dublin.

The suggestion made at the general meeting of members in Dublin that a joint committee be appointed to consider the question of the Society's further encouragement of suitable stallions in Ireland was considered, together with a letter from Mr. W. T. Trench, and as the questions raised were of great importance, it was deemed desirable to refer the whole subject to the general meeting of members next March.

Election of Councilman.

It was resolved to invite Mr. R. Clayton Swan to fill the vacancy caused by the death of Mr. William Wright, and the Council then adjourned till Thursday, December 13th.

English Jersey Cattle Society.

A Council meeting of this Society was held at 7, Princes Street, Hanover Square, on Wednesday last.

A letter was read from Mr. H. S. Redfield, of the American Jersey Cattle Club, submitting proof of proposed alterations in the U.S.A. bye-laws regarding the entry of imported cattle, and inquiring as to the methods adopted for the identification of cattle imported from Jersey into this country. The secretary was instructed to reply to Mr. Redfield as to the methods and means of identification at present in use between England and the Island of Jersey. A communication was also directed to be sent to the secretary of the Royal Jersey Agricultural Society.

Mr. Mathews, on behalf of the General Purposes Committee, reported that they had examined the statement of funds. The balance of the current account at the bank amounted to £380 12s. 2d. Expenses in connection with the butter test prize money, etc., were recommended for payment.

Printed reports of the Society's butter tests held during the year were laid on the table, and elicited a lengthy and interesting discussion as to the comparative yields of cows exhibited at the various shows. It was finally decided to offer the following prizes for butter tests in 1901.—

	1st prize.	2nd prize.	3rd prize.	Special butter prize.
Royal Jersey Agricultural Society	Gold medal or £10	Silver medal	Bronze medal	£1
*Bath and West of England Society (two classes, open to all breeds):—				
Cows under 900 lb. live weight	£10	£3	£2	£1
Cows 900 lb. live weight and over	£10	£3	£2	
Royal Counties Society ..	Gold medal or £10	Silver medal & £5	Bronze medal & £3	£1
Tunbridge Wells Society	Do.	Do.	Do.	£1
Tring Agricultural Society	Do.	Do	Do.	£1
London Dairy Show	Do.	Do.	Do.	£1

* Gold, silver, and bronze medals will be given for the three best Jerseys in the test eligible for the Herd Book.

Mr. George Murray-Smith, of Gumley Hall, Leicestershire, was proposed a member of Council to fill the vacancy caused by Mr. Ernest Mathews becoming President.

The date of the next Council meeting was left to be arranged by the Secretary in February.

Glasgow Agricultural Discussion Society.

The annual meeting of the Glasgow and West of Scotland Agricultural Discussion Society was held on Wednesday in the society's office, Hope Street, Mr. Thomas Fulton, Shields, Govan, presiding. The secretary (Mr. A. MacNeillage) submitted the annual report, which stated that the course of lectures last session had been very successful, and were well attended. There was a credit balance of £2 0s. 10d. The report also referred to the loss sustained by the society through the death of Mr. Alexander Wilson, Langfaulds, a former president of the society, and one who had been a leading member for many years. The report was adopted. On the motion of the chairman, Mr. Robert Howie, Netheraulds House, was unanimously elected president for the ensuing year. Mr. Fulton, the retiring president, was elected a vice-president.

Donington Fair.—This fair, which is one of the most important in the southern part of Lincolnshire, being noted for a very fine stamp of cart horses, was held on Wednesday. Dealers were present from London and many of the provincial centres. The best of the draught horses were in demand at prices ranging from 50gs. to 70gs. Strong horses suitable for van purposes were less difficult to sell, and some of these made up to 40gs. Drive ponies, £6 to £10; good foals, £14 to £18. In the beast fair business was not over brisk. There was a nice show of stores. Steers and heifers, £13 to £15; drapes, £10 to £13; and young stock, £5 to £7 per head. There was a demand for in-calvers; heifers, to £17 10s.; cows, £19 to £22.

LITERARY NOTICES.

French Agriculture.

Agricultural industry in France has made considerable advances during the century which is drawing to its close. Great changes are observable in practice owing to improvements in machinery which continue to be forthcoming. There has also been an increase in the yield of produce per acre, due to enlightened cultivation, the more general use of manures, and better appliances. A volume* which puts on record these changes cannot fail to be both interesting and useful. M. Convert has done this work well in the book under notice, which forms one of Baillière and Sons' "Encyclopédie Industrielle." The volume is divided into four parts, which are conveniently arranged for study. The first is devoted to climate and soil and the division of land into holdings, with explanations of the manner in which it is cultivated, either directly by the owners, by ordinary tenants, or on the metoyage system. In the latter mode the produce is divided between the owner and occupier of land, but it is less followed than formerly, only one-tenth of the land being now farmed in this manner. On the other hand, the owners, large and small, cultivate more than half the land. Details are given of the value of the land, the agricultural population, wages of workers on the soil, the cost and extent of machinery, implements, live stock, and manures. The second part of the volume treats of cereal and potato cultivation, and gives statistics relating to the export of wheat, also notes on legislation in France respecting cereals, and a history of the price of wheat. The "plantes industrielle," such as the sugar beet, colza, hemp, flax, hops, chicory, coffee, olive, and vine are similarly dealt with. In the last section are given particulars of farm animals, dairy and meat supply, and the foreign trade in cattle, as well as notes on wool and silk. The volume is a very complete and interesting account of French agriculture, and can be studied with advantage by all interested in land questions. M. Convert may be congratulated on having produced a most valuable book.

The pastoral progress of New South Wales has been much less satisfactory than the agricultural. The latest returns in regard to sheep show a total of 36,314,000; these figures are for December, 1899, and it is hoped that the numbers will not be any further reduced, as, with one exception, they are lower than those of any year since 1880. The maximum number of sheep in the colony was 61,831,000 in 1891, every year since showing a large reduction. The number of horses at the present time is 480,700—a much smaller total than in any of the previous nine years. The number of cattle is 1,883,000, which is considerably below the average of the past ten years, but so great has been the attention paid to dairying that the value of the production from cattle is yearly increasing. The number of dairy cows in the colony is now 416,000, and the weight of butter produced 31,483,600lbs., and of cheese 3,245,300lbs. In spite of the reduced number of sheep, wool has maintained its high position among the exports of the colony. Included in the total value of domestic produce exported in 1899 is wool valued at £10,020,495.

The Agent-General for New South Wales has also favoured us with a copy of a second and enlarged edition of an illustrated brochure on the New South Wales contingents to South Africa. It contains a number of portraits of the officers and men, and also of the nurses who accompanied them, whilst there is a "Roll Call of Honour," being the names of every officer and man from the colony who took part in the war in South Africa.

The Essex Technical Instruction Committee have just issued a report on the visit of the Essex farmers' party to Denmark during May and June of this year. The report was compiled by Mrs. S. Dymond from notes taken during the trip by members of the party, from manuscripts of the addresses delivered, and from information supplied by the Danish experts and others. There are several illustrations reproduced from photographs.

The West of Scotland Agricultural College has lately published a bulletin giving reports on its experiments on the manuring of potatoes carried out in 1899, written by Professor R. Patrick Wright, F.H.A.S., F.R.S.E., and a report on the influence of manures on the quality of potatoes, by Professor John H. Paterson, Ph.D.

The 1901 edition of Zadkiel's Almanac has now been published. This almanac, which is in its seventy-first year, is so well known that it needs no describing here. The latest edition is similar to its immediate predecessors, being full of useful tables, forecasts of the weather, "Voice of the Stars," and "astronomical phenomena." It is published by Messrs. Glen and Co., 14, Red Lion Court, Fleet Street, E.C.

* "L'Industrie Agricole." F. Convert, Professeur d'Economie rurale a l'Institut national agronomique. Paris: Librairie J.-B. Bailliere et Fils, 19, Rue Hautefeuille. 1901

NEWS NOTES.

Gored to Death by a Bull.—A farm labourer named Greensides, while crossing a field near Hull on Monday, was gored by a bull, which inflicted such terrible injuries that the man lived only half an hour after the attack.

The Crossley Gas Engine Company, Manchester, have lately issued a new catalogue and price list of their famous gas engines, in which considerable alterations both as to powers of the engines and in the prices are described. The company have entirely revised the whole of their gas engine designs and patterns, and the changes are considered to make them the finest engines of their kind in existence.

News has just come to hand of the death of Mr. John G. Springer, secretary of the American Southdown Sheepbreeders' Association. Mr. Springer died very suddenly from apoplexy, and he was actively engaged in his duties on the day of his death. He did a great deal of good work for the Association, and it will be difficult to fill his place, whilst he will also be greatly missed socially, as he was very popular.

Failure of a Notts Farmer.—At the Official Receiver's Office, Lincoln, on Monday, the first meeting was held of the creditors of Arthur Felix Gross, of Tiln Farm, Hayyton, Notts, farmer and milk dealer. The debtor's statement of affairs showed gross liabilities £6,720 4s., and a deficiency of £5,634 4s. 11d. was shown. The debtor attributed his failure to "bad seasons, loss on resale of beasts, heavy trade expenses last winter, and legal expenses." It was unanimously resolved that the estate remain in the hands of the Official Receiver for administration, and the debtor was directed to furnish an account of his transactions during the last six months.

Braintree Market Sold.—The Urban District Council of Braintree have concluded negotiations for the purchase of the market rights and tolls, together with the freehold of the market square and fair field, for the sum of £4,500. An order had been issued by the Board of Agriculture closing the market after October 1, but an extension of time has been granted to enable the Council to complete the purchase and provide proper accommodation for cattle. The Charter of the market dates from the reign of King John, and for many years the manorial rights have been in the hands of a local auctioneer. It is proposed to convert the spacious field in the centre of the town, on which fairs are held, into a public recreation ground.

The French Wine Harvest.—Though in the Bordeaux and Médoc districts the wine harvest is declared to be one of the best and most prolific of the century, very disheartening reports have been received from the Bourgogne country and the valley of the Rhone. According to a message from Paris on Tuesday there are storms in various districts daily, which are the cause of incalculable damage. These storms, though of short duration, are of extreme severity, and at Salces three horses, which were harnessed to carts loaded with grapes, were struck by lightning and killed. The *Temps* correspondent telegraphs that the disaster is general. Half the grape crop is spoiled by the rain which also prevents the threshing of the corn. The vine people have been unable to plant their autumn seeds, and their potato crop has also almost entirely been spoiled. The correspondent declares that the misery in the Eastern Pyrenees will be very great this winter. The wine growers of Auvergne, Bourgogne, the Rhone, and Saone have petitioned the Minister of War to release the Reservists from their annual training as they are extremely short-handed owing to the difficulties caused by the bad weather. The Minister has promised to accede to their desire as far as is compatible with the exigencies of the military service.

Hull Fair.—The annual fair at Hull was commenced on Thursday, when Mr. H. Swallow sold about seventy Lincoln longwool shearling rams. Mr. C. M. Johnson's (Kingsthorpe) rams fetched an average of nearly £7; ten rams belonging to Mr. Tom Sasswell (Pointon) sold at about £12 each; and Mr. Swallow's lot realised an average of £8 11s. Fifteen rams belonging to Mr. W. Watson brought £7 each, and a number from Brampton Brian, the property of Mr. Hughes, reached an average of £11 1s. each. Breeding ewes, the property of Mr. H. Fawcett, sold at 44s. each, and Lincoln longwool gimmer sheep realised an average of 52s. each. Mr. Robert Leonard sold forty shearlings belonging to Mr. G. M. Gale at an average of 5½gs. Mr. Richard Hornsey disposed of twenty-five shearling rams, the property of Mr. G. M. Hayles (Manor House), at an average of 56s. each. Mr. George Taunton sold fifteen shearling rams for Mr. Robert Taylor (Withernwick) at about £5 8s. each, and six shearlings for Mr. R. Richardson at about £5 each. At the horse fair there was a large show and a very good demand. From £25 to £30 was readily paid for some good Hackney mares and geldings, and foals realised £8 8s. to £10 10s.; useful cart horses made £18 to £25, and some good two-year-old colts £20 to £24. A lot of inferior horses were sold at £5 to £10.

MOLASSINE

FOOD FOR HORSES, CATTLE, SHEEP, PIGS, etc.

Replacing an equal quantity of Fodder.

A STAPLE FOOD AND CONDIMENT COMBINED. **Patented in all the principal Countries in the World.**

ANNUAL CONSUMPTION, 1,200,000 CWT.

Manufactured by Messrs. Henry Tate & Sons, Sugar Refineries, London and Liverpool, exclusively for the Molassine Company, Ltd. Introduced into the Imperial and Royal Stables of **GERMANY** and **RUSSIA.** It is adopted throughout **THE GERMAN ARMY,** and during the few months it has been on the Market in the United Kingdom it has met with a **most favourable reception,** which is evidenced by the **many Repeat Orders** we are daily receiving, and assurances of its **permanent adoption.**

MOLASSINE contains 36 to 40 per cent. of **Sugar,** and is a combination of **Sugar, Treacle,** or **Syrup with Vegetable substances.** It is guaranteed to consist exclusively of natural organic materials.

RESULTS OF FEEDING WITH MOLASSINE.

IT STIMULATES APPETITE, IMPROVES DIGESTION. GRIPE AND DIARRHŒA COMPLETELY DISAPPEAR.

HORSES. From 2 to 4 lbs. per day.

CATTLE. 8 lbs. per day.
SHEEP. 1½ lbs. per day.

PIGS. Per 100 lbs. of their own weight, from 1 lb. to 1½ lbs.

MILCH COWS. 5 lbs. per day.

After a few weeks' feeding are in the **best condition,** and show **strength, highest working power,** and a **smooth** and **glossy coat.**

Thrive quickly, and especially in the last period of fattening, take willingly to their food, and thus **become weeks sooner ready for the market. The meat is of best quality.**

Eat Molassine greedily. The disagreeable smell of the Pig-Stye disappears, the **animals are in the best health.**

After 8 to 10 days' feeding give more milk, richer in cream.

MOLASSINE replaces an Equal Quantity of FODDER.

MOLASSINE packed in bags of 1½ cwt. each.

rails, Sugar Works of Messrs. **HENRY TATE and SONS, SILVERTOWN, ESSEX.**

Price per ton, £6 15s. Price per cwt. £0 7s. 6d.

For buyers of regular weekly or monthly supplies we shall be pleased to quote special prices.

WINTER STOCKS SHOULD BE ORDERED WITHOUT DELAY.

For samples and prices apply to The MOLASSINE COMPANY, Ltd, 36, Mark Lane, London, E.C.

First Class Representatives and Distributors throughout the United Kingdom wanted.

Farm, Live Stock, Dairy, Milling, Malting, Hops, &c.

(REGISTERED AS A NEWSPAPER AT THE GENERAL POST OFFICE.)

VOL. LXXXIII. No. 3605. LONDON, MONDAY, OCTOBER 29, 1900. THIRTY-TWO PAGES PRICE 3D.

SOCIETIES.

THE NATIONAL ASSOCIATION of ENGLISH HOP GROWERS.
(Founded June, 1894.)

PRESIDENT.—COLONEL BROOKFIELD, M.P.

HON. TREASURER.—E. ALBERT WHITE, ESQ., Beltring, Kent.

SECRETARY.—THOMAS IRONMONGER.

CENTRAL OFFICE.—61, HOP EXCHANGE, BOROUGH, LONDON.

GENERAL OBJECTS.

To promote united action among English hop growers as a body for the improvement of the industry.

To promote, support, or oppose such legislative and other measures as may affect the industry.

To collect and publish, for the benefit of members, special statistical and other useful information relating to English and foreign hop culture.

To arrange for arbitrations in cases of dispute between sellers and buyers of hops, for the avoidance of litigation.

ANNUAL SUBSCRIPTIONS.

Ordinary members, 3d. per acre of hops under cultivation; honorary members, £1 1s.; hop factors, £1 1s.

CENTRAL AND ASSOCIATED CHAMBERS OF AGRICULTURE.

NOTICE OF MEETING.

A MEETING of the COUNCIL of the CENTRAL AND ASSOCIATED CHAMBERS OF AGRICULTURE will be held (by permission of the Society of Arts) at the House of the Society of Arts, John Street, Adelphi, on Tuesday, November 6, 1900, at 11 o'clock in the forenoon.

Members of Council representing either the Central Chamber or Associated Chambers are requested to attend.

Subscribing Members of the Central Chamber are invited to be present, and may speak by permission of the Chairman, but are not entitled to move resolutions or to vote.

AGENDA.

To transact General Business.
To receive Communications.
To consider Alterations in the Laws and Bye-Laws proposed by the Business Committee.
To receive Reports of Committees (if any).
To receive "Statement of Legislation required in the Agricultural Interest," prepared by the Business and Parliamentary Committees in pursuance of Council's resolution of May 29th last.
To consider the following subjects:—
(1) The Report of the Royal Commission on Local Taxation (if issued).
(2) Agricultural Insurance.

Associated Chambers and Clubs are requested to consider the above subjects, and to send up any resolutions which they may pass thereupon to the Secretary of the Central Chamber before the Meeting of the Business Committee, at 8 p.m. on Monday, November 5th, 1900. Suggestions of subjects for discussion at future Meetings of the Council should be forwarded at the same time.

ERNEST H. GODFREY, Secretary.

SMITHFIELD CLUB FAT STOCK SHOW, DECEMBER 10 to 14, 1900, at the ROYAL AGRICULTURAL HALL, ISLINGTON.

Entries close as follows:—Live Stock (Cattle, Sheep, Pigs, and Carcase Competition), Nov. 1; Post Entries, Nov. 5. The entries for Implements have already closed on Oct. 5.

Prize Lists, Entry Forms, and other information can be obtained on application to E. J. POWELL, Sec., 12, Hanover-square, London, W.

AUCTION SALES (*Continued*).

ROTHERHITHE, within about three-quarters of a mile of the Tower Bridge, near the entrance to the proposed new Rotherhithe and Radcliff Tunnel and the Surrey Commercial Docks.—Very extensive Freehold Riverside Premises and Steam Flour Mills, fitted with valuable modern plant and machinery on the roller system, with granaries, warehouses, engine and boiler houses, dwelling-houses, yards, stabling, etc., now and for many years past in the occupation of Messrs. J. B. and T. H. Perks, and for sale, in its entirety, with possession on completion of the purchase. The property possesses the important frontage to the Thames of about 96ft. 6in., with wharfage and lay-by for barges, frontages of about 98ft. 9in. on the north side, and 104ft. on the south side of Rotherhithe-street, also a long side frontage to Gilham's-court, the total ground area being about 18,000 square feet, exclusive of the site of the old mill stream, which extends to Paradise Street in the rear, and has an area of about 7,000ft. super. The property, from its considerable river frontage, situation, and extent, would also be suitable for wharfingers, timber merchants, large manufacturing premises, electric engineering works or other purposes.—Messrs.

DEBENHAM, TEWSON, FARMER, and BRIDGEWATER will SELL, at the Mart, Tokenhouse Yard, London, on Tuesday, November 27, at 2, in one lot, with possession, the exceedingly important FREEHOLD PROPERTY known as Rotherhithe Mill, and 9, 11, and 13, Rotherhithe-street, together with the whole of the valuable fixed plant and machinery. The premises comprise on the north side of Rotherhithe-street and abutting upon the River Thames a range of three two-storey granaries, all communicating, and dwelling-house adjoining; on the south side of Rotherhithe-street an open courtyard, with double entrance gates, extensive mill-house of five floors, with all necessary rolling and other machinery, gearing and accessories, engine and boiler houses, with 25-horse power beam engine and two horizontal boilers, tall chimney shaft, mill stores, yards, stabling for thirteen horses, coach-houses, large van shed, harness room, men's rooms, and loft, and dwelling-house No. 26, Gilham's-court, piece of vacant ground adjoining, also the old mill stream and water course from the River Thames. The mill premises communicate with the waterside granaries by an iron bridge over Rotherhithe-street.

Particulars of Messrs. HARRIES, WILKINSON, and RAIKES, Solicitors, 38, Nicholas-lane, Lombard-street, London, and of the Auctioneers, No. 80, Cheapside, London.

HOLMEWOOD, LANGTON, [illegible] miles from SOUTHBOROUGH and WELLS station, 2 miles of the S.E.R. Station at Tunbridge Wells, and about the same distance from Groombridge Station on the L.B. & S.C.R.).

MR. EDWARD JAS. CARTER has been instructed by J. J. BARTOW, Esq., to SELL by AUCTION at SPRINGBANK FARM, LANGTON, on WEDNESDAY, OCTOBER 31, [illegible] o'clock precisely,

We are always buyers of any class Machinery for prompt cash.—HENRY LEWIS & SONS, Thames Bank Ironworks, Reading.

SEEDS, PLANTS, ETC.

500,000 CABBAGE PLANTS. Fidler's Eclipse (the earliest and best in cultivation), Early Offenham, Wheeler's Imperial, and Ellam's Early. As ground must be cleared we will clear out; all one price, 2s. 6d. 1,000; 5,000 to 10,000, 2s. 3d.; any number above, 2s.; Scotch Drumhead, very hardy and good, 2s.; Sutton's Giant Drumhead, 2s. 6d.; these, if planted before Christmas, mean 50 tons of good keep for late summer and autumn. Please note.—A great Fruit Tree Sale takes place on the premises, Nov. 28, 1900.—W. HORNE AND SONS, Cliffe, Rochester, Kent.

500,000 PLANTS in each of the following well-known sorts:—Early Rainham, Enfield Market, Early Market and Daniel's Defiance Cabbage, all at 2s. 6d. per 1,000. Hicks' Hardy Winter White Cox Lettuce, 3s. 6d. per 1,000; free on rail at Sandwich Station for cash with order.—Z. COLEMAN, Seed and Plant Grower, High Street, Sandwich, Kent.

SEED WHEATS.—Garton's New White Monarch Wheat grown from seed supplied direct from Garton last year; hardy, heavy cropper, Straw very strong, ear very compact. Ambrose's Improved Red Wheat, an excellent variety, heavy cropper, fine quality Grain, Straw good and strong. Both the above varieties grown on gravel soil. Other kinds of Wheat can be supplied; also good Cabbage and Kale Plants.—For samples, prices, and particulars, apply to L. J. LEE Seed Grower and Merchant, Leagrave, Luton Beds.

SEED POTATOES.—Early, mid-season, and main crop varieties: Challenge, Conquest, British Queen, and Up-to-Date. All of excellent quality and shape, and exceptionally heavy croppers, grown specially for seed from select stocks. Special quotation for autumn delivery. Illustrated descriptive catalogue and prices on application to "Manager," Earl of Rosebery's Home Farm, Dalmeny, Park, Edinburgh.

GARTON'S WHITE MONARCH WHEAT, from seed direct from Messrs. Garton, 45s. per quarter, free on rail Billingshurst, L.B. & S.C.R.—Address, H. F. AND E. LOCKE KING, Rowner Mills, Billingshurst.

RIVETT'S WHEAT.—Very fine stock, grows two quarters per acre more than any other variety, and is not touched by birds; 34s. per quarter, cash with order. Seed from Webb's last year cost 76s. per quarter.—JOHN BARRON, Elvaston House, Borrowash, Derby.

CABBAGE PLANTS! CABBAGE PLANTS!—Autumn-sown, Enfield Market, Early Rainham, Wheeler's Imperial, Red Pickling, Early and Late Drumhead, White and Brown Cos Lettuce.—T. Davies, Tangley, Guildford.

SEEDS, PLANTS, ETC.

EXCELSIOR WHEAT. Selected expressly for Seed for the last 20 years, is very prolific, has produced sixty-four bushels of grain and 3 tons of straw per acre with ordinary cultivation. Grain of Superior Milling Quality, straw strong, clean and almost impossible to become laid. It is still the most profitable and hardy wheat to grow on all soils. Price 40s. per quarter, 36 stones nett, sacks included; on Rail for cash with order.—Send for Growers' reports proving above to THOS. CHETTLE, The Manor Farm, Reading.

SEED WHEAT.—Standard red and Squarehead. Heavy cropping varieties of fine quality, grown specially for seed from select stocks. Prices moderate. Samples, with illustrated descriptive catalogue of seed grain, on application to "Manager," Earl of Rosebery's Home Farm, Dalmeny Park, Edinburgh.

QUICK! QUICK!—Strong three-year-old plants, 15s. per 1,000 f.o.r.—E. W. DIVER, Manor House, Isleham, Cambs.

HALL'S SANITARY WASHABLE DISTEMPER

(PATENTED)

A NEW SANITARY WATER PAINT,

HAS GREAT ADVANTAGES,

SOME OF WHICH ARE AS FOLLOWS:—

It sets hard, Kills Vermin, and Disinfects.

It is washable in 3 weeks, does not scale, can be Painted or Varnished, and will Stand Inside or Outside.

It is made in Dark Rich Shades as well as in Light Tints, contains no Lead, and does not Turn Black.

It only requires the addition of Water to make it ready for use, so that anybody can apply it.

It is Cheaper, Cleaner, Healthier, and more Artistic than Wall Paper.

It makes an excellent Shading for Greenhouses, the inside quality lasting about 9 months, the outside quality several years

SILCOCK'S CALF REARING.

CALF MEAL

To rear Calves economically and profitably use SILCOCK'S SOLUBLE CALF MEAL. Thousands of Calves are reared on it annually; it is a true milk substitute, is very easily digested, dissolves at once in water, gives least trouble in preparing, does not scour, is very economical in use, as one pint makes one gallon of thick gruel, and it fits early for cake feeding. It contains about 80 per cent. of soluble feeding digestible ingredients, while in milk, butter-milk, and whey the figures stand at 12½, 9, and 6 per cent. respectively. With the minimum of cost and trouble SILCOCK'S CALF MEAL gives the maximum results. Use SILCOCK'S SOLUBLE CALF MEAL, feed regularly, in right quantity and at correct temperature and you will have little trouble in rearing paying calves.

Price, 12/6 per cwt., carriage paid. 5 cwt. lots, 12/-.

R. SILCOCK & SONS, Poulton-le-Fylde, Lancs.

FOOT-ROT.

D. CLARKE'S Carbolized WHEAT PROTECTOR.

WHEAT

WHEAT

BEST AND CHEAPEST DRESSING FOR SEEDS.

In use in England for OVER FIFTY YEARS, and is now being used extensively in the Colonies of Australia, New Zealand, and Central Africa.

A 9d. PACKET DRESSES 8 BUSHELS OF SEED.

This specific takes the place of Bluestone, and by its use the Seed is strongly carbolized and is protected both by the smell and taste from being eaten by birds and other pests. The seed also germinates quicker by its use.

Numerous Testimonials have been received, testifying that the "PROTECTOR"

Prevents Smut in Wheat, Oats, and Barley.
Prevents Destruction of Seed by Birds or Worms.
Seed germinates a fortnight earlier.
Saves a quarter bushel of Seed per acre.

Sold in packets **1/9** *and* **3/6** *each,* **7** *small packets* **10/6**, *or* **7** *large* **21/-**, *by Chemists and Medicine Vendors, or from Proprietor, Wilderness, Diss, on receipt of amount*

NO CURE! NO PAY!!

G. F. DAWES'

Is the only Guaranteed Cure for Lame Sheep, leaves the hoof and foot soft and healthy. Price 3s. and 1s. 6d. In Brown Pots only, sufficient to dress 80 Sheep and 40 Sheep.

Trial Pot free from the Manufactory.

SCAB IN SHEEP CURED IN ONE DIPPING.
NO CURE, NO PAY.
G. F. DAWES, Bury St. Edmund Suffolk

Frank Miller's

HARNESS COMPO.

Larger Box, better value than any other make, does more work with less labour, blacks, oils, and finishes with one application. Suitable for all users of heavy harness. Saddle Soap, Axle Oil, Hoof Dressing, Harness Oil.

Frank Miller's Peerless Shoe Blacking
Shines like Diamonds.

FRANK MILLER'S BLACK WAX POLISH
A Liquid Blacking for Box Calf.

Tower Chambers, Moorgate, London, E.C.

BIBBY'S "CREAM EQUIVALENT" for CALVES.

An Ounce of Fact is worth a Ton of Theory.

A STRIKING FACT.

In our Spring number of "Bibby's Quarterly" we reproduced the photographs of two groups of Calves which are now being reared at the Hornby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.

One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."

We asked our readers to tell us which of these groups were fed on New Milk, and 707 Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the "Cream Equivalent" fed Calves as having been fed on New Milk.

We think the above striking FACT speaks volumes for "Cream Equivalent."

The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.

SOLE MANUFACTURERS:—

J. BIBBY & SONS,
Exchange Chambers, Liverpool.

LEARNER'S PATENT FOOT-ROT CURE.

Leaves the hoof soft and pliable
3/- & 1/6 per tin Four 3/- for 10/- Post Free
ALFRED J. LEARNER, REDHILL, Surrey.

HUSK OR HOOSE

IN HEIFERS, CALVES & SHEEP

No time should be lost in attacking the above fatal disease at the onset, and for this

DAY, SON, & HEWITT'S

"BRONCHOLINE"

is without doubt the most effectual medicine extant, if given on first symptoms. It allays Bronchial irritation, destroys the parasites, soothes the lungs, and gives strength to overcome the malady. A well-adjusted dose acts as a capital *preventive*, and is equally invaluable for Tapeworms.

Price 7s. 6d. per ½-doz box.
Sold also by the half-gallon and gallon, at greatly reduced rates.

THE GASEOUS FLUID.

Unmatched for Fret, Colic, or Gripes in Horses, Diarrhœa, Scour, Debility, &c. Hoven or Blown Cattle and Sheep instantaneously relieved. For Coughs, Colds, Chills, and all weakly animals.

Price 1s. 9d. per bottle; 20s. per doz. box.

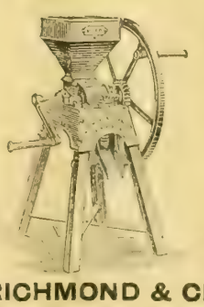
SAFETY FEEDER CHAFF CUTTERS.



TO COMPLY WITH THE NEW ACT OF PARLIAMENT.

GREAT COMPETITION at the Royal Agricultural Society of England's Birmingham Show, 1898.

SIXTEEN DIFFERENT APPLIANCES WERE TESTED AT THE TRIALS.

The Judges awarded the PRIZE of £10 to RICHMOND and CHANDLER, LIMITED, for their "MULTIPLEX" SAFETY FEEDER. Since Improved and numerous other Prizes have been awarded. Send for List to

RICHMOND & CHANDLER, LTD., MANCHESTER.

MOLASSINE.

A Staple Food & Condiment for Horses, Cattle, Sheep, & Pigs.

SEE ADVERTISEMENT ON BACK PAGE.—

3RD ANNUAL GOLD CUP BARLEY COMPETITION.

SEASON, 1900.

THE GOLD CUP BARLEY PRIZE consists of a massive Cup, entirely of gold, and is valued at 20 guineas. It is specially engraved, with particulars of the Competition, or the winner may elect to receive the prize in 20 guineas cash. Diplomas may also be awarded at the discretion of the Judges.

OPEN ONLY to USERS of the GOLD CUP BARLEY FERTILISERS.

Manufactured exclusively by

WILLIAM COLCHESTER, Chemical Manure Works, IPSWICH.

Entries Close November 17th.

Competing Samples should reach the Head Office by that date. Schedules, and all information, on application.

THOMAS'

PHOSPHATE MEAL

(BASIC SLAG),

THE CHEAPEST AVAILABLE SOURCE OF PHOSPHORIC ACID.

GUARANTEED AS TO PURITY, ANALYSIS AND FINENESS OF GRINDING.

TUBERCULOSIS IN MILK.

The District Councils, both urban and rural, in the West Riding of the County of York have formed themselves into an association for the purpose of taking united action in matters which concern them generally. The beginning is auspicious, and it is probable that much good may result. Last week there was a meeting in Leeds of the representative members of these various bodies; and the subject of discussion was as to the local autonomy required by the various bodies to enable them to fight against the spread of tuberculosis in milk. It appears that a committee had been appointed to go fully into the matter, and the report issued by that body was extremely interesting as well as useful. When the Corporation of the City of Leeds was seeking new Parliamentary powers it inserted in its Bill a clause to give it power to interfere with cowsheds and dairies situate outside its jurisdiction if they supplied milk within the city boundaries. At the time we called attention to the matter, and explained that it was not only unfair to the local authorities, but that it would also lead to that unsatisfactory state of affairs which always results from divided or dual authority. The committee appeared in opposition to this part of the Bill, and successfully, with the result that Leeds did not obtain the power to meddle with authorities beyond its borders. This was considered a victory, but it now turns out to be an extremely limited one. Shortly after this several other municipalities applied for similar powers to those asked for by Leeds. In the cases of Bradford, Halifax, and Sheffield, the committee attempted to oppose, and was much surprised in each case to find that it was held that they had no *locus standi*, and that in consequence their petitions were worthless, as they could not be heard. The absurdity of this decision needs but little explanation. If it were wrong that Leeds should have the right to interfere with matters situate beyond its jurisdiction, it is difficult to understand why Bradford, Halifax, and Sheffield should have such powers. It is a great pity that there was not an appeal, for the decision was so irrational and illogical as to only need explaining to make its absurdity apparent.

It is a still more strange thing that the President of the Local Government Board should agree to receive a deputation from the Yorkshire Councils, and then, at the last moment, refuse to do so. This hardly looks like fair treatment. The committee makes two very pertinent suggestions as to the conditions under which an outside authority should be entitled to interfere (if at all). They are that the borough or city shall not be entitled to interfere with cowsheds and dairies outside its own area unless it can show two things—first, that it has fully carried out the law upon the subject within its own boundaries; and, secondly, that the local authority with which it is endeavouring to interfere has been negligent in the execution of its duty upon the subject. These conditions seem most reasonable, and ought to be accepted by any municipality. Apart from the fact that there ought not to be one law for one city and another for its next neighbour, we cannot see any real reason for such powers. An ordinary municipal authority has quite enough—if not more than enough—to do in managing its own affairs without endeavouring to establish a sort of spurious suzerainty over its smaller neighbours. The matter must be fought out, and that right quickly. If all district councils would act as those of the West Riding of the County of Yorkshire, and then form an association representing the whole county, they would find—probably to their surprise—that they would be able to prove themselves much more powerful than all the municipalities in the country. We shall probably hear much more about the doings of the West Riding District Councils, but it will be a great pity if they are not backed up by other counties. The fight must be decided one way or the other now; and delay cannot mean any good. The claims are just as unreasonable on the part of the municipalities as it would be for the local councils to claim to go into the borough and inspect all the goods sent out.

The receipts on account of revenue from April 1, 1900, when there was a balance of £3,517,047, to October 20, 1900, were £56,287,040 against £55,420,045 in the corresponding period of the preceding financial year, which began with a balance of £3,919,173. The net expenditure was £101,230,000 against £62,605,754 to the same date in the previous year. The Treasury balances on October 20, 1900, amounted to £2,865,886, and at the same date in 1899 to £2,725,084.

SAMPLES.

By a Man of Mark Lane.

The following statement regarding the sugar bounties question appeared in the Parisian newspapers on Friday:—"The negotiations which have been proceeding in Paris between France, Germany, and Austria-Hungary on the sugar question are nearing their conclusion. It is regarded as almost certain that an agreement will be established between the three Powers for the suppression of the export bounties which have now been in existence for some time. The agreement will be based on an equivalent suppression, that is to say France, whose direct export bounties are higher than those of Germany and Austria-Hungary, will modify the Act of 1884 in such a way as to reduce the industrial advantages accorded to French sugars by the said Act, so that only that section of the bounties clause which is essentially agricultural will be left in force. The effect of this will be that the three countries will renounce their bounties to an equal extent, but from this to the final solution of the question is a long step.

"When the Franco-Austro-German agreement is definitively consummated negotiations will have to be begun with the sugar-importing countries which have instituted countervailing duties, in order to induce them to abolish those taxes, or to dissuade those countries which may show an inclination to establish fresh ones from doing so. It is only by the securing of such a result that the abolition of export bounties can be of any avail. If Great Britain agrees to give up compensating taxes the way will be prepared for the resumption of the work of the Brussels Conference, and it will then be possible to bring forward a definite scheme for an international convention for the regulation of sugar tariffs. The meeting of the conference is thus dependent on the issue of a series of negotiations, the result of which it is still difficult to foresee."

Mr. Akers-Douglas, M.P., will attend the annual dinner of the Nonington and Goodnestone Agricultural Association at the former place on Thursday evening next. On the 6th and 7th November he will preside at the dinners of the Dover, Deal, and District Agricultural Association, at Deal, and the Chislet and Herne Agricultural Association, at Herne Bay, respectively.

According to the *Siberian Messenger*, the harvest in Manchuria has been gathered in only over an area of about 8,300 acres out of the total area devoted to raising crops. At the same time, the greater portion of the harvest on the left bank of the Amur has also been lost owing to the lack of field labourers during the spring and summer, and of harvest men at this moment. The outlook is very gloomy, and the authorities are trying to stem the tide of immigration, as all the available supplies of food and corn will be required during the coming winter for the Russian troops quartered in various districts of Manchuria.

According to the second forecast of the cotton crop in Burma, issued by the Department of Land Records and Agriculture, Rangoon, on September 26th, the area under cultivation in the five principal cotton growing districts is 151,033 acres, or 2,470 acres more than last year. In Thayetmyo and the Lower Chindwin the crop has been damaged by the heavy rainfall, but otherwise the prospects are good.

AGRICULTURAL POLITICS.

By a Lobbyist.

I have excellent reasons for stating that Lord Salisbury has either asked, or will ask, Mr. Walter Long to again assume direction of the Board of Agriculture. The Prime Minister was deeply impressed during Mr. Long's previous tenure of the position with his considerable ability, the courage with which he pursued what he deemed to be the wise path, and his practical comprehension of the necessities of the agricultural interest. There was at one time a fear that the state of Mr. Long's health would induce him to decline the honour which it was shrewdly suspected the Premier meditated bestowing upon him.

However, it is now comprehended that there is no further justification for this fear. The stress of the election seems to have given him quite a new nerve. After securing his own seat he went into the Westbury division of Wiltshire, and worked assiduously for his brother, Colonel Chaloner. His speeches were marked by his old-time lucidity of expression and intelligence. It is an excellent thing that we are to have Mr. Long at the Board of Agriculture. This means continuity of policy.

Of course, though Mr. Long's brother, Colonel Chaloner, is among the rejected candidates, it is certain that he will not long remain outside St. Stephen's. He has placed the Conservative party under distinct obligations to him by the effective service he has rendered at bye-elections. The Colonel's oratorical method is particularly attractive. He has not command of the same sonorous English as has his brother, but he speaks with a breeziness, a dash, and a spirit that seldom fail to attract the sympathies and touch the emotions of his hearers. He practically, until ill-health, too, afflicted him, gave himself into the hands of the organisers of the party for electoral work; and I am bound to say that they were not slow in their appreciation of his value. The Colonel will thus, I repeat, soon be again in the lists as a candidate. Party gratitude renders this inevitable.

Will Mr. Plunkett remain at the head of the new Irish Agricultural Department? This question is, of course, suggested by his electoral defeat. It is certainly the fact that when first created the post was regarded as a Parliamentary one. No one dreamed of selecting its chief from outside Parliament, Who, too, would be the Parliamentary spokesman of the Board in the event of the vice-president being a non-Parliamentary official? True, the Chief Secretary could essay the task; but assuredly he has enough already upon his shoulders.

As a fact, the Board was created partially in order to relieve him of some of his responsibilities. True, too, the Irish Attorney-General and Irish Solicitor-General will also be in the House, but their duties and position are legal and not agrarian and industrial. One, of course, would be glad to see Mr. Plunkett safely launch the organisation of which he is really the parent; but the fact remains that the non-possession of a seat in the House of Commons is a fatal disqualification. The Vice-President of the Irish Board of Agriculture must have a seat at St. Stephen's.

Those friendly critics of Mr. Plunkett—and their criticism is filling columns of the *Times*—are not quite fair when they attribute his eviction from his old Parliamentary seat to religious bigotry. It was, indeed, something more than Orange pique and Orange prejudice that secured his defeat. There was a feeling of indignation throughout the whole constituency over the fact that Mr. Plunkett should have gone to the ranks of his opponents in order to secure a man to fill the chief administrative position at his disposal.

Mr. T. P. Gill, the secretary of the Irish Board, may be an able man; he may have studied agriculture with the dry-as-dust enthusiasm of an economist; he may be diligent, conscientious, and courteous. All these qualities and attainments he may possess; but there is over all the trail of Nationalism and Plan-of-Campaignism. Mr. Gill was in other years one of the ablest men in the Parnellite party, and he was also one of the men who defended Mr. Parnell's revolutionary land ideals and schemes. Men asked themselves, on learning of this appointment, if the methods advocated by Mr. Parnell were to be authoritatively applied. If this were to be the case then the imagination could anticipate nought by agrarian chaos.

It was not as if Mr. Plunkett had a restricted area to choose from. The Ulster system years ago secured an international reputation for intelligence and fairness. Among the men who were responsible for the continuance of this system could surely have been found one who would have given a well-remunerated service to the country and to agriculture.

Such an appointment would have been accepted as an assurance that the methods which had brought a measure of prosperity to the Ulster farmers were to be applied to the whole country. It would have been an indication that the new administration would be run on sane lines. It may be, of course, that Mr. Gill possesses altered views—he may regret his Parnellism and his Plan-of-Campaignism. The country, however, possesses no evidence of the fact; and, what is more, it has since the appointment received no assurance to this effect. Irish Conservatives were possessed not only by chagrin, but by fear as a result of Mr. Plunkett's nomination of Mr. Gill.

No man would rejoice more than I myself over Mr. Plunkett's return to the House of Commons. I shall rejoice if he be able to retain his Ministerial appointment. I believe he is sufficiently strong to keep Mr. Gill in check, should that gentleman desire to make experiments in order to test the wisdom of his earlier opinions. Should Mr. Plunkett be provided with another seat he will be the wiser for his salutary lesson. I repeat that this lesson is not the child of political and religious prejudice, but the offspring of chagrin and fear. Mr. Plunkett's high intelligence, his debating capacity, his ideals, and his personal popularity should make him a successful administrator. He is one of the higher-typed politicians—he belongs to the band of men who resort to politics not for the satisfaction of sordid ambitions, but because they look upon Parliament as the best machine for realising their ideals. His absence from St. Stephen's will thus mean a distinct loss to politics, and particularly to Irish politics. Still, I can understand the influences which induced his rejection.

PRACTICE WITH SCIENCE.

The Destruction of Leaves.

Mr. Spencer Pickering, of the Woburn Experimental Fruit Farm, has writen to the *Standard* drawing attention to the wanton and pernicious destruction of plant food which goes on all over London at this period of the year, namely, the burning of fallen leaves. "In nearly every square garden," he says, "a continuous stream of smoke may now be noticed, rendering the air perceptibly thicker in the vicinity; and even in the public parks, where some intelligence might be expected in the presiding horticultural authorities, the same operation progresses merrily, but on a larger scale, while the trees close by are all the time showing unmistakable signs of wanting the very nourishment of which they are being robbed by the ignorance of their custodians.

"Every country gardener in the kingdom knows the value of leaf mould, and learns in the earliest stages of his education the simple process by which it may be made, or rather the process by which it may be allowed to make itself, and one would hardly have thought that such a knowledge is beyond the capacity of his metropolitan brothers. A few prosecutions by the County Council under the Smoke Abatement Act would give a salutary impetus to the acquisition of this knowledge, and would save in the aggregate many hundreds of pounds to the dwellers in squares, besides saving many a good tree in our parks from death by starvation."

New Agricultural Patents.

Specially compiled for the MARK LANE EXPRESS by Mr. G. D. Howard (Hughes, Son, and Co.), Patent Agent, 38, Chancery Lane, London, W.C., of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

17,793.—W. J. Neil and W. Ogden, both of Manchester, for an invention for "Improvements in chaff-cutting machines."

18,015.—A. Ashmore and J. Nelson, of Fenchurch Street, London, for an invention for "A combined plough and fertiliser-distributor."

18,052.—R. J. Watts, of London, for an invention for "A new or improved portable creamery."

18,146.—W. Wylie, of Pollokshields, Glasgow, for an invention for "Improved arrangement of fittings for emigrant berths adaptable for horse stalls and cattle pens."

Patents Sealed.

15,041.—R. Wallace, of Castle Douglas, Kirkcudbrightshire, for an invention for "Distributing manure, etc."

15,574.—M. Baurmann, of Karst, near Neuss, Germany, for an invention for "Improvements relating to harrows."

Bad Meat and Putrid Rabbits: Heavy Fines.—At Clerkenwell Police Court on Tuesday Edwin Wainwright, of 31, Aylesbury Street, Clerkenwell, was fined £10 and costs for depositing for sale forty-five pieces of meat which were unfit for human food, whilst Albert Jackson, of 26, Chapel Street, Clerkenwell, was fined £15 and costs for having exposed for sale twenty-one pieces of rabbit which were so putrid as to make the magistrate ill for half an hour after he inspected them.

THE DAIRY.

Tuberculosis in Milk.

A private meeting of gentlemen representing the District Councils, urban and rural, of the west Riding was held at the Hotel Metropole, Leeds, on Tuesday, for the purpose of discussing the subject of tuberculosis in milk, and the preservation of local autonomy in the matter of the inspection and regulation of dairies. The committee of the District Councils were, it seems, successful last year in getting a clause inserted into the Leeds Corporation Bill limiting the powers of the Corporation to its own area, but when they tried recently to get a similar clause inserted in the Bills of the Bradford, Halifax, and Sheffield Corporations they failed. It was to consider the situation thus created that Tuesday's meeting was held. The chair was occupied by Mr. John Farrer, chairman of the Hunslet Rural District Council, and there were present nearly forty other representotives of District Councils. Dr. J. R. Kaye, medical officer of health to the West Riding County Council, and Mr. W. L. Williams, barrister, were also in atttendance.

The executive committee of the District Councils, who had been appointed to watch legislation dealing with the subject, presented an exhaustive report. It stated that by the Milk Shops Orders, as amended in 1899, sufficient powers were given to all the local authorities adopting them to ensure a pure supply of milk and the cleanliness of plant and utensils in and about dairies. The Lords Committee modified the "Model Milk Clauses" of the Leeds Corporation Bill by providing that nothing should be done by the Corporation outside their borough except by order of two justices, and then that no order should be made unless the justices were satisfied that the local authority had neglected or declined to deal with the case. Notwithstanding this decision on the part of the Lords Committee, the modifying clause—which was accepted by the district councils' committee as a tentative measure was struck out when the Bradford Bill came before the Police and Sanitary Committee of the House of Commons. Again, when the clauses in the Halifax Bill were petitioned against the Court of Referees refused the *locus standi* of the district councils—a decision which the committee suggested should be appealed against. The committee afterwards opposed the Sheffield Bill with some confidence, but in this case also the committee allowed the milk clauses to stand without modification. Members of Parliament representing the West Riding were approached and an interview was sought with the President of the Local Government Board with the object of preserving the local autonomy of the district councils; but in the end the President declined to receive the deputation.

It is believed, the Committee went on to say, that the Leeds Corporation intend at the earliest opportunity to obtain the repeal of their present milk clauses and substitute therefor the Model Clauses. The Committee believe that Leeds has not seriously endeavoured to exercise its present powers or given them a fair trial, and they feel that the neglect to do so should debar the Corporation from obtaining drastic power in other districts. Your Committee submit it should be a condition precedent to the granting of such powers as proposed to any county borough.

1. That the county borough applying for the same has effectively dealt with all cow sheds and milk shops in its own area, and enforced the Cow Sheds Order there.

2. That the outside authorities to be affected have neglected to perform their duties in the same matters, especially after notice from the county borough or County Council.

The Committee are, they state, forced to the conclusion that unless public attention be again drawn to the matter, the Local Government Board will favour the insertion of the "Model Milk Clauses" in any Bill promoted by a county borough. They are of opinion that the question is of such importance that general legislation is needed. In this connection they draw attention to the provisions of the Public Health (Scotland) Act, 1897, section 60 and 61, whereby it is provided (shortly)—That, if the medical officer of any district has evidence that any person in the district is suffering from any infectious disease attributable to milk from any dairy without the district, or that the milk from any such dairy is likely to cause any such disease to any person residing in the district, such medical officer shall forthwith intimate the same to the local authority of the district in which such dairy is situate, and such other local authority shall be bound forthwith by its medical officer to act as therein mentioned. These provisions, the Committee go on to say, not only preserve local autonomy and fix the responsibility on the proper authority, but also give an equal right for a local authority to require the council of any other local authority (including a county borough) to enforce the law in their district on notice given to them. This the "Model Milk Clauses," they allege, do not do. In the cases of Leeds, Sheffield, and Halifax, there is a considerable area of purely agricultural land within each borough where such a power might be applied, and if this principle is capable of application there, the local districts have as much right to the power as the county boroughs.

This report was received and considered in all its bearings, and eventually a representative committee was appointed to confer with the Sanitary Committee of the West Riding County Council and the County Boroughs upon the whole subject of tuberculosis in milk and in human beings, and to give effect to such agreement as may be come to for securing by legislation or otherwise the fullest practical means for protecting the purity of the milk supply of the West Riding, and the prevention and treatment of consumption in the human being.

The Committee were also empowered to devise a scheme under which the West Riding District Councils Association shall become a permanent institution, having for its object the protection of the interests of the various district councils concerned.

The conference with the Sanitary Committee of the West Riding County Council and the County Boroughs above referred to took place on Wednesday at Wakefield. The proceedings, which were presided over by Alderman Sugden (chairman of the West Riding Sanitary Committee), were held in private, but it is understood that the representatives of the County Council were sounded as to whether they were likely to give further support to the smaller public bodies in resisting the invasion of the county boroughs into their districts. The "education of Parliament" is, however—as Mr. Milnes Gaskell recently pointed out—such a costly business that, after much discussion, it was decided to invite the representatives of the county boroughs to a friendly conference, at which the whole subject of tuberculosis in milk and in human beings will be considered.

Mention was made in the course of the proceedings of the suggestion of Dr. Kaye, the West Riding Medical Officer of Health, that the County Council should combine with the county boroughs and the other smaller authorities in the erection and maintenance of a West Riding sanatorium for consumptives. The proposal was received with favour, but ways and means have yet to be considered, and how far it may be legally possible has yet to be decided. It is, however, hoped that the county boroughs will give the matter their favourable consideration. In any case, they are to be asked to attend the joint conference next month, at which the suggestion will be discussed. Dr. Kaye estimates that there are 6,000 sufferers from consumption in the West Riding. His suggestion is that the County Council should provide a model sanatorium somewhere in their district, and make a small fixed charge for maintenance against each sanitary authority sending a patient.

Show of Wensleydale Cheese and Butter.

The annual show of Wensleydale cheese and butter at Leyburn took place in the Town Hall on the 19th inst. On the whole the quality of the exhibits was in advance of previous displays. Mr. Thomas Nuttall, of Leicester, who judged the cheese, considered that whilst there is a marked improvement, a little more attention should be bestowed on the curing. One or two cheese in a lot were inferior in this respect, and the flat-shaped was not so good as the Stilton-shaped. The judge of the butter exhibits was Mr. Thomas Fairbank, King Edgley, who remarked that he had never examined finer produce in Yorkshire. A new feature of the prize list was a silver challenge trophy for farmers, given by Mrs. C. J. Burrill, Elm House. Thirty-one competitors exhibited Stilton-shaped cheese against twenty-eight last year, and flat-shaped cheese was represented by nineteen exhibits as against twenty-one. In the farmers' butter classes there were twenty-eight entries as compared with thirty a year ago, and in cottagers' butter twelve as against ten.

The awards were as follows:—Stilton-shaped cheeses—1 and 3, R. Ewbank, The Temple, Leyburn; 2 and 4, M. Hammond, Low Gill, Aysgarth. Flat-shaped cheeses—1, M. Spensley, Castle Bank, Leyburn; 2, W. Mason, Swinithwaite; 3, G. Bell, Nappa House, Aysgarth; 4, M. Hammond. Butter.—Farmers' class—1, Mrs. Hodgson, Berry House, Hudswell, Richmond; 2, Miss Lily Ewbank, The Temple, Leyburn; 3, R. D. Capstick, West Burton, Aysgarth. Cottagers' class—1, Mrs. Sarah Metcalfe, Spennithorne; 2, Mrs. Jane Pratt, Carperby; 3, Mrs. Vayro, Jervaulx Abbey, Thornton Steward.

Irish Dairy Association's Surprise Butter Competitions.

The third Surprise Butter Competition conducted by the Irish Dairy Association was held on October 5th, and the creameries of the Co-operative Wholesale Society secured the bulk of the prizes. The competition butters were judged by Messrs. R. Gibson and J. J. O'Donovan, of Limerick, and by Messrs. C. Daly and J. H. Hickey, of Cork. The judges awarded the first prize to Lixnaw Co-operative Wholesale Society for an exhibit which secured a total of 382 marks out of a maximum of 400. The second prize was gained by Greybridge Co-operative Wholesale Society with 374. Drumcliffe Co-operative Dairy Society secured third place, running very close to the second prize winner with the same aggregate of marks, but with only 142 marks for flavour against 150 awarded for flavour to the Greybridge exhibit. Fourth place was secured by Oola Co-operative Wholesale Society with 373 marks; fifth place by Bilboa Co-operative Wholesale Society with a total of 371 marks, including 146 marks for flavour; sixth place fell to Whitecross Co-operative Dairy Society with a total of 371 marks, including 139 for flavour. Reserve number was Ballybricken Co-operative Wholesale Society with 371 marks, including 137 for flavour.

A competition in keeping butter was held under the auspices of the Irish Dairy Association recently, but was not well supported, there being only thirteen competitors. These exhibits were kept for a period of five weeks at a temperature of 40deg. Fahr., and were then judged independently by three judges. The judges in this case were Messrs. Hickey, O'Donovan, and Stokes, of Limerick. The judges reported the general character of the exhibits as disappointing with the exception of the first two exhibits. The first prize of the Irish Dairy Association's silver medal and the Moore Challenge Cup was awarded to Granagh Co-operative Dairy Society, Ballinleena, County Limerick, the reserve number being secured by Knockavardagh and Moyglass Co-operative Dairy Society, Killenaule, County Tipperary.

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended October 20, 1900, together with the quantities imported in the corresponding week of the previous year:—

	1899.	1900.		1899.	1900.
	No.	No.		Cwt.	Cwt.
Cattle ..	7,951	8,303	Wheat ..	1,222,800	1,515,300

* Great Hundreds.
† Included with Other Fruit prior to 1900.
‡ Entered by the Bushel prior to 1900.
§ Included with Other Vegetables prior to 1900.

Herbert Close, who for the past twenty years had held a position of trust in the service of Messrs. Warr and Loveridge, corn merchants, was sentenced at Hull on Friday to six months' imprisonment for embezzling £100 belonging to the firm. The prisoner confessed to having embezzled over £4,000 during the last three years. The money had gone in turf speculations.

Sleaford October Fair.—This fair was held on the 20th inst., when about 600 store beasts were penned in the market, but although there was a large attendance trade was unusually slow, and sales were the exception, a result due to the high price of cake and the scarcity of feeding. Bullocks made from £15 to £23; steers and heifers, £12 to £15; bulls, £12 to £15; drapes, £10 to £14; sheep, theaves, 40s. to 42s.; lambs, 30s. to 34s. A number of young horses, unbroken, were on offer, as much as £20 being asked for second-raters, but few changed hands.

Devizes October Green Fair.—The supply of cattle at this fair, which took place on the 20th inst., was larger than was expected, having regard to the recent revocation of the orders restricting their movement, and trade, which was mainly conducted by means of auction sales, was fairly brisk, some good prices being obtained. The prospects of keep in the country are excellent, there being plenty of roots, and the recent rains have also increased the supply. The result was that most of the horn stock changed hands. In the sheep fair the supply was much smaller than usual. This is usually a large fair for culls, but on the present occasion the number penned was small. Lambs sold well, at prices quite as good as were recently obtained at Weyhill and other fairs. Ewes were not quite such a brisk sale. Tegs sold very well. The horse fair was very largely supplied, there being some good hacks and carriage horses, and a large number of cart horses and mares on offer. There was also a number of Welsh suckers, which sold readily. Many of the best animals were sold at good prices.

BARLEY AND MALT.

By Hordeum.

The Barley Show.

The necessarily hurried and incomplete notice of the great show at the Brewers' Exhibition, which appeared last week, left much detail for further consideration.

By far the most satisfactory feature could not then be referred to with propriety. It remained to be seen what action the agricultural colleges and technical schools would take in response to the invitation of the Board of Agriculture to use the exhibition and the facilities it offers in further experiments.

The Board is to be heartily congratulated upon its wise action in this matter, and a sufficient number of stations have already taken it up to ensure a marked measure of usefulness and ultimate success.

One immediate outcome will be the preservation of a part of every sample shown under proper conditions, so that agricultural students will have carefully placed for comparison the best and worst barleys sent in the year of grace 1900 in open competition

From Thirty Counties

in Britain and nearly a dozen of the foreign countries now trying to grow barley for maltsters and brewers' use.

Another generation will look with astonished interest at some of the samples, especially those from Cornwall, Essex, Yorkshire, and Scotland. It is useful to have for comparison the very beautiful samples that took the champion and other chief honours at the show. Suffolk and Devon are the two most favoured localities of the season, but Somerset ran them pretty closely. Wrench's Premier, when grown under good conditions, takes a maltster's eye, and is doubtless an admirable variety to cultivate. Messrs. Fison, a very noted Suffolk firm, are also worthy of hearty congratulation that not only was the champion sample grown with the aid of their manures, but a very large number of the whole of the exhibits had been so treated, of which a considerable, but still undetermined, number were prize winners. The champion lot has been sold at an altogether unprecedented price.

The Dressing and Threshing Classes

have worked out much more satisfactorily than at one time seemed possible.

Boby's machinery was used by nearly two-thirds of the growers, covering a very large proportion of the prize winners. The threshers were supplied by no less than twenty firms, in which list Marshall's stood first with more than one-fourth, and Clayton and Shuttleworth with nearly as many, but the relations are not kept the same in the prize list.

The mode of judging in this class finally pursued left it entirely dependent upon the freedom from defect as to the number of marks any and every sample secured. These again were worked out to percentages, so that the actual and relative values were considered with no knowledge of the names involved until the order of merit was established. It was most satisfactory to find how very close to each other nearly all the important makers kept.

As the number of prizes and classes had been considerably increased this year, the work of the judges was greatly increased, although fortunately the

Decreased Number of Entries

assisted them greatly. Had there been anything like proper competition from abroad the difficulties would have been much enhanced. A number of good home counties lost a good deal through want of enterprise. It is not creditable that prizes are withheld from such counties as Cambridge, Salop, and Yorkshire through insufficient entries.

The actual numbers for the past three years are as under:—

Table I.

ENTRIES OF ENGLISH, COLONIAL, AND FOREIGN GRAIN FOR THE YEARS 1897-1900.

Year.	British.	Colonial.	Foreign.	Total.
1897	92	—	27	119
1898	143	—	30	173
1899	196	3	23	222
1900	166	—	10	176

The total has, however, only been exceeded once before, and, taken as a whole, the exhibition shows a marked improvement in many particulars upon all former shows.

The weight of all the barleys sent in ran much more evenly together than they ever did before. No one expected to see the weights of the last three years equalled, nor did it seem likely that a very low record would be made, but in reality over one-fourth of the samples sent in and weighed fell under 56lbs., and whilst not one went up to 60lbs., the highest was very close at 59.8lbs. Twenty-four samples exceeded 58lbs., and in all 110 samples weighed 56lbs. and upwards.

The record is as under for four years:—

Table II.

WEIGHTS PER BUSHEL.

	1897.	1898.	1899.	1900.
	lbs.	lbs.	lbs.	lbs.
British highest	60·4	60·0	59·0	59·8
,, lowest	54·3	54·4	54·0	58·1
Foreign highest	58·0	59·5	58·4	57·5
,, lowest	45·7	42·0	48·3	52·2

that Society could take the matter up. (Hear, hear.)

How these weights work out will be shown in Table 3 next week.

At the great barley competition in connection with the Brewers' Exhibition, London, last week, the Championship of the World was won by a sample of twenty quarters grown by Mr. C. J. Pratt, of Melton, near Ipswich, and the second by Mr. J. Carpenter, of Alphington, Exeter. Both these samples were grown with Joseph Fison and Co.'s Extra Quality Barley Fertiliser, which fertiliser, in fact, carried everything before it, barleys grown with it winning no less than twenty-four prizes and twenty-two diplomas, in addition to the championship and second prizes above named.

At the annual Brewers' Exhibition, held in London this week, in the barley competition, the Championship of the World was awarded to a magnificent sample of "Wrinch's Premier." This is not the first time this variety has carried off this coveted distinction, Mr. Wrinch winning on three previous occasions.

The Brewers' Exhibition.

Completion of Prize List

The following awards were made too late for us to print in our last issue:—

Class X.—THE CLARE SEWELL READ PRIZES (given by F. and G. Smith, Dereham).

No. in Catalogue.

92. H.c.—Mr. C. G. Miles, Mill Farm, Alburgh.

Class XIV.—THE EAST SUFFOLK PRIZE (given by Capt Pretyman, M.P.)

138. Second prize, £5.—Mr. H. O. Ranson, Sproughton.

133. Third prize, diploma.—Mr. N. Pepper, Coochithe.

CLASS XVIII.—THE SPECIAL PRIZES FOR BEDFORDSHIRE FARMS.

1. First prize, £4 4s.—Mr. G. Duncombe, Cople, Beds.

5. Second prize, £3 3s.—Mr. S. Harrison, Hill Farm, Renfold.

12. Third prize, £2 2s.—Mr. J. Pedley, Great Barford.

19. Fourth prize, £1 1s.—Mr. J. Matthews, Odell, Sharnbrook.

Class XIX. is included in Class XVIII., owing to insufficient entries.

Class XX.—WEST SUFFOLK SPECIAL PRIZES (Given by Sir Cuthbert Quilter).

122. Third prize, bronze medal.—Mr. Bigg, Glensford (entered by W. H. Scruby and Co., Harlow).

Class XXI.—MARK LANE EXPRESS DIPLOMAS FOR SEED CORN.

Sussex.

144. Hon. T. S. Brand, Home Farm, Glynde (entered by Mr. T. W. Picard, Glynde).

Class XXIV.—THE SULPHATE OF AMMONIA COMMITTEE'S PRIZES.

57. First prize, £25.—Essex barley: Mr. R. Seabrook, Tolleshunt D'Arcy.

105. Second prize.—Rutland barley: Mr. L. J. Briggs, Belmesthorpe.

108. Third prize.—Salop barley: Mr. F. Horne, Bank Farm, Claveley.

63. Gloucestershire barley: Mr. A. Day, Stratford-on-Avon.

Class XXV.—JOSEPH FISON AND CO.'S (IPSWICH) SPECIAL PRIZES.

137. First prize, £25.—Suffolk barley: Mr. C. J. Pratt, Melton (entered by Mr. John Cooper, Barley Merchant, Ipswich).

32. Second prize, £15.—Devon barley: Mr. J. Carpenter, Alphington, near Exeter.

126. Third prize, £10.—Suffolk barley: Mr. A. E. Gray, Wenhaston, Halesworth.

98. V.h.c.—Northamptonshire barley: Mr. J. S. Railton, Evenley, Brackley.

99. H.c.—Oxon barley: Mr. F. G. Castleman, Northbrook, Kirlington.

42. C.—Dorset barley: Mr. R. H. Cooper, Wyke, Sherborne.

CLASS XXVI.—WEBB AND SON'S SPECIAL BARLEY MANURE PRIZES.

109. First prize, £15.—Salop barley: Mr. R. Preece, Cressage House, Shrewsbury.

148. Second prize, £10.—Warwick barley: Mr. J. W. Lea, Thelsford, Warwick.

156. Third prize, £5.—Worcester barley: Mr. E. G. C. Bomford, Spring Hill, Fladbury.

147. C.—Warwick barley: Mr. A. E. Day, Orchard Hill, Stratford-on-Avon.

CLASS XXVII.—ANGLO-CONTINENTAL (late Ohlendorff's) GUANO WORKS. PRIZES.

Insufficient entries.

CLASS XXVIII.—THE BEST SHEAF OR SHEAVES OF BARLEY.

174. First prize, £3 3s.—Essex barley: Messrs. E. W. King and Co., Coggeshall.

176. Second prize, £1 1s.—Essex Barley.—Mr. R. Seabrooke, Tolleshunt D'Arcy.

Class XXIX.—(Offered for the Machine which has been used for Threshing the largest percentage of properly dressed Barleys in every class).

First prize, Silver Medal.—Messrs. C. Burrell and Sons, Limited, St. Nicholas Works, Stetford.

Second prize, Bronze Medal.—Messrs. R. Garrett and Sons, Limited, Leistod, R.S.O., Suffolk.

Third prize, diploma.—Messrs. Clayton and Shuttleworth, Lincoln.

V.h.c.—Messrs. R. Hornsby and Sons, Limited, Grantham.

H.c.—Messrs. E. Humphries and Co., Limited, Atlas Works, Pershore.

C.—Messrs. Marshall, Sons, and Co., Limited, Gainsborough; Messrs. Burrows and Stewart; Messrs. Nalder and Nalder, Ltd., Wantage; Messrs. Ransomes, Sims, and Co., Ipswich.

Gainsborough October Horse and Cattle Fair.—At this fair, which took place on Wednesday, a large number of good quality beasts were shown, and sheep were an improvement on recent fairs. Prices were rather higher than usual. Cross-bred hogs made up to 39s.; small long wools, 26s.; and lambs, 34s. Irish forward beasts were better to sell, two to three-year-olds making from £13 to £16; older beasts, to £18 10s., and young steers, £10 to £11. There was a large attendance at the horse fair, and the following were the prices realised:—Welsh ponies, £10 to £14; agricultural foals, £14 to £22; two-year-olds, £20 to £35; medium trappers, £15 to £20.

Death of Mr. William Biddell, J.P.

We regret to have to record that Mr. William Biddell, J.P., of Lavenham Hall, after a very brief illness, which was borne with calmness and fortitude, died at his residence on Thursday evening. On Saturday week Mr. Biddell took the chair at an agricultural meeting held in Ipswich; last Wednesday he was at Bury Market, apparently in his usual health and spirits; and he has been called away, therefore, while yet in harness, and in the full vigour of a veteran manhood. His robust figure will be sadly missed for many a day to come, and the news of his death will be read with profound regret by a wide circle of friends and acquaintances. It was not until his return home from last Bury Market that Mr. Biddell became seriously indisposed. He was seized with severe pain in the body—a complaint from which he had suffered in some measure for many years—and felt so ill that he went to bed, and sent for a doctor, who, after making a careful examination, came to the conclusion that it was a case of strangulated hernia, and advised that another medical man should be consulted. When the doctors had made a joint diagnosis of his condition, they decided that an operation was absolutely necessary, and this was performed by Dr. Griffiths, of Cambridge, in the presence of the local practitioners, and the first report was that it had gone on very successfully; but two hours afterwards a change for the worse was noticed, and, just half an hour later, unable to bear the shock and exhaustion, Mr. Biddell passed peacefully away in the presence of his wife, his brother from Ipswich (Mr. George Biddell), his daughter, and son-in-law. The patient himself seemed to have anticipated such a fatal termination to his illness, for during the day he gave minute instructions about several family and business matters, added a codicil to his will, and appointed his executors.

Mr. Biddell held high place in the county, and won general respect by reason of his sound judgment, his thorough knowledge of agricultural matters, and his ever-cheerful readiness to place his valuable services, in a public as well as in a private capacity, at the disposal of his friends and neighbours. He did not follow his profession in any narrow spirit. As "Colborns' New Monthly," in its series of articles on "Workers and their Work," said of him, he was a foremost speaker on all occasions in which the interests of agriculture were concerned. He may be said to have created opinion for the tenant farmers, and then represented it. By persistence in work, and the power of speech, he rose from the Farmers' Club to the Chamber of Agriculture, and finally to the House of Commons. He was the President of the West Suffolk Chamber, which he represented at the Central Chamber. At the time of his death Mr. Biddell was farming over 1,000 acres of strong arable land, and he leaves it, as he ever kept it, in the highest possible state of cultivation. After the death of his brother, Mr. Manfred Biddell, he gave some attention to the breeding of Suffolks, and won a fair number of prizes, but in a general way he regarded stock from the purely practical rather than the exhibition point of view. In looking after his farms, and seeing that everything was in order, he has up to quite recently been marvellously active for a man of his years and great physique. He weighed just upon 20 stone, but could beat many a younger man in tramping over heavy plough-land.

Mr. Biddell was an active member of the Suffolk Agricultural Association, and less than a week before his death, as already indicated, he presided at a committee meeting held at Ipswich. During the years that the West Suffolk Chamber of Agriculture was in existence, Mr. Biddell was one of the members who took keen interest in the many debates, and gained the confidence of the entire Chamber, so that he was appointed president. At Ixworth Farmers' Club, of which he was a member, his opinions were always attentively listened to. He also was a great supporter of the Lavenham Farmers' Club, an institution which was in a flourishing condition about thirty years ago. As the head of the well-known firm of Messrs. Biddell and Blencowe, land agents, auctioneers, and valuers, the deceased gentleman manifested excellent business capabilities, and his judgment was looked to as the outcome of sterling integrity, combined with sound common-sense. A typical Old English gentleman, he delighted in meeting his many agricultural friends, and on festive occasions he was a host in himself.

The funeral will take place to-morrow (Tuesday). It has been arranged that the first part of the service shall commence at 12.15 at Lavenham Church and that the procession shall then proceed to Hawstead (which is expected to be reached at three o'clock), where the deceased gentleman will be laid to rest in a family vault, beside the bodies of his first wife and their children.

A disastrous fire occurred at Morestead on Sunday night, the whole of Mr. J. S. Curtis's private racing stables being burnt to the ground. All the horses were got out safely with the exception of Joe's Luck (two years), by Savile—Reprieve, and his own brother, a yearling colt. The origin of the fire is not known.

By LUPULIN.

Hops and Nitrate.

The Permanent Nitrate Committee evidently have great confidence in the value of nitrate of soda as a stimulating manure for hops, if we may judge by the substantial prizes they offer annually to growers, and it must be admitted that their confidence is not misplaced, for an examination of the samples now on view at the Hop Exchange demonstrates the improvements that can be effected by the judicious application of this nitrogenous salt, inasmuch as the quality of the hops now submitted is, on the average, very superior to those I have previously seen in similar competitions. The use of a large quantity of nitrate is undoubtedly beneficial in producing heavy crops. The growth of bine is stimulated, and, under favourable conditions of weather, a good yield of fruit follows as a natural consequence. This is, however, almost certainly accompanied by loss of colour and brightness in the finished product, therefore it is necessary to exercise discretion in handling the manure, in order to secure all possible advantage therefrom, and to avoid the drawback to which I have referred.

The planters whose samples are now under review have profited by their previous exprience and observation, and are able to prove the possibility of securing crops which fully equal the season's average of quantity, and in several cases surpass the average of quality. Take, for instance, the sample exhibited in Class D by Mr. H. Lillywhite, of Oakshott, Hants. This is certainly the best sample in the show, and presents all the characteristics which unite in attaining perfection. The hops are ripe, and are full of lupulin, the colour is of that clear rich primrose tint which is always admired, the management is all that can be wished for, the sample being very resilient, and though the drying is absolutely complete, the cones are neither broken nor brittle, and both the face and side of the sample present that aspect which is sought after by buyers.

I have singled out this most excellent specimen for the purpose of special demonstration of the possibilities within reach of planters who may be as yet undecided as to the desirability of the application of nitrate of soda; but I do not desire that an inference may be drawn therefrom by which any detrimental comparison can be made between this and the other samples, for it is very satisfactory to me to be able to speak also in generally approving terms of the exhibits from East, Mid, and the Weald of Kent, as well as of those from Sussex and Herefordshire.

There are twenty-six samples in all. The excellence of that exhibited in Class A (East Kent) by Mr. Geo. Whiteman, Tyler Hill, Canterbury, induced the judges to award a special prize thereto. In Class B (Mid Kent), Mr. W. Rogers, Kingsdown, takes the first, and Mr. T. Welfear, East Peckham, the second prize. In Class C (Weald of Kent), the first prize was awarded to Mr. J. J. Bates, Cranbrook. In the Herefordshire class, Mr. C. T. Ockey, Castle Froome, was placed first, his sample being an excellent proof of what can be done in hop-growing when skilful experience and good judgment are brought to bear upon it. The same may be said of the sample shown by Messrs. Firkins Brothers, Bishops Froome, to whom the second prize in this class was awarded. In Class F (Sussex), there was keen competition for the premier position between Mr. Gilbert Eames, Linch, Midhurst, and Mr. A. Fairbrother, Wadhurst. The latter sample is rather the riper of the two, and is very rich in condition, but eventually the question was decided by the more delicate flavour of Mr. Eames's sample, and to this gentleman the first prize was awarded.

There is much to be said in favour of such exhibitions, in which planters are incited to do their best by prizes of sufficient importance to reimburse them for their trouble. The public comparison of samples is instructive to the industry as a whole, and is not without value to the trade, as results can thus be tested, in conjunction with the means employed to attain them, apart from the disturbing element introduced in the market, when £ s d is necessarily the most important factor in the consideration. And although the Nitrate Committee are primarily promoting their own interests as traders in putting these inducements before planters, they are also directly benefiting the English hop-growing industry. Therefore, I trust they will continue to follow the same course in future seasons.

**All official reports and notices of the National Association of English Hop Growers will be printed in the* MARK LANE EXPRESS, *which will also contain all current information likely to be of interest and benefit to the members of the society.*

Home Notes.

The Borough.

A great king, whose name is associated with the highest attainment of wisdom, has recorded a warning against the danger that threatens when "all men speak well" of any of us. If such a warning be applicable to the conditions or affairs of commercial life, we may certainly take note of it now, for at the present, there is no discordant voice in the approval with which all men (except brewers) regard the progress of the hop trade, and the favourable prospect which is daily opening out before us. But fortunately I cannot discern the appearance of any cloud, not even so "big as a man's hand," in our sky, and there seems every probability that "the winter of our discontent, now made glorious summer by this sun" of prosperity that is shining upon us, will be further removed from our recollections by yet brighter and warmer rays soon to be experienced and welcomed.

The solid facts are before us. Active, healthy trade is recorded this week. Merchants are buying freely, their customers are placing more orders, the value of hops is steadily hardening as the ascertained shortage of crops, not only in England, but in all the hop-growing countries of the world, is realised, and in front of the position there stands a body of planters, not numerous, perhaps, but nevertheless strong in their resolution to protect their produce until the legitimate terms they ask for its surrender are acceded to. I am quite satisfied that my friends have no cause to fear the final issue of events, and at the same time I am not displeased that the tide has flowed somewhat in favour of the early buyers, for they have also a right to remuneration for the use of their capital and for the exercise of their business organisation in the distribution of our crops.

I do not trace that any further advance in prices has been established during the past week, but the values of the previous week have been well maintained, and a large business has been done thereat. The clearance of Weald of Kent and Sussex hops has been almost effected, and more attention is now being given to the choicer growths of East and Mid-Kent, in which we shall doubtless soon hea rof extensive transactions. In Worcesters there has also been an active trade, and although some of my friends in the Midlands sold rather too hastily, there are many others whose better patience was rewarded by satisfactory results, and there yet remain several good lots whose owners are waiting further development of the market.

An important feature of the week's proceedings has been the publication by the Board of Agriculture of the

Estimated Total Production

of hops in the present year, as under:—

County.	Estimated Total Produce.		Acreage.		Estimated Average Yield per Acre.	
	1900.	1899.	1900.	1899.	1900.	1899.
	Cwts.	Cwts.	Acres.	Acres.	Cwts.	Cwts.
Gloucester	235	619	47	42	5·00	14·74
Hants	12,291	30,589	2,231	2,319	5·51	13·19
Hereford	32,650	83,950	7,257	7,257	4·48	11·62
Kent	230,928	418,997	31,614	31,988	7·30	13·10
Salop	689	966	138	138	5·00	7·00
Suffolk	7	34	4	4	1·75	8·50
Surrey	5,311	15,213	1,300	1,388	4·09	10·96
Sussex	39,717	73,807	4,823	4,949	8·23	14·91
Worcester	26,935	37,207	3,964	3,788	6·79	9·82
	347,894	861,373	51,303	51,543	6·78	12·76

It is the general opinion of Borough experts that the total produce, 347,894cwt., showing the average of 6.78cwt. per acre as given by the Board, is in excess of the actual crop available for sale. There are those who state very positively that the real yield does not exceed 5½cwt. per acre, or about 282,000cwt., although I am disposed to think that the estimate arrived at and published by the N.A.E.H.G. is closer to the mark. This was an average of 6 cwt., making a total of 308,000 cwt. But, taking the official figures as the basis of calculation, I find that the crop of 1900 comes out 315,497 cwt. less than last year, representing an average shortage of about 47½ per cent. Doubtless this percentage is somewhat incorrect, as it is generally admitted that the official figures of last year's crop did not reach the real weight harvested.

The production of each of the counties has fallen off, though in different proportions, which will be seen by the following table, founded upon the official returns, omitting Gloucester, Suffolk, and Salop, where only a few acres of hops are cultivated.

	Average shortage per acre.	Per centage of Shortage.
Hants	7·68 cwts.	58·22
Hereford	7·14 ,,	61·44
Kent	5·80 ,,	44·27
Surrey	6·87 ,,	62·68
Sussex	6·18 ,,	44·80
Worcester	3·03 ,,	30·85

From these figures it appears that the largest average reduction was in Hampshire, and the smallest in Worcestershire, the largest percentage of shortage being in Surrey, and the smallest also in Worcester. It is a curious feature in the record that the neighbouring counties of Hereford and Worcester should present such a marked contrast in their results this year.

[In my notice of Mr. W. F. Pudge's exhibit at the recent Brewers' Exhibition, the description as printed, "too highly pressed," should read "too *lightly* pressed." This correction will make my remarks more comprehensible.]

Foreign Notes.

Nuremberg.

The recent indifference of brewers is passing away, and their influence as buyers is being felt in the market. Their purchases, added to a continued active demand for export, have created an important trade during the past week, from 6,000 to 7,000 bales having changed hands. The result is seen in the further hardening of values, as quotations are perceptibly advancing. In the earlier days of the new market inquiries were chiefly for medium qualities, Franconian hops, which were obtainable at moderate rates, being much in favour. Attention is now being given to better sorts, Hallertaus, Wurtembergs, and others being more freely handled, and during the past few days Spalt growths at full prices are in great demand. The actual deficiency of this year's growth is evidently being realised by consumers, and the tendency of affairs is so distinctly towards increased values that I am prepared to hear shortly of further substantial advances in quotations for all descriptions.

Aischgrund.

Nearly the whole of this season's growth is already disposed of at full prices. Only a small quantity remains in first hands.

Kindingerland.

The good prices bid have induced growers to sell their produce, and, with the exception of a few, the whole of the growth has been cleared at an average of 120s.

Upper Franconia.

The crop came down very short of last year, and nearly the whole of it has been taken up at prices that are quite satisfactory to growers.

Spalt-land.

The rapid advance in the value of hops has been remarkably illustrated here. In one day prices were

TO HOP GROWERS.—Users of WIRE WORK should buy the Best English Galvanised Steel Hop Strand, made by Rylands Bros., Ltd., Warrington, Lancs. For prices, &c., apply to their London office, 86, Leadenhall-street, E.C.; or their Sole Agent for Kent and Sussex, Mr. Edward Ball, 3, Newstead-road, Lee, S.E.—[ADVT.]

raised from 80s. to 100s., and the market closed firmly, many growers refusing to sell even at the highest figure.

Stuttgart.

The improvement in the tone of business at Nuremberg has affected this market. Trade is very brisk, and prices are rising, as every available lot of hops is at once taken up by buyers.

Rottenburg.

Last week's trade has been the best of the season; nearly 3,000 bales were sold. Brewers are buying freely, and are giving whatever prices growers are asking.

Burgundy.

Although business in hops has been rather quiet recently, there is no weakness in value, which is well supported at the advance already established, the current rates being from 105 to 120 francs per 50 kilos.

Belgium.

The reaction from the recent depression has been still further accentuated, and prices have again moved upward both in the speculative and the trading markets. Alost hops have been dealt with on the Brussels Bourse at 90 francs for October-November delivery, and higher figures are demanded for December and January. In the country it is difficult to buy Alosts at 90 francs, and at Poperinghe quotations range from 90 to 95 francs. Some advices speak of even 100 francs having been paid to planters, and there is no doubt that excessive firmness characterises the present position, with the prospect of still further progress in favour of sellers.

At the open market held at Assche last week, when hops were submitted to a jury for prizes, it was stated that the quality was remarkable for the season, and that considerable improvement in the management was evident. All the lots shown were eagerly taken up by buyers at 87 to 97 francs.

Recent imports and exports of Belgium throw some light on the hop situation in that country. The imports for September last amounted to 141,029 kilos, and in September, 1899, were only 105,115 kilos. The exports in September last were only 43,397 kilos, whereas in the same month last year they were 142,795 kilos.

America.

While the trade in the New York markets remains comparatively quiet, as consumers are buying only sufficient for their immediate requirements, the value of hops in the country districts is rising rapidly, the dealers advancing their bids in order to cover themselves against eventualities which they foresee may arise in the early future. A cable to hand on Saturday stated that both in New York State and on the Pacific coast the firmness of growers had compelled advanced offers from buyers, and that current prices for choice hops are now nominally from 17 to 18 cents per pound, showing an advance of fully 1 cent. in the past week. There is difficulty in buying even at these rates. Growers are very slow to operate, and a further improvement seems to be probable. In the mean time it may be noted that the New York market opened three weeks ago at 17 to 18 cents for choice new growth, being quite 3 cents in advance of the opening prices of last year. From Sonora Co. (California) I hear that the crop does not exceed 8,000 bales this year, and last year this district turned out 18,000 bales, and from other districts I have confirmations of previous estimates, which go to prove that the total estimate of 200,000 bales for the whole of U.S.A. is not by any means under the actual output.

The general character of the reports this week from the Continent and America is distinctly indicative of the early establishment of higher values, and the maintenance of brisk business in every direction.

(*For Hop Market Reports, see pages* 559, 561.)

Hereford October Fair.—The October fair at Hereford was commenced on the 16th inst., when there was an average supply for the first day, chiefly big bullocks, many of them in tip-top condition, and all were shown in the stock market, instead of in the streets. Graziers were present from long distances. Considering that the plentifulness of keep in the country justified an improved demand, farmers held out for prices, which buyers were loth to give, and trade was slow, notwithstanding which most of the cattle were cleared off at about last October's prices. Yearlings sold at from £11 to £14, two-year-olds and three-year-olds £14 to £19 10s., and a few prime lots of three-year-olds at £20 apiece. On the second day the supply was again about the average, and at the commencement trade was a little freer. The cattle most sought after were those that would go on for another year, and could be purchased now at from £14 to £18. Owing to the beef trade being sluggish large cattle were almost unsaleable. Yearlings ranged from £11 to £14; older animals fetched up to £20. In the horse department there was a large supply, but a very slow trade.

FARM PROSPECTS.

Bedfordshire.

It is raining hard as I write, and if it keeps at it until next Sunday morning nearly everybody will be thankful. We have experienced an extraordinary autumn. Plenty of grub for the cattle, but no water, unless carted to them; and unfortunate has been the farmer who lives away from a river. Some years ago meadow land was a bane to the occupiers, but the last three years it has been an untold blessing; the clear, running water being life and health to the cattle.

Wheat Sowing

is all behind in this district, the land being too steely for the proper reception of the seed; in fact, much of the land had become too hard to plough. I have a twelve-acre field well up and looking luxuriantly green, but this was drilled five weeks ago on fallow which was particularly fine.

The Corn Markets

get duller, but bread gets dearer. Wheat at 29s. per quarter; bread at fivepence per quartern loaf. Some time ago, when wheat was making from 45s. to 50s. per quarter, we could get our bread for sixpence per loaf, and nobody grumbled. Is this Free Trade? The General Election is over, and has proved that the loud outcry against the Agricultural Rates Act was nothing but a very hollow cry. I thought the cities and towns had such

an Awful Grievance

against the Tories because they were making them pay the farmers' rates, and were going to turn them out neck and crop, when opportunity offered, the party who so dared to neglect their interests. But the cities and towns have nearly all gone Tory, far more than the agricultural divisions, fully proving that we farmers who have received a small instalment of justice from the present Government have not such deadly enemies in the towns as certain platform orators and certain newspaper writers would have us imagine. This never ought to have been made a party question, and the Liberals have had to suffer through making it one.

British Corn.

I think your readers will own, sir, that a well-known contributor to the *Field* splendidly—although unknowingly—backs up my last "notes" to you when he says: "My own belief is that, as regards our national food supply, the nation is asleep, and that unless adequate steps are taken the day is certain to arrive when our people will endure such privations as are unknown in the history of the British people." Yet when a man like myself advocates British corn for Britons he is branded a fool; but times will prove who are the fools.—THOMAS STREET (October 26th).

Cornwall.

The weather continues remarkably dry and mild. Grass is plentiful, and live stock are doing well in the fields. A great deal of threshing has been done, and proves the yield to be much below the estimate at harvest; there is a great bulk of straw, but the yield of all grain is much below average, and the samples are indifferent. Potatoes have been dug, and also prove to be a bad crop, so that they have gone up much in price and now are making nearly double the price of a month ago. Mangolds are a fair crop, but not so heavy as last year. Swedes and turnips are generally a good crop, but in some places are diseased.

All kinds of live stock are healthy and selling at fair prices. Good horses are scarce and dear. Farm labourers are well employed. All farm work is in a forward condition. Wool is a wretched price, and all grain is cheap.—R. S. O. (October 26th).

Durham.

Farm prospects may be considered fair. Stack-yards look full. As yet, however, farmers have threshed very little grain, and they incline to think the yield will be disappointing. Potatoes and turnips are not much complained of, and grass has grown well throughout the autumn. The usual breadth of wheat will be sown.—R. (October 23rd.)

Essex.

We are suffering from one of the worst autumnal droughts ever remembered. During September I only registered 46-100ths of an inch of rain, and up to last night, in the twenty-four days of this month, only 42-100ths of an inch. We are to-day getting a few little showers, but we want a good two inches before we can satisfactorily work the land. Have not sown any wheat yet, land too dry, and clover lands too hard to plough. J. C. S. (October 25th).

Gloucestershire.

The weather during the last month has been favourable for almost all tillage operations, but too dry for the grass land, and except on low-lying meadows there has been but little growth this autumn, so stock will go on winter rations earlier than usual. The few storms have kept the roots and young clovers growing nicely, and both look better than for some years past at this time of the year. It has been too dry to do any wheat planting except on a few pieces of fallow, but most of the land is ready, and we are getting a nice rain to-day, so it won't take long to get it in when we start. The early-planted vetches and winter oats are looking well.

Husk is Very Prevalent

amongst both calves and lambs, and it seems unusually difficult to cure, but other stock continue to do well, and cattle will go into the yards in much better condition than last year. Anyone going about cannot fail to notice the

Alarming Quantity of Thistles

allowed to remain uncut in almost every part of the country. A few weeks ago the seed flying about often resembled a snowstorm. Doubtless, it is very difficult nowadays to get such work done at the right time, but if the matter is not taken in hand at once, the future penalty will be a serious question to all farmers.—J. H. W. (October 26th).

Hampshire (East).

A very genial autumn so far. Rain is now needed on some of the wheat lands. Threshing is generally disappointing, in the case of wheat especially so, both as regards yield and quality. Root crops have improved rapidly during the last few weeks, and now appear to be a full average, after a summer which at one period bid fair to give us nothing but failure.

The prices for show lambs at Winchester Fair were much lower than usual this year, and good advertisement for the Hampshire Downs that this yearly display of early maturity is, the breeders cannot but lose considerably over the business. Such very fat mutton is now to the consumer's taste, and commands no price commensurate with the cost of its production. Good beef is very scarce, and full prices are, therefore, now being realised.—G. S. M. (October 25th).

Shropshire.

Roads wet after rain, and sky is clearing. Barometer falling to 39.6, and thermometer in shade 52. What we most need is mild, dry weather to harvest the potatoes and sow and to cart the mangolds before frost. Some wheat and rye have been put in the ground under favourable circumstances. No excess of rain has yet fallen. Scarcely any frost. Now is the time to store mangolds before it comes. One American writer gives great praise to England for benefits bestowed on all conquered nations, while other Powers oppressed them. May the same results now follow the wars at home and abroad.—J. G.

Somerset.

The beautiful autumn tints again show the time of year. In West Somerset the weather has been exceptionally fine and mild, with only a little rain, not enough to chill the land, permitting the late turnips and grass to make a fair growth. The early roots have received a check, but, on the whole, I think the root crop will be nearly an average. The young grass plant is particularly good and strong. The thrashing machine has been everywhere busy telling the sad tale that barley and wheat in general is 10 bushels per acre less than expected, or

Less Than Average.

For instance, where 40 bushels per acre was expected there is only 30, and I venture to think there are less acres under 30 than over, and the barley samples also are more plain than good. Live stock are healthy, and many are still running in the fields by night. Water everywhere seems a short supply, and no doubt will be so until we get the wind and rain to break the springs. We have now to

Face the Winter

about six months. As a rule, this means an expensive time if we desire to keep our animals in a growing and thriving condition; economy, with every care and attention, is needed if we carry them through with any profit, whilst cake and feeding stuffs are so high. I do not consider there will be a margin of much profit at the end of the year unless it comes on the grazier's side.—A. B. (October 26th).

On the whole the season in East Somerset may be classed as fairly good, for though corn is perhaps hardly up to the average, the hay and root crops are above, both as to quantity and quality, while grain has been fairly plentiful all the summer. For some reason or other cows have not given a very large

Yield of Milk

this season, and milk at the present time is somewhat scarce. Except for the outbreak of foot and mouth disease live stock in this district is fairly healthy; great inconvenience and considerable loss had been occasioned by the restrictions consequent on the outbreak, and nothing short of a good prospect of freedom from it in the future can justify the measures taken. The high price of cakes and other feeding stuffs adds a good deal to the cost of meat and milk making, while many farms are showing plenty of

evidence of the labour difficulty. Very little has been heard of agriculture or

Agricultural Questions

during the recent elections; it looks as if farmers were either better satisfied with their position or were tired of expecting any help from legislation. The Agricultural Rating Act will, however, soon have to be dealt with, and it appears to be a good opportunity to deal with the whole question of local taxation in a broader and more satisfactory way than by relief to classes by grants in aid.—C. P. (October 26th).

South Lincolnshire.

After a spell of six weeks of almost unbroken fine weather a welcome rain set in yesterday morning, clearing in the afternoon, recommencing at midnight, and is still raining. Undoubtedly we have had one of the

Finest Potato Harvests,

as regards weather, that we have had for many years. Had it held fine until to-night, almost every potato would have been safe. As regards the yield, various estimates are given, but the Up-to-Dates decidedly take the palm, the British Queen coming next; 4 to 5 tons per acre are about the average yield, although there are a few crops of 7 to 8 tons. The prices are good, as much as 80s. per ton being offered. Several lots have already changed hands. Corn threshing has had to give place to the

Mustard,

which we hear is coming out very light. The seed is small, and crops that looked like seven sacks per acre have come out five. There is a great quantity of grey seed; nevertheless, a fair price is obtained, various, from 7s. to 14s. per bushel. Wheat-sowing has just commenced on the stronger lands, but not a great breadth is sown here.

Keep is Plentiful,

and stock are doing very well out at present, but must soon be housed; but farmers are a bit careful. Cotton cakes at £5 10s. per ton. Labour plentiful at 2s. 6d. per day. Beef, 7s. 6d. per stone. Mutton not quite so good a trade. Pork scarce, but stores cheap and plentiful. Barley meal too dear to buy to feed with.—R. M. W. (October 27th).

Yorkshire

We are suffering from three drawbacks—the high price of labour, the dearness of feeding stuffs, and the deficient yield of grain. The weather has been favourable of late, and a fair acreage of wheat has been sown, but there is no disposition to put in a large area. The potato crop is lifted, but has turned out the

Lightest Yield for Many Years.

There is besides a good lot of disease. Potatoes will be scarce in North Yorkshire by next spring. Turnips have never promised well all summer, but they have now grown into a decent crop. There is little that is now to be told of the agricultural situation. It has been a very bad year for farmers, and it is expected there will be

Many Changes Next Spring,

owing to men giving up their farms or retiring. The only thing that gives any promise is the price of fat stock, and for these the value is lower.—W. P. (October 25th).

Foreign Prospects.

France.—Weather being now favourable, autumn sowing is in full swing, and the work progresses speedily and in suitable conditions of soil and moisture. Farmers being too busy to attend markets, supplies continue small, but vet quite up to requirements, for millers do not care to buy while prices are falling, and their abstention keeps trade very flat.

Spain.—Wheat sowings are in full activity in most parts of the Peninsula under favourable auspices.

Holland.—Weather is damp and cool, and not unfavourable to the recent sown cereals.

Germany.—Weather has been windy and wet, with occasional night frosts; the official report of the crop condition of wheat and rye is slightly better than it was a year ago.

Hungary.—Prolonged absence of rain is causing some uneasiness, as agricultural work is considerably in arrear.

Italy.—Preparations for wheat sowings have been in active progress, and in many places the work has already begun. In most parts of the Peninsula operations were favoured by rain.

Roumania.—Rain is needed for the recently-sown wheat and rapeseed. Maize cutting has begun, and the crop promises to be a most satisfactory one throughout the country.

Russia.—Abundant rains in central and southern districts have relieved apprehensions as to the well-being of the autumn cereals. Short supplies of good seed wheat in Kama and other Eastern places cause complaints, local grain being poor and unsuitable for seed.

United States.—The *Cincinnati Price Current* says the week has been favourable for the autumn-sown wheat crop, which is doing well, but there is considerable evidence of insect eggs in Ohio and Indiana which is creating apprehension. The maize supply is ample for all requirements, and the situation is unfavourable for an advancing tendency in value as the season advances.—*Dornbusch.*

THE WEATHER.

Monday (October 22nd). Fine weather prevailed over our islands, but there was a good deal of cloud in many places. Slight rain was measured in the morning, as the result of the fall in the preceding twenty-four hours, at several stations on our east coast, but the amounts were small. Frost occurred over the central parts of England early in the morning, and at Loughborough the exposed thermometer fell nine degrees below the freezing point. The winds were north-easterly over the southern portion of the kingdom; but they had become south-westerly in the north, under the influence of a cyclonic disturbance which had arrived from the Atlantic, and was passing eastwards at some distance to the north of Scotland. The weather was fine in London, and the highest temperature was fifty degrees.

Tuesday (October 23rd).—Cloudy weather prevailed over most parts of the British Islands, and slight rain fell in places. The whole type of weather underwent a material change, and the anticyclone, which had occupied a fairly central position over the country, was moving slowly to the south-westward. A cyclonic disturbance appeared over the south of Sweden, and the winds were nearly everywhere from between north and west. Temperature rose briskly, and the increase was very considerable over central England. Slight rain fell in London during the early morning, but the day was fair, and the thermometer rose to fifty-eight degrees.

Wednesday (October 24th).—Dull and unsettled weather prevailed over our islands, and the temperature was generally several degrees higher than the average for the season. Rain was measured in the morning as the result of the fall in the preceding twenty-four hours over the northern and western portions of the kingdom, and rain again fell during the day at several places in the North. The midday temperature rose to 60deg. in the east of England, and in London it rose to 59deg.

Thursday (October 25th).—Rainy and unsettled weather prevailed over our islands, and temperatures were again high. A cyclonic disturbance was passing eastwards to the north of Scotland, and the winds were generally south-westerly over England, but had shifted to the north-west over Ireland in the rear of the disturbance. Rain was measured in the morning, as the result of the fall in the preceding twenty-four hours, in nearly all parts of the country, but the amounts were small except in the extreme north of Scotland. Wednesday night was very warm in England, the thermometer not generally falling as low as fifty degrees. It rained in London during a great part of the day, and the air was very mild, the thermometer registering fifty-nine degrees.

Friday (October 26th).—The weather was again generally unsettled, and sharp showers of rain or hail occurred in many parts of the country. Some improvement had, however, set in at the Irish stations, where the barometer was rising throughout the day. A cyclonic disturbance was still situated to the north of Scotland, and a well-formed secondary disturbance was passing across the north of England. The winds were mostly westerly, and a moderate gale was blowing in the English and St. George's Channels, with rather a rough sea. The early morning temperatures were low in Scotland, where frost occurred in places, but the themometer was still high in the south of England, the lowest night reading being about 50deg. The day was cold in most parts of the country. Showers occurred in London during the morning, and the temperature rose to 51deg.; the afternoon was fine and cold.

Saturday and Sunday (October 27th and 28th).—The weather continued rainy and unsettled over our islands during the two days, and on Saturday a strong and squally north-west wind was blowing. The day temperatures were in fair agreement with the normal, but the nights were somewhat cold, and frost occurred in the open in several parts of the kingdom. The cyclonic disturbance which had occasioned the rough weather at the close of last week has arrived over Denmark, and is passing away to the eastward. Other disturbances had reached us from the Atlantic on Sunday, and the barometer was falling over the entire country. The exposed thermometer indicated a frost in the suburbs of London early on Saturday morning, as well as on Sunday, but the thermometer touched 50deg. on each of the two days.

Cruelty to a Cow.—A butcher of Hornsey Road, named Jack Humphreys, was charged at Highgate Police Court on Wednesday on a summons taken out at the instance of the Royal Society for the Prevention of Cruelty to Animals with cruelty to a cow. The evidence showed that the defendant was the owner of a cow which was turned out to graze in the Shepherd's Cottage Playing Fields, Highgate. On the evening of October 1st a gentleman who was walking across the fields found the cow lying in a ditch, moaning in a piteous manner, and unable to move. Next day the cow was still in the same position, and the defendant's attention was called to it, but he did not send anyone to see it until the evening of October 3rd. In the meantime, at eleven o'clock on the morning of that day, some humane people pulled the cow out of the ditch. The animal died shortly afterwards. The defendant was fined 20s. and 9s. 6d. costs.

MILLING.

Hints for the Warehouseman and the Miller.

Business in both wheat and flour is very dull, and there is every probability of it remaining so for some little time to come. Flour is selling very slowly, although prices are lower, with a still downward tendency. English wheat has only been in moderate supply, values not being quite so firm, while in some cases a little less money has had to be taken to effect sales. On the other hand, offals are still very brisk.

A great deal of home-grown wheat is coming to hand in very poor condition for milling, and inland millers, especially those who have no conditioning plants, are sighing for the samples of 1906. Without proper appliances it is almost impossible to handle some lots, and many millers are not anxious to buy. English wheat always has an excess of moisture, and in seasons like the past one this natural characteristic is accentuated, and there is a loss of colour as well as strength. The latter can be remedied, however, by mixing with it a sufficient quantity of strong American flour.

Weevils and their Extermination.

One of the most troublesome pests in the silo and the grain warehouse, if not properly kept down, is the weevil, although its depredations are to be found in the newest installations of brick and concrete and steel. The insect is very cosmopolitan, and is found in nearly all grain centres. The best way to exterminate it when it infests grain in bulk is to use bi-sulphide of carbon, although the pest can be removed in large numbers by aspiration and sieving. In this case they should be burnt, and the cleaning process should be repeated at frequent intervals, as those which escape the application of air currents multiply to an amazing extent. The bi-sulphide of carbon is very explosive and volatile, is heavier than air, and should be used with great caution. About one and a half pounds of the chemical is sufficient for each ton of grain, and if the silos or bins are very badly infected it is well to use more than one application.

If it is required to free empty bins of the pest, one pound of the bi-sulphide will be

Sufficient for Every 1,000 Cubic Feet

of space in the silos. After the package has been opened the contents should be scattered over the grain or placed about in pans as quickly as possible, and all doors and openings should be tightly closed and kept so for at least ten hours. As it is a very explosive liquid, special care must be taken not to allow the fumes to come into contact with a naked light. Millers need not be afraid to pour it on the stored grain, as no harm can be done by its application in that way. Very soon it evaporates and penetrates the whole bulk, killing all insect life with which it comes into contact. When the bins are opened the chemical gradually loses its pungency until in a short time no trace of it is left on the wheat. But, as has been already said, some millers may not care to use it for the destruction of mill pests, including moths, and then the only remedy is cleanliness. There must be constant sweeping and cleaning all over the mill and warehouses or silos, with frequent aspiration of the grain itself. If this is well done there will be no need to resort to the bisulphide remedy. But the latter is the more expeditious and certain as to results.

Treatment of the Last Break Stock

It is well known that the stock from the last break should be kept by itself, and it is the best plan to scalp it on a three-sheet centrifugal, in the case of a moderately large plant, clothed with 30, 30, and 26 wire. The tail-over might go to a conical bran duster, covered with 24 wire, the tail over of which would be bran and the throughs would go with the throughs of 26 on the centrifugal, and might be classed as pollards, or they might be further divided. The throughs of the two sheets of 30 meshes would go to another three-sheet centrifugal, having two sheets with flour numbers and a sheet of No. 7. The tail-over could be purified and the throughs might go to the last reduction. In the case of a very small plant, it might not be convenient to purify the tail-over of the second centrifugal; it would then be sent to a tailings roll. This way of treating the last break stock would be especially suitable for mills using mild and soft wheats like English, but for a large plant, where all hard foreign and well-conditioned wheat was being ground, a plansifter might take the place of a centrifugal, but the writer would not specially advise it. In this case, however, the following arrangement of sieves would suffice to do the work: The top sieve would be 26 wire, the tail over going to a bran duster, as above, and the throughs on to No. 9 flour silk. The tail-over of the latter might go on to 30 wire, the tail over of which would be offal, and two flour silks, both No. 10, would get out the remainder of the bran flour. What stock was left would tail over the last silk on to No. 7 silk, the tail of which would be purified, and the throughs would go to the last reduction.

Miller-Farmer

CORN MARKETS.

LONDON.

Mark Lane, Monday.—Malt: Very little doing in old; samples of new are on the increase. Barley: Grinding, 3d per qr dearer; malting unchanged. Wheat: Slow at late rates. Oats: In some cases made 3d per qr more money. Maize: Advanced 6d per qr. Flour: Steady.—NIXON, GOWER AND Co.

Mark Lane, Wednesday.—The supply of English wheat is at present sufficient to meet all requirements, and even at a further decline of 3d to 6d business was difficult to complete. White of fine quality, 32s 6d, 65lb; and red of similar sample, 30s 6d, 63lb delivered. American descriptions were generally 3d lower, but with an absence of buyers there was nothing to actually test the market, which was somewhat irregular. Flour is frequently 3d to 6d per sack lower since last Monday, but consumers still buy only for pressing needs. American first patents quoted at 25s 6d to 26s; second ditto, 24s to 25s; first bakers, 19s 6d to 20s 6d; and second, 16s to 17s 6d. Hungarian up to 29s 6d. The London Millers' Association made no alteration in their prices to-day, town household remaining at 25s 6d, and whites 28s 6d per sack. Grinding barley generally unaltered, with Persian and Black Sea in fair supply. Maize continues very scarce, flat being now held for 23s landed, but operators were not anxious to follow the advance.

Mark Lane, Friday.—On the week, breadstuffs are lower, while feeding stuffs show firmness. The attendance of buyers was only on a limited scale. English wheat, although easier since last Monday, was steady to-day at the decline. Nearly everything, however, resulting is still confined to the country exchanges. Fine white, 32s, and red of similar sample 30s 6d, 63lb delivered. American 3d easier since last Monday, while also irregular. Flour was again idle to-day, but sellers showed no inclination to accept concessions, and the general range of prices is 3d to 6d lower per sack since Monday last. The London Millers' Association made no alteration in quotations at this afternoon's meeting. Maize was again the most selected among feeding stuffs, and flat is almost unobtainable landed, 21s 6d being demanded, but 21s is named ex ship; round corn firm; Odessa, 26s 6d ex quay; sound new Plate, 23s ex quay. Barley steady for feeding kinds; supplies of Black Sea and Persian on hand are kept down, but wants are not too readily met at present. The market for beans and peas continued featureless, but steady. Egyptian splits, 20s 3d ex mill. Mazagans, 20s landed. New Zealand, new, 32s to 32s,6d; and old, 33s to 34s, 504lb. Canadian white peas, new, 29s 6d to arrive, and old 30s 6d ex granary. Maize germ meal easier for American, owing to heavy arrivals. Arrivals of grain this week:—English and Scotch wheat 450, barley 1,150 qr. Foreign wheat 17,560, barley 22,600, oats, 23,810, maize 8,160, beans 2,110, peas 940 qr. Flour 24,040 sacks.

COUNTRY.

Aylesbury, Saturday.—The wheat trade again dull, with a further decline of 6d on the week. Other grain maintained their prices. An average attendance and good quantity on offer. Wheat, 26s to 29s; barley, 25s to 32s; beans, 29s to 35s; oats, 18s to 24s.

Banbury, Thursday.—Wheat (white) (old), 29s to 31s per qr; wheat (red) (new), 26s to 28s per qr; beans (new), 28s to 30s per qr; beans (old), 33s to 34s per qr; oats (new) 16s to 18s per qr; oats (old) (black), 21s to 22s per qr. Wheat a slow trade at about last week's rates.

Bristol, Thursday.—We have had a quiet trade for wheat since our last. There was a fair supply of English wheat at to-day's market, and to effect sales from 3d to 6d less had to be taken. Foreign also the turn easier. Grinding barley 3d higher. Maize and oats without change. Flour trade little doing.—GRACE BROTHERS.

Cambridge, Saturday.—During the week the wheat trade has been dull with a drooping tendency. Supplies are not large. Farmers are now getting on with their wheat sowing after a nice rain. At this market to-day there was a small supply of wheat, which met with a dull trade at prices, perhaps, slightly under last week. Wheat—red, 29s to 31s; and white up to 31s per 504lb. Barley was in smaller supply and unaltered in price. Beans, turn easier. Oats were firmer.

Canterbury, Saturday.—Wheat was rather cheaper, and trade generally was dull. Ruling prices:—White wheat, 30s to 32s 6d; red ditto, 29s to 31s 6d; malting barley, 28s to 35s; grinding ditto, 21s to 24s; white oats, 18s to 21s; ditto black, 15s to 20s; peas, 29s to 31s; tick beans, 30s to 32s; mazagans, 27s to 29s; flat maize, 22s to 24s; round ditto, 27s to 28s per qr; winter tares, 6s per bushel.

Carlisle, Saturday.—Fair supply of oats to-day in our market, good demand at 6d per qr advance. New, 17s to 19s per 336 lb; old, 23s to 24s per 336 lb.—THOMAS ROBINSON.

Chester, Saturday.—English wheat was of poorer quality, and not so well sold, oats being used up principally by farmers, few samples were changing hands. Indian corn had fair consumptive trade, with slight fall in value. Quotations: Wheat, white and red, 4s to 4s 2d per 75lb.; grinding barley, 3s to 3s 6d per 64lb. Beans, new, 4s 8d to 4s 10d; old, 5s 6d per 80lb. Oats new, 2s 2d to 2s 4d; old, 3s 2d to 3s 7d per 46lb. Indian corn, 11s 6d to 11s 9d per 240lb.

Chichester, Wednesday.—The attendance was about up to the average for a bye-market, but the tone of business was quiet. Not much wheat offering, and the transactions which took place were at a decline of 6d to 1s on the week. Feeding stuffs were steady at late rates, without much activity being shown, while flour was unaltered.

Colchester, Saturday.—Wheat small supply, slow trade at barely last week's prices. Barley, very much less offering, the medium and better sorts making rather more money. Beans, peas and oats scarce, and selling at fully late rates.—FRANCIS AND Co.

Cork, Wednesday.—Barley, 272 cwt., 6s 6d to 7s 6d; oats, 626 cwt., black 4s 9d to 4s 11d 20 cwt, white 6s.

Dorchester, Saturday.—Quiet trade for both English and foreign wheat, prices dropping 6d quarter. Fair quantity of malting barley offering, but again only the best qualities were saleable Grinding barley 3d per quarter dearer. Feeding stuffs firm.

Glasgow, Wednesday.—There was a small attendance at our Corn Exchange to-day. Wheat dull, at 3d per boll decline on the week. Flour depressed, and 6d to 1s per sack lower. Indian corn quiet, at a decline of 1½d to 3d per boll. Grinding beans steady and unchanged. Canadian peas quiet and unaltered. Canadian oats firm, and the turn dearer. Home quiet but steady. Barley steady. Oatmeal quiet, and the turn in buyers' favour. Bran and thirds dull, but unaltered. —GIBSON AND CLARK.

Hereford, Wednesday.—Moderate attendance, with dull trade in English wheats, particularly for medium grades. English barleys were freely offered without any improvement in value. Oats quietly steady. Maize unchanged. Beans firm. Vetches and peas, nothing doing. Wholesale prices:—Wheat, white, 3s 6d to 3s 8d, red, 3s 5d to 3s 7d; barley, 3s to 3s 9d; oats, 2s 3d to 3s; beans, 3s 8d to 4s; maize, 2s 8d to 3s 2d; vetches, winter, 4s to 6s, and spring 3s 6d to 5s.

Ipswich, Tuesday.—Small supply of wheat, and trade quiet at barely last week's rates. New reds, 29s to 30s; old, 30s to 31s 6d; white, 33s. Good supply of barley. Best samples were in request at from 32s to 36s; medium runs from 26s to 30s. Oats the turn dearer. Maize steady. Beans and peas firm.

Leeds, Tuesday.—Continued heavy shipments and weakness in America keep the wheat market in a stagnant state, and in the practical absence of business, it is impossible to quote values. All but finest barleys are rather lower, and difficult to sell, best qualities in fair demand. Maize, beans, and oats very slow.—DUNNS AND Co.

Leicester, Saturday.—Good average attendance, with moderate supplies of home-grown wheats in variable condition. Trade sluggish for all except choice samples at 29s to 32s per 36 stones. Fine oats firm.

Lincoln, Friday.—Fair supply of new wheats. Trade very slow, with no change in value. Reds, 27s to 28s; whites, 28s to 29s. Foreign wheats less money. Good supply of barley; trade very flat, with maltsters buying sparingly. Good oats firm, inferior cheaper. No change in beans, peas, and maize.

Liverpool, Friday.—Wheat firm but quiet, with a small business at 1d decline on whites and ½d on reds. Flour is quiet without change from last market day's quotations. The Liverpool Millers' Association make no change in prices. Maize is in slow request for mixed American at 1½d under Tuesday owing to larger arrivals. European scarce and dearer. Plate has a fair trade at unchanged prices. Barley slow for feeding; malting idle at unchanged prices. Beans quiet trade, with a fair inquiry from Scotland for flat sorts, Pandermo's making 3d advance. Peas in fair request at ½d under Tuesday. Oats are very quiet for English; foreign sorts have a moderate business, but without change. Oatmeal steady with only a small inquiry. Oilcake firm with a moderate business at late rates.—SEGAR AND TUNNICLIFFE.

Maidstone, Thursday.—The attendance to-day was quite as numerous as usual, and about the average display of wheat samples. The tendency is to a slight decline in value, but as the farmers are discontented with present prices and do not press, not enough drop to alter quotations from last week. Barley is bought pretty freely if really good, but middling and inferior sorts neglected. Oats, beans, and peas, no change. Maize is rather high just now, so its sale is of retail description. Not any alteration in tares, rye, hemp, sergo, or millet.

Manchester, Thursday.—There is a lower range of prices prevailing to-day as compared with a week ago. English wheat is 6d per qr easier, whilst foreign sorts are about 2d per cental down. Flour, though quotably unaltered, is slow of sale with prices tending against the seller. No particular alteration is noticeable in beans, peas, or barley. Indian corn is ½d per cental easier as compared with last week.

Newark, Wednesday.—Wheat a small show, which sold steadily at previous prices. Barley: Some inquiry for the better qualities, inferior samples very unsaleable. Oats and beans firm at last week's prices.

Newcastle-on-Tyne, Saturday.—A dragging sale at our to-day's market for wheat, which was disposed of at 6d per 504lb under last week's prices. Maize steady at last week's prices; demand, however, was not active. Fine Scotch oats were sold at last week's quotations, common sorts to make sales 3d to 6d below last week's prices had to be taken. Barley steady for fine malting qualities, common sorts neglected. Beans and peas unchanged. Flour 6d. per sack lower on the week.—JOSEPH POLLARD AND Co.

Newcastle-on-Tyne, Saturday.—Wheat and flour disappointing for sellers, malting barley also. Oats slow and on the wane. Beans and peas steady. Maize lower to sell.

Northampton, Saturday. — The supply and demand of farm produce, limited. A quiet market on the lines of last Saturday. Not much doing, and business generally inactive. White wheat, 30s to 32s; red, old, 30s to 31s; red, new, 27s to 30s; malting barley, 25s to 32s; grinding ditto, 21s to 23s; oats, 17s to 21s; old, fine, 24s; beans, 28s to 31s; old fine, 36s; peas, 28s to 36s; flour, 23s to 26s.

Norwich, Saturday.—There was only a small supply of wheat at our market to-day, and where business was effected was in favour of buyers. Not so much barley on offer at late rates. Stormy and unsettled weather has prevailed during the past week. Wheat, red, 29s to 30s per qr, weight 63lbs. per bushel imperial. Corn Inspector's return for the week ending 22nd October, 1900:—Wheat, 3,783-6, 28s 6¾d; barley, 13,810-7, 26s 1½d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat a good supply, fair trade at previous values. Barley, fine samples sought after, and full rates maintained, while inferior lots were difficult to move. Oats and beans both moderately represented, and full rates supported.—ROBERT HUBBLE.

Oxford, Saturday.—Quiet market. Wheat changed hands at barely last week's prices. Barley, smaller supply offering. Firm trade for good quality, inferior very slow.

Peterborough, Saturday.—The wheat trade has been slow to-day, but supply was so small that local millers had to pay last week's prices for their requirments. Middling barley was lower, but samples firm. Oats in fair demand at full prices.—THOMAS HILL AND SON.

Plymouth, Thursday.—There was a good attendance at our corn market to-day. Trade was quiet, wheat 6d lower. Barley has increased 3d. Maize and oats steady at last week's prices.—ORLANDO DAVIS AND Co.

Reading, Saturday.—The wheat supply to-day was somewhat limited, but business proved quiet. Last week's figures were generally obtained, and these varied from 27s to 30s per qr for new wheat, and 30s to 32s for old parcels. The barley trade also ruled very slow, and where sales took places they were at late quotations. Other descriptions of corn sold at unaltered figures.

Sheffield, Tuesday.—Moderate attendance at the Corn Market. Foreign and English wheat a little lower on the week. English and foreign beans firm at late rates. Flat corn 3d per qr dearer. Oats and barley unchanged. Quotations:—Wheat, white, 32s to 33s; red, 31s to 32s; new, 30s to 31s per 504lb; oats, old white, 26s; ditto, new white, 17s 6d to 19s; ditto old black, 22s; ditto new black, 16s to 17s per 336lb; peas, grinding, 32s to 34s; ditto blue, 53s to 70s per 504lb; beans, English (new), 31s 6d to 32s per 532lb; barley, grinding, 23s 6d to 24s 6d; ditto malting, 27s to 35s per 448lb; Indian corn, small old, 29s to 30s; ditto American mixed, 23s 6d to 24s per 480lb.

Spalding, Tuesday.—Wheat was a slow trade, and prices had a downward tendency at 27s per qr. Oats, slow, at previous prices. Barley unchanged. No quotable alteration in other articles.

Stockton, Wednesday.—Moderate show of English wheat, which made 29s and 30s per qr. Since last week the foreign wheat market has continued to be in a depressed state owing to large shipments and weakness in America, and to do business a reduction of fully 6d below last week's prices had to be submitted to. Maize and oats unchanged. There was a fair show of malting barley, which made 25s to 27s 6d per qr.

Sunderland, Saturday.—Little wheat offering, and prices rather easier. Barley in good supply, but condition moderate, and difficult to sell. Arrivals coastwise: wheat 2,523 qrs; oats, 385 qrs. Foreign nil.—E. AND F. RICHARDSON.

Taunton, Saturday.—Large attendance. English wheat a quiet trade at slightly easier prices. Malting barley large supply; best samples firm; secondary slightly easier. All feeding stuffs steady.

Wakefield, Friday.—During the past week the trade has been very slow for wheat, but to-day there is a slightly improved demand at last Friday's prices. There is a large supply of barley offering, but the finest only sells at about former rates. We quote no alteration in feeding stuffs.—MICHAEL SANDERSON AND SON, LIMITED.

Wakefield, Friday.—The wheat trade has ruled exceedingly stagnant this week, and on the limited business doing sellers have been compelled to accept less money. Yesterday's advance in America causes a steadier feeling to-day, with an improved inquiry. Fine malting barleys continue to be sought after, lower qualities rather favour buyers. Maize, beans, and oats in poor demand at unchanged rates.—DUNNS AND Co.

Winchester, Saturday.—Wheat in moderate supply, which met a slow trade at 6d to 1s reduction on the week. Best barley sold readily; medium qualities difficult to quit. Oats firm trade, at fully late rates. Maize unaltered. Flour cheaper to sell.—FEAR, COLEBROOK AND Co., LD.

Wisbech, Saturday.—A short supply of grain. Wheat a dull trade at 6d to 1s decline. Red, 27s to 28s. Oats, 17s to 19s. Barley, 25s to 28s.—JAMES FLETCHER.

Wolverhampton, Wednesday.—A good attendance, but trade quiet, wheat market being very flat. Quotations:—English wheat, new, 12s to 12s 6d; English wheat, old, 13s per 216lb; oats, old 15s to 16s, new 10s 6d to 11s 6d; beans, old 14s 6d to 15s 6d, new 12s 3d to 13s 3d per 196lb; maize, 24s 6d to 25s 6d per 480lb.

Worcester, Saturday.—Market moderately attended, and trade slow. Wheat is very quiet, and English samples were only saleable at a reduction. Foreign made about previous rates. Barley, oats, and beans unchanged. Maize the turn easier. Wheat, white, 29s to 30s; red, 27s to 28s per qr.

Worksop, Wednesday.—Fair attendance. Smaller show of grain, especially barley, which sold much better. Oats scarce and dear. Wheat, old white, 31s to 32s; old red, 30s to 31s; new white, 28s to 29s; new red, 27s to 28s per qr; best malting barley, 30s to 32s; secondary, 28s to 29s; grinding barley, 23s to 25s; old white oats, 25s to 27s; old black, 24s to 25s; new white oats, 18s to 20s; new black, 17s to 18s; flat maize, 24s to 25s; round, 28s to 29s per qr.

York, Saturday.—Farmers do not offer very much wheat, and prices remained unchanged. The following are the average prices of corn, according to the official weekly return, computed by standard imperial measure:—Wheat, 26s 4d; barley, 24s 1d; oats, 17s 2d per qr.

FOREIGN.

The Antwerp wheat market has ruled quiet, business having been to a great extent confined to the immediate requirements of consumption. Wheat quotations have shown no improvement upon the French country markets, which have been depressed, in sympathy with the downward tendency of prices in Paris. Business in wheat at Marseilles has been limited and inactive. The Parisian wheat market has shown a dull tone. Flour for consumption has exhibited little change in the French capital. It is believed that there are considerable stocks of wheat in Russia—at any rate the exportation of wheat from Russia has been increasing since the commencement of the new wheat year, having amounted to 5,593,549 hectolitres, as compared with 4,539,718 hectolitres in the corresponding period of 1899. Roumania and the Balkan provinces have also wheat supplies available for exportation this year. Wheat has shown little change at Konigsburg and Dantzic. The tendency of the Odessa wheat market has continued dull and weak. The quantity of wheat now en route for Europe is returned at 1,130 000 qrs, as compared with 1,410,000 qrs at the corresponding date of 1899. The total of 1,130,000 qrs representing the quantity of wheat now en route for the Continent, is made up as follows:—France, 100,000 qrs; Belgium, 310,000 qrs; Holland, 320,000 qrs; Germany and the North, 1,700,000 qrs; and Italy, Spain, etc., 320,000 qrs.

Hamburgh, Saturday.—Barley rules exceedingly dull here, and prices are tending lower. Stocks on the spot are certainly small, but the demand is equally poor, and transactions are few and far between. Our local maltsters and brewers are well stocked, and from England there seem to be no orders in the market and no reasonable bids can be drawn from there.—FRANCIS M. TH. DUHNE.

Hamburg, Saturday.—Weather wet, with a changeable temperature. Influenced by dull reports from foreign markets, trade here is quiet, and prices of most articles tend in buyers' favour. The imports during the week amounted to 1,586 tons wheat, 3,320 tons rye, 6,048 tons barley, 17,530 tons maize. Soft wheats are cheaper, while fine dry Holstein, Mecklenburg, and Saale are not materially lower, such being still held at 27s 6d to 28s 3d per 504lb., f.o.b. Common Holstein and Hanoverian is offering at 25s to 26s 6d, f.o.b. Hard Winter 2 and fine River Plate is selling at 28s 9d to 29s 9d per 480lb. Rye quiet, 9 10-15. South Russian is offering at 22s to 22s 3d per 480lb, c.i.f. Good Saal barley is selling at 30s 9d to 32s, fine at 33s 6d to 35s 6d, and finest at 36s to 38s 6d per 448lb, f.o.b. Bohemian and Moravian is held at 34s to 41s per 448lb, f.o.b., but does not meet much attention. Russian feeding barley 18s 3d to 18s 6d per 400lb. Mixed maize near at hand maintains its value, 21s to 21s 3d being paid, while forward deliveries are rather easier; November 19s 9d, December-March 18s 9d per 480lb, c.i.f., Hamburgh.—JOHN TATLOCK.

POULTRY AND PROVISIONS.

Smithfield, Saturday.—The demand this morning ruled rather firmer, but large quantities, however, were unsold. Quotations:—Fowls: Yorkshire, 2s 3d to 2s 6d; Essex, 2s 3d to 2s 9d; Surrey, 2s 6d to 3s 6d; Sussex, 2s 6d to 3s; Irish, 1s 3d to 1s 8d; Boston, 2s to 2s 6d; country ducks, 2s 3d to 2s 9d; turkeys (cocks), 6s 6d to 9s; hen, 4s to 5s; Bordeaux pigeons, 8d to 10d; feathered ditto, 7d to 9d; wild rabbits, 9d to 10d; tame, 1s to 1s 2d each; Australian, 7s 6d to 10s 6d per dozen; pheasants, 4s 6d to 5s; young partridges, 3s to 3s 9d; old, 1s 6d to 1s 8d; young grouse, 4s to 4s 6d; old, 3s per brace; hares, 3s to 3s 3d; leverets, 1s 6d to 2s; wild duck, 1s 4d; pintail, 1s 4d; teal, 6d to 9d; woodcock, 2s to 2s 6d; widgeon, 1s; snipe, 6d to 8d; golden plover, 7d to 10d; black, 5d to 6d each.

Glasgow, Wednesday.—The arrivals were large, the unsold parcels at Kilmarnock fair being sent to Glasgow. As the trade supplied themselves freely at Kilmarnock, the sales in Glasgow were almost nil. There is a splendid variety of cheese on offer. Cheddars and Dunlops are quoted from 45s to 66s per cwt. September-made Canadians are expected to arrive to-day.

Liverpool, Saturday.—Bacon: Under the influence of weaker American advices and limited consumptive demand the market is easier, and closes dull with further declining tendency. We quote, to-day, choice Cumberland cut, 20lb to 22lb, 46s 6d to 50s; 26lb to 30lb, 45s to 46s; 32lb to 38lb, 43s to 48s; long middles, rib-in, 18lb to 22lb, 50s to 55s; clear bellies, 14lb to 16lb, 48s to 52s; 18lb to 20lb, 48s to 51s; Staffordshire cut (lean on), 35lb to 40lb, and Birmingham cut, 33lb to 38lb, 45s to 48s; clear Staffords (lean off), 40lb to 44lb, and Yorkshire cut, 40lb to 45lb, 43s to 45s; singed Wiltshire, Canadian, 45lb to 55lb, 54s to 60s; American, 40lb to 50lb, 44s to 49s; short clear backs, 12lb to 16lb, 43s to 45s; 16lb to 20lb, 42s to 43s; fat backs (export), 38s to 39s; long clear middles, 35lb to 40lb, 43s 6d to 45s; 40lb to 45lb, 43s to 44s; short clear middles, 45lb to 50lb, 40s 6d to 41s 6d; short middles, (rib in), 18lb to 23lb, 47s to 49s; shoulders, square cut, 12lb to 14lb, 36s 6d to 40s; 14lb to 16lb, 36s to 40s; New York cut, 11lb to 13lb, 32s to 34s per cwt. Hams dull and reduced in value. We quote choice long cut, 8lb to 12lb, 46s 6d to 51s; 14lb to 16lb, 45s to 50s; short cut and A.C., 10lb to 12lb, 45s 6d to 49s; 12lb to 14lb, 44s to 48s; 14lb to 16lb, 41s 6d to 45s per cwt. Lard is in moderate request, and with lower cables is easier to buy. We quote pails and kegs, 37s 9d to 39s; prime Western (in tierces), 37s 6d to 37s 9d per cwt. Beef rules steady at recent values. We quote extra India mess, 70s to 75s; Plate and Packet, 65s to 67s 6d per 200lb. Pork quiet, but with light supplies prices are well maintained. We quote finest prime mess, 69s to 74s per 200lb. Cheese.—The demand has been moderate, and with somewhat easier cable quotations importers have shown more willingness to meet buyers, and prices must be reported a shade easier. We quote finest Canadian, coloured, late makes, 54s to 55s; white, 54s to 54s 6d; finest States coloured, 53s 6d to 54s 6d; white, 53s to 54s; summer cheese, ripe in flavour, are somewhat plentiful, and are offering freely from 51s to 53s; lower grades in light supply, nominally 28s to 44s per cwt. Butter.—Notwithstanding the advance in Continental and Irish produce the inquiry for Canadian and American is very disappointing. We quote, fancy Canadian creamery, in boxes, 102s to 107s; second quality, 98s to 100s; finest States, 95s to 100s; finest ladles and imitation creamery, 78s to 84s; finest Danish, 112s to 122s; Australian, 103s to 110s; Irish creamery, 106s to 112s; Cork firsts, 94s; seconds, 87s; thirds, 79s per cwt.—HOBSON'S BROTHERS.

Newport, Wednesday.—A good supply and an average attendance. The quotations were: Cheesepickles, 56s to 58s per cwt; fancy dairies, 58s to 62s; doubles, 55s to 60s; truc ales, 56s to 60s; and Cheddars, 56s to 58s, per cwt.

BUTTER.

Tuesday.—Bedale: 1s 4d to 1s 5d per roll of 24oz. Gainsborough: 1s 1d to 1s 3d per lb. Settle: 1s to 1s 1d per lb. Stone: 1s 2d to 1s 3d per lb. Sheffield: 1s 3d to 1s 4d per lb.

Wednesday. — Barnsley: 1s 3d per lb. Boston: 1s 1d to 1s 3d per lb. Colne: 1s 2½d per lb. Goole: 1s 2d per lb. Hereford: 1s 2d to 1s 4d per lb. Keighley: 1s 3d per lb. Kirbymoorside: 11d to 1s per lb. Knaresborough: (wholesale), 1s 6d; (retail), 1s 7d to 1s 8d per roll of 24oz. Louth: (wholesale), 1s to 1s 1d per lb. Market Drayton: 1s 2d to 1s 3d per lb. Market Weighton: 1s 1d per lb. Masham: 1s 3d to 1s 5d per roll of 24oz. Northallerton: 1s 7d to 1s 8d per roll of 24oz. Stockton: 1s 1d to 1s 2d per lb. Whitby: 11d to 1s per lb.

Thursday.—Brigg: 1s 1d to 1s 2d per lb. Bristol: Canadian creamery, 106s to 108s; Canadian dairy, 92s to 94s. Waterford: 96s to 98s. Driffield: 1s per lb. Penistone: 1s 3d per lb. Ripon: 1s 4d to 1s 7d per roll of 24oz. Scarborough: 1s 2d per lb. Wetherby: 1s 3d to 1s 4d per lb.

Friday.—Chester,: 1s 3d per lb. Crewe: 1s 3d per lb. Derby: 1s 2d per lb. Easingwold: 1s 1d to 1s 2d per lb. Grimsby: Danish, 118s to 120s; Dutch, 110s to 113s; Canadian, 108s to 110s; Finland, 110s to 112s per 112lb. Helmsley: 1s 1d to 11d per lb. Leeds: Danish, 118s to 124s 6d per 112lb; Irish creameries, 104s to 110s; York lump, 15s to 16s per stone; ditto long rolls, 1s 1d per lb. Leyburn: 1s 4d to 1s 5d per roll of 24oz. Lincoln: 1s 2d per lb. Otley: 1s 5d to 1s 7d per roll of 24oz. Stratford-on-Avon: 10d to 1s 3d per lb. Whitchurch: 1s 1d to 1s 2d per lb.

EGGS.

Tuesday.—Bedale: 8 for 1s. Gainsborough: 8 or 9 for 1s. Settle: 8 or 9 for 1s. Sheffield: 8 or 9 for 1s. Stone: 8 for 1s.

Wednesday.—Barnsley: 7 for 1s. Boston: 7 or 8 for 1s. Colne: 2s 6d per score. Goole: 9 for 1s. Hereford: 8 to 10 for 1s. Keighley: 7 for 1s. Kirbymoorside: 10 or 11 for 1s. Knaresborough: 9 or 10 for 1s. Louth (wholesale): 12 for 1s. Market Drayton: 8 or 9 for 1s. Market Weighton: 9 or 10 for 1s. Masham: 9 or 10 for 1s. Northallerton: 7 or 8 for 1s. Stockton: 6 or 7 for 1s. Whitby: 8 or 9 for 1s. Worksop: 3s per score.

Thursday.—Brigg: 8 or 9 for 1s. Driffield: 12 or 13 for 1s. Penistone: 8 for 1s. Ripon: 7 or 8 for 1s. Scarborough: 9 for 1s. Wetherby: 8 or 9 for 1s.

Friday.—Derby: 7 and 8 for 1s. Easingwold: 10 or 11 for 1s. Grimsby: Austrian, 6s 2d to 7s 4d; Russian, 5s 7d to 7s 6d; Canadian, 6s 5d to 8s per 120. Helmsley: 8 or 9 for 1s. Leeds: Yorkshire, 12s to 13s per 120; Irish, 10s to 11s; Danish, 8s 6d to 10s 3d; Austrian blues, 6s 6d to 7s 3d; ditto reds, 5s 9d to 6s. Leyburn: 8 or 9 for 1s. Lincoln: 8 or 9 for 1s. Otley: 7 or 8 for 1s. Sandbach: 6 and 7 for 1s. Stockport: 5 and 6 for 1s. Stratford-on-Avon: 2s 6d to 3s 1d per score. Whitchurch: 2s 6d to 3s 1d per score.

COLONIAL DAIRY PRODUCE.

London, Friday.—Butter.—The demand for Australian and New Zealand butter this week has shown no marked improvement, nor is there any advance in prices. Some of the brands of butter from New South Wales are already showing signs of fishiness, while is very disappointing. Other brands, however, are excellent quality. Choice Australian realises 110s to 112s, and occasionally 114s for a fancy lot. Finest makes 100s to 103s, and fine, 94s to 95s. Choicest Danish is now making 121s to 123s, finest 117s to 119s. Cheese.—The market for Canadian cheese has this week been slow, and the c.i.f. quotations from Canada have been slightly easier. Prices on the spot remain unchanged.—W. WEDDEL AND CO.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—A good supply of vegetables evidenced a better inquiry. Good supplies of fruit were available, but met a good demand. Greenstuffs:—Cabbages, 3s 6d; beetroots, 3s per tally; cauliflowers 1s 3d to 1s 6d per dozen; Brussels sprouts, 1s 6d to 1s 8d per half sieve; parsnips, 3s 3d per bag; spinach, 2s 6d per bushel; carrots, 2s to 2s 6d; turnips, 2s to 3s; parsley, 1s to 1s 6d; leeks, 2s 6d to 3s per dozen bunches; horseradish, 1s to 1s 6d per bundle; celery, 10s to 14s per dozen rolls. English onions, 5s per cwt; Valencia, 6s to 6s 6d per case; potatoes—Maincrops, 100s; Snowdrops, 100s; Up-to-Dates, 80s to 90s; Reading Giants, 80s; Imperators, 70s per ton. Fruit:—English grapes, 6d to 9d per lb; Almeria, 3s to 14s; lemons, 3s 6d to 5s per barrel; English apples, 1s 6d to 2s per bushel; Nova Scotian, 10s to 14s per barrel; Egyptian pears, 2s 6d to 3s per bushel; Californian, 7s to 10s per case; peaches, 2s to 8s per dozen; Valencia nectarines, 6s to 7s per case; pineapples, 2s to 4s each; bananas, 5s to 8s per bunch; pomegranates, 6s to 8s per case; Grenoble walnuts, 10s to 12s per bag.

POTATOES.

Borough and Spitalfields, Saturday.—Potatoes. The arrivals were rather equal to demand, but prices were steady. English: Hebory 2 Hebrons, 3s 6d to 4s 6d; Early Puritans, 3s 6d to 4s 6d; Snowdrops, 3s 6d to 4s 6d; Reading Giants, 3s 3d to 4s; Prolesses, Maincrops, 3s 3d to 3s 6d; Up-to-Dates, 3s 6d to 4s 6d per cwt.

Goole, Wednesday.—Good attendance and brisk trade to-day; prices were practically the same as last week, viz., 7s to 8s per ton. Best, in some cases, made a shade more.

HOPS.

Canterbury, Saturday.—There has been an active business in the hop market, a large amount of contracts changing hands. £7 per cwt. is ruled as being the top price, but has been reached before the season's end. Many bids are being refused as growers prefer not showing so poor a return on the outlay.

Worcester, Saturday.—There was very few growers on the market to-day, the only ones and those evidently heard the advice of their friends to keep their samples very much to any time, as nothing less than [illegible]. There has been a decided dearth of any offers during the week, and [illegible] good weight at the present time. [illegible] packets have passed the pending series to-day and [illegible] the week making a total of [illegible] packets up to date.—[illegible] AND CO.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The somewhat broken weather of the past few days has not been agriculturally unwelcome, for up to the 24th, October had a very low rainfall and the land needed a series of showers. The completion of wheat sowings in England can never in the best of autumns be regarded as completed until the autumn itself is over, but it is something to be well advanced with ploughing as in the present year. In France the wheat sowings are already for the most part over, and the same is the case in the other Latin countries, where to get the wheat promptly sown has been a tradition from classical times. The Russian winter wheat is probably nearly all sown by now, for the snow may begin to fall before October is over, as Napoleon found to his cost in a certain historic campaign. America has had very curious weather experiences of late, but the rapid alternations of temperature have not interfered with autumn sowings of wheat. From all that we hear, over an average area has been sown.

The British markets of the last week have been decidedly reactionary in tone, and the price of wheat is rather lower for all sorts, from the highly-priced No. 1 Northern American to the poorer or chicken wheat samples out of the home crop. The decline may be averaged at "a full sixpence." The causes of this weakness are not far to seek. There has been a praiseworthy restraint exercised by English farmers in their new crop deliveries, as the following sales since harvest will show:—

1900	941,000 qrs.
1899	1,113,000 ,,
1898	1,009,300 ,,

But imported wheat and flour have been sold to the following extent:—

1900	3,709,000 qrs.
1899	3,152,000 ,,
1898	2,714,000 ,,

The trade cannot "eat its cake and have it." If half a million qrs. of extra trade was done from 1st September to 15th October, consumption will not rise to meet the sales, and consequently there is a strong presumption that trade from 15th October to 30th November will be half a million qrs. under the average. The reports which are sent out by firms, whether on London or country markets, often mislead by reason of a certain vagueness in the ordinary language in which markets have to be described. It seems inconsistent, yet "a good business" may frequently be done on "a bad market," and over average sales may easily accompany under average prices. If a market has an average turnover of 10,000 qrs. and 15,000 qrs. are pressed on sale, it may often arise that a decline of 1s. has to be allowed to effect sales, yet at that decline 14,000 qrs. may be cleared and the business done, therefore, amount to 40 per cent. over the mean. Such a market will almost certainly be reported as "weak and declining," a right description of *prices* but a misleading description of *trade*.

Another cause of present weakness is the large visible supply of wheat in America. The figures cabled on Friday were as follows:—

	Bushels.
1900	58,313,000
1899	48,555,000
1898	14,848,000
1897	24,929,000

The accumulation of grain waiting shipment from America is undoubtedly a menace to prices on this side of the Atlantic.

There are now on passage to the United Kingdom the following quantities of wheat:—

	Qrs.
From Russia	125,000
America	355,000
California	840,000
Argentina	240,000
Australasia	220,000
All other Countries	10,000
Total Oct. 26, 1900	1,790,000
,, ,, 1899	1,605,000
,, ,, 1898	1,150,000
,, ,, 1897	1,810,000

The supply immediately in prospect, therefore, does *not* add to the depression of the markets, and is in itself quite moderate. We may expect, too, that any increase in the second item will in November be balanced by a decrease in the fourth and fifth. The Russian shipments during November are likely to be heavy, but that is owing to the rush to clear before the ports are impeded by ice.

The quantities of spring corn on passage are as follows:—

Qrs.	Barley.	Maize.	Beans.
1900	625,000	476,000	5,000
1899	568,000	988,000	8,000
1898	480,000	650,000	7,000

The maltster and the grower of malting barley have been the chief men at Mark Lane since the 20th, and we are glad to say that an excellent business has, on the whole, been done, though the prices have not been all that we could have hoped. Maltsters, as usual, have been free in paying for anything really bright in colour, satisfactory in skin, and good in weight; 37s. to 39s. has been obtained without difficulty. But it is stated by old buyers, who have known Mark Lane for thirty and forty years, that farmers now grow barley more for quantity and less for quality than they used, and that there is a plethora of 25s. to 30s. sorts at the expense of 35s. to 40s. descriptions. This raises an interesting question, "Is prolific barley of second-rate malting quality only?" This is an agricultural question rather than a market one, but it is certain that this October at all events the abundance of "good brewing barley" and the real scarcity of good bright malting has been a feature of every successive market.

In the country we hear of a better demand for English oats, and of 18s. 6d. being paid at such markets as St. Ives and Ely. At this rate London, which makes a mean bid of 17s. 9d., will not get much English produce. Winter oats are selling so well that farmers may be tempted to increase the area sown. About 19s. 6d. is made for new black winter, and up to 22s. for fine grey. Although no returns of Irish oats imported seem to be available, samples may be met with not only at Mark Lane and Bristol, but at Plymouth, Southampton, Rochester, and many other markets. About 18s. is asked for old and 16s. 9d. to 17s. for new. Foreign oats were in sellers' favour on Monday, Tuesday, and Wednesday, but since Thursday have not been so good a trade. Some 320lb. Dutch samples have made 19s. 6d. to 20s. per qr. New dun peas are now to be met with at most markets. 30s. is asked at East Anglian, 32s. at Kentish and Sussex markets.

Shipments of wheat from all countries show a decrease on the week, and the total shipments of maize and barley are also reduced. Of oats there is a slight increase.

The price of London flour, credit terms, according to the London Flour Millers' Association, has been lowered 6d. per sack for "whites" and the same amount for "households."

THE BALTIC.

On the big wooden door of South Sea House may be seen a small half-sheet of note-paper on which is written "Removed to 190, Bishopsgate-street." Surely so big a business was never "removed" with so little fuss! The new temporary quarters give much satisfaction in themselves, but are too far east for any but residents on the lines which run into Liverpool-street and Broad-street. Messrs. Trollope and Co., the contractors for the new Baltic in St. Mary Axe, are working day and night. Members will be glad to note that there is an excellent dry foundation. Business during the last few days has been inactive, and on Saturday scarcely any of the chief members turned up. It had been expected that the C.I.V. demonstration would render business difficult, and employers did not grudge the half-day to pleasure. When it was learnt that Monday was to be the day of the demonstration the feelings of operators might "be better imagined than described."

Sales of the week include:—Wheat: No. 1 Californian 30s., Walla Walla 28s. 9d., South Australian 30s. 6d., Argentine 30s., Taganrog 29s., Odessa Ghirka 30s., fine Azima 31s., and Roumanian 29s. per qr. Maize: American 20s. 9d., Galatz 22s. 3d., Roumanian 19s., Odessa 26s., and fine Cinquantina 27s. 6d. per qr. Barley: Azoff 18s. 9d., Californian brewing 26s. 3d., Odessa 18s. 10½d., and Persian 17s. 3d. Oats: Petersburg 13s. 9d., black Libau 14s. 9d., white American 14s. 9d., white Canadian 14s. 6d., and Dutch 18s. per qr. Linseed: Calcutta 63s., La Plata 54s. 6d., and Azoff, 59s. Rapeseed: Yellow Cawnpore 45s. 6d., Guzerat 53s., and Ravison 34s. Cottonseed: Egyptian, £7 2s. 6d. per ton.

FOREIGN CORN TRADE.

The shipments of grain from the chief exporting countries last week were as follows:—

	Wheat. Qrs.	Flour. Sks.	Maize. Qrs.	Barley. Qrs.	Oats. Qrs.
United States	232,000	139,000	324,000	10,000	100,000
Russia	258,000	—	11,000	126,000	181,000

Miscellaneous	60,000	5,000	20,000	20,000	10,000
Total	702,000	154,000	408,000	172,000	291,000

LONDON TOP PRICE FLOUR.

OFFICIAL PRICES.

Cereal year commencing 1st September, 1900. s. d

Sept. 1, 1900 .....(per sack) 30 0

(No official change since last date given).

THIS DAY'S MARKETS.

MARK LANE, MONDAY.

[FIRST REPORT.]

The market to-day was dull for all sorts of wheat, but holders were not as a rule disposed to make last week's 6d. reduction into the 1s., which would have led to a good trade. The price of maize was again advanced for all grain in granary, while uncertainty of delivery caused corn on shipboard to be neglected, even when offered at very moderate terms. Holders of newly arriving cargoes are naturally very discontented. Barley was a steady trade, both for malting and feeding, and oats were a better business for the lighter sorts. There is 6d. decline in buckwheat, 26s. 6d. being accepted for Russian. Canary seed makes 32s. for Turkish, 36s. for Saffi, and 64s. for the very finest Spanish. Dari is held for 6d. advance. Locust beans are firm, with £5 2s. 6d. paid for Portuguese per ton. In ordinary beans and peas values are steady.

CLOSE OF THE MARKET.

By Telephone, 2 p.m.

THE C.I.V. RECEPTION AFFECTED THE LATER ATTENDANCE, AND AFTER 1.30 VERY LITTLE WAS DONE. THERE WERE NO FURTHER PRICE CHANGES IN THE LEADING STAPLES.

THE FLOUR TRADE.

MARK LANE, Oct. 29th.

There were few price changes to-day, but 6d. decline, which was allowed on Friday, formed the basis of the business passing, whether in London or in country makes. The American patents are rather weak, but no further decline from the prices quoted on Friday was, as a rule, allowed. Hungarian and Australian sell steadily, but French and Californian are neglected. London bran, mixed straight, is offered at 90s. to 92s. per ton, while fine country flake makes 110s., and ordinary 100s. per ton. Little American or Argentine bran is now offering. Canadian oatmeal finds a fair sale at £10 per ton for "Maple Leaf," £9-10s. for "Coarse," and £8 10s. for "Fine." There is a sale for brose meal at 27s. 6d. to 28s. per sack. Brewers' grains make 87s. 6d. for Burton on rail.

LONDON TERM MARKET.

This market is held twice a day, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made :—

WHEAT.—	Oct.	Dec.	March
	s d.	s. d.	s. d.
Oct. 22 noon	6 7 .. 6	9 .. 6	11
4 p.m.	6 7 .. 6	8 .. 6	11
Oct. 23 noon	6 7 .. 6	8 .. 6	10
4 p.m.	6 7 .. 6	8 .. 6	10
Oct. 24 noon	6 7 .. 6	8 .. 6	10
4 p.m.	6 6 .. 6	7 .. 6	10
Oct. 25 noon	6 6 .. 6	7 .. 6	9
4 p.m.	6 6 .. 6	7 .. 6	9
Oct. 26 noon	6 6 .. 6	7 .. 6	9
4 p.m.	6 6 .. 6	7 .. 6	9
Oct. 27 noon	6 6 .. 6	7 .. 6	9
To-day noon	6 6 .. 6	7 .. 6	9

Maize made 4s. 6d. for Oct. delivery, 4s. 1d. for Dec., and 3s. 10d. for March.

The deposit required from members of the Term Market has been fixed at £50. "Call" hours will in future be 11 a.m. and 4 p.m.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States.

The Term Market (while the "Baltic" is rebuilding) is temporarily situated at the Great Eastern Hotel, No. 190, Bishopsgate-street, ground floor.

SEEDS.

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., write that in the absence alike of any speculative or consumptive demand, quietude now reigns on the seed market. Meantime, prices of red clover, and alsyke seeds have, to some small extent, gone against holders, but other varieties show no quotable variation. Winter tares move off slowly at the low ates now accepted. The trade in these, this season, has been the worst ever known. For rye, the inquiry continues meagre. Mustard and rapeseed are both still getting dearer; whilst all kinds oi bird seeds are dull and featureless. Blue peas and haricot beans command former terms.

GRAIN AND FLOUR FACTORS' REPORTS.

There is no change to record in the trade for milling offals, which remain firm at last week's prices.—RICHARD DOGGETT, Mark Lane.

Flour.—A steady trade at 3d. decline since this day week.—T. S. MEDILL, Mark Lane.

We have small arrivals of both wheat and flour. Demand is small and prices are unchanged. Maize 3d. per qr. dearer; barley and oats unchanged. COVENTRY, Mark Lane.

We have very little of interest to report respecting our market, which seems likely to remain quiescent for a time. As regards Red Clover, buyers are disposed to await the definite result of the new crop before stocking themselves to any extent. The samples showing of new English are not encouraging, some of them being of very poor quality. In other Clovers and Trefoil there is little passing. Birdseeds are dull. Blue Peas somewhat easier.—JOHN PICARD and CO., Mark Lane.

Offals.—Small brans on spot rather easier, but late prices maintained for forward delivery. No change in pollards. Weather continues mild.—GREENHILL BROTHERS, Belfast, October 27.

Flour.—With American markets declining daily business this week has been dull. Sellers to-day would accept 6d. per sack less than last Saturday. Grain.—Indian corn is now more plentiful, and shows a fall of 3d. per boll on the week. Supplies of peas are fairly large on spot, and buyers scarce. Barley unchanged. Beans in fair demand at steady prices. Mill stuffs.—There is a large make of bran here at present, which accounts for buyers getting their requirements filled cheaply. Thirds, on the other hand, are firm.—MCKINNON AND MCDONALD, Glasgow, October 27.

Wheat firm but quiet at 1d. per cental decline on white and ½d. on red. Flour is quiet without change. The Liverpool Millers' Association make no change in prices. Maize is in slow request for mixed, owing to larger arrivals. European scarce and dearer. Plate has a fair trade at unchanged prices. Barley slow for feeding; malting idle at unchanged prices. Beans quiet trade, with a fair inquiry from Scotland for flat sorts, Pandermo's making 3d. advance. Peas in fair request at ½d. per cental under Tuesday. Oats are very quiet for English; foreign sorts have a moderate business, but without change. Oatmeal steady with only a small inquiry. Oilcake firm with a moderate business at late rates.—ROSS T. SMYTH, Liverpool, October 27.

THE BALTIC, MONDAY, 1 p.m.

STATE OF TRADE.

All the trains are late, and frequenters of the Baltic were frequently so much behind time that they missed the noon call on the Term market. The Exchange is very patriotic, but the Lord Mayor is censured for not making the day of reception for the C.I.V. Tuesday. The extreme inconvenience of an interrupted Monday extends to the meat, coal, hop, hay, straw, fruit, and vegetable trades as well as to grain and cargoes. Wheat cargoes are said to be firmer, maize to be easier, barley and oats firm at currencies, but the fact is that business is quite insufficient as yet to test values, and it is, therefore, unsafe to say definitely how the market is going. The following few transactions may be given:—

BUSINESS DONE.

WHEAT.—Hard winter, 28s, arrived; Texas winter, 27s 3d, Nov. shipment; Turkish new crop, 26s 3d, Nov. shipment; Bulgarian new crop, 27s Nov. shipment.

MAIZE.—American new crop, 18s 6d, Jan. shipment; Roumanian, 19s 3d, first spring shipment.

BARLEY.—Azoff, 19s, prompt shipment; Californian, 26s 6d, prompt shipment.

LINSEED.—Bombay, 53s 6d, April shipment; Argentine, 53s 6d, January shipment.

HOPS.

London (Borough), Monday.—Messrs. W. H. and H. Le May, hop factors, 67, Borough High-street, London, S.E., report: There has been a great clearance of the large growths of Mid-Kent hops during the past week. The market continues to harden, and the smallness of the crop is now evident by the sparseness of the hops left unsold.

FEEDING STUFFS.

London, Monday.—Linseed Cake: Market unchanged, very firm, but not much demand. Cotton cake about as before. Linseed keeps as firm as ever.

English linseed cake	£8	10	0	to 8	15	0 ex mill
American Western linseed cake	8	0	0	to —		ex quay
Russian oil cake	8	0	0	to 8	5	0 ex quay
Feeding cake, Samuelson's S.P.F. (10 to 12 per cent. oil)	6	15	0	—		ex warehouse
Decorticated cotton cake			None.			ex quay
Decorticated cotton meal			None.			ex quay
London made cotton cake (best)	5	5	0	to 5	7	6 ex mill
Egyptian cotton cake (in bags)	5	0	0	to 5	2	6 ex quay
Burton desiccated ale grains (bags included)	4	10	0			on rail, Burton
Rangoon Rice Meal	4	15	0	—		ex warehouse
Russian linseed in bulk, per 416lbs	2	16	0	to 2	18	0 ex warehouse
Calcutta linseed in bags, per 410 lbs	3	3	0	to —		ex warehouse

—ROBT. AND JOHN HEWETSON.

CATTLE.

Metropolitan Market, Islington.

Monday, Oct. 29th, 1900.

	British.	Total.	Oct. 30th, 1899.
Beasts	1,630	1,630	1,750
Sheep and lambs	7,280	7,280	7,910
Calves	10	10	5
Pigs	130	130	—
Milch cows	60	60	65

Quotations per 8lbs (sinking the offal).

ENGLISH.	Inferior.	Second.	First.
	s. d.	s. d.	s. d.
Beasts	3 0 —	4 4 —	4 11
Sheep	3 2 —	5 2 —	6 0
Lambs	5 4 ..	5 8 ..	6 0
Pigs	2 10 ..	4 0 ..	4 8

Milch cows, per head, £15 to £22 10s.

British arrivals include as follows:—Scotland, 18; Eastern Counties, 22; Midland, Home and Western Counties, 1,435; Devon, 49; Ireland, 115.

We note to-day, as compared with Monday last, a decrease of 130 in the supply of beasts, the larger proportion of which consisted of second and middling quality, for which trade was steadier, though no material alteration in value can be noted; best quality Scotch, Herefords, and Devons were firm in value and sold readily. Less demand for fat cows and rough cattle, which consequently were bought on easier terms.

The following are top quotations per 8lb. (sinking the offal):—

	To-day.	Oct. 29th, 1899.
Scotch	4s 10d to 4s 11d	4s 8d to 4s 10d
Devons	4s 8d to 4s 9d	4s 6d to 4s 8d
Herefords	4s 9d to 4s 10d	4s 6d to 4s 8d
Runts	4s 8d to 4s 9d	4s 6d to 4s 7d
Lincolns	4s 2d to 4s 6d	4s 0d to 4s 2d
Irish	4s 2d to 4s 4d	4s 0d to 4s 2d
Fat cows	3s 6d to 3s 8d	3s 6d to 3s 8d

There was a decrease of 150 in the number of sheep and lambs on offer, for the former trade was slow, especially at the opening, best quality wethers were in steady request at a slight but not quotable decline on Monday's rates, the latter being in excess of the demand ruled 2d. per 8lb. lower in value, and met with forced sales. Lamb trade almost nominal; the supply included about 680 from the Eastern Counties, 280 Scotch, and 2,200 Irish.

Undermentioned quotations are at per 8lbs. (sinking the offal), and are for the best of each class penned:

	To-day.	Oct. 29th, 1899.
7½ to 8-stone Downs	5s 11d to 6s 0d	5s 6d to 5s 8d
9-stone ditto	5s 9d to 5s 10d	5s 4d to 5s 6d
10-stone half-breds	5s 4d to 5s 6d	5s 2d to 5s 4d
12-stone half-breds	5s 0d to 5s 2d	4s 10d to 5s 0d
10-stone Irish	5s 0d to 5s 2d	4s 8d to 4s 10d
10-stone Down ewes	3s 10d to 4s 0d	3s 10d to 4s 0d
11-stone half-bred ditto	3s 4d to 3s 6d	— to —
5-stone Down lambs	5s 10d to 6s 0d	— to —
6-stone half-bred ditto	5s 4d to 5s 6d	— to —

No demand for the few calves on sale.

The pig trade ruled slower at less money for all grades. Best quality 8 to 9 stone pigs were quoted at 4s 8d per 8lb, sinking the offal.

London Central, Monday.—Moderate supplies, trade very slow. Beef: Carcases, 3s 9d to 3s 10d; hindquarters, 4s 2d to 4s 6d; roastings, 5s to 5s 4d. Sheep: Ewes, 3s to 3s 4d wethers, 4s 2d to 4s 6d; hindquarters, ewe, 4s to 4s 4d; wether, 5s 2d to 5s 6d. Pigs, large, 3s 8d to 4s; small, 4s to 4s 4d.

FOREIGN CATTLE.

Deptford, Monday.—Beasts, 1146. The almost nominal supply to-day here consisted of a consignment from the United States, for which, though there was but little competition owing to the small numbers on offer, trade ruled firm and steady at from 4s 6d to occasionally 4s 7d per 8lb, offal given in, for beasts to dress from 680 to 720 lbs. No sheep on the market. The following were the numbers on offer on the corresponding day last year, with the current top rates:—Beasts, 1,562, 4s to 4s 1d per 8lbs to dress about 720lbs; sheep, 429.

Liverpool, Monday.—The supply of cattle in market to-day was practically the same as last week. Trade good, and last week's prices fully maintained. Sheep in slightly larger numbers, trade slow, and prices rather lower all round. Beef, 6¾d to 4¾d per lb; mutton, 8d to 5¼d per lb. At market: 1,811 cattle and 7,310 sheep.

PROVISIONS.

London, Monday.—The arrivals from Ireland last week were 3,255 bales bacon, and from foreign ports 9,175 bales bacon. Owing to the slow demand for bacon last week prices were further reduced, goods offering at 6s to 8s less than previously. On Friday official rates were 4s to 6s lower, and the market closed slow. Irish, 54s, 60s to 63s; Danish, 56s, 60s to 63s; Canadian, 53s, 56s to 59s. The butter market was generally firm and prices advanced Danish 122s to 124s; Colonial, 100s to 114s; Canadian 106s to 106s. Lard, good demand; Irish, 50s to 58s; American pails, 40s to 41s.

CORK BUTTER.

The directors of the Imperial Accident Live Stock and General Insurance Company have declared an interim dividend for the half-year ending June 30th at the rate of 7½ per cent. per annum.

From Messrs. E. R. and F. Turner, Limited, of St. Peter's and Grey Friars Works, Ipswich, and 82, Mark Lane, London, E.C., we have received a copy of a new illustrated catalogue and price list of food preparing machinery. It includes corn and seed crushers, separate or combined with bean and maize kibblers, "Lukoos" grinding mills, oil cake breakers, and chaff and grain weighing and mixing machines, for the manufacture of which implements the firm is most extensively known.

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

With a larger number of beasts on offer, trade at Islington was of a very variable nature, being firm and steady at last week's quotations owing to a rather short number, the pick of the market consisting of Scotch, Herefords, and Devons, with a few runts. The majority of the supply consisted of middling descriptions, which, being in excess of the demand, met a slow, dragging trade, rates favouring the buyers to the extent of fully 2d. per 8lbs. Even at this reduction and more a clearance was on Monday found to be impossible. Of fat butchering cows and rough cattle the number on offer was also too large. Prices in consequence were easier and sales more or less forced; fat bulls, however, were firm in tone and value. At the foreign cattle market, Deptford, business was confined to Wednesday and Saturday, no beasts being shown on Monday, which has not been the case for a long time. Trade here was firmer at an advance of from 1d. to 2d. per 8lbs. Now that the Canadian season is practically over, the only cattle arriving here will be from the United States, and these, it is reported, will be below the late average in point of number. The total offered for sale at both markets was 4,841 (previous week 4097), consisting of 2,160 British (increase 520) and 2,681 foreign (increase 224). These latter comprised 1,978 from the United States and 703 from Canada. The following were the top rates paid per 8lbs. (sinking the offal):—80 to 85 stone Polled Scotch, 5s.; 90-stone Herefords, 4s. 10d.; 80-stone Devons, 4s. 9d.; 90-stone runts, 4s. 9d.; 100-stone Lincolns, 4s. 6d.; 90-stone Dublins, 4s. 5d.; 95-stone Waterfords, 4s. 2d. to 4s. 3d.; 110-stone Lincolns, 4s. 2d. to 4s. 4d.; 88 to 90 stone States, 4s. 6d. to 4s. 7d.; 85-stone Canadians, 4s.; 100-stone fat cows, 3s. 8d. to 3s. 10d.; 100-stone fat bulls, 3s. 6d. to 3s. 8d. The sheep trade, which was confined to the Islington Market with a larger supply, was firm and steady so far as wethers were concerned, rates on Monday opening firmer at a slight advance in value, which, however, were not maintained during the day. Very few transactions were recorded on Thursday. For ewes there was rather less demand, rates ruling 2d. per 8lb. in favour of the buyer. There is still a small inquiry for lambs, but only for the very best. The total number penned was 7,960, as against 7,460 during the previous week. The following were the top rates paid per 8lb (sinking the offal):—7½ to 8 stone Devons, 6s.; 9-stone ditto, 5s. 10d.; 8-stone Scotch, 5s. 10d. to 6s.; 10-stone Downs, 5s. 8d.; 10-stone halfbreds, 5s. 6d.; 10-stone Irish, 5s. 4d.; 12-stone halfbreds, 5s. 2d.; 10-stone Down ewes, 4s.; 11-stone halfbred ditto, 3s. 6d.; 5-stone fat Down lambs, 6s. Calves numbered only thirty head, and were difficult to cash, the choicest being quoted at 5s. 8d. per 8lb. (sinking the offal). There was a large supply of pigs, trade for which was slow, no alteration in value being noticeable. Best small breeds made from 4s. 8d. to 4s. 10d. per 8lb.

Trade in the West.

The continuance of beautiful growing weather is having a very beneficial influence on the stock markets; and, although good deliveries are coming to hand, prices for most things are steadily hardening. Milch beasts have seldom, if ever, been dearer than they are at present, the best young heifers commanding a very free sale at all the leading markets at prices ranging from £17 10s. to £22 each, and barreners are proportionately as dear, those in fresh condition now marketing readily at £22 to £28 per pair, and exceptional lots at more money. The sheep sales for the present season close much dearer and with a much firmer feeling than had ever been expected, rates at the close of the week being from 4s. to 5s. dearer than they were at Winchester Fair on Monday. Fat cattle trade is tending upwards, well-finished bullocks being now worth 11s. to 12s. per score, and contract bullocks 10s. to 10s. 6d. Mutton has quite recovered its former firmness, and nothing worthy of the name of mutton can be bought under 7½d. to 8½d. per lb., and ewes at 7½d. Lamb is worth 9d. to 9½d. Pigs also are very dear; and veal makes extreme rates, 7½d. to 8d.

Trade in Ireland.

An increase on previous week of 327 cattle and 1,242 sheep made last Thursday's Dublin market a very flat one, even though there was a strong contingent of cross-Channel buyers present for cattle. Heifers formed the great bulk of the beef department, but did not go so well as at late markets owing to absence of an important Newcastle dealer who buys very largely. Inquiry for prime bullocks was pretty good, and last week's price was nearly maintained, but for the ordinary run values were down from 10s. to 15s. per head, as might be expected with 5,124 beasts on market the largest number, it is said, for the past eight or nine years. Prime ox and heifer beef made from 52s. 6d. to 56s., a few extra lots touching 57s. 6d.; second quality, 47s. 6d. to 50s.; and inferior, 42s. 6d. to 45s. Dealings in sheep were very slow, only a few lots being taken for shipment, though prime wethers for home consumption sold fairly well. On the whole, however, sheep were fully 2s. per head down on the week. Best wethers were worth from 6½d. to 6¾d. per lb.; ewes, 5¼d. to 6d., rough and inferior sorts selling slowly at from 4½d. to 6d. The number of sheep on the market was 7,560. Veal of prime quality made from 7d. to 8d. per lb., but inferior sorts slow at from 4½d. to 6d. Very few really good milch cows were shown, and best springers were firm at late figures. A large supply of swine penned. Trade fairly active all round at about previous rates, a complete clearance being early effected. Choice light-weight pigs made from 44s. to 46s. per cwt.; heavy, 38s. to 44s.; and coarse inferior sorts from 28s. 6d. to 34s.

Trade in Scotland.

John Swan and Sons, Limited, give the following as their report on above for the current week:—The supplies of fat cattle on offer have been considerably larger, and the quality quite up to the average. There has been a very good demand, and all classes have met a good trade, any change amongst the better classes being in sellers' favour. Fat cows have also sold well. Fat sheep and lambs have been forward in much similar numbers to last week. The trade for the best shop sheep is good, and, taken all over, prices have been fair at about last week's quotations. Fat calves have been a much larger show, and fat pigs about the same as last week. Both have met a dearer trade at fully late rates. In the store market the numbers of sheep and lambs offered have been smaller. A good selling trade has been experienced, and prices are without change. Store cattle have again been an exceedingly large supply. With the too high prices at the other side, and the determination of farmers to buy more cheaply, trade has been somewhat stiffer, and though the best descriptions of stirks and bullocks in fair condition have made fair prices, anything of a secondary class has been very difficult to sell, and prices unremunerative to sellers. Milch cows have been forward in similar numbers to last week, and the trade has been fair, the best cows making good prices. Quotations:—Top price best beef, 8s. 3d. to fully 8s. 6d. per stone; current, 8s. to 8s. 3d. per stone; mutton from 7½d. to over 8d. per lb.

LONDON.

London Central, Wednesday.—Fair supplies, but trade slow. Arrivals of beef included 40 tons Scotch, 620 Liverpool sides, 1,500 hindquarters, and 750 forequarters American refrigerated. Quotations: Beef, Scotch, short sides, 4s 4d to 4s 8d; long, 4s 2d to 4s 6d; English, 4s to 4s 2d; American, Deptford-killed, 3s 8d to 3s 11d; Liverpool, 3s 8d to 3s 10d; American refrigerated hindquarters, 3s 10d to 4s; forequarters, 2s 7d to 2s 9d. Mutton: Scotch, 4s 4d to 4s 8d; English wethers, 4s 2d to 4s 6d; ewes, 3s to 3s 4d. Veal: English and Dutch, 3s 8d to 4s 4d. Pork: English, 4s to 4s 4d; and Dutch, 3s 11d to 4s per 8lb.

London Central, Friday.—Good supplies, but trade slow. Arrivals of beef included 80 tons Scotch, 440 Liverpool sides, 3,000 hindquarters, and 1,650 forequarters American refrigerated. Quotations: Beef, Scotch, short sides, 4s 4d to 4s 8d; long, 3s 2d to 4s 4d; English, 4s to 4s 2d; American, Deptford-killed, 3s 8d to 3s 11d; Liverpool, 3s 8d to 3s 10d; American refrigerated hindquarters, 3s 10d to 4s; forequarters, 2s 8d to 2s 10d. Mutton: Scotch, 4s 4d to 4s 8d; English wethers, 4s to 4s 2d; ewes, 2s 10d to 3s 2d; Canterbury, 2s 8d to 2s 10d; Wellington, 2s 6d to 2s 8d; Sydney and River Plate, 2s 5d; Dutch wethers, 3s 2d to 3s 4d; ewes, 2s 10d to 3s 4d. Veal: English and Dutch, 3s 8d to 4s 4d. Pork: English, 3s 10d to 4s 4d; Dutch, 3s 4d to 4s; and Irish, 2s 8d to 3s per 8lb.

Islington, Thursday.—Fair supply of beasts, and, as customary on a Thursday, chiefly consisted of fat bulls and rough cattle. Trade ruled slow at about late rates. Only a limited supply of sheep penned, but the demand for wethers and ewes was of an extremely slow character. Prices for the former were in buyers' favour, the latter ruling occasionally weaker; 7½-stone to 8-stone Down wethers, 5s 8d to 5s 10d; 9-stone, ditto, 5s 6d to 5s 8d; 10-stone half-breds, 5s 2d to 5s 4d; 10-stone Down ewes, 3s 10s to 4s; 11-stone half-bred ditto, 3s 4d to 3s 6d per 8lb, to sink the offal. Calf trade nominal, pigs ruling easier. Total supplies, 100 beasts, 530 sheep, 20 calves, 320 pigs, and 10 milch cows.

COUNTRY.

Basingstoke, Wednesday.—At Raynbird and Sons' sale yard there was a large attendance of buyers to meet a supply of 29 fat beasts, 54 calves, 572 sheep and lambs, 356 pigs, and 124 head of dairy and store cattle, for which the following prices were realised:—Fat beasts, £12 to £17 5s; fat calves, 80s to £5 15s; small, 20s to 55s; fat wethers, 40s to 58s; ewes, 27s to 43s 6d; fat lambs, 25s to 43s 6d; fat hogs, 37s to £5 9s; porkers, 42s to 58s; small, 26s to 38s; store pigs, 10s 6d to 23s; dairy cows, £9 to £20 15s. A short supply of fat beasts met with a fair inquiry, the choice lots rather exceeding previous rates, but half fat and inferior lots a dull business, a clearance very nearly made. The fancy lots of fat sheep and lambs made more money to-day, and other sorts maintained late rates; a clearance made. Hants Down wethers and young ewes sold for 41s, 47s, 42s 6d, 45s, 44s, 47s 6d, 42s, 52s, 49s, 52s 6d; ten-months-old ditto, 44s 6d, 32s, 52s, 38s 6d, 51s, 48s 6d, 40s, 36s, 56s 6d, 52s 6d, 58s, 45s, 35s; old ewes, 27s, 36s, 38s 6d, 37s, 34s 6d; rams, 44s, 54s, 50s, 42s; three-months-old, sucking lambs, 25s, 34s 6d, 27s, 31s 6d. Kent ewes, 43s 6d: Cheviot ewes, 37s. With a small supply of dairy cows on offer, there was a good inquiry for the best class milkers, high prices being realised. Store cattle continues a dull trade. Fat calves were cleared at late rates. Fat hoggs are scarce, those on offer meeting a brisk demand. Porkers also realised high prices, the trade throughout being very firm. Store pigs met a slow inquiry. The trade for fat sows showed an improvement, selling readily at an advance on late quotations. Ruling values:—Prime Devon and Scotch beasts, 7d to 7¼d; Shorthorn ditto, 6d to 6¼d; bulls, cows, and inferior beasts, 5d to 5¾d per lb; best quality fat sheep, 8¾d to 9d; second ditto, 7d to 8d; rams, old ewes, and inferior, ; 5¾d to 6¼d; choice fat sucking lambs, 8¾d to 9d per lb; fat calves, 6d to 8¾d per lb; fat hogs up to 9s 6d; porkers, 11s, and sows, 7s 3d per score.

Boston, Wednesday.—Best beef, 7s 6d; cow beef, 7s per stone; strong stores, £16 to £17 10s; growing stores, £9 10s to £11 10s; milch cows, £17 to £22; heifers, £12 to £16; in-calvets, £16 to £17 10s; calves, 40s to 60s; wether mutton, 8d; ewe mutton, 6d per lb.

Calne.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne:—

Prime stores.	Thickness of fat in any part of the back.	Price per sc.
6 sc 10 lbs to 9 sc 10 lbs	2½ in. and under..	8s 6d
Under 10 sc 10 lbs	Not exceeding 2¾ in.	8s 0d
Under 11 sc 10 lbs	Not exceeding 2¾ in.	7s 3d
Under 12 sc	Not exceeding 3 in.	—

Any pigs outside these limits at their value. Half truck, 12 pigs. Whole truck, 25.—CHARLES AND THOMAS HARRIS AND Co., Limited, Calne, Wilts.

Cambridge Monday.—The stock exhibited for sale at this market and the prices obtained were as follows:—Beasts, 900; sheep, 590; pigs, 289; horses, 25. Beef, 6s 9d to 7s 9d per stone; mutton, 4s 6d to 6s; pork, 5s 9d to 7s. A good show store beasts, nearly all cleared. Fat beasts, a large supply, prices not so good. Fat sheep, a good brisk trade. Stores, not many to hand. Fat pigs, short supply, brisk trade at fully last week's prices. Stores, a fair trade. Hay, straw, and roots short supply.

Canterbury, Saturday.—There was a smaller supply of sheep, but the demand has slackened and trade was not quite so good. Lambs ranged from 18s to 20s, and old sheep from 25s to 33s per head. Wethers were quoted at from 32s to 39s. Horned stock were in poor request, yearlings making from £5 to £7, and two-year-olds up to £10.

Carlisle, Saturday.—Again a large show of Irish store cattle, consisting of between 500 and 600 heifers and bullocks. Many of the horned bullocks were of an excellent type, but there were few of the best class of heifers, these being kept back by the dealers for Newcastle Fair on Wednesday. The attendance of buyers was large, and trade fairly brisk. Small heifers realised £6 10s to £8 10s; and the best sorts to £14 10s; polled bullocks, £8 10s to £10 10s; horned bullocks, £9 10s to £15 10s. Pigs a small show; slow sale, at 20s to 24s

Dorchester, Saturday.—Large quantities of milch beasts and fat stock were offering. Beef and mutton met a better trade than for some weeks past.

Dublin, Thursday.—Best finished cattle with difficulty maintained last week's quotations. All other descriptions harder to sell even at a further concession to buyers. Sheep slow dragging trade, prices for all classes favouring buyers. Cattle (best), 29s to 33s per cwt. Other descriptions, from 25s to 28s per cwt. Mutton, 5d to 6¾d per lb; extreme 7d per lb. —GANLY, SONS, AND Co.

Dumfries, Wednesday.—Beef in good demand at late rates. Horned bullocks, to £19; ditto heifers, to £15; polled bullocks, to £19 12s; polled heifers, to £14; Highland bullocks, to £19; Galloway bullocks, to £17; ditto heifers, to £14; calving cows, to £12 10s. Sheep met a good demand at last week's prices.

Edinburgh, Wednesday.—Light supplies. Cattle trade slow. Half-bred lambs, 22s to 28s; grey-faced, 26s 6d; Cheviot ewes, 26s; Cheviot Dinmonts, 26s to 35s; polled bullocks, 11gs. to 14gs.; horned bullocks, £12 10s to £14 10s; stirks, £9 to £11 10s; best shorthorned cows, £27; secondary, £14 to £17; Ayrshires, £12 to £18.

Glasgow, Wednesday.—Supplies less than last week. Trade quiet, owing to the wet weather. Top Scotch cattle, 66s per cwt; secondary, 60s to 62s; top Irish, 58s to 60s; top mutton, 8d; secondary, 6¾d to 7¼d per lb. Lambs over for the season. Dead meat slow. Best Scotch beef, 6¼d; States, 5¾d; Canadians, 5¼d to 5½d; cows, 4¾d.

Hereford, Wednesday.—Return of stock brought to the cattle market this day:—Bullocks and cows 778, calves 81, sheep and lambs 1,339, pigs (fat and sows) 27, sucking pigs 46, pigs (stores, not more than ten) 204, pigs (stores, more than ten) 112, horses 7, colts 15. Prices of stock: Best beef 6d to 7d per lb; wether sheep, 6½d to 8d per lb; ewes, 5½d to 6d per lb; veal, 9d per lb; lamb, 8½d per lb; pork, 4½d to 5d per lb; bacon, 4d to 5d per lb.

Ipswich, Tuesday.—Messrs. Robert Bond and Sons report a rather larger supply of fat cattle, and a good attendance of buyers. Well finished animals were dearer, up to £25 5s. A fair number of fat sheep were penned; prices were slow, in favour of the buyers. Weaning calves were not so numerous, but those by Shorthorn bulls were in strong demand, up to 66s. Fat swine were short, and prices ruled higher. A good entry of grazing cattle; buyers were short, consequently trade was lower. This being the second annual sale of dairy cattle, about 50 heifers and cows were forwarded, including about 40 of the finest Shorthorn heifers that have been seen in the district. Most of them were bred in Cumberland or Westmoreland, and had calves by side, making up to £24 5s. The second Michaelmas sale of horses was held at the Drill Hall, for which nearly a hundred horses were entered. Cart horses and colts sold well, but hackneys were dull. Numbers at sale and market:—Beasts 821, calves 59, sheep 2,095, pigs 1,204, horses 162.

Leicester, Saturday.—Large supplies of stock in good condition; fair attendance, but trade very sluggish, and prices easier. Milch cows, £14 to £24 per head. Bullocks, £9 to £15. Sheep in fair demand at steady prices.

Lincoln, Friday.—Fair show of cattle, but little demand Best bullocks, £14 to £16; two-year-olds, £10 to £14; young stock up to £10. Milch beasts, £14 to £20. In sheep and pig departments exceptionally bad trade. Sheep, lambs, and drape ewes, 20s to 36s. Pigs: Suckers, 13s to 20s; inferior stores, 25s to 40s; strong stores, 40s to 50s.

Newcastle, Tuesday.—Large supplies. Prices steady. Demand good. Numbers:—Cattle, 2,011; sheep and lambs, 7,522; pigs, 1,277; calves, 69. Prices (sinking the offal):—Beef, 5s to 8s; pork, 5s to 9s 6d per stone; mutton, 5d to 8d; lamb, 6d to 8d; veal, 5d to 9d per lb.

Norwich, Saturday.—The supply of store cattle here to-day was large; sales proceeded slowly, and prices were slightly in favour of buyers. Fat beasts, which were in average supply, showed little change, prices ranging from 7s 6d to 8s and 8s 3d per 14lb. Store sheep were in moderate supply; but trade was dull, at late rates; hoggets were quoted at 28s to 40s; and keeping shearlings at 42s to 48s per head. Fat sheep made 9s to 9s 6d per 14lb. The weather to-day was wet and winterly.

Romford, Wednesday.— A good supply all round. The beef and pork trade showed a slight advance.

Salford, Tuesday.—There was again an increase in the number of cattle on offer, with a fair demand at last week's full prices. The supply of sheep was smaller. Choice light weights were scarce, and met with a good demand at an advance in price; medium and rough kinds were better to sell and prices, though not quotably higher, tended in favour of the seller. There was a larger supply of calves and a dull trade, prices tending in buyers' favour. Quotations:—Cattle, 5d to 6¼d; sheep, 6d to 8¾d; calves, 5d to 7¼d per lb. At market—Cattle, 2,886; sheep, 7,943; calves, 154; pigs, 125.

Sheffield, Tuesday.—A fair show of milch beasts, and a fairly good business was done, best qualities making £17 to £23 10s; secondary, £13 to £15 10s.

Shrewsbury, Tuesday.—Larger supplies of cattle, with a fair demand. Fat sheep brisk, with smaller supplies. Pigs, a fairly good trade. Quotations:—Beef, 6d to 7¼d; mutton, 6½d to 8¾d; and veal, 7½d to 8½d per lb. Porket pigs, 9s to 10s 6d; and bacons, 8s to 10s per score. Cows, with calves, up to £22 10s. Number offered:—1,108 cattle, 44 cows with calves, 1,570 sheep and lambs, 84 calves, 24 fat, 115 porket, and 548 store pigs.

Spalding Tuesday.—A fair show of fat beasts, which sold slowly at about 7s 6d per stone. The store trade was poor, and there was very little demand In the sheep market trade was dull. Best half-breds, 8d; other sorts, 7½d per lb.

Stockton Wednesday.—There were on offer 217 cattle, 3 calves, 501 sheep, and 371 pigs. Best cattle were only a small show, and the quality not so good as last week. Trade was

very slow at 7s 6d to 8s per stone for the best, and 6s 6d to 7s for rougher kinds; calves, 6d to 8d; young sheep, 8d; ewes, 6d; tups, 4d to 5d per lb.

Taunton, Saturday.—Very small supply; medium attendance; somewhat quiet trade.

Thame, Tuesday.—There was a good supply of stock at market and a capital attendance of buyers. The beef trade was cheerful at better prices. Bacon and pork met with a ready sale. Veal made more money, but mutton was in buyers' favour. Mr. Bond's sale comprised 112 fat beasts, and a few down calving heifers; 190 fat sheep, 123 fat and weaning calves, 160 fat and store pigs, and 4 horses. Fat bullocks made £15 to £21; fat heifers, £14 to £21; down calving heifers, £13 to £14 7s 6d; fat wethers, 44s to 52s; fat ewes, 38s to 47s; fat tegs, 32s to 43s; fat calves, £3 to £5 15s; cow calves, 23s to 68s; bull calves, 14s to 76s; fat pigs, 10s per score; and porkets, 10s 6d; stores were a better trade.

Wolverhampton, Wednesday.—Beasts a moderate supply, quiet trade. Sheep, moderate supply; trade fair. Calves, small supply; fair demand for best. Beef, 5d to 7d; mutton 6d to 8½d; veal, 6d to 8d.

Wakefield, Wednesday.—With larger supply, beef trade ruled slow, but last week's quotations were maintained. Choice beef made 6½d per lb., and other kinds 5d to 6d; late prices also ruled in the mutton trade. Small sheep 8½d; average sorts, 7d to 7½d. Ewes and tups, 5d to 6d. Numbers penned: —Fat Beasts, 1,804; sheep, 3,018.

Wakefield, Wednesday.—There was a large supply in all departments, but the business was not so brisk as the dealers had expected. Still a fairly good trade was done, especially for beef, some fine animals being offered. There were 1,604 beasts on sale, against 1,554 at the last market. Best beef made 6½d per lb, and other sorts realised 5d to 6d. There was a large supply of sheep—3,018, against 2,976. Despite the increased number, sellers insisted on having last week's prices.

Worcester, Saturday.—A moderate supply of fat cattle, and a good demand for best qualities at late rates. Sheep, good supply and trade. Pigs sold more briskly, and good calves were wanted. Beef, 6d to 7d; mutton, 8d; ewes, 6d; and veal, 7½d per lb. Pork pigs, 10s; and bacons, 9s per score.

York, Friday.—Calves, 8d per lb; small sheep, 8d ditto; large sheep, 7½d ditto; ewes, 6d ditto; small pork pigs, 7s a stone; large pork pigs, 6s 6d to 6s 9d ditto.

FOREIGN.

Yorkhill, Tuesday.—At the sale of United States cattle there were penned in the sheds 287 cattle, landed by the Hestia (s), from Newport News. Bullocks, as is usually the case, formed the greater proportion of the total number, while there were also a number of bulls included in the shipment. The cattle, as regards quality, were fully up to the average, many of the bullocks being prime beasts in a well-finished condition. Bulls were up to the average and showed well. The attendance of buyers was scarcely so large as usual, but was fairly good. The dead-weight quotations were as follows:—Best bullocks, 60s per cwt, and for really choice up to 62s; heavy prime, 58s; secondary and heavier, 56s; bulls, 46s to 50s, according to quality and finish.

WOOL.

London, Thursday.—At public sale this evening, Messrs Buxton, Ronald, and Co. brought forward the total of 11,130 bales, comprising 4,792 New South Wales and Queensland, 1,286 Victorian, 21 South Australian, 348 Tasmanian, 4,116 New Zealand, and 573 Cape. A good attendance of buyers was assembled, and competition was carried on briskly, late rates being fully maintained, being the turn firmer in the case of merinos. New South Wales, greasy combing, marked J M V over Mooloomoon, sold 8d to 9d; lambs, 7½d to 8½d; pieces, 5½d to 8d.; scoured combing, T. E. and Co., B in circle, Springvale, 1s 1½d to 1s 3½d; clothing, 10½d to 1s 1d; pieces, 8d to 8½d; clothing ditto, over Floodvale, 7¾d to 11½d. Victorian greasy combing, Trida, 6d to 6½d; pieces, 6d; bellies, 5d. Queensland scoured combing, Thurulgoona. 1s 3d to 1s 4½d; clothing, 1s 4d to 1s 5½d; broken, 1s 2d to 1s 2½d; greasy combing Portland, 8d to 8½d; pieces, 8d to 7½d; scoured combing Tookok, 1s 1½d to 1s 2d; clothing, 1s 3d; necks, 1s 1d to 1s 2¼d.

London, Friday.—Wool, English, per packet of 240 lb—Fleeces, Southdown hoggs, £8 to £11 10s; half-bred hoggs, £7 to £8 10s; ditto wethers, £6 10s to £8; Kent fleeces, £6 to £7; Southdown ewes and wethers, £8 to £11 10s; Leicester ditto, £6 to £7. Colonial, per lb: Victorian, fleece, superior, 1s 4d to 1s 5d; scoured good, 1s 5d to 1s 5½d; scoured average, 1s 3d to 1s 4d; greasy average to fair, 9d to 10d; New South Wales, scoured average, 1s ½d to 1s 1½d; greasy average, 6¾d to 7¾d; South Australian, greasy average, 5½d to 6½d; New Zealand, scoured average, 1s 2d to 1s 3d; greasy average, 7d to 8d; Cape, scoured superior, 1s 3½d to 1s 4½d; fleece average, 6½d to 7½d; greasy average, 5d to 5½d; Natal, scoured, 1s to 1s 1d; greasy average, 6d to 6½d. Crossbreds, greasy, Victorian, good to superior, 9d to 10d; New Zealand, fine, 8½d to 9½d; ditto medium, 6½d to 7½d; ditto coarse, 5¾d to 6½d.

Bradford, Thursday.—Market is bare of business and there is no animation or confidence, offers now being made are lower than ever, and though holders are fairly strong the tendency is in favour of buyers. Mohair is quiet, the yarn trade showing no improvement in any direction, and business is impeded in the piece trade by the uncertainty about cotton.

Canterbury, Saturday.—There continues to be a fair demand for fine wools such as Downs and the best halfbreds, but for Kent fleeces trade is dull. For Kent fleeces only 6d per lb is offered. Lamb wool, 4d to 5d; halfbreds, 7d; and Downs, 8d to 10d per lb.

Leicester, Saturday.—The turnover in the local wool market still continues quiet. The inquiry for merinos and fine cross-breds is still nominal. In good sound, strong cross-breds trade is steady at late rates. Shropshire fleeces change hands slowly at 18s 6d to 19s 6d per tod. The tendency of values is in favour of purchasers. In the yarn trade there is some activity in the production to order.

FEEDING STUFFS.

London, Thursday.—Linseed.—The market has continued to advance, but the present high values are rather checking business. Calcutta London spot and near, 63s; October-November, and November-December, 62s 9d. April-June, 50s 6d. La Plata, December-January, 54s; January-February, 53s. Hull rather easier. Calcutta, April-June, 51s. Azov, Black Sea, October-November, 58s 6d. La Plata December-January, 54s. January-February, 53s. To the Continent Bombay is quoted March-May, 53s 6d. Calcutta, March-April, new crop, 53s; April-June, 51s 9d. La Plata, December-January, 53s 3d; January-February, 52s 9d. Linseed cakes firm. London made, £8 10s to £8 12s 6d. Russian, £8 2s 6d to £8. 7s 6d ex dock. American Westerns at £8. Cotton cakes firm. London made, £5 2s 6d to £5 5s; Egyptian, £5. Rapeseed is quiet, and rather easier to buy. Brown Calcutta to London, November-December, sold at 46s; April-June quoted 41s. To the Continent we quote: Yellow Guzerat, March-May, 48s 3d; October-November, 52s 9d. Yellow Cawnpore, March-May, 46s. Brown Cawnpore, November-December, 49s 6d; March-May, 42s 9d; brown Calcutta, October-November, 46s 6d; April-June, 41s 6d. Ravison to Hull, prompt 33s. —THE PRODUCE BROKERS COMPANY, LIMITED.

Mark Lane, Monday.—Linseed Cakes: The trade continues extremely inactive, buyers only filling their immediate requirements, while shippers ask prohibitive prices. Russians come along slowly, and are without change. Americans remain scarce, and prime brands are firmly held at last week's prices. The demand for English is not large, and, with a considerable quantity offering in second-hands, values are not quotably dearer. Cotton cakes: A fair quantity of foreign is still available, both on spot and for shipment, and with little prospect of any scarcity, which often occurs at this time of year, the tone of the market is not quite so good. Decorticated are not obtainable on spot, but offer unchanged for October-November shipment, with meal selling quietly in same position. Maize germ meal: American is in good supply, and with only a moderate inquiry values are weak. Rice meal: Rangoon moves off quietly at unaltered prices both on spot and for November-December shipment.

—PINNOCK BROS., Mark Lane.

Hull, Tuesday.—At to-day's market the supply of home-grown wheat is moderate, and the demand for it very poor, at 6d per quarter reduction from the prices of last Tuesday. Foreign also meets a slow sale at 6d decline on the week. Barley of all descriptions steady at late rates. English oats offer sparingly, and are quite as dear. Foreign beans easier to buy. Flat maize maintains fully last week's prices. Round Odessa scarce on spot, and held for extreme rates. Large round corn offers on moderate terms. Linseed.—The arrivals are 15 qrs from Harlingen, 2,690 qrs Konigsberg, 1,960 qrs Libau, 2,218 qrs New York, 11,185 qrs Odessa, 7,728 qrs Petersburg, 10 qrs Rotterdam, 1,738 qrs Riga; total, 27,544 qrs. Throughout the week there has been again a strong feeling, with prices almost daily hardening. Calcutta: There is nothing now offering to Hull, 62s 9d to 63s seems about the value, Sept.-Oct., and Oct.-Nov. to London. Black Sea: Very little offering, 59s the value Oct.-Nov. Petersburg, a little Oct.-Nov. sold at 57s, but sellers are extremely scarce. Riga and Libau are nominally worth 56s, as there are no fresh offers. American Duluth made 59s Sept.-Nov. River Plate, 54s 9d Dec.-Jan., first half February 54s 3d, all the month 53s 9d. The market closes quieter. Cottonseed.—There has not been much passing in the near positions, but prices remained fairly steady until to-day. Spot sold at £7 10s, passage at £7 8s 9d and £7 2s 6d according to position. To-day there are sellers at £7 5s nearly due, and, £6 18s 9d and £6 15s accepted later passage. October made £6 17s 6d, but now offers at £6 15s. Nov.-Jan., also Feb.-Mar., after changing hands at £6 13s 9d to £6 16s 3d, have since declined to £6 10s, which was accepted to-day, but with buyers over thereat. Linseed cakes are dearer, with strong tone. Cotton cakes unchanged. Hemp.—No change.—KEIGHLEY MAXSTED AND CO.

WATERLOO ROUND FEEDING CAKES, £6 15s 0d PER TON; WATERLOO ROUND 97 PER CENT. PURE LINSEED CAKES, £9 7s 6d PER TON; WATERLOO ANGLO SHAPE 97 PER CENT. PURE LINSEED CAKES, £9 5s. 0d. PER TON; WATERLOO 97 PER CENT. PURE EGYPTIAN COTTONSEED CAKES, £5 17s 6d PER TON. ALL F.O.R. HULL.

MOLASSINE, packed in bags, of 1½cwt. each. Price per cwt. 7s. 6d. Price per ton, £6 15s., on rail at works, Silvertown, Essex.

HAY AND STRAW.

Whitechapel, Saturday.—A fair demand for the supplies on offer. Best clover, 85s to 100s; inferior ditto, 80s to 85s; specially picked hay, 92s 6d; good ditto, 80s to 87s 6d; inferior ditto, 50s to 60s; mixture and sainfoin, 70s to 90s; and straw, 25s to 36s per load.

Leeds, Tuesday.—There is a continued good demand in the warehouses for hay and straw, especially the latter, which is scarce. Prices are very firm and unchanged. Quotations:—Meadow hay, 6½d to 7d; clover, 7d to 7½d; wheat straw, 5½d; oat straw, 6d; rye straw (retail), 7d per stone.

FOREIGN HAY AND STRAW.

London, Saturday.—Owing to the lightermen's strike there has been very little stuff coming along this week, and, in consequence, prices are firmer, although with no change. We quote: Canadian Timothy and clover mixture, 85s; Dutch 1st cut clover, 90s; French and Dutch 2nd cut clover, 92s 6d; good Dutch hay, 72s 6d to 75s; common ditto, 65s; large bale French wheat straw, 46s 6d; small ditto ditto, 43s; small bale French oat straw, 43s. All these prices are per ton, delivered by barge alongside.—FULLER AND PRENTIS, 9 and 10, Great Tower Street, E.C.

MANURES.

Liverpool, Friday.—Basic slag is in fair seasonable request at the quotations, and there is a slight inquiry for kainit, but other fertilisers are quiet. The firmness in the market for feeding stuffs continues, though the demand lacks activity. Prices as below: Nitrate of soda, best quality, i.e., guaranteed, 95 per cent., pure, in bags, £8 5s to £8 7s 6d per ton; East India bone meal, in bags, £4 7s 6d to £4 10s per ton; kainit, prime 23 per cent, in bags, £2 7s 6d to £2 10s per ton; linseed cake, American thin oblong, prime, in bags, £7 17s 6d to £8 per ton; ditto, English, prime, in bulk, £8 15s to £9 2s 6d per ton; ditto, foreign, round, prime, soft, and oily, in bags, £8 7s 6d to £8 12s 6d per ton; cottonseed cake, N.A., decorticated, prime, in bags, £6 17s 6d to £7 per ton; ditto, English ditto, prime, very soft, in bags, £7 7s 6d to £7 12s 6d per ton; ditto, English, undecorticated, prime, in bulk, £5 7s 6d to £5 10s per ton; cottonseed (crushed), 20 to 25 per cent. oil, prime, in bags, £7 7s 6d per ton; maize germ meal, English, prime, in bags, £5 7s 6d to £5 10s per ton; rice meal, Rangoon, as imported, in bags, £4 15s per ton; Indian meal, coarse to fine grinding, prime, in bulk, 11s 3d to 12s 3d per 240lb; linseed, fine bold feeding, in bags, £8 3s to £3 5s per qr. 41blb; N.A. cloversced, new red, fair to good, in bags, per cwt; D.N.S. brand superphosphate of lime, guaranteed, 25 to 27 sol., in bags, per cwt; ditto, ditto, 30 to 31 sol., in bags, per ton; ditto, ditto, 35 to 36 sol., per ton, nominal; basic slag, prime quality, guaranteed, 30 to 35 per cent. phos., in bags, £1 11s to £1 12s 6d per ton; ditto, ditto, ditto 35 to 40 phos., in bags, £1 15s 6d to £1 11s 6d per ton; ditto, fine quality, guaranteed, 38 to 45 phos., in bags, £1 18s 6d to £1 19s 6d per ton, at the purchaser's depôts.—H. JONES LANGAR AND CO.

Winsford (Cheshire), Saturday.—Current prices for salt at the works: Common white salt, 11s per ton; fine screened rock salt, 3s 6d per ton. Ex truck loads in bulk.—THE SALT UNION, LIMITED.

LETTER TO THE EDITOR.

New and Old Breeds of Wheat.

Sir,—Mr. Cave, in calling attention to the fact that I was in error on one point in connection with his trial crops, need not have gone out of his way to question my experience, or to assume that I had any unfriendly intentions.

I admire the manner in which he evidently seeks to place useful object lessons in the way of the tenants, who, as a rule, have neither the time nor the opportunity to test new varieties.

As to my experience, I am probably old enough to be Mr. Cave's father. I obtained my first "Square Head" seed from the original introducer, the well known Mr. Hope, of Fenton Barns, in 1871, and I have grown the variety every year since on all sorts of soil in different counties; often, as I said, from seed direct from Scholey's warp land, with the best results. I have grown practically every variety of wheat, and never miss a chance of testing new sorts. My first introduction to Garton's wonderful results was at a reception given by the late Lord Winchilsea some seven years ago, and I have since grown most of their cross-bred cereals. Like Mr. Cave, I have at least six of their stocks sown, or to be sown, for the ensuing season, including four acres of "White Monarch" just coming up.

The *raison d'être* of my letter was to emphasise the absolute necessity of exercising the utmost care that the *conditions of growth* in connection with published results should be the same all round. In Mr. Cave's case they were not, one crop coming in his "shift" after clover, the other after beans.

Some years ago I heard an old farming friend say that there was only one better preparation for a wheat crop than red clover mown twice, and that was red clover mown three times. Since then our scientists have more or less justified the old man's conclusions, and the assertion I made will be endorsed by practical men as holding good, on an average, on nine-tenths of the wheat-growing lands of England. Mr. Cave is of opinion that on some strong lands a greater return is obtained after beans. If that is the case on his own land it may account for the surprising yield of the "Square Head" as compared (I repeat unfairly) with the "White Monarch" after clover.

Results are, however, influenced by many different causes, and vary much in different seasons even under similar conditions. It is only by continuously and carefully experimenting at home and so finding out what is suitable not only for his locality and farm, but also for each field he occupies, that a farmer can hope to arrive at satisfactory results in connection with either new crops or different manures.—Yours faithfully,

JOHN FRANCIS BEDDALL.

Kempston Manor, Bedford.

Contagious Diseases of Animals.

† 1 Head of cattle slaughtered as suspected, but on post-mortem examination found to be free from the disease.

FIRST-CLASS representatives and agents required throughout the United Kingdom for the sale of "MOLASSINE"—Write for particulars to the "MOLASSINE" CO., LTD., 36, Mark Lane, London, E.C.—[ADVT.]

LIVE STOCK.

OUR ILLUSTRATIONS.

The Jersey heifer Carol, winner of first prize at the recent Dairy Show in the class for Jersey heifers in milk bred in Great Britain or Ireland, is the property of and was bred by Lady de Rothschild, Aston Clinton, Tring. Carol is a little over two years and four months old, and is by Chieftain 5829, out of Harmony, by Spots Lad 4389.

Sir Walter Gilbey, Bart., Elsenham Hall, Essex, is the owner and also breeder of the Hackney stallion Bonny Danegelt 6990, a chestnut by Royal Danegelt 5785, dam Lady Dorothy 185, by Denmark 177. Our photograph was taken at the Royal Show at York, where Bonny Danegelt won first prize in the class for Hackney stallions foaled in 1898, and also the Hackney Horse Society's champion gold medal for the best Hackney stallion in the show.

STOCK AND SHOW NOTES

By Herdsman.

The Governor of New South Wales, in a recent speech at the annual meeting of the New South Wales Sheepbreeders' Association, said the backbone of their industry was to be found in the woolly Merinos. At home and in the colonies the sheet anchor of agriculture is the sheep. In England this is an undeniable fact, and whenever a door is shut, as it is now in Argentine, against the importation of live stock, the effects are quickly realised. There is now, for instance, a tremendous reaction in the pedigree sheep circles of Lincoln and Yorkshire, and also in respect of the Down flocks, and the retrogression in the price of pure-bred rams has been most pronounced the last week or two at Yorkshire ram fairs and the later sales.

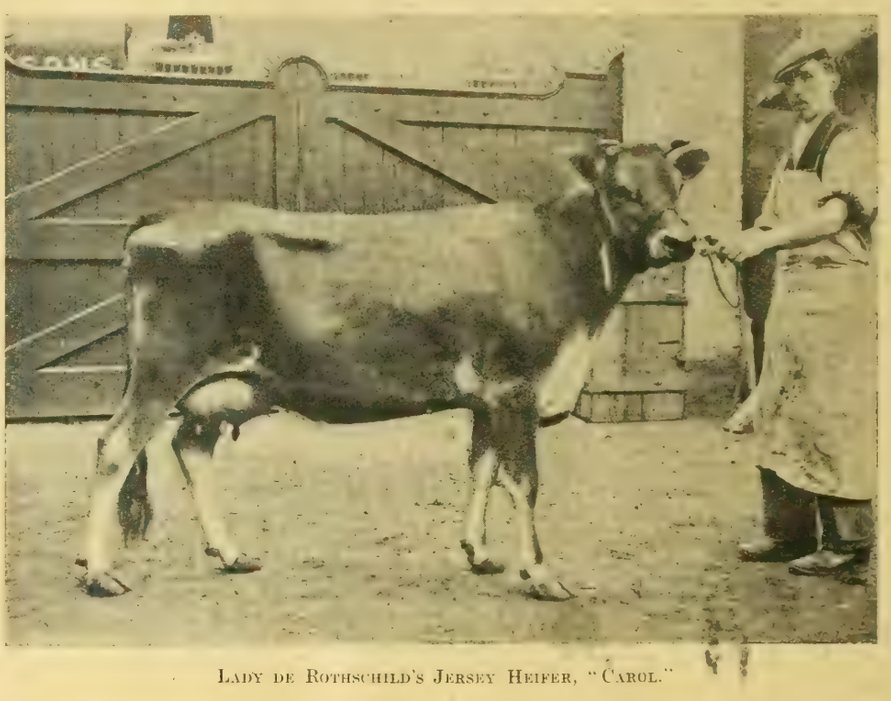
The dispersals of shearling sheep before harvest were the most remunerative, and it appears to be the better plan to sell out surplus sheep early in the season, one advantage—and it is followed by the leading breeders—being that the sheep are off the owners' hands, a great saving of food and of wages resulting. The number of rams lately placed on the market has been unprecedented. At Malton Fair recently over six hundred were penned, and ram sheep in some instances at Malton and elsewhere fetched prices that were really not much beyond mutton value. The outcome of this downfall in prices will be a reduction in the number of sheep reared as rams, as flockowners are not likely to continue a trade that gives no profit.

With reference to the account of the Guernsey bull, Frolic 6th, which was illustrated in our issue of the 8th inst., Mr. W. A. Glynn, Seagrove, Sea View, Isle of Wight, writes:—"The Guernsey bull, Frolic 6th, though bred and shown by me, was sold directly after this year's season at a record price to America. You also mention 'his varied career this year'; it may be misleading. It is not surprising that 'he was not noticed' at Bath and West, bearing in mind that he did not go to Bath; having won all he could at the Society's show in 1899 he was not qualified to go this year. At Royal Counties Messrs. Barnes and Middleton were appointed judges of Guernseys; otherwise this year where sent he was first. Last year he was sent to six leading shows, and won a second and five firsts and champion. He had previously done very well indeed when entered."

Mr. Louis Robinson, M.D., who is a most careful observer of animal life, contributes an interesting paper to the current number of *Pearson's Magazine* describing the various ways in which animals sleep. Most ruminating animals, he says, habitually doze while they are chewing their cud, and this interesting process of preparing their hastily gathered food goes on automatically while they are in a state of comparative oblivion. It is very seldom that you can catch a cow with her eyes tightly closed, or with her head resting on the ground. Young calves, however, may frequently be seen sound asleep with their heads laid upon their flanks. Being curious to know what the giraffe did with his immense neck while sleeping, I made inquiries at the Zoological Gardens, and learned that these creatures invariably adopt this attitude.

It is obviously difficult for long-horned cattle, deer, or wild sheep to pillow their head upon the ground, after the manner of a young colt, nor do they seem very desirous of doing so. The heads and horns of many of these creatures are of immense weight, and at first sight it seems strange that they should be able to take their rest while still supporting their heads by muscular action. As a matter of fact, however, very little muscular power is required. If you dissect the neck of an ox, or, indeed, of any large quadruped, you find that the neck bones are strapped together all along the upper side by a band of enormously strong elastic tissue, the ends of which are attached to the skull and the thick vertebræ above the shoulder. This is technically known as the *ligamentum nuchæ*, and it undoubtedly serves to support the head with very little strain on the muscles.

Even the horse in his adult state, although he appears to be a sounder sleeper than the ox, seldom rests his head upon the ground. It is well known that horses can sleep while standing up, and any groom will inform you that some can never be tempted to lie down while in the stable. Such horses, however, are found to be less efficient for work than those that take their rest in the usual way. When turned out at pasture all horses, except those which are crippled by disease or injury, lie down at night with their legs folded beneath their bodies.



Lady de Rothschild's Jersey Heifer, "Carol."

The entire herd of pure-bred Jersey cattle belonging to Mr. J. H. Shore, of Whatley House, Frome, Somersetshire, is to be sold by auction on Thursday, November 8th, in consequence of the Bangle Farm being given up. Whatley has long been famous for its herd of Jersey cattle. It was founded about 1878, and is one of the oldest herds in the West of England. Frequent visits from Weymouth to Jersey led to an extensive knowledge of the best island breeders and their strains of blood; several importations were made. The herd now consists chiefly of the blood of Mr. William Labey's herd at Grouville. It was this stock which as far back as 1854 won first and reserve prizes (only two prizes being given) at the R.A.S.E. Show at Newcastle, and from which Mr. Dumbrell, of Brighton, so successfully bred. The two best Labey strains, viz., the Fontaine and Mabel, abound in the herd. The Mabel tribe is also represented in the female line through Mabel 33rd, lot 8, who was by Mr. Marett's famous sire Orme 4296 (used by Lord Rothschild), from Mabel 13th, a well-known island prize-winner, and the dam of Mrs. Greenall's Mabel 23rd, winner of eleven first prizes, including first prize at the Royal Show, Manchester, 1897.

In addition to these excellent Island strains the herd contains some of the old English blood from Captain Spicer, Mr. W. E. Budgett, and the late Mr. Maitland Spencer's herds in the West of England. Among the sires now in use are Mr. W. J. Labey's Fontaine's King 5547, lot 66, now in his sixth year, a son of Boyle; and Mona's Chief 6337, lot 70, of the Mabel strain, both well adapted from their high breeding and character to go into first-class herds. Also Lord Charles Bereford 5961, lot 67, bred by Mr. R. J. Pope, from that celebrated champion prize cow Lady Dawish, and Leylands Oak 6615, lot 71, bred by Mr. McKenzie Bradley, by that equally famous prize bull Leylands Champion 6303, a son of the beautiful Butter Test prize cow Lady Lavinia 5th. Reference to the pedigrees shows that many of the animals for years past have carried off most of the prizes at the Frome Show, and occasionally at the Bath and West of England meetings. The herd has, however, not been widely exhibited, but kept specially for practical dairy purposes, the object being to obtain a large supply of the richest milk and butter from cows of the finest quality and of the best strains of Jersey blood.

The fifty-second annual exhibition of cattle and poultry will take place at Birmingham from December 1st to 6th. Entries close on Thursday, November 1st, and on applying for entry forms to Mr. W. H. Lythall, secretary, at Bingley Hall, it is necessary to state for which section they are required. A sum of £3,200 is offered in prizes, including the President's, Lord Mayor's, and High Sheriff's prizes. The challenge cups, value £105 each, are, as usual, offered by Messrs. Elkington and Co., Mr. Joseph Thorley, and Messrs. Webb and Sons, and one value £50, the gift of the proprietor of the *Birmingham Daily Post*. The usual extra prizes of £50 each for the best Hereford, Shorthorn, and Scot; £30 for best crossbred, and £20 for best Devon are offered. The Cooper Challenge Cup, value £25, for sheep, is offered; and in the pig section the hotel and innkeepers are providing a new challenge cup, value £21. The classes for corn, roots, and potatoes are about the same as last year, with the addition of a 10gs. cup, the gift of Mr. Mitchell. In the poultry and pigeon section there are 350 classes, with liberal prizes and numerous specials and cups.

On Saturday, the 20th inst., Messrs. Alfred Mansell and Co., of Shrewsbury, despatched by the ss. Covic, of the White Star line, from Liverpool, on account of Mr. G. H. Hunn, of Michigan, twenty-three high-class Shropshires, comprising four ram lambs and ten ewe lambs, bred by the Exors. of the late Mr. W. Nevett, sired by Rare Brand 9199 (a son of the noted ram Rare Stamp 4761, the progenitor of upwards of sixty showyard winners), Montford Jumbo 10013 (winner S. and W. M., by Downton King 7875), Buttar's Jubilee 9378 (winner Manchester R.A.S.E., by Bonaparte 7330), Newport's first winner S. and W. M., bred by Mr. A. E. Mansell; by the 120-guinea Royal winner Phenomenon 9680; Corrie Varkie 9418, bred by Mr. Buttar, by the late Mr. T. Mansell's Lord Patriot 4627. Messrs. Evans supplied a valuable shearling ram in a son of Star of Morning 10145, bred by Mr. A. E. Mansell, by Dream Star 8977, dam by Corston Artist 5948, g.d. by

the 150-guinea Plymouth Champion 5432. The remainder consisted of eight choice shearling ewes from Mr. A. E. Mansell, sired by Fortification 9498 (sire of this year's Royal winner sold at 240gs. for Australia), Dream Star 8977, Rose Bush 10014 (sire of the second prize Royal winner at York, sold at 150gs., also first and champion at the S. and W. M. Show), Bonny Dreamful 9382, and Ulster Rose 9734, Miss Rose's Dublin winner. These ewes were all in lamb to high-class sires, viz., True Treasure, winner fourth prize S. and W. M. Show, 1900; Strong Bone 10548, bought at 100gs.; and Montford Kaiser, by Montford A. 10006, dam by Phenomenon. These animals were all carefully selected by Mr. Hunn, and should they do well in their new home he proposes to embark largely in the breeding of high-class Shropshires.

Alluding to the shipment made by Messrs. Alfred Mansell and Co., of Shrewsbury, to Russia some few weeks since, which, by the way, we hear has arrived at its destination safely and given unqualified satisfaction, it comprised, amongst others, a valuable selection of Shorthorn bulls, viz., Montford Knight, bred by Mr. Minton, by the celebrated bull Best of Archers 69981, from Montford Honeycomb 22nd, by Gladys Hero 4th 59013; Lord Diamond 2nd, a Kirklevington bull, bred by Mr. Tetley Nickells, by Village Knight 2nd 75830, from Lady Diamond Kirklevington; Adonis, a well-grown red bull, from Mr. R. P. Cooper's herd, by Matchmaker 69105, from Adela 2nd, by Ruling Star 58098; Thorndale Archer, a very smart red bull, bred by Mr. P. L. Mills, by Best of Archers 69981, from Thorndale Premium Rose 7th, by Grand Duke of Connaught 57412. Mr. Mills also supplied another good bull in Chamberlaine Surprise, a fine roan by Surprise 73747, from Bestwood Blanche, by Master of the Ceremonies. Lord Powis' herd supplied a very nice and remarkably good white bull in Matchem 77234, bred by the late Mr. Bruce, of Inverquhomery, by Waverley 68072, from Rosebud 3rd, by Cap-a-pie 58591.

The twenty Shorthorn heifers were a very choice lot, consisting of Rachel 23rd, a roan, bred by Mr. Tremaine, by Count Clarence 3rd 76427; Oakum, a two-year-old roan heifer, bred by Captain Mytton, by Baron Hobbs 66672; Love Bird 2nd, a red heifer, from Mr. J. Noylor's herd, by Easter Gift 72459, from Love Bird, by Captain of the Guard 58596; Lady Ophelia Fawsley, a good roan, bred by Mrs. L. Holland, by Fawsley Magic 74539; Lady Lucy Worcester 5th, bred by Mr. John Naylor, by Easter Gift 72459; Gwendoline 6th, from the same herd, and also sired by Easter Gift; Frosty Morn, another heifer from the same herd, by Privateer 71276; Flora 5th, from Mr. R. P. Cooper's herd; Duchess 6th, from the same herd, by the prize-winning bull Fellow Citizen 72522; Maid of the Mist, by Fawsley Magic 74539; an excellent well-grown heifer with nice character, viz., Lady Jevellar, bred by Mr. John Garne, of Filkins, by First Favourite 68643; Duchess of Sherborne 15th, a nice roan, bred by Mr. Tremaine, by Earl of Clarence 13th 72443; Countess of Gloster 2nd, also bred by Mr. Tremaine, by Baron Sherborne 9th 74020; Colina, bred by Mr. T. Mace, by Adonis Foggathorpe 69849; Butterfly Queen, by Recorder 75372; Rosamond 5th, a roan, bred by Mr. T. Handy, by Pigglesworth Duke 75207; Silver Butterfly, by Fawsley Magic 74539; Primrose 7th, bred by Mr. James Scott, by Royal Centurion 69448; Marigold 12th, bred by Mr. Wentworth Taylor, by Royal Hall 69463, and Primrose 7th, a red heifer, by Royal Centurion 69448. Most of these heifers were in calf to high-class sires, and in addition to these the cattle included four two-year-old Jersey heifers in calf, specially selected on the island.

The shipment also included eleven Clydesdale stallions and entire colts, and three mares, sired by such well-known stallions as Macgregor, King of the Roses, Petruchio, Macmeekan, and Prince Attractive, and were all nice, straight, well-built horses, with extra good legs and feet. The sheep comprised twenty-five Shropshire rams, ten Shropshire yearling ewes, and one Oxford ram, all of which were selected from the best flocks. The pigs were about twenty Large White and Berkshire boars from the prize-winning herds of Mr. P. L. Mills, Mr. R. P. Cooper, Mr. J. Jefferson, and Mr. Denston Gibson.

The Horse Breeding Committee of the Department of Agriculture recently met in Dublin to hear what Irish breeders have to suggest. There seems to be a good deal of eagerness among them to secure a full share of the grants, in the expectation that the creation of new regiments of mounted infantry will almost immediately set up a demand for army mounts. It is thought that the old Irish horse, which has almost disappeared in the course of crossing with Hackneys, might, if the strain could be rescued, furnish just the stamina required for rough campaigning. It was represented to the Committee that £10,000 or £15,000 would not be too much to spend in Ireland on a purchase of sires and the creation of Government stud farms.

Mr. Sanders Spencer, of Holywell Manor, near St. Ives, Hunts, has again been shipping some of his noted pigs. This time a pair of choice pigs were shipped on Monday last by the ss. Laras, from Millwall Docks, London, to an old customer in Russia.

The entries of stock for the Smithfield Club's Show close on Thursday next, November 1st. Post entries will, however, be received up to 4 p.m. on Monday, November 5th.

CATTLE.

The Age of a Prize Bull.

Prosecution at Birmingham—Fine, £120.

Joseph Gowling, farmer, of Radford, Leamington, who, as reported in our last issue, was charged at the Birmingham Police Court on the 19th inst. with having falsely and fraudulently pretended to William Lythall, secretary to the Birmingham Agricultural Exhibition Society, that a bull known as Cock o' the North II. had been born on September 13, 1898, by means of which false pretence he did unlawfully obtain on March 15th the sum of £20 and also a cheque for £280, the moneys and properties of the Agricultural Exhibition Society, and was then remanded on bail, was brought up again on Tuesday. Mr. McCardie and Mr. E. W. Cave (instructed by Messrs. Milward and Co.) appeared for the prosecution; while defendant, who pleaded guilty, was represented by Mr. Parfitt and Mr. Norris Foster (instructed by Messrs. Buller and Cross).

Mr. McCardie said that defendant was a breeder and exhibitor of Shorthorn cattle. In October, 1898, he bought the Shorthorn named Cock o' the North II. at a sale conducted by Messrs. Thornton. In the catalogue this calf was described as having been born on July 23. In February, 1899, defendant wished to enter the animal in the herd-book, and sent to Mr. Powell, secretary of the Shorthorn Society, particulars in which the date of birth was given as August 23, 1898. The Birmingham Agricultural Exhibition Society held shows several times a year, and at one of these shows, held in March last, one of the classes was for beasts from fifteen to eighteen months old, while another was for beasts eighteen to twenty-one months. At this show prisoner exhibited Cock o' the North II., and, apparently with the view of getting it into the class in which he was not entitled to exhibit it, decided again to change the date of birth, stating it to be September 13, 1898. Mr. Lythall, on his attention being called to the discrepancy, wrote to the prisoner, telling him that the animal should have gone into Class 8, that for beasts from eighteen to twenty-one months. Prisoner wrote back to say that the date he had given was correct, and that the animal should go into Class 9, for beasts of fifteen to eighteen months. In consequence of this statement, defendant was awarded the first prize of £20. At the sale held in conjunction with the show, Cock o' the North was sold for £260, and a cheque for £280 was sent to prisoner. The winner of the second prize communicated with Mr. Lythall, and inquiries were made, which led to the present prosecution. So far as the society knew, defendant was a hard-working, respectable man, and though they had suspected from time to time that similar false pretences had been practised they were not attempting to show that on any prior occasion the defendant did anything of the same kind. In fact, they had no desire to unduly press the charge.

In reply to the Recorder, Mr. McCardie said that the purchaser of the animal was a Mr. Millar, but as the animal died some time after the purchase Mr. Miller had obtained from insurance the exact sum he gave for it.

Mr. Parfitt, on behalf of the defendant, pleaded that for thirty years the defendant had enjoyed the very highest character, and suggested that under the circumstances a fine might be considered sufficient punishment. The reason why the second alteration was made was that the defendant was told by his son that there was a doubt about the age. Never before had there been any suggestion of wrong against him. The defendant has suffered very considerable loss already not only in connection with this particular animal, but because at shows all over the country he would not be allowed to enter his name as an exhibitor.

Evidence as to character was given by Mr. J. C. Coburn, Mr. Hatherall, Mr. J. W. Glover (Mayor of Warwick), and Mr. J. N. Peyton. All these gentlemen stated that they had known defendant for many years as a steady, hard working, and straightforward man.

Mr. W. H. Lythall, secretary to the Agricultural Exhibition Society, in reply to the Recorder, said that if the animal had not been awarded the prize its value at the sale would have depreciated to the extent of 50gs. It was a difficult matter to say, but something like that amount would represent the difference.

The Recorder said that the prisoner had pleaded guilty to a kind of practice which he was afraid was more common than some people had any idea of. It was a very difficult thing to find out, and in a case like this, in which a difference of a few weeks in age made the difference between entry in one class and entry in another, such a fraud would have very far-reaching consequences with regard to the taking of prizes and the value of the animal. It seemed quite clear that if this beast had not been placed in a particular class to which it did not belong it very likely would not have taken a prize in the class to which it did belong. In awarding the punishment he must take care that the prisoner should reap no profit from the transaction, and he thought it wise to deduct the sum prisoner paid for the calf originally from the £260 for which he sold it. This would bring the amount down to £240, and he thought he should be behaving very leniently to the prisoner if he divided that sum by two. He, therefore, fined the prisoner £120, and ordered him to be imprisoned until the money was paid.

Sale of Pedigree Live Stock at Harleston.

The second unreserved Michaelmas sale of live stock bred by Mr. J. B. Dimmock, Shotford Hall, Harleston, took place on Monday, and was attended by a very large company of breeders, etc. The dispersal was again entrusted to Messrs. George Durrant and Sons, and was favoured by lovely autumn weather. Mr. Dimmock had catalogued a good representation of the various breeds for which he has earned so good a reputation, both in the local show-yards and at the exhibitions of the Royal Agricultural Society of England, and from start to finish a sharp demand was experienced, so that the 160 lots were quickly brought to the hammer and knocked down by Mr. George Durrant, after luncheon had been partaken of by about 200 guests. The proceedings commenced with the Large Black pigs, for which Mr. Dimmock holds the first silver medal given in Suffolk or Norfolk. The bidding in this department ruled very fast, five of the fat hogs realising £6 5s., £5 5s., £5 2s. 6d., and two £4 17s. 6d., others of the twenty-two offered ranging from £4 15s. downwards. The best pair of a score of young sows made as high as £4 12s. 6d., and of eight boar pigs one yielded £3 15s. One lot of eight store pigs went at 30s. 6d. apiece, and forty young stores were readily sold at from 23s. 6d. downwards. Ten young White in-pig sows made from 75s. to 50s., seventy-five crossbred stores from 20s. 6d. downwards, and half a dozen Londoners 47s.

Eight horses were then sold as under:—Bay horse foal, winner of second prize at Harleston Show, 21½gs.; roan two-year-old filly, first prize at Halesworth Show as a foal, 38½gs.; brown two-year-old filly, 38gs.; bay two-year-old filly, 33½gs.; bay two-year-old colt, 35gs.; chestnut two-year-old filly 25gs.; bay mare, seven years, Bowthorpe 19481, S.H.S.B., 32gs.; chestnut horse, six years, 27gs.

Stall-fed cattle, to the number of twenty-six, were next submitted, fat heifers realising from £26 5s. to £14 5s., and fat steers from £24 10s. to £14 15s. Amongst the neat stock seven Shorthorn heifers with calves by side fetched £20 5s., £19 15s., £19 10s., £18 10s., £17 10s., £17 5s., and £17, others near calving going at from £16 15s., sixteen grazing steers at from £13, a red-polled bull, eighteen months old, at 30gs., to Lord Hastings, and a Shorthorn bull of like age at 23gs., to Mr. Gray.

The sheep brought the sale to a close, Mr. Dimmock offering his entire lot of Suffolk lambs. Half-a-score ewe lambs, which were awarded first prizes at Eye and Harleston, went at 60s., to Mr. Charles Devereux; 100 more, ear-marked, averaged 47s. 3d., and ten, not ear-marked, made 35s. 6d. Six wether lambs, first prize at Harleston, fetched 60s.; 106 more from 43s. 6d. to 32s.; forty ear-marked Suffolk ewe lambs, bred by Capt. Cobbold, 39s. 6d.; forty-eight, bred by Mr. Leonard Smith, from 39s. 6d. to 36s.; ten of Mr. Dimmock's draft ewes, 35s.; thirteen Suffolk ewes, from Mr. Nicholson's flock, 35s. 6d.; four Suffolk ram lambs averaged 50s. 3d., and fifty-five fat sheep, 45s. 6d.

The buyers included Lord Hastings, Sir Hugh Edward Adair, Messrs. Gray, Goldspink, C. Hayward, Todd, G. Warnes, John Breese, R. Baldwin, Jas. Barber, F. G. Miles, Thurlow, J. Elsey, Scotchmer, Harris, E. J. Cheney, John Wittrick, G. Symonds, John Mendham, R. Read, E. J. Cook, W. R. Riches, Toynbee, Sanderson, Jas. Broom, Charles Devereux, John Lawn, C. Tooley, W. Wright, jun., G. Holland, jun., Adcock, J. Roe, O. Brock, G. Self, W. Tibbenham, Tubby, J. C. Pike, W. H. Poll, C. P. Poll, Massingham, Clay, Witton, C. Charlish, E. J. Alexander, H. Davy, Hodson, Minter, Keeble, A. Wharton, W. Wharton, Westgate, P. Miles, D. J.

Danby, Tweedale, J. W. Smith, W. Chaplin, E. Reeve, Weston, Dawson, S. Warnes, W. G. Munnings, etc.

Shorthorn Bull Sale at Beverley.

At Beverley, on Wednesday, Mr. T. H. Speck, in conjunction with Mr. J. Crust, disposed of nine Shorthorn bulls, the property of various gentlemen, and four Lincoln Red Shorthorn bulls from Mr. R. Botterill's herd at Tathwell Hall. There was a good attendance of buyers, and the prices realised were fairly satisfactory. Full particulars will be found below:—

SHORTHORNS.	Gs.
Cherry Prince 11th (Mr. R. Botterill's), c 1898, s Agrippa 69853 ..... Mr. Robinson	17½
Lord Wilsthorpe 3rd (Mr. R. B. Appleby's), c 1899, s Maxim 73035 ..... Mr. Tewton	15
Cambridge Duke (Mr. T. Barber's), c 1899, s Cambridge Rose Duke 13th 68320 ..... Mr. Blenkin	17½
Deacon (Mr. G. Langdale's), c 1899, s Interpreter 68801 ..... Mr. Hutchinson	20
Lord Roberts (Mr. R. B. Appleby's), c 1899, s Maxim 73036 ..... Mr. Leonard	29
Sabian (Mr. J. Boyes's), c 1899, s Weston Beau 75833 ..... Mr. North	19

Yearling bull, s Hangham Wonder 780 ..... Mr. Newton	14½
Bull, eleven months old ..... Mr. Jefferson	18½
Bull, ten months old ..... Mr. Ransom	19
Bull, nine months old ..... Mr. Foster	17

Sale of Lincoln Red Shorthorns at Fledborough.

A sale of Lincoln Red Shorthorns, belonging to Mr. C. H. Stafford, was held at Fledborough, near Newark, on Thursday, and it was well attended by buyers from all parts, the herd being a well-known one. Messrs. Dickinson and Rigall, Louth, were the auctioneers, and they had the satisfaction of conducting a good sale, the prices realised being, as the following list will show, satisfactory:—

COWS AND HEIFERS.—Croft Ruby, calved 1895, £32; her bull calf, calved March 6th, 1900, £33; Fledborough Calceby 1st, calved 1895, £30; her cow calf, calved September 14th, 1900, £10; Withern Violet, calved 1896, £41; her cow calf, calved September 5th, 1900, £5 10s.; Marston Crescent, calved 1897, £17 10s.; her bull calf, calved October 2nd, 1900, £5 10s.; Marston Bellows, calved 1893, £21, to Mr. Spencer; her bull calf, calved June 6th, 1900, £10, Mr. Tindall; Withern Primrose, £28, Mr. Whitworth; her bull calf, calved February 19th, 1900, £13 10s., to Mr. Spencer, Retford; Withern Buttercup's cow calf, calved February 28th, 1900, £14 10s., to Mr. Whitworth; Willoughby Venus, £20, Mr. Esam; her bull calf, calved April 13th, 1900, £15 10s., Mr. Esam; Willoughby Winsome, £14 10s., Mr. Brocklebank; her cow calf, calved April 13th, 1900, Mr. Dakin; Willoughby Mabel, £17 10s., Mr. Marriott; her cow calf, calved April 10th, 1900, £20, Mr. Marriott; Withern Honeysuckle, calved 1896, £30, Colonel Thorpe; her cow calf, Miss Kitchener, £18, Mr. Cartwright, Wagnall; Willoughby Daisy, £24, Mr. Brown; her bull calf, calved April 1st, 1900, £40, Mr. Barnes; Willoughby Peoni, £15, Mr. Whitworth; Fledborough Tulip, £20; her bull calf, calved November 28th, 1899, £15, Mr. Simpson; Willoughby Norah, calved 1896, £15 10s., Mr. Marriott; her cow calf, calved July 6th, 1899, £7 10s., Mr. Whitworth; Fledborough Charity, calved 1897, £23; her cow calf, Lady Wood, £25 10s., Colonel Thorpe; Fledborough Molly, calved May, 1896, £20 10s., Mr. Marrison; red cow, £30 10s., Mr. Bullen, Newark; her bull calf, calved March 3rd, 1900, £26, Mr. Morley; Croft Garnet, £10 10s.; her cow calf, calved April 21st, 1900, £18, Mr. Freshney; red cow, £16, her steer calf, £7, Mr. Cartwright; Fledborough Calceby, £35, Mr. Marriott; Fledborough Kate, £18 10s., Mr. Rowbottom; Marston Whisper, calved 1898, £30 10s., Mr. Todd; her bull calf, calved October 5th, £7; Fledborough Wymant, calved August, 1898, £35, Mr. Rowbottom; Lady Gatacre, calved December, 1898, £11 10s., Mr. Turner; Lady Clery, calved April, 1899, £10 10s., Mr. Freshney; Lady Symons, calved April, 1899, £14, Mr. Bullen, Newark; Lady White, calved March, 1899, £25, Mr. Tinley; Lady Sarah, calved March, 1899, £57, Colonel Thorpe; Ladysmith, calved May, 1899, £27, Mr. Tinley; Lady Roberts, calved April, 1899, £24, Mr. Tinley; Lady French, calved April, 1899, £9, Mr. Pennington, Sutton; Fledborough Lady Methuen, calved December 2nd, £11 10s., Mr. Whitworth.

BULLS.—Benniworth, calved March, 1896, £50, to Mr. Cartwright; Fledborough Colesburg, calved March 28th, 1899, £22 10s., Mr. Crawboro; a bull, £12 10s., Mr. Turner. Bullocks, steers, heifers, and calves were sold at from £18 5s. per pair to £32 10s. per pair, to Messrs. Dakin, Saunders, and Marshall.

Sale of Shorthorn Heifers at Ipswich.

Messrs. Robert Bond and Sons' second special sale of dairy stock at Ipswich took place on Tuesday, and the chief features were the consignments of about forty Shorthorn heifers with calves by sides, or near calving, from Mr. E. F. Quilter, Bentley, Mr. Herbert Smith, Walton Grange, and Mr. R. B. Bond, Sproughton. These heifers were mostly selected last autumn in Cumberland and Westmorland, and run with polled Angus, pure Shorthorn, and red poll bulls. They were big-framed animals, which promised to develop into heavy milking cows. There was a large company of buyers present, and some good prices were realised. Details are given below:—

The property of Mr. R. B. Bond, Sproughton.

Red and white Shorthorn heifer and calf by Polled Angus bull ..... Mr. E. W. Salmon	£15	5	0
Roan Shorthorn heifer and calf .... Mr. W. J. Robb	24	5	0
White Shorthorn heifer and calf ..... Messrs. G. and A. Rope	19	5	0
Roan Shorthorn heifer, due in November ..... Mr. P. Rose	15	0	0
Roan Shorthorn heifer and calf ..... Mr. W. B. Colman	14	10	0

The property of Mr. E. F. Quilter, Bentley.

Red and white Shorthorn heifer and red calf ..... Mr. J. O. Francis	19	5	0
White Shorthorn heifer and roan calf .. Mr. J. Pratt	15	10	0
Roan Shorthorn heifer and red calf ..... Mr. E. F. Gooding	20	0	0
Roan Shorthorn heifer and red calf ..... Messrs. G. and A. Rope	22	0	0
Red Shorthorn heifer and red calf .. Mr. A. Catchpole	18	0	0
Red Shorthorn heifer and red calf ..... Mr. T. M. Rudland	21	5	0
Roan Shorthorn heifer and red calf ..... Mr. T. M. Rudland	22	15	0
Roan Shorthorn heifer and roan calf ..... Mr. S. E. Bean	19	10	0
Roan Shorthorn heifer and red calf ..... Mr. E. A. Haddenham	21	0	0
Roan Shorthorn heifer and red calf ..... Mr. T. M. Rudland	20	0	0
Roan Shorthorn heifer and roan calf ..... Mr. G. Harper	14	5	0
Roan Shorthorn heifer and red calf ..... Mr. T. M. Rudland	18	15	0
Roan Shorthorn heifer and red and white calf ..... Mr. G. Harper	14	12	6
Roan Shorthorn heifer ..... Mr. E. A. Haddenham	15	10	0

The property of Mr. H. E. Smith, Walton Grange.

Red and white Shorthorn heifer and calf ..... Mr. W. S. Colman	21	10	0
Roan Shorthorn heifer and calf ..... Mr. E. A. Haddenham	18	0	0
Red Polled heifer and calf ..... Mr. S. E. Bean	19	0	0
Roan Shorthorn heifer and calf .. Mr. E. F. Godding	19	0	0
Red and white Shorthorn heifer ..... Mr. H. Fiske	16	5	0
Red and white Shorthorn heifer .. Mr. J. Somerville	14	15	0
Red and white Shorthorn heifer .. Mr. J. Somerville	15	0	0
Red and white Shorthorn heifer .. Mr. H. O. Ranson	15	5	0
Red and white Shorthorn heifer ..... Mr. E. A. Haddenham	18	5	0

Sale of Devon Cattle at Exeter.

Messrs. Risdon, of the Risdons and Andrews, on Wednesday held a sale of pure-bred Devon cattle in connection with the Devon Cattle Breeders' Society at the Exeter Cattle Market. There was a fair attendance, and fairly good prices were realised, as will be seen from the following list:—Bickham Boy, calved June, 1899, the property of Mr. C. C. Merson, Bickham, Dunster, Somerset, sold for 43gs.; a bull, calved June, 1899, the property of Mr. R. W. C. Evered, Spaxton, Bridgwater, 41gs.; Gay Laddie, July 3rd, 1899, Mr. William Kidner's, Kingston, Taunton, 32gs.; Maxim, March, 1899, and Landmark, March, 1899, the property of the Hon. C. B. Portman, Childe-Okeford, Blandford, 30gs. each; a bull, April, 1899, Mr. John Tapp's, Durston, Taunton, 26gs.; Horner Green, November, 1896, Mr. E. Adams's, Allenford, Taunton, 22gs.; Farmer's Boy, December, 1897, Mr. William Kidner's, Kingston, Taunton, 20gs.; Wood Squire, March, 1899, Mr. William Lethbridge's, Southtawton, 21gs.; bull, calved May, 1899, owned by Mr. John Tapp, 20gs.; Jupiter, July, 1899, Mrs. Harriet Davis, Milverton, Somerset, 20gs.; Stipendiary, July, 1899, Mr. William Tuckett, Stockleigh, Pomeroy, Crediton, 27gs.; bull, December, 1899, Mr. William Kidner, 27gs.; bull, January, 1900, Mr. William Tuckett, 21gs. There were several other animals sold at prices ranging from three guineas to 18 guineas.

Among the purchasers were the Hon. C. B. Portman, Messrs. Lee, Broadclyst; Hoult, Exeter; W. and J. Baker, Taunton; Loughmann, Alton, Hants; W. Hicks, St. Austell; Cowle, Winkleigh; J. L. and H. Steer, Clyst St. George; H. W. Corner, Bath; Harris, Ottery St. Mary; Alford, Netherexe; Pile, Ottery St. Mary; Jennings, Chanin, Tiverton; Earle, Kea, Truro; J. Merry, Wellington; Richards, Ide; E. P. Northey, Okehampton; Bishop, Sidmouth; and S. A. Passmore, Northamptonshire.

Transactions in Store Stock.

[*From the Irish Department of Agriculture and Technical Instruction.*]

The fair at Moneymore, co. Londonderry, on Monday was a small one, and a good demand prevailed. Prices:—Calves, second class, £3 10s. to £4 10s. Yearlings, first class, £8 to £9 5s.; second class, £5 10s. to £7 10s.; third class, £3 11s. 3d. to £4 10s. Two-year-olds, first class, £11 6s. 8d. to £12; second class, £8 5s. to £9 10s.; third class, £5 10s. to £7. Springers, first class, £15 15s. to £17 5s.; second class, £10 10s. to £15; third class, £8 17s. 6d. to £10 10s. Lambs, first class, £1 12s. 6d.; second class, £1 1s. to £1 5s. Over 12 months and under 24, first class, £2 to £2 10s.; second class, £1 10s. to £1 15s.

At Templemore, co. Tipperary, on Monday, there was a large fair of nice cattle, which met a very good demand, and nearly all sold at good prices. There was but a small supply of sheep, and the demand was only middling. Prices:—Calves, second class, £4 to £4 15s. Yearlings, first class, £9 to £9 15s.; second class, £7 2s. 6d. to £8 15s. Two-year-olds, first class, £14 5s.; second class, £9 12s. 6d. to £11 15s.; third class, £6 to £6 15s. Springers, first class, £16 15s.; second class, £12 10s. to £14 10s. Lambs, first class, £1 7s. 6d. to £1 10s.; second class, £1 3s. to £1 7s. Over 12 months and under 24, first class, £1 19s. to £2 2s.; second class, £1 17s. 6d. to £1 18s. Two years old and over, second class, £1 15s.

Longford Fair, held on Monday, was smaller than usual, and the demand was slow, a number of cattle not changing hands, as sellers considered prices unsatisfactory. Prices:—Calves, first class, £3 to £6 15s.; second class, £2 to £4 10s. Yearlings, first class, £9 10s. to £10 5s.; second class, £6 10s. to £9. Two-year-olds, first class, £13 15s. to £15; second class, £10 to £13. Three-year-olds, first class, £16 to £16 15s.; second class, £12 to £14 10s. Springers, first class, £17 13s. 4d. to £20.

The fair at Antrim on Thursday was an average-sized one. There was a brisk demand, and a good clearance was effected. Prices:—Calves, first class, £5 to £5 10s.; second class, £2 15s. to £4. Yearlings, first class, £8 12s. 6d. to £9 10s.; second class, £5 10s. to £7 5s.; third class, £4 3s. 9d. to £4 1s. 6d. Two-year-olds, first class, £11 15s. to £13 10s.; second class, £8 to £9; third class, £6 15s. to £6 17s. 6d. Three-year-olds, second class, £13 to £14 8s. Springers, first class, £15 15s. to £20; second class, £11 to £14 10s.

At Great Munster Fair, Limerick, held on the 26th, there was a large supply of cattle of good quality, demand brisk, and a good clearance effected. Prices:—Calves, first class, £5 6s. 6d. to £6; second class, £4 to £5 5s. Yearlings, first class, £8 12s. 6d. to £9 10s.; second class, £6 15s. to £8 10s.; third class, £5 10s. to £6 10s. Two-year-olds, first class, £12 to £14; second class, £9 10s. to £11 15s.; third class, £6 5s. to £8. Three-year-olds, third class, £10 10s. to £11. Springers, first class, £15 to £20; second class, £11 10s. to £14 10s.; third class, £9 to £10 10s.

HORSES.

Polo Pony Breeding.

Mr. John Hill, writing to *Land and Water*, in reply to a letter from Sir R. D. Green-Price, on the subject of a polo pony farm, says:—

He intimates that a suitable farm of about 600 acres at a rent of 14s. an acre can be obtained, and proposes the formation of a syndicate to take the farm and stock it, and that a sum of £2,000 would be required for a start. Now, anxious as I am to see a breeding farm of this sort in working order, yet if it is to be done at all it is worth doing well, and I can hardly see the way clear to make a beginning even, with only a capital of £2,000.

The old farm-taking axiom for a high-class farm was, that the tenant should have a capital of £10 an acre, but that must have been in the very good old times, which can barely be remembered by the oldest inhabitant. But, after all, £10 an acre capital is nearer the mark than £3 6s. 8d., as suggested. When, considering the amount of capital required, of course the whole plant of the farm must be taken into account, implements, household effects, on-coming payments, wages, etc., as also farm horses, sheep, and some few cattle which would be necessary. After this would come the expense of laying in the pony stock. Without knowing the lines on which Sir Richard proposes to work it is difficult to give an opinion, but taking it for granted that a breeding stud is intended, not a "dealing" undertaking and turning out the finished article after buying them in the rough, the following perhaps would be an approximate statement of the stock required:—Thirty brood mares at £30, twenty foals at £10, twenty yearlings at £20, twenty two-year-olds at £30, twenty three-year-olds at £30, twenty four-year-olds at £30.

This would give us 130 ponies of all ages at an average price of £25. This calculation is based on the supposition that a full stock of all ages be put on at the commencement of the business, so that there would be no waiting for future developments, and we should begin as it was intended to go on, breeding and disposing of the stock at four years old, unless, of course, from time to time ponies were sold at an earlier age for breeding purposes, or to special customers who might be met with. The prices mentioned should purchase the best class of mares. I should buy none under 13.2 hands high; and every mare should, if possible, be sound. I mean not only free from hereditary unsoundness, but such as would go to work if required. A great saving would be made in the depreciation in value of holding stock, if barren mares or unsuitable breeders could be disposed of when necessary as workable animals, and not have to be sold at nominal sums. It would be of the first importance that the selections were judiciously made, and no faulty made one should on any account be purchased: their breeding, too, should be ascertained as far as possible, so that the choice of stallions might be made with some degree of certainty. Two stallions would be necessary, and I would suggest one thoroughbred and one polo pony sire, eligible for the Stud Book. It might also be useful to have a suitable

Arab stallion. For a start perhaps two would be sufficient, and £150 at least would be required for their purchase. We should thus have 130 ponies at £25 each, costing £3,250, and two stallions £150, making the capital invested £3,400. This runs out curiously near Sir Richard Green-Price's estimate, and I do not think it could be done for less, probably rather a larger outlay might be found necessary. It would then be required to have other stock on the farm, say 100 breeding ewes at 40s., and 40 cattle at £10. Implements, tools, and fittings would take at least £250, and four cart horses £150. Quite £500 would also be wanted as working capital. From the above figures it will be seen that a total capital to start the business of £5,000 would be approximately the sum required. I do not think it would be possible to farm such an extent of land as Sir Richard names in that district entirely with ponies. My experience is that a few cattle are always wanted to clear up the rough places on the pastures which horses will not eat, and also to make some manure in the winter. Sheep, of course, should help to pay the rent.

I will not go so far as to say that a farm conducted in this way would at first be remunerative, but it ought to be so worked as to keep the money together, and the value as an experimental lesson would be of great public interest. Nothing can be done unless a few public-spirited authorities will come forward and put the money down and wait patiently for results. When the ponies bred from the foundation mares begin to come in, it might pay to hold some of the best on and train them properly for polo, thus making their full value. But all this sort of thing could hardly be counted when calculating the probable incoming from the farm stock. Still, it would be legitimate business to sell the best colts as stallions, and breed with that object in view. When once started the whole success or failure would depend on the management, and this should be entrusted to a thoroughly practical committee of the syndicate, with a capable farm manager to carry out details. The latter should not only have a thorough knowledge of farming from a practical standpoint, but he should be a good judge of ponies and of what a polo pony should be. Perhaps the most important thing of all would be the selection of the foundation brood mares and stallions. Whatever is done about buying in the stock, a firm foot would have to be put down against any description of "coping." The buyer or buyers should be paid so much for their trouble and expense, and this would be a considerable outlay, as many studs must be visited and miles of country travelled in finding suitable animals. I would suggest that one man (if he did not buy the lot) should purchase one class of pony. That is, let all the brood mares be selected by the same buyer or buyers, and the ponies of each age in the same way, so that the same idea may be carried out all through. It would prevent all kinds of different types being bought, as would be the case if ponies were selected by different men. At all events, all the eggs would not be in the same basket, and if one buyer selected a wrong type of a particular age it would be known how and where the fault lay, and it would be more easily rectified. It would be a most difficult job for anyone, and it is only practical men that should be allowed to tackle it. The whole scheme is bristling with difficulties, but it is well worth considering. I look upon the whole thing more as an experimental breeding farm than a commercial venture.

Testing for Lameness.

Professor Zurn, director of the Veterinary Clinical School of Leipzig, strongly recommends that in testing a horse for lameness he should not be walked along a straight line, but chiefly in a circle; then the higher and lower parts of the limbs outside and inside the circle are unequally weighted. For example, if during this ri- exercise the halting of the lower leg increases on account of the greater weight, the ailment resides in the lower part (hoof, coronet, or pastern); on the contrary, if the halting of the outside leg increases, the seat of the ailment is in the higher region (shoulder, haunch); a greater amount of strength is requisite to move this limb, and one can understand that the extension and supporting of the foot is more difficult.

Professor Zurn also states that after having examined the horse in motion you must explore the limb with the hand, in order to assure yourself, if you do not perceive any sign of heat, whether or not there are traces of wounds or contusion, invisible swelling whether or not pressure of the fingers causes abnormal pain. Inflammation of the lymphatic vessels in the vicinity of the extremities under the hocks, ring bones, etc., may also cause halting. Under the influence of persistent halting it may happen that certain muscles, particularly those behind the hock, will decrease in volume, become atrophied.

This atrophy of the muscles is caused not merely—as many believe—by complete paralysis of the shoulder and hock, but particularly, and in most cases, it is due to ankylosis of these joints. In this exploration of the halting limb with the hand an excellent sign is given by the pulsation of the artery situated on the interior of the canon in the hind limb. If the pulse is feeble and little perceptible, the cause of lameness is in the top part of the limb; if strong and slightly perceptible, the seat of the ailment is in the lower part, and generally in the hoof. Horses with a halting foot place it down reluctantly; the pain they manifest is sometimes greater while resting on the toe, and sometimes while on the heel, according as the suffering part is in front or back of the hoof. Horses limping from the hock bend the pastern joint completely.

Shire Horse Show and Sale at Lichfield.

Messrs. Winterton and Sons held their annual Shire Horse Show and Sale at the Repository, Lichfield, on the 19th inst., when 220 foals, colts, and town horses were offered. The sum of £37 was given in prizes, and the judges were Messrs. C. R. Chamberlain, Alfreton, and W. Barrs, Odstone. The awards and prices realised were as follow: Colt foal, bred by exhibitor, first and second, W. Neale, sold for 38gs. and 23½gs.; third, A. Stretton, sold for 24gs.; reserve, W. Neale, sold for 23gs. Filly foal, bred by exhibitor, first, E. Riley (Barton), sold for 40gs. to Mr. Done; second, W. Neale, sold for 31gs.; third, J. H. Lewis, sold for 25gs. Colt foal, the property of a tenant farmer, first, A. Stretton; second, H. Summerfield. Filly foal, first, E. Riley; second, J. H. Lewis. Yearling colt or filly, first, Mr. Phizacklea, sold for 40gs.; second, C. Coxon. Two-year-old colt or filly, first, R. Parton, sold for 60gs. to Mr. Gibbs; second, S. Bamford, sold for 40gs.; reserve, W. Shaw. Mare or gelding, not exceeding sixteen hands, suitable for town work, first, W. Shaw; second W. Neale, sold for 77gs. Mr. Neale, of the Bacons End Stud Farm, Coleshill, included in the sale fifteen brood mares and foals. Five colt foals averaged 25gs. each, and two filly foals 28gs. each. The brood mares made 28½gs., 77gs., 33gs., 66gs., 45gs., 57gs., 37gs., and 24½gs. The following are some additional prices realised:—Mr. Summerfield's gelding, 51gs.; Mr. Ashmall's, 45gs.; Mr. Parton's mare, 50gs.; Mr. Watt's mare, 50gs.; Mr. W. Roobottom's gelding, 46gs.; Mr. T. W. Greaves's gelding, 48gs.; Mr. J. Lees's gelding, 38gs.; Mr. W. Cripwell's gelding, 50gs.; the Hon. Mrs. Colville's gelding, 50gs.; Mrs. Richard's mare, 36½gs.; Mr. J. Riley's geldings, 40gs., 37gs.; Mr. Hackett's gelding, 47gs.; Mr. Weston's, 34½gs.; Mr. E. Riley's mare, 40gs.

Shire Show and Sale at York.

Messrs. Walker and Sons' autumn show and sale of Shire and cart horses took place on Tuesday in the paddock adjoining their horse repository at York. The catalogue contained about 100 animals, the chief of which were the twenty-six forming the Thicket Priory Stud, the property of Mr. J. J. Dunnington-Jefferson. The highest price realised in this lot was for 22601 Thicket Wealthy, a bay mare foaled in 1895, which was purchased at 96gs. by Mr. H. D. Brocklehurst. Her colt foal made 42gs. Thicket Jewel, bay mare, foaled in 1896, realised 90gs. to Mr. F. H. Fawkes; Thicket Duchess, bay yearling, sold for 74gs. to Mr. Wood, Brompton; and Thicket Welcome, a grey yearling filly, 62gs. to Lord Middleton. The twenty-six animals realised an average of a little over £50 each. The sale was very largely attended by breeders and buyers from all parts of the country, and trade was very brisk for useful horses. A list of the principal prices is given below.

Previous to the sale the auctioneers offered £21 in prizes, including £10 for the best heavy town horse. Mr. G. E. Clarke, Chesterfield, and Mr. J. Forshaw, jun., Carlton-on-Trent, were the judges. Their awards were as follows:—Town mare or gelding, four years old and upwards: 1, Maple Duchess mare, five years, G. Carver, Otley, sold for 110gs. to T. H. Sowden; 2, Robin, chestnut gelding, rising five years, A. Sheard, sold for 92gs. to Captain Barlow; 3, Punch, bay gelding, rising five years, N. Melbourne, sold for 70gs. to go to Liverpool. Light lurry or van horse, four years old and upwards: 1, Judy, chestnut mare, four years, A. Oglesby, Hemswell, Lincoln, sold for 40gs. to go to Liverpool; 2, Prince, brown gelding, six years, A. Sheard, sold for 50gs. to the Cleckheaton District Council. Shire mares, three years old and upwards: 1, 21768 Everton Kathleen, bay mare, foaled in 1893, J. Harrison, Everton, Bawtry, sold for 140gs. to J. H. Preston; 2, 21769 Everton Mistress, grey mare, foaled in 1895, same owner, sold for 46gs.

Sale of the Desford Shire Horses.

The annual sale of the Shire horses, the property of Messrs. W. and J. Thompson, the well-known breeders of Desford, took place at Desford Hall on Thursday, the auctioneers being Messrs. Sexton, Grimwade, and Beck, Peterborough. Unfortunately heavy rain fell during the whole of the morning, but despite this the attendance was a very good one, all the well-known breeders being present or represented. Before the sale over 450 guests were entertained to luncheon in a large marquee. Sir Oswald Mosley presided, and proposed the loyal toasts, and also submitted that of "Messrs. Thompson and Success to their Sale," briefly alluding, in connection with the last-mentioned toast, to the fame horses from Desford had earned. Mr. P. A. Muntz, M.P., proposed "The Chairman," and in a happy speech upon the breeding of Shire animals he spoke of the great necessity there was that the quality of the horses should be kept up to high pitch. Mr. Beck had charge of the hammer in the saleyard. Of the 44 animals offered for sale 36 were three years old and under, these young fillies and colt foals being principally by the good horses that have found a home at Desford, namely, Hitchin Conqueror, Sopwell Duke, Stonewall, Eastoft Lad, Desford Vulcan Chief, and Cotheridge Swell. As was only to be expected from these well-known sires, the quality of the selection sold was very high. The competition for the animals was very keen throughout, the breeders, no doubt, having in their memories how well many purchases from the same foundation at the last Desford sale repaid buyers, both as regards re-sale and showyard career. The mares and foals realised very good prices at the outset, but for some reason or other, at the conclusion of this section business flagged considerably, and the three, two, and yearling fillies sold at disappointing prices. The top figure of the sale was 280gs., and this was paid for Desford Vesta, a brown mare by Duncan III., the purchaser being Mr. Eadie. The average price for the 44 animals was £104, the total amount realised being £4,575 18s. Particulars of the animals sold, prices realised, etc., are given below:—

BROOD MARES.	Gs.
Desford Forest Meg 10035, brown, f 1889, s Fear Not 4394 ..... Mr. Haynes	65
Crofton Sweetbriar 19711, bay, f 1894, s Apostle 14455 ..... H R H The Prince of Wales	180

Desford Venture (Vol. xxii.), bay, f 1899, s Desford Vulcan Chief 16110 — Mr. Whitehurst — 52

Sale of Shire Horses at Crewe.

The annual sale of pedigree Shire horses held in the Cheshire Repository, Crewe, by Messrs. Frank Lloyd, Nuttall, and Co., took place on the 19th inst. The auctioneers gave £40 in prizes, and the competition in the various classes was very keen. Among the prize-winners were:—Class 1, silver cup value 5gs. for the best Shire mare foaled in or previous to 1896, Mr. E. Green, The Moors, Welshpool, with brown mare Desford Kathleen, foaled in 1894, by Lincolnshire Boy, and the winner of many prizes. After spirited bidding she was secured on behalf of Mr. R. W. Hudson, Great Barlow, at 280gs. Second in the class was a weighty brown mare the property of Mr. W. Dyke Pulford, foaled in 1890, by Mona's Prince. She was sold to Mr. Whitehurst, of Markeaton, near Derby, at 80gs. The silver cup, value 5gs., for the best Shire filly foaled in 1897, was awarded to Mr. George Mullock's (Poulton) weighty brown filly Poulton Heiress, by Calwich Heirloom. At 200gs. she fell to the bid of Mr. Tom Edwards, team owner, Liverpool, who is establishing a Shire stud. The reserve in this class was a bay filly belonging to Mr. Edward Green, The Moors, Moor's Czarina, by Regent 2nd. She was secured on behalf of Mr. P. A. Muntz, M.P., at 125gs. The silver cup, value 5gs., for the best Shire filly foaled in 1898 or 1899 was won by Mr. T. Gittins, Pool Quay, Welshpool, with a brown filly foaled in 1899, by Moors Phenomenon, dam a mare by Potentate. She sold at 200gs. to Mr. Colin Campbell. In Class 5 the silver cup, value 20gs., for the best Shire in the sale, was won by Mr. Edward Green, The Moors, with Desford Kathleen, who, with her filly foal, realised the handsome figure of 480gs. Mr. Green also won a silver cup, value 5gs., for a black filly foal, dam Desford Kathleen, and realised 200gs. to Mr. J. Hill, Smethwick Hall, Congleton. In the class for the best mare or gelding, not pedigree, the silver cup offered was won by Mr. Powell, Leigh, with a black gelding sold at 78gs. to Mr. W. Owen, Bala. The other sales included Mr. Deane Worston grey mare 49gs. to Birmingham; Mr. J. Myatt, grey gelding, 40gs. to Nuneaton; Mr. W. C. Such, bay mare, 40gs. to Hampshire; Mr. H. R. Hart, bay colt, 36gs. to Wick, grey colt, 28gs. to Nantwich, chestnut colt, 26gs. to Kent; Mr. C. B. Beech, bay colt, 35gs. to Nantwich; Messrs. Davies, bay filly, 34gs. to Kidsgrove; Mr. A. Major, bay gelding, 30gs. to Nantwich.

Sale of Mr. Lawson's Hackneys.

Hackney breeders turned up in strong force on Wednesday at the sale of the well-known pedigree Hackneys of Mr. W. Lawson, of the Marton Stud, Blackpool. The sale was conducted by Mr. Bainbridge, of Lancaster. Chief interest naturally centred round Zaverda, the famous three-year-old filly which won firsts at all the great shows last summer. The bidding was very spirited, and she was finally knocked down to Mr. Alexander Gemmel, of Glasgow, for 400gs., amid loud applause from the assembly. Another interesting lot was Blackpool Countess, a two-year-old chestnut filly, which won several firsts last season. Mr. R. M. Bailey, of Hoghton, made the final bid, and the splendid animal was knocked down to him for 80gs. The well-known black two-year-old filly, Blackpool Gentility, which was first at the last Royal Lancashire Show, was purchased by Mr. Gemmel for 60gs. The brown brood mare, Maggie Murphy, was sold to Mr. R. M. Birley for 90gs.

The other animals belonging to Mr. Lawson were disposed of as follows: Bay colt by Unique, 20gs., Mr. Baird; bay filly by Chocolate Junior, 22gs., Mr. Birley; chestnut filly by Langton, 20gs., Mr. Magee; Blackpool Fireaway, yearling colt, 27gs., Mr. Jones; Blackpool Louise, two-year-old filly, 40gs., Mr. Gemmel; Blackpool Firefly, two-year-old filly, 41gs., Mr. Stock; White Thorn, harness mare, 64gs., Mr. Gemmel; Bonta, harness mare, 32gs., Mr. Eaton; Valerie, brood mare, 30gs., Dr. Stevenson; Copley Lady Dunlop, brood mare, 50gs., Mr. Dunderdale; Flora III., brood mare, 40gs., Mr. Gemmel; Newbald Regina, brood mare, 52gs., Rev. L. C. Wood; Miss Fireaway, brood mare, 35gs., Mr. Tweedale.

The catalogue also included a number of animals belonging to Mr. C. V. Haworth, which sold as follows:—Davenwort, chestnut colt, 8gs., Mr. Magee; Lord Ramsdale, chestnut colt, 6gs., Mr. Hopkinson; Thornton Squire, yearling colt, 16gs., Mr. Crabtree; Thornton Flower, two-year-old filly, 30gs., Mr. Crabtree; Sontro, three-year-old gelding, 26gs., Mr. Haworth; Day Spring, brood mare, 30gs., Mr. Milne.

Mr. David Mitchell's Hackneys and Ponies.

On Tuesday Mr. David Stevenson, of Troon, brought under the hammer at Millfield, Polmont, a number of Mr. David Mitchell's Hackneys and ponies. Mr. Mitchell's stud is known far and wide, and the attendance was, as was to be expected, a large one, many English buyers being present. Among them was Mr. Thomas Mitchell, of Bradford, who was one of the principal purchasers of the day. While all the animals presented for sale were of the best class, very special attention was directed to the famous Filberta, a two-year-old filly which was awarded the Hackney Horse Society's gold medal at the Highland Show at Stirling, undoubtedly a fine filly, but did not show itself up to form. Bidding started low for such a horse—50gs.—and the animal was eventually knocked down at 62gs. to Mr. Neil, Kilmarnock, who offered a very different figure for the filly some time ago. The plum of the sale, however, was the well-known pony gelding Marson, a noted prize winner, a model as a pony either in all-round or action. He is a son of Mars. Mr. Mitchell set the ball a-rolling at 100gs., and it gradually mounted to 160gs. in spirited bidding; but Mr. Mitchell was not to be shaken off, and he became the purchaser of what should be an acquisition to the South. Elam, a two-year-old gelding, created the liveliest bit of bidding of the day, starting at 30gs., and reaching 59gs. He is a big gelding, and is likely to turn out well. All over prices were decidedly disappointing, considering the blood and the condition in which the various lots were shown. A glance at the prices clearly indicates this. The total sum realised was £981 15s., and the following were the various prices:—

Fantail 3936, brood mare, chestnut, 15.1½ hands, f 1889, s Danegalt — Mr. Goodall — Gs. 27
Miss Ronald, chestnut foal — Mr. Scott — 13
Brown Berry 1463, brood mare, brown, 14 hands, f 1886 — Mr. Mitchell — 20
Golden Rose 6733, brood mare, chestnut, 15 hands, f 1890 — Mr. Matthew Bo'ness — 25
Chestnut colt foal — Mr. Mitchell — 14
Snowstorm 3527, brood mare, chestnut, f 1893 — Mr. Johnston — 27
Lochbunnie, chestnut filly foal — Mr. M. Scott — 16
Belle of the Ball 6387, brood mare, bay, 15.2 hands, f 1891 — Mr Malteague — 36
Chestnut filly foal — Mr. Beattie — 20
Empress 17737, brood mare, chestnut, 15 hands, f 1896 — Mr. Taylor — 35
Flora 2756, harness mare, chestnut, 15.1½ hands, f 1888 — Mr. Goodall — 39
Dazzler, saddle hack, bay, 15.1 hands, f 1896 — Mr. Bailie M'Farlane — 20
Marson, pony gelding, bay, 13.2 hands, f 1896, s Mars — Mr. Thomas Mitchell — 160
Diana, three-year-old filly, bay, f 1897 — Mr. Goodall — 16
Major, three-year-old gelding — Mr. Orr — 29
Filberta 16627, two-year-old filly, chestnut, s Polonius — Mr. Neil — 62
Blackberry, two-year-old filly, bay, f 1898 — Mr. Dickson — 19
Danseuse, two-year-old filly — Mr. Rycroft — 30
Adorus 6961, two-year-old colt — Mr. Orr — 19
Storm King, two-year-old gelding — Mr. Baird — 28
Elam, two-year-old gelding — Mr. Mitchell — 59
Marzapan, two-year-old gelding — Mr. Rankine — 24
Ganygold, yearling colt — Mr. Mitchell — 61
Millfield, yearling colt — Mr. Legge — 21
Sir Charles, yearling colt — Mr. Taylor — 18
Dainty Davie, yearling colt — Mr. Aitkenhead — 34
Rizzio, yearling pony colt — Mr. Taylor — 25
Gilberta, yearling filly — Mr. Taylor — 22
Ballet Girl, yearling filly — Mr. Charles E. Green — 16

Horse Sales at Ipswich.

At the Drill Hall, Ipswich, on Tuesday, took place Messrs. Robert Bond and Sons' second Michaelmas sale of carthorses, colts, and Hackneys. There was an improved trade for carthorses and colts, but for Hackneys a dull trade was experienced. Mr. Hy. Hart, of Gosbeck, awarded the prizes for the best carthorses, which were won by Mr. H. A. Reynolds, of Bucklesham, and Sir Cuthbert Quilter, Bart., M.P. The following were the principal lots sold:—

CART HORSES AND COLTS. — Gs.

The property of the Rt. Hon. Lord Rendlesham.
Chestnut gelding — 19
The property of the Exors. of Mr J. G. Everett, Falkenham

Scott, bay mare — 20
The property of Mr. H. A. Reynolds, Bucklesham.
Chestnut gelding, three years — 40
The property of Mr. W. M. Cockrill, Akenham.
Suffolk mare, eight years — 30
The property of Mr. I. Lott, Langham.
Bay hackney, four years — 20
Tinker, black gelding, six years — 30½
Boxer, grey gelding — 18
The property of Mr. W Cross, Ixworth.
Chestnut gelding, seven years — 30½
The property of Mr. G. Bishop, Little Wenham.
Prince, chestnut gelding, seven years — 25
The property of Mr. E. Sporle, Ipswich.
Ramper, bay gelding, eight years — 19
The property of the Exors. of Mr. H. Cooper, Holton Hall.
Grey Shire mare, six years — 21
Bay foal — 15½
The property of Sir J. Gorell Barnes, Stratford.
Stratford Smart, Suffolk mare, f 1894, s Everett's Baron — 27½
The property of the Exors. of Mr. J. G. Everett.
Chestnut filly, s Cordy's Langley Hero, two years — 30½

HACKNEYS.

The property of Lord Rendlesham, Home Farm.
Bay mare, five years, 16.3 hands — 40
The property of Mr. C. H. Whittall, Stowmarket.
Black gelding, seven years, 16 hands — 17
The property of Mr. W. Dunnett, Woodbridge.
Bay gelding, five years, 15.2 hands — 26½
The property of Exors. of Mr. J. Lambert, Mendlesham.
Bay cob, six years, 15 hands — 21
The property of Mr. F. J. Geater, Middleton.
Dark chestnut pony, rising five years, 13.2 hands — 16

On the same day, at the Ipswich Sale Yard, Messrs. Spurling and Sons offered just over sixty carthorses and colts, for which there was a very good demand throughout, the top price being 32½gs. for a six-year-old bay gelding. The following were the chief prices realised:—

Gs.

The property of Mr. S. Dawson, Stratton Hall.
Boxer, chestnut gelding, six years — 18
The property of Mr. W. Jolly, Bramford.
Bay mare, three years — 22½
The property of one consignor.
Bowler, bay gelding, six years — 32½
Sharper, black gelding, six years — 20

Club, chestnut gelding — 20
Delight, Suffolk mare, f 1891 — 17
The property of Mr. Lawson, Rattlesden.
Chestnut mare, seven years — 24
The property of Mr. J. Pratt's Exors., Melton
Two-year-old colt — 15
Ditto — 14½
Ditto — 18
Ditto — 16½
Ditto — 14½
Ditto — 14½

Horse Sale at Glasgow.

On Wednesday Messrs. Dixon and Wallace offered for sale at their horse bazaar, Cattle Market, Glasgow, 165 carriage, harness, van and cart horses, and cobs and ponies. All the animals showed remarkably well, although the majority of them were pretty well worked out, the season for good horses being about over. Cobs and ponies were of good substance, fair style, and suitable ages. There was a crowded ring of buyers forward from all parts of the country, dealers and farmers being well represented, but trade was not at all satisfactory. Good horses met a sharp demand, and they sold well, but inferior lots met a slow trade and were difficult to cash. Cobs and ponies had a fair selling trade, and sold relatively dear. The ages of the animals ranged from five to twelve years, a number of them being aged, and they were from 14.2 to 17 hands high; ponies from 11 to 13.2 hands high. Harness horses realised up to £25; secondary and inferior, 5 to 8 guineas; best vanners, to £28; secondary, £10 to £16; inferior, 4 to 8 guineas; best cobs, to 36 guineas; secondary, 10 to 18 guineas; inferior, £5 to £9; ponies, to 18 guineas, and down to 5 guineas; long animals, 8 to 23 guineas; and cart horses, 5 to 27½ guineas, all according to style, substance, and action.

SHEEP.

Mr. E. G. Legg's Dorset Horns.

Mr. T. Ensor, of Dorchester and Wimborne, assisted by Mr. T. H. Ensor, secretary of the Dorset Horn Sheepbreeders' Association, sold by auction at Melplash Court, near Bridport, on the 18th inst., the Coombe Down portion of Mr. E. G. Legg's Dorset Horn breeding flock, together with a few well-bred yearling Hereford heifers of a good stamp. The high reputation which Mr. Legg has for so long enjoyed as a breeder and judge of this useful and popular breed of sheep affords ample proof of the high appreciation in which the flock is held, the flock being undoubtedly one of the oldest in existence, having been established as far back as 1790 by Mr. David Legg, passing to his son, Mr. Edward Legg, in 1825, and into the hands of the present owner in its entirety in 1858. The sheep which were offered were greatly admired for their wonderful size and matching character, and we doubt if a better and more typical flock could be found. They presented a splendid appearance, with fine bone and wool, and they supplied undoubted proof of the skill and judg-

ment displayed in their breeding. The flock comprised 116 two-teeth ewes, 87 four-teeth ewes, and 70 six-teeth ewes. Conveyances met the morning trains at the Bridport and Crewkerne stations, and the sale was well attended by most of the representative flockmasters. The sale commenced punctually at two o'clock with the six-teeth ewes, of which the following were among the chief prices realised:—65s., Mr. Studley, Toller; 59s., Mr. J. Chick, Compton Valence; 56s., Mr. J. C. Davy, Yondover; 54s., Mr. Tolman, Mapperton Marsh; 53s., Mr. J. Chick; 52s., Mr. J. Woolmington; and 48s. (twice), Mr. Tolman and Mr. J. Pile, Langdon, 61s., respectively. Four-teeth ewes ranged from 52s. to 85s., Mr. Crawford buying an exceptionally fine pen at the latter figure, which was the top price of the day; Mr. B. Wyatt securing the next best lot in this age at 73s.; 63s. was paid by Mr. J. Pile for the third best lot in this age; Mr. C. Scutt, Preston, 58s.; Mr. C. Scutt; 57s., Mr. Job Hansford; 55s., Mr. J. K. Rolls, Burton Bradstock; 54s., Mr. J. K. Rolls; 53s., Mr. Zealley; 52s., Mr. Tolman. Two-teeth ewes ranged from 55s. to 80s., Mr. B. Cox buying a very good pen of ewes at the last-named price; 76s. was the next highest price, which was given by Mr. B. Wyatt; 65s. (twice), Messrs. C. Scutt and R. Bugler respectively; 60s. (twice), Messrs. H. Hansford and J. Lenthall respectively; 57s., Mr. J. K. Rolls; 5s., Mr. Slade. Some well-bred Hereford heifers realised £20 10s. to £24 10s. per pair.

Sheep Sale at Salisbury.

Messrs. Waters and Rawlence's tenth annual autumn sale of sheep at The Butts, Salisbury, was held on the 19th inst., the entry comprising just over 4,000 head, and with a large attendance of buyers a capital trade ensued, prices being quite on a range with the excellent Wilton Fair figures. Wether lambs made from 47s. downwards; ewe lambs, from 41s.; mixed lambs, from 44s.; culls, from 30s.; registered ewes in ages, 50s. to 45s.; fat ewes, 47s. to 40s.; grazing ewes, 37s. to 34s.; rams, 35s. to 63s. After the sale of sheep 62 choice heifers, the property of Mr. G. H. Morey, of Britford, were sold well, as follows, in lots of five:—Two-year-old in-calf heifers, £12 10s., £12 5s. (twice), £10 5s., £10, and £9 per head; weanling heifers, £9 15s., £9 7s. 6d., £8 10s. (twice), £8 5s., and £7 5s. per head.

Sheep Sale at Hawick.

Messrs. Andrew Oliver and Son held their closing sheep sale for the season at Hawick on Thursday, when they presented upwards of 200 lots, comprising 2,500 Cheviot ewes, 240 Black-faced ewes, 210 gimmers, 630 Cheviot wedders, 940 lambs, and 10 Cheviot rams, in all, 4,530 head. All the lots were of a secondary description. There was a good attendance of buyers. Cheviot draft ewes were the principal portion of the sale, and they sold fully as dear as the tops at former sales.

We have received a price list from Messrs. Rylands Brothers, Limited, Warrington, giving quotations for galvanised hop strand. This firm are the oldest makers of wire in the country, and they are at present making a speciality of wire for the use of hop growers. The sole agent for Kent and Sussex is Mr. Edward Ball, 3, Newstead Road, Lee, Kent.

THE HACKNEY STALLION "DANEGELT," 6990.

SHOWS.

Ayrshire Agricultural Association Cheese and Butter Show.

The annual show of dairy and farm produce in connection with the Ayrshire Agricultural Association was held at Kilmarnock. The weather was fair, and not at all unpleasant, and there was consequently a large attendance of exhibitors and others who had an interest in the result of the judges' work. The show is the largest of the kind in Scotland, and it always attracts particular attention, especially on the part of dairy farmers in Ayrshire and the South-Western counties generally. On this occasion there were scarcely so many visitors as usual, the takings showing a falling off of £14 as compared with last year. The entries were 1,259, as compared with 1,203 last year, an increase of 56. This increase is very satisfactory in view of the fact that the butter-making competitions, which secured an entry of thirty-one a year ago, were discontinued. The exhibits in the cheese section numbered 595, an increase of 35, but in the butter section there was a decrease to the extent of 28, the figures for this and last year being 182 and 210 respectively. The association held out considerable inducements in the way of prize-money. The sum offered was £481, compared with £493 in 1899, and £203 15s. was distributed over the cheese classes. The quality of the exhibits showed that progress has been made in the art of cheese-making. Only very few samples bore traces of discolouration, but in a number of cases there was a want of brightness. In the class for coloured cheese 105 lots were pitched, against 93 last year, and the quality was decidedly better than in previous years.

A notable feature was the almost entire absence of discolouration, and the flavour, in a very large proportion of the lots, was good. A number of the exhibits, however, were more or less open in texture. The first prize was awarded to Mr. Andrew Barrowman, Caigton, Castle-Douglas, for a specially nice exhibit. It received the maximum number of points for flavour and colour, but dropped four on account of body and texture and one in respect of finish. The general character of the class for white deep cheese was very good. Many of the samples were rather new and green, and consequently tough in texture. The first three lots were of outstanding merit. Some of the judges were of opinion that the exhibit of James Wallace, Lochlea, Tarbolton, should be placed first, as it was much more mellow and close-cutting than the lot shown by Mr. M'Harg, Stranraer, but the premier ticket was eventually given to the latter. The class for loaf cheese was very much the same in character as the one just described, with this addition, that the style and get-up were specially fine. Flat cheeses were of good average quality. There was, however, a want of what might be termed really high-class lots. As a rule, the finish was exceedingly good, but in a number of cases the exhibits were open, and in others where the body was very good hardness and greenness was discovered. The exhibits in the ton competition were well staged, and had a tidy appearance, but the colour was inclined to the dull side. All the winners were well-known makers, and the judges found difficulty in allotting the first prize. In the end they decided to give the premier award to J. C. Cunninghame, Dunragit, and the second to William Hunter, Garthland Mains, Stranraer, whose exhibit, however, excelled in external appearance.

In the different butter sections the exhibits were of a high order of merit. Some of the samples had an extremely high colour, caused in many cases by the use of the milk of cows which had newly calved, and the judges advised the exhibitors to discontinue the practice. Several samples were very streaky, owing to the use of coarse salt which had been applied at too low a pressure and had not dissolved quickly. With regard to mush butter, the texture and grain was often perfect, but a prevailing fault was a want of fulness of flavour, a condition which is possibly accounted for by the coldness and wetness of the season. Samples which were in other respects perfect were rejected owing to the fact that the cream had been ripened before the process of churning was commenced. The judges strongly recommended the Association to discontinue the class for fancy butter unless prizes were given for the most artistic exhibits irrespective of quality or other considerations, the reason being that in the course of preparation the samples were ruined in the handling. A marked advance was shown in the quality of the honey, and there were many more exhibits than usual.

The principal prize-winners were:—

CHEESE

Champion competition: 1, and champion, Mr. Andrew Barrowman, Caigton, Castle Douglas; 2, Mr. William Barrow, Overlaw, Kirkcudbright; 3, Mr. William M'Cosker, Ingleston, Borgue, Kirkcudbright.

White deep cheese, made according to any method: 1, Mr. John M'Harg, Carnaell, Sandhead, Stranraer; 2, Mr. James Wallace, Lochlea, Tarbolton; 3, Mr. James Bryden, Mauchline, Dailly.

Two flat cheese, each not under 40 lb. weight, made according to the Dunlop or any other method: 1, Messrs. W. and H. Hodge, Almont, Daljarroch, Ayrshire; 2, Mr. James M'Cartney, Kirkoch, Kirkcudbright; 3, Mr. Archibald M'Kie, South End, Campbeltown.

Loaf cheese, coloured or uncoloured, Cheddar or other imitation English, each lot not under one-half cwt., and each cheese not exceeding 12lb.: 1, Mr. William Hunter, Garthland Mains, Stranraer; 2, Mr. John M'Harg, Cairnwell, Stranraer; 3, Mr. James Kerr, Banks Dairy, Kirkcudbright.

Sweepstake competition sweet milk cheese made according to any method, each lot not under 1 cwt.: 1, Mr. John Smith, Hall, Auchencairn, Castle Douglas; 2, Mr. Robert Dunlop, Drybrough, Castle-Douglas; 3, Mr. James Wallace, Lochlea, Tarbolton.

Sweet milk cheese made according to any method, each lot not under 1cwt., competition limited to Ayrshire: 1, Mr. David Plunkett, Threave, Kirkmichael, Maybole; 2, Mr. Alex. Barclay, Rigghead, Galston; 3, Mr. William Drummond, Fairwells, Craigie.

Cheese of any kind or make, each lot not under 1 cwt., from a dairy not exceeding twenty-five cows, competition limited to Ayrshire: 1, Mr. William Lindsay, Killoch, Galston; 2, Mr. William Wallace, Hill, Ochiltree; 3, Mr. John Marr, Brigland, Mauchline.

Cheese made according to any method, each lot not under 1cwt.; competition restricted to persons who have used Messrs. R. J. Fullwood and Bland's annatto and rennet preparations exclusively throughout the season: 1, Mr. John M'Harg; 2, Mr. Stephen Hunter, Whiteleys, Stranraer; 3, Mr. James Cruickshanks, Cumston Mains, Tayinloan.

Cheese made according to any method, each lot not under 1cwt.; competition limited to Ayrshire, and limited to persons who used Hansen's dairy preparations exclusively throughout the season: 1, Mr. Alex. Wyllie, Mossgiel, Mauchline; 2, Mr. James Borland, Caldon Hill, Craigie; 3, Mr. John Millar, Low Dollars, Hurlford.

One ton of cheese, of any kind or shape; competition open to members wherever resident: 1, Mr. J. C. Cunninghame, Dunragit; 2, Mr. William Hunter, Garthland Mains, Stranraer; 3, Mr. John Stevenson, Boghead, Galston.

One half-ton of cheese of any kind or shape; competition limited to Ayrshire: 1, Mr. Allan Stevenson, Parkhill, Mauchline; 2, Mr. James Bryden, Moorston, Dailly; 3, Mr. Robert Paton, Knockendale, Symington.

BUTTER

Powdered butter; open competition: 1, Mr. Wm. Kidd, South Dean, Kilmarnock; 2, Mr. Hugh Thomson, Newhouse, Kilmarnock; 3, Mr. James Smith, West Gateshead, Kilmarnock.

Fresh butter; open competition: 1, Mr. Hugh Thomson; 2, Mr. William Kidd; 3, Mr. Thomas Gilliland, Grassmillees, Mauchline.

Powdered butter; limited to Ayrshire: 1, Mr. William Kidd; 2, Mr. James Smith; 3, Mr. James N. Drummond, Bargower, Hurlford.

Fresh butter; limited to Ayrshire: 1, Mr. Robert Kid, West Raws, Kilmarnock; 2, Mr. William Kidd; 3, Mr. Hugh Thomson.

Open sweepstake competition: 1, Mr. M. Wallace, Mossside, Kilmarnock; 2, Mr. A. Beneban, Thornhill; 3, Mr. William Kidd.

Open sweepstake competition: 1, Mr. William Kidd; 2, Mr. James Smith; 3, Mr. Hugh Thomson.

Open sweepstake competition; fresh butter: 1, Mr. Robert Kidd; 2, Mr. Hugh Thomson; 3, Mr. William Kidd.

Fresh butter, open competition, to test the style of the butter the class prize: 1, Mr. [illegible]; 2, Mrs. Fenwick, Bradleys, Dunnings, Perthshire; 3, Mr. Philip A. Stillman, Rochford, Essex.

HONEY

Six 1lb. glass jars of run or extracted honey: 1, Mr. R. Brown, Foxy Apiary, Somerton, Mrs. Symes, Mount Sharon Street, Dalry; 3, Mr. F. Chapman, The Dairy, Wells, Somersetshire.

Six 1lb. sections of honey, [illegible]: 1, Mr. Henry Wood, Ridge, Kirkby Hall, York; 2, Mrs. J. [illegible], Rose Cottage, Dunmow.

Six 1lb. sections of honey, [illegible]: 1, Mr. William Hall, Dunmow; 2, Mr. [illegible], Rose Cottage, Dunmow; 3, Mr. A. [illegible], Maldon, Essex.

Six 1lb. sections of honey, [illegible]: 1, Mr. W. [illegible]; 2, Mr. [illegible]; 3, Mr. [illegible].

Six 1lb. sections of honey, [illegible]: 1, Mr. Henry Wood, Paradise, Lichfield, Staffordshire; 2, Mr. John Rees and Mrs. [illegible], Bryn-y-Neuadd, Llanfyllin, North Wales; 3, Mr. R. Brown, Flora Apiary, Somerton.

[illegible]: 1, Mr. [illegible]; 2, Mr. [illegible]; 3, Mr. [illegible].

Six 1lb. sections of honey, [illegible]: 1, Mr. [illegible]; 2, Mrs. [illegible]; 3, Mr. [illegible].

1, Mr. William Hogg, Dalbeattie Road, Castle-Douglas; 2, Mrs. John Ross; 3, Mr. John Ross.

The Cheese Fair.

The quantity of cheese staked in the fair was quite as great as in former years, but was held by a very limited number of dealers. Trade was not particularly brisk. Buyers would not respond to the dealers' prices, which were regarded as being too high. The dealers, however, could not see their way to lower the quotations. Dunlops sold at from 50s. to 53s., and Cheddars at from 60s. to 70s.

Framlingham Farmers' Club.

The sixty-first exhibition in connection with the Framlingham Farmers' Club was held in the Old Castle Hall on the 19th inst. The cottagers' productions, which formerly occupied tables in the hall, were this time accommodated in a small marquee, the central tables of the hall being devoted to table decorations, there being this year three entries as against none last year, and a nice show they made. The proceedings commenced with the ploughing competitions, and at an early hour there was an assembly of ploughs on the Market Hill, amongst the horses being some grand animals, a credit to the agriculturists of the district. The prizes were awarded as follows:—1, S. Chambers; 2, J. List; 3, W. Pearl; 4, W. Brooks; 5, G. King. Boys: 1, W. Hart; 2, G. Driver; 3, G. Warne. The three prizes offered by Messrs. Ransomes were taken by Chambers, List, and King. Mr. Sam Wightman, Saxted, offered a special of 10s. for the best stetch in the field, and this was taken by S. Chambers. The competitions took place at Mr. Morton Capon's, Ivy House Farm, on a wheat stubble. The land was a bit hard, but the work was on the whole well done. Messrs. Ransomes, Sims, and Jefferies, of the Orwell Works, Ipswich, offered three prizes in money for the best work done by their ploughs, instead of, as in previous years, presenting one of their ploughs. There was a good display of poultry, which department has now become one of the chief classes of the show. The exhibition of cottagers' productions was a highly creditable one. The entries were not, perhaps, quite so large as in previous years, but the vegetables were for the most part of fine quality. Prizes were awarded, not only to a number of cottagers resident in Framlingham, but in other parishes included in the club's sphere of operations. The roots were shown, as usual, in the Castle grounds. There was not quite so large an entry as in former years, but they were for the most part sound and good. The prizes were awarded as follows:—

ROOTS

Best nine specimens of any one of Sutton's improved varieties of mangel (given by Messrs. Sutton and Sons, Reading): 1, Mr. Chas. Ling, Bedfield; 2, Wm. Turner, Dennington.

Best nine specimens of Sutton's swede (given by Messrs. Sutton and Sons): 1, Mr. Chas. Ling; 2, Lord Rendlesham, Rendlesham.

Best nine specimens of Sutton's turnips (given by Messrs. Sutton and Sons): Mr. Chas. Ling; 2, Lord Rendlesham.

Best nine roots of mangel of Carter's variety: 1, Mr. Chas. Ling; 2, Mr. Edgar Scrutton, Brandeston.

Best twelve roots of Carter's swedes: 1, Mr. Chas. Ling; 2, Mr. Edgar Scrutton.

Twelve specimens of Webb's mangold, drawn from a crop of two acres (given by Messrs. Webb and Sons, seedsmen), Wordsley, Stourbridge): 1, Mr. Chas. Ling; 2, Mr. W. B. Barham, Bruisyard.

Twelve specimens of Webb's swede, from a crop of two acres (given by Messrs. Webb and Sons): 1, Mr. Chas. Ling; 2, Mr. R. Chambers, Worlingworth.

One bushel of Webb's barley (given by Messrs. Webb and Sons): 1, Mr. W. B. Barham.

One bushel of barley (given by Messrs. Creasy and Co., Framlingham): 1, Mr. W. B. Barham.

Best six specimens of any one variety of mangold (given by Messrs. Fred. Smith and Co., Suffolk Seed Establishment, Woodbridge): 1 and 2, Mr. E. H. Preston.

Best six specimens of any variety of swede (given by Messrs. F. Smith and Co.): 1, Mr. Alfred Pulham; 2, Mr. E. B. Winter.

Best four mangolds (long red): 1, Mr. Chas. Ling; 2, Lord Rendlesham; 3, Mr. Wm. Kindred.

Best four mangolds (long yellow): 1, Mr. Alfred Pulham; 2, Mr. Chas. Ling.

Best four mangolds (Red Globe): 1, Mr. Chas. Ling.

Best four mangolds (Yellow Globe): 1, Lord Rendlesham; 2, Mr. Jno. Abbott; 3, Mr. Alfred Pulham.

Four mangolds (Golden Tankard (given by Mr. C. Austin, Brandeston Hall): 1, Mr. Morton Capon, Framlingham; 2, Mr. Jas. Harmer, Framlingham; 3, Mr. W. Searby, Letheringham.

Four swedes (not grown with beet): 1, Mr. Chas. Ling; 2, Mr. W. Saunders; 3, Mr. W. Searby.

Four turnips (yellow fleshed): 1, Mr. Chas. Ling; 2, Mr. Jno. Abbott; 3, Mr. G. H. Waine.

Four turnips (white fleshed): 1, Lord Rendlesham; 2, Mr. Chas. Ling; 3, Mr. Alfred Pulham.

Wenlock Farmers' Club.

The Wenlock Farmers' Club's annual show was held on Monday, and the chief feature was the exhibition of horses, which was far in advance of any previous year, both in quality and number. Mr. T. H. Whiteman (Ashton Court, Leominster), with a chestnut gelding, Country Lad, secured the first prize in the class, which included many valuable animals. Mr. C. Wadlow, of Easthope, was first in the class for colt or filly suitable for hunting purposes, and Mr. F. Craig, of Westwood, was the second. There were eleven entries in the class for colts or fillies by a thoroughbred horse. Premier honours went to Mr. C. Allen, of Cound, near Shrewsbury, and Mr. E. Sankey, of Leighton, was awarded a second prize for a chestnut colt. Mr. J. F. Williams, at Bridgnorth, exhibited a nice chestnut colt in the colt or filly class, and the judges selected this exhibit for the first prize. There was good competition in the class for cart mare and foal, the property of a farmer residing within the limits of the Wheatland Hunt. Mr. E. Sankey's (Leighton) foal by Moor's Thumper was first, and a mare and foal shown by Mr. T. Jones, of Tarley, Bridgnorth, was second. Another good class was for cart gelding or filly foaled in 1898. Mr. W. H. Davies's chestnut filly secured first prize, and Mr. R. H. Gwynne's (Wellington) bay filly was second, and Mr. G. W. Marsh, of Craven Arms, was third. Mr. Gwynne in the cart colt or filly class was first with a nice bay colt, by Moor's Thumper, Mr. A. B. Dyas being second with a black filly by the same sire. Mr. Morgan Jones, of Delbury, Craven Arms, with a grey filly in the class for colts or fillies foaled in 1900 was first, and Mr. E. Sankey second and third. In the class for dairy cows there were eighteen entries. Mr. W. Bebbington, of Harton, was first, Mr. H. C. Yate, of Bridgnorth, second, and Mr. W. Bishop, of Barrow, Broseley, third.

North Somerset Ploughing and Root Competitions.

The annual ploughing match in connection with the North Somerset Agricultural Society was held last week at Mont Farm, Wraxall, in the occupation of Mr. J. R. Parker, and on the estate of Mr. Antony Gibbs. The number of ploughmen present was quite up to the average of late years; but the weather was too fine to enable the men to put in their best showing work. The ground was a fine stretch of two-year-old ley, which was very dry, owing to the absence of rain. Taking into consideration this drawback some very excellent work was put in, and the judges expressed themselves as being more than satisfied under the circumstances. The same day as the ploughing takes place the society's secretary (Mr. J. Watts) makes known the results in connection with the premiums offered for root growing. The club prizes are for an acre of wurtzel—First prize, £3 3s.; second prize, £2 2s.; an acre of swedes a prize worth 2½gs. In addition to these there are champion prizes for the best acre of wurtzel, the leading award being worth £3 3s., and the second £2 2s., and for the best acre of swedes 2½gs. In addition to these several seedsmen and manure manufacturers offered prizes for roots grown and stimulated with their articles. There were some twenty of these classes, and in the majority some excellent results were obtained. One feature about the North Somerset Society is that whilst it encourages farmers to improve their stock and the general cultivation of their holdings it is not unmindful of the claims of those who work on farms, and it devotes four classes (two premiums to each respectively of £2 and £1) for labourers and indoor servants, and two classes for servants other than agricultural.

Prize List.

PLOUGHING.

Champion class.—Ploughmen of any preceding year winning the first premium in the first class or farmers sons' class: 1, Mr. Arthur E. Alvis, Nailsea; 2, Mr. Frederick J. Lawrence, Nailsea; 3, Mr. Charles Brice, Wraxall.

First class.—Farm labourer: 1, Mr. Reuben Skinner, Portbury; 2, Mr. J. Attwood, ploughman to Mr. J. Watts, Flax Bourton; 3, Mr. G. Brown, ploughman to Mr. A. Gibbs, Tyntesfield.

Second class.—Not being a farmer's son, and under twenty-one years of age: 1, Mr. George Ogborne, ploughman to Mr J. Winstone; 2, Mr. W. Sealy, ploughman to Mrs. Thatcher, Portbury.

Farmers' sons' class.—Under twenty-one years of age: 1, Mr. Henry Merrick, Backwell; 2, Mr. F. E. Ball, Downside; 3, Mr. Alfred Parker; 4, Mr. E. Ball, Downside.

SERVANTS.

Labourers in agriculture.—Labourer who has worked for the same employer (or on the same farm) the greatest number of successive years: 1, Mrs. Cox, 37 years 9 months with Mr. Antony Gibbs.

Labourer who has worked for the same employer, being a tenant farmer:—1, Mr. G. Rogers, with Mr. G. Hardwicke 28 years; 2, Mr. T. Price, with Mr. H. Weeks, Wraxall, 21½ years.

Farmhouse indoor male servant: 1, Mr. J. A. Atherton, 14 years 7 months with Mr. A. Williams, Yatton; 2, Mr. H. Hyman, 8 years 9 months with Mrs. Davis, Walton.

Farmhouse female servant: 1, Daisy Vander, 6½ years with Mr. J. Vowles, Westown; 2, Annie S. Hunt, 6 years with Mr. J. L. Wyatt, Clevedon.

Male servant, not in agriculture: 1, Mr. E. Hatch, 30 years with Colonel Long; 2, Mr. H. Walters, Mrs. Were, Barrow Gurney.

ROOTS.

Acre of mangold wurtzel: 1, Mr. B. Morgan, Tickenham, 34 tons 14cwt. 1qr. 4lb.; 2, Mr. E. Chambers, Portbury, 25 tons 15cwt. 2qrs. 24lb.

Acre of swedes: 1, Mr. S. Burdge, Yatton, 22 tons 11cwt. 1qr. 20lb.; c, Mr. E. Chambers, Portbury.

Champion classes.—Acre of mangold wurtzel: 1, Mrs. Attwell, Congresbury, 52 tons 2cwt. 3qrs. 12lb.; 2, Mr. J. Hinditch, Portbury, 37 tons 1cwt. 1qr. 30lb.

Acre of swedes: 1, Mr. W. Winstone, Tickenham, 20 tons 1cwt. 16lb.; c, Mr. W. J. Williams and Mr. J. Alvis.

Agricultural and Horticultural Exhibition at Worcester.

Under the auspices of the Agricultural Sub-Committee of the Worcestershire County Council Technical Instruction Committee a successful exhibition of agricultural and horticultural produce was opened on the 20th inst. at the Shire Hall, Worcester, by the Lord Lieutenant of the county, the Earl of Coventry. No prizes were offered, though awards were made. The Tenbury, Madresfield, and Knightwick Agricultural Clubs were represented by excellent collections of produce. The strongest exhibit was the dessert and culinary fruit. Plums and damsons were worthy of special mention, and some excellent samples of hops were shown. A special feature was the preserved fruit class. There was a good collection of horticultural exhibits, tickets showing the locality, kind of soil, and mode of cultivation. Dairy produce, beekeeping, and fruit drying were also well represented.

Mr. E. E. Wheeler presided at the opening, which was very numerously attended, and explained that the object of the exhibition was to show what could be produced in the county, and the methods of their production, together with the class of the soil. The exhibition was purely educational, and would, he hoped, benefit those for whom it was intended. Farmers were too apt to keep themselves to themselves, and not let other people know what they were doing. This he believed to be a mistake, and the agricultural community would benefit by an alteration. The Agricultural Sub-Committee of the Technical Instruction Committee of the County Council were endeavouring by the provision of proper instruction to produce a better agricultural labourer, and he appealed for the assistance of farmers in this.

Lord Coventry then declared the show open, and hoped it was the first of a series of such shows. The soil of Worcestershire was particularly well adapted for growing fruit of the best kind and quality, and he was particularly pleased to see such an excellent show of fruit from all parts of the county. Nowhere in his travels did he see such good fruit as Worcestershire produced, and he was glad to find market gardening and fruit-growing very much on the increase, especially in the neighbourhood of Evesham, which must prove of great value if they could only secure better channels for marketing the fruit. They had still a great deal to learn in the planting and management of orchards, and he impressed upon growers the value of careful selection and packing, so that the fruit might be placed on the market in good condition. The heavy railway rates and the salesmen's commission at present left very little profit for the grower, but motor-cars and light railways ought to help to lower the railway rates. He believed they would all learn many useful lessons from the show.

Cider Making as an Industry.

On Monday afternoon a successful conference on "Cider, Fruit, and Orchards" was held at the exhibition. Mr. E. V. V. Wheeler (chairman of the Agricultural Sub-Committee of the County Council Technical Instruction Committee) presided over a large and influential gathering of fruit growers and cider manufacturers. The chairman pointed out that the bulk of the fruit grown in Worcestershire was really cider fruit, but most of the orchards were to be seen in a most careless and neglected condition. The object of the County Council had been to improve this state of things, and he claimed they had been to some extent successful. He was afraid that many people, farmers in particular, still looked upon cider as an article made to save money by giving it to their men in addition to wages, and most of the stuff made was not fit even to be given away. He hoped before long to see such views swept away by the wave of public opinion, for although farmers thought they saved money, he was sure in reality they did not.

Mr. J. Wootton advocated the supply of a good light cider having not more than 3 per cent. of alcohol, for which a ready sale might be obtained. It was essential that the growth of the vintage fruit should be encouraged, for it was from those only that the best cider could be made. Mr. Harper (Stroud) complained of the lack of these vintage fruits, the supply of which was inadequate to the demand for the cider.

Mr. Radcliffe Cook urged Worcestershire, Herefordshire, and Gloucestershire to combine in the provision of a central institution where scientific experiments might be carried on to aid in the cider industry. He pointed to France and Germany as countries which were rapidly advancing in the supply of cider, and which were assisted by their respective Governments to deal with the matter in a systematic manner.

Farmer Fined for Selling Beer to his Labourers.

The Isle of Ely (Cambridgeshire) magistrates last week fined Frederick William Tombleson, farmer, of Wisbech, £2 and costs for selling beer by retail without having in force an Excise licence. The evidence showed that the defendant bought beer at one shilling a gallon, and sold it to his labourers for convenience, there being no public-house within a long distance of their work. The money for the beer was deducted from the men's wages. The defendant pleaded ignorance, and said he did not supply the beer for profit. The magistrates, in imposing the fine, pointed out that the defendant had rendered himself liable to a penalty of £20.

All farm live stock should be fed on "Molassine." It is an excellent food and condenser combined. See advertisement on back page of this issue.—[ADVT.]

SOCIETIES.

Devon Cattle Breeders' Society.

A meeting of the Council of the Devon Cattle Breeders' Society was held at Exeter on Wednesday, Mr. J. G. Davis presiding.

It was resolved to hold a show and sale of Devon cattle in the spring of next year, the secretary to fix the date as near that of preceding years as possible.

In considering the revision of the regulations, Mr. Kidner objected to young bulls being required to have a ring through the nose. The County Council required the observance of this regulation, but the Council was not composed entirely of practical men, so this Society was entitled to lead them a little. It was unreasonable to compel a man to put a ring through the nose of a bull of about twelve months old. If a man carried a vicious young bull about the country he would be liable for any damage it might do. He did not think the County Council should be allowed to ride rough shod over them in this way. A bull could be controlled equally well by a clamp.

Other members thought otherwise, and it was decided to reduce the age from fifteen months to twelve months in Rule 10, which stipulated that either a ring or clamp should be used.

The scrutineers presented their report on the result of the election of judges, and the following were elected:—Messrs. J. Kidner, J. Chick, S. Farthing, A. Bowerman, A. Tribble, and S. Kidner.

An application was received from the local committee of Cardiff, asking the Society to offer prizes at the meeting of the Royal Agricultural Society there in 1901. It was resolved to contribute £21, on the condition that the money was appropriated as champion prizes for the best male and female Devon cattle.

On the motion of Mr. S. Kidner, the secretary was instructed to apply to the railway companies to grant prefential rates to councillors attending Council meetings and agriculturists attending the shows.

Cleveland Bay Horse.

A meeting of the Council of the Cleveland Bay Horse Society was held at Stockton on Wednesday. Mr. G. C. Whitwell presided, and alluded to the action the Society took in connection with the Paris Exhibition, and said the whole affair had ended much as they anticipated. They could not see their way to enter Cleveland Bays in classes to which other breeds were admitted, and the result had been that the classes were a complete fiasco. Only one Cleveland Bay stallion was entered, and that by the executors of a deceased member. He had received a letter from Mr. H. Stephens, suggesting that something should, if possible, be done to extend the breed of Cleveland Bays. Whilst visiting the local shows during the summer, he (the chairman) had been somewhat disappointed at the small entries of young stock. With regard to the older stock, he thought matters were satisfactory, and both at the Royal and Yorkshire Shows he considered they were extremely good. He had made inquiries amongst various breeders and found that South Africa had been a blank; but he thought they might look forward to a cheerful future.

The secretary read a letter from Lord Hopetoun, the new Governor-General of Australia, in which his lordship desired to enter a bay filly in the Society's stud-book. He also expressed a wish to become a life member of the Society, and enclosed the necessary £10 subscription. The chairman expressed his regret that the Society could not enter the filly, as it was not eligible.

Beds Chamber of Agriculture.

The new session will be opened by Mr. James Crouch reading a paper on "Poor Rates, Past and Present," on Saturday, November 3rd, at Bedford. An interesting programme has been arranged, including Mr. Godfrey (secretary to the Central Chamber) on "Agricultural Legislation"; a paper on "Bacon Factories," by Mr. Loudon Douglas (who wrote such an interesting article in the R.A.S.E. Journal a little while ago on the same subject); Mr. Stopes, the barley judge, will dilate on "Pure Beer and Materials," and no doubt attract a large audience; the President of the English Jersey Cattle Society (Mr. E. Matthews) will lecture on "The Quality of Milk from Various Breeds of Cattle"; "Farm Machinery" (an important subject just now) will be dealt with by Mr. F. S. Courtney, M.I.C.E., steward of the implements at the Royal Shows; and Mr. Robert Long, of Stondon, will read a discourse on "Waste in Agriculture."

Suffolk.

The annual general meeting of the Suffolk Agricultural Society was held in the Town Hall, Ipswich, on the 19th inst., the chair being occupied by Mr. J. A. Hempson.

The annual balance-sheet, audited by Messrs. James E. Ransome and Edward Packard, showed total receipts for the 1900 show amounting to £3,048 2s. 6d., this sum including a credit balance from 1899 of £734 5s. 5d., with £229 7s. received from the Woodbridge Local Committee; £815 8s. 8d., gate money at Woodbridge; grants from County Council and from the town of Woodbridge to working dairy, £30; prizes presented to the society, £248 5s.; special premiums for labourers, £10; annual subscriptions (less £28 arrears), £593 3s.; life membership subscriptions, £20; arrears collected since 1899 audit, £15; entrance fees (less £3 1s. arrears), £235 3s. 2d.; sale of catalogues and receipts from advertisements in ditto, £54 10s. 8d.; royalties on grand stand and refreshment-booths, £42 1s. The total expenditure was £2,111 16s. 11d., the following being amongst the items:—For hay, straw, and fares, £47 5s. 9d.; printing (including the catalogues), £85 6s. 3d.; rosettes for prize winners, £7 15s. 1d.; advertising, £46 4s. 6d.; erection of shedding, £398 10s. 3d.; and for canvas, etc., £51 2s. 5d.; other items bringing the ground account to £498 3s. 3d. Bill-posting cost £32 2s. 6d.; the working dairy, £30; secretary's salary, £100. The stock prizes there had been paid, £949 12s., and the balance in hand was £911 5s. 7d., which subsequent receipts had increased to £936 5s. 7d.

The balance sheet having been adopted, a hearty vote of thanks to the Director of the Show Yard (Mr. A. J. Smith), and to the Local Committee, was carried, on the motion of Mr. P. M. Browne. Mr. Smith, in reply, expressed pleasure at the appreciation of his efforts, remarking that Woodbridge was always loyal to the Society.

The chairman said the Society felt very much indebted to the Local Committee for having brought about such a handsome result. He thought that all the arrangements had been most successfully carried through by the staff of the Society, at the head of which was their worthy secretary. (Hear, hear.)

Mr. John Brooks, Mistley, and Mr. Thos. Mortimer, Ipswich, were elected members of the Society. The meeting was adjourned until the 23rd prox.

At a Committee meeting which preceded the annual meeting, Mr. Wm. Biddell presiding, a telegram was read from the Mayor of Sudbury regretting inability to invite the Association, as "the sewage scheme would be in full work in the Borough."

Mr. P. M. Browne mentioned that the Society was likely to receive an invitation from Beccles, where, he remarked, they had always had a successful show. The present Mayor, however, could not answer for his successor, and it might be as well to wait until after November 9th.

Mr. Herman Biddell thereupon proposed that the committee adjourn the consideration of this question and that of the prize list until November 23rd. This was agreed to.

It was intimated that the annual show would be held in the week commencing June 3rd, 1901, and that this—according to the Society's usual arrangements—would fix the show days for Thursday and Friday, the 6th and 7th June.

Suffolk Sheep.

A Council meeting of the Suffolk Sheep Society was held at Ipswich on Friday, the Marquis of Bristol in the chair, when the secretary, Mr. Ernest Prentice, made known the awards of the judges in the flock competitions. They were as follows:—

District A Challenge Cup, Mr. Herbert E. Smith; r. and v.h.c., Mr. S. R. Sherwood (previous holder of the cup); h.c., Sir Hugh Edward Adair, Bart., and Mr. R. Holmes White.

District B Challenge Cup, Mr. Henry Lingwood (previous holder of the cup); r. and v.h.c., Mr. Benjamin Hitchcock; h.c., Mr. Joseph Watkins.

District C Challenge Cup, Major E. W. Baird; r. and v.h.c., Mr. Robert Barclay; h.c., the Marquis of Bristol (previous holder of the cup); c., Mrs. Clotilde Davies and Mr. E. R. Pratt.

District D Challenge Cup, Mr. Thomas Keeble; r. and v.h.c., Messrs. Stanford Bros.; h.c.; Sir T. Barrett-Lennard, Bart.; c., Mr. A. W. Ruggles-Brise (previous holder of the cup) and Mr. D. Abbott Green.

Best ewe lambs (for Pretyman Challenge Cup), Major E. W. Baird, the Marquis of Bristol, Mr. Herbert E. Smith, Messrs. Stanford Bros., and Mr. R. Holmes White.

Mr. Henry Lingwood proposed a vote of thanks to the gentlemen who had acted as judges. It was an undertaking that occupied a considerable amount of time and attention, and he could testify to the careful and painstaking manner these gentlemen entered upon their duties.

Mr. Joseph Smith seconded the motion, remarking that they were greatly indebted to the gentlemen who had devoted so much time and attention to the work of judging the various flocks. (Hear, hear.)

The President, who said he heartily endorsed the observations that had been made, put the motion, which was carried amidst applause.

Mr. J. W. Eagle, in acknowledgment, remarked that the judges had discharged the duty devolving upon them to the best of their ability. They had been through the various flocks, and seen some fine specimens of the breed, both ewes and lambs. They had drafted some animals which they did not wish to see in cup-winning flocks. There was no doubt that these competitions were doing a large amount of good. He thanked the owners of the flocks for their great hospitality, and for the assistance all they had afforded the judges in various ways.

Mr. D. Abbott Green also acknowledged the compliment, observing that it gave him great pleasure to accept the invitation of the society to act as one of the judges. He felt that in visiting the various flocks he had gained some experience, which he hoped would be valuable to him in the future. It was very gratifying to him to meet a lot of old friends, and he hoped he had made several new ones. With respect to the flocks generally, he quite endorsed the remarks of Mr. Eagle, that they had seen some very fine specimens. As far as he could see, there were two directions in which improvements were desirable, one being to secure greater uniformity so as to get the flocks more matchy, and the other was an improvement in the wool.

The other judges, Mr. John C. Dawson and Mr. J. R. Grimsey, also thanked the meeting.

Mr. Henry Lingwood and Mr. George Pettit were appointed judges in the Bristol Champion Challenge Cup and the Pretyman Challenge Cup competitions. The following seven names were chosen for recommendation to the Royal, County, and local shows, as judges of Suffolk sheep at shows in 1901:—Mr. J. R. Grimsey, Mr. J. C. Dawson, Mr. S. W. Slater, Mr. F. S. Lewin, Mr. C. T. A. Robertson, Mr. G. P. Watkins, Mr. J. Flintham, Mr. J. W. Eagle, Mr. F. Smith, Mr. W. Whitlock, Mr. S. Traylen, and Mr. George Pettit.

It was resolved that the premiums to the Royal Agricultural Society (Cardiff) and the Highland and Agricultural Society (Inverness) should be offered as last year, viz., gold medal to the Royal for the best shearling or two-shear ram, and £20 to the Highland Society, being £10 for the Suffolk classes and two prizes of £5 each for cross-breds.

Lincolnshire.

The annual meeting of the Lincolnshire Agricultural Society was held at Lincoln on Friday, Sir John Thorold, Bart., presiding.

Alderman Frankish moved the appointment of the Earl of Yarborough as chairman for the year, observing that the next exhibition was to be held at Brigg, in which town his lordship took great interest. Mr. C. W. Tindall seconded, and the resolution was carried unanimously.

The secretary (Mr. S. Upton) read the report of the Council, which commented on the success of the Spalding exhibition. The result had been a very acceptable addition to the Society's funds, meriting the warmest acknowledgment of the members. The Society now had seventy life, and 932 annual members—a decrease of twelve. After an absence of ten years, the Council had accepted a hearty invitation to revisit Brigg, the town at which the first exhibition of the North Lincolnshire Agricultural Society was held, in 1837. The town itself was not large, but it was the centre of an important district of the county, and large populations were within easy reach of it. A contribution had been offered equal to that of 1891, with the use of the same ground as a site, and a cordial welcome was promised, so that there was a fair prospect of a meeting equal to the best results of towns with similar populations hereafter visited by the Society.

Mr. Upton also read the financial statement, which showed that the year began with a balance in hand of £323 19s. 10d. The receipts had been £5,766 8s. 1d., and the expenditure totalled £4,906 9s. 2d., of which £4,483 7s. 11d. was in connection with the exhibition. The financial year thus closed with a balance in hand of £859 18s. 11d. The assets of the Society were certified to be £2,447 8s. 5d.

Mr. J. Evens moved the adoption of the report and accounts, and the confirmation of the proceedings of the Council. Mr. J. Adams seconded the proposition, which was unanimously agreed to.

Mr. A. L. Jessop proposed a vote of thanks to Lord Carrington for the assistance he rendered to the Society as chairman during the past year. This was seconded and adopted unanimously. Mr. W. K. Broughton was re-elected auditor. Mr. Tindall moved a resolution thanking Sir John Thorold for having occupied the chair at the meetings during the whole year, and taken Lord Carrington's place at the show. Alderman Frankish seconded the resolution, which was carried with acclamation. Sir John Thorold, in responding, said that ever since the Society was formed he had taken great interest in it, and had always tried to do whatever lay in his power to help it on. (Applause.)

Mr. Casswell asked if it would not be well for the Council to consider whether they could not do something to strengthen the hands of the President of the Board of Agriculture in his efforts to stamp out diseases of stock.

Mr. R. Davy supported the suggestion, and said he had been assured by the inspector for his district, where there had recently been several outbreaks of sheep scab, that nineteen cases out of twenty could be traced to Scotland. It was a shame for sheep to be allowed to come across the country and bring disease. He thought the sheep should be inspected and registered on entering the country, and it would be a great satisfaction to the breeders if the Council of that Society could take the matter up. (Hear, hear.)

Alderman Frankish said the Executive Committee of the Lindsey County Council were now considering whether they would be able to adopt some such regulations. They would be glad to

have compulsory slaughter, but the Board of Agriculture would not allow it. At present they had no authority to prevent these sheep coming into the country, and he was glad the matter had been mentioned, and hoped something might be done.

Sir John Thorold said he thought there was power to insist upon animals coming from Scotland or from other places outside the county being inspected.

Mr. Dean said he did not agree with Alderman Frankish that Executive Committees had no power. In the Kesteven Division Sir John Thorold was chairman of the committee, and he (Mr. Dean) was a member. They passed a resolution to the effect that animals coming into the division from Scotland and other places named should be notified to their cattle inspector, who should be at liberty to go and examine them, and if he thought it necessary he could order that the sheep be dipped. That worked most satisfactorily last year, and whereas in the previous year they had thirteen or fourteen cases of scab reported, he did not think there had been a single case since the resolution was passed. Their inspector only recently told him how satisfactorily it worked and how easy it was to carry it out; and he said he was only disappointed that Lindsey and Holland had not adopted similar resolutions.

The matter then dropped.

At a Council meeting held prior to the annual meeting, it was decided, in order to avoid as much as possible clashing with the Peterborough Agricultural Society, to hold the Brigg exhibition of the Lincolnshire Society on Thursday, Friday, and Saturday, July 11th, 12th, and 13th.

AGRICULTURAL LAW.

Agricultural Tenants and Dilapidations.*

An outgoing tenant is liable to his landlord at common law (a) to use the property in a proper manner, (b) to take reasonable care of it, and for any violation of these liabilities, whether "permissive" or "voluntary" in character, he is liable, and such damage as the valuers consider equitable will be deducted from the sum due to him for Tenant-right.

A tenant from year to year, under no express agreement thereon, is only bound to keep the premises wind and water tight when that can be done without "substantial repairs," but beyond this most agreements of tenancy lay a more or less clearly-defined burden upon the occupier under the head of repairs, and, according to the terms so laid down, the valuers must determine the measure of damage, such items as neglect to thatch, or replace tiles, to paint, paper, tar, whitewash, keep drains clear, scour out water carriages in irrigation meadows, to keep fences and gates in order, etc., etc., will be those most frequently met with. The presumption exists that these were all found in good tenantable condition upon entry, and so must be left upon quitting.

As regards dilapidation for neglect of, or for improper cultivation, the law treats it as "waste" if lands let for cultivation be not cultivated "according to the custom of the country"; most leases, however, are explicit on the question of cultivation, and usually stipulate as to the state in which the outgoer must leave the farm, especially the arable land; thus it is a very common provision to bind a tenant to a particular course of cropping during the last year of his tenancy, or to stipulate that (in a Michaelmas tenancy) a fair proportion (usually one fourth or one-fifth) of the arable land shall be left in seeds or other approved preparation for wheat, and that a certain proportion shall be seeded down with rotation clovers with the last year's corn crop.

The landlord is entitled to a set-off against the valuation in such cases, where it is shown that he sustains damage by the outgoer's non-compliance with these stipulations; but it occasionally happens that he is benefited thereby, and, notwithstanding that the lease has been violated, in such case the valuers may with justice overlook such violation.

Besides this question of sufficiency of acreage on quitting for corn, or roots, etc., the question of "cross-cropping" often gives rise to much trouble. A great many leases lay down the precise course of cropping that must be pursued, during the entire tenancy (in most cases the old four course, or modifications of it), and though such very stringent stipulations as this in an agricultural agreement are much to be deprecated, some clear lines as to the over-cropping and cross-cropping of a farm should appear in every farm agreement. Thus, provisions may appear with regard to hay sold off, to ensure the feeding on the land of root crops, to prohibit the mowing of meadow land twice in any one season, and to prevent the too frequent recurrence of white-straw crops, or the excessive growth of potatoes, the grazing of new clover leys during the winter months, etc.

As regards hay and straw sold off the farm, the lease sometimes stipulates that this may be done upon certain returns being made in the shape of cake or manure to the holding, and that this has been done the out-goer is liable to give proof if called upon.

The selling off of roots and green crops is usually absolutely prohibited, as it is well known that such a course is more exhausting to any land than had a crop of hay or straw been similarly sold off the land.

Old leases usually provide that no two white straw crops shall follow in rotation, but the more modern practice is to stipulate that not more than two white straw crops shall be grown on the same land in four years, thus allowing for the growth of barley after wheat, and giving the occupier a little more freedom of cultivation.

In fixing the amount of dilapidation for excessive or cross-cropping, the valuer will naturally consider the general state of the whole farm, as it occasionally happens that certain fields, by reason of their position or otherwise, suffer in this way; while, on the other hand, the farm generally has been cultivated above the average, and, on the whole, has not suffered in fertility.

Produce Sold off the Farm.

In dealing with a dilapidation claim under this head, the points to be considered are: (*a*) Had the tenant the right to sell off? (*b*) If so, has he fulfilled the conditions (if any) of his lease as to return in the purchase of cake or manure to restore the fertility of the land from which the produce has been taken? (*c*) If he had no right to sell off the farm, then to what extent has the holding suffered by exhaustion, by reason of the loss of the manurial constituents of the fodder, and the absence of the live stock, which would otherwise have consumed it on the holding?

In cases where the outgoer is bound to leave his hay or straw, or both, at consuming prices, and yet has sold any off the farm, he will be liable for the difference between market and consuming price to the landlord or his incoming tenant (besides the cartage and expense necessary to replace it), because not only has he violated his agreement, but has necessitated the purchase of fodder for live stock which ought to have been in existence on the holding, as presumably it was when the new outgoer went into the farm.

The north-country custom of "yardage" (usually about 1s. per cubic yard), payable by an outgoer in respect of the manurial value of hay sold off the holding, is worthy of passing notice here, though the custom appears to be falling into disuse, and in many cases it has now become more usual to consider the manurial value of any produce, whether hay, straw, or roots, sold off to be one-third of its selling price.

In this connection it should be remembered that not only is a farm directly impoverished by the sale of hay, straw, and other produce, but that as live stock cannot well be kept without the use of corn, cake, or other foods, the manure arising from their consumption is also lost to the land when their head of stock is not maintained as it should be.

In the case of sales of hay and straw in years previous to the last, the old rule that a ton of fodder properly fed would produce three tons of dung may be of some service.

Foul Land.

A claim may also arise for foul land, and this can only be dealt with by the valuer's inspection not only of the stubble, but also of the young seeds, where the presence of noxious weeds and couch is even a more serious consideration than upon the stubbles.

The damage in the case of foul land should be the cost of cleaning it, but the presence of a few foul spots will not be sufficient to secure a "set-off" under this head. The land must be really foul and full of couch.

The presence of docks and their seed, occasioned by neglect to pull at the proper time, is, to my mind, even more disastrous than mere couch, as the eradication of docks, when once established, is a matter of years, and, perhaps, a lifetime, whereas the cleansing of couch is not nearly so serious a matter.

* "Agricultural Valuations and Agricultural Leases Explained." By G. S. Mitchell, F.S.I.

FOREIGN AND COLONIAL.

Italy in Australia.

Some twenty years ago Charles du Breil, Marquis de Ray, then Bolivian Consul at Marseilles, formed a scheme for the colonisation of New Ireland, an island containing over a million acres, and situated about 350 miles from New Guinea. The embryo colony was to be designated "New France," and alluring terms were offered intending settlers; but nearly all the immigrants, about 500 in number, were recruited from the ranks of impoverished vignerons and labourers in Northern Italy. The scheme ended in complete disaster, the settlement proving a failure, and after much privation and suffering, the unfortunate immigrants, declining to settle under French rule in New Caledonia, found their way to Sydney, where they were kindly treated by the New South Wales authorities, the majority readily finding employment in various parts of the colony. This was in 1881.

In the course of the following year one of the immigrants, Rocca Comminitti, who had been sent into one of the northern coastal districts of the colony, having put by the greater part of his earnings during the preceding few months, took up a selection of forty acres. He was speedily followed by several of his compatriots, and, on the strength of what they had saved from their earnings, they resolutely set to work, and by utilising the strength of each family, and obtaining occasional employment from other sources, were speedily enabled to declare that they had formed out of apparently unpromising materials a "new Italy" of their own, in place of the "New France" originally contemplated in Polynesia. The story of the successful fight made by these brave Italians under most discouraging circumstances shows what can be effected by perseverance, unflagging industry, and systematic thrift. Their earlier source of income was obtained by cutting and selling timber, but, as time rolled on, a barren forest gave way to a comfortable-looking settlement, with clean and tidy dwellings, good and substantial fences and out-buildings, some of them of an especially good and durable character, while splendidly-tilled and cared-for gardens, orchards, and vineyards met the eye on every side.

In little more than three years from the first 40-acre selection being made, a substantial school-house was erected, a priest paid periodical visits to his flock, and although, being a little off the mail road, seldom visited by strangers, and almost unknown to the outer world, the little settlement has gradually grown and flourished, until the colony of "New Italy" has become an accomplished fact, worthy of the emulation of many of those who are now only drones in the great hive of human progress, and the consideration of those who honour themselves by devoting their time and talents to the proper government of their country. The holdings are mainly small ones, and, although each is securely fenced, the land is not all utilised for tillage, attention being principally devoted to the thorough cultivation of small areas for horticulture and wine-growing, the Italian colonists evidently believing in the superior tillage of small areas as against the indifferent cultivation of larger ones, and inspection of their labour, their trees and crops, proves very conclusively that the policy is a sound and payable one. The area of grapes under cultivation is from half an acre to about three acres to nearly every homestead, the black Hambro' being principally grown, the Reisling, and probably some others, finding a place also in some of the vineyards, which are everywhere marvels of cleanliness and attention, and in every instance is the area being gradually increased at such a ratio as the circumstances of the owners will permit. Within a few years from the date of settlement one Vincenzo Nardi realised from half an acre a sufficient crop to enable him to sell fully 1,000lbs. of grapes at 6d. per lb., in addition to making over 60 gallons of wine for home consumption. The following year he had double that quantity of matured vines, and the year succeeding upwards of two acres of productive vines, representing over £100 in cash, and more than 240 gallons of wine, which, at 5s. a gallon, means £60, as well as citrons, lemons, sweet potatoes, mulberries, apples, peaches, cabbage, lettuce, peas, oats, and barley.

And Nardi's was not an isolated case by any means. Some others had larger areas and greater variety of fruits, vegetables, and cereals growing. The success of mulberry cultivation has led to the introduction of the silk-growing industry, which, in time, may assume considerable proportions. It may be mentioned that until Rocca Comminitti, the real founder of "New Italy," appeared upon the scene in April, 1882, the locality was comparatively a howling wilderness, sacred to the timber-getter and the dingo, and the land thereabouts generally described as being "not fit to keep a bandicoot." Nevertheless it grew magnificent timber, and thousands upon thousands of the tall and stately giants of the forest, reduced to the severely practical form of hardwood piles and railway sleepers, have found their way from the forest to the river, and thence to Victoria, New Zealand, and other distant ports. The apparently barren and undulating ridges on which "New Italy" is located, and which extend for many miles in the direction of the Clarence River, are thickly timbered with ironbark, mahogany, spotted gum, and a species of oak, while in the flats at the foot of the adjacent range, where the richer soil has been washed down, are large quantities of grey and black ironbark, box, orange gum, grey gum, tallow-wood, pine, beech, teak, and stringy-bark. The trees are tall, straight, and stately, some of them growing a clean bole 100 feet high without a limb, and, as showing their values as timber, it may be mentioned that at one place may be seen the remains of an ironbark tree from which two "stringers" for girders, each 86ft. long, 18in. in width, and 6in. thick, had been obtained. The butt of the tree at the sevenfeet from the trunk was only 2ft. 6in. in diameter, and at 96ft. measured 19in.

The district is eminently suited for settlement by those versed in the agricultural industries of Southern Europe, and the story of "New Italy" shows what can be effected by colonists, however straitened their means, who are determined to make the most of their opportunities, no matter how slender they may be.

Profitable Crop Plants.

Professor A. N. M'Alpine delivered the inaugural lecture of the new session of the West of Scotland Agricultural College, and he took for his subject "Profitable Crop Plants," dividing his discourse into three parts, namely,: (1) Plants in general; (2) crop plants—the points connected; (3) the profit—where precisely does it come into the question?

In his introductory remarks Professor M'Alpine said:—I shall do my best to divest the subject of technicalities. I do not intend to consider crop plants individually, but rather to point out to you the various ways in which other plants come in and interfere with the profit, and shall not forget that I am addressing a general audience, farmers as well as students. We shall begin, then, in the right and proper way—the way which experience has proved—by taking our bearings and laying down our plan. The plant is, as all of you are aware, a sort of half-way house between the soil on the one hand and the farm stock on the other. So to speak, the plant stands about midway between the beginning and the end of agriculture, the soil being first, the plant second, and the stock third, then back again to the soil. Every farmer has to pass and repass these three landmarks in the course of his work, he must go round and round this perpetual circle—soil, plant, stock. Since he does so for business reasons he must keep within a larger circle with but one landmark—profit, profit, profit.

Plants in General.

To the husbandman a plant is merely the machine that he uses for the purpose of producing food both for man and beast. That this is the common idea associated with the thing called plant is shown by the prevalent use of the word plant for machines of every kind—electrical plant, engineering plant, and so forth. It is not to be forgotten that the plant of the farmer is a much more wonderful plant than any of these. The plant of a nail maker, for example, simply takes iron and changes its shape—turning out nails. The plant of the farmer, on the other hand, goes much further than this; it not only alters the shape of the matter that goes into it (which is all the nail-making machine can do), but even transforms the substance itself, turning out food from stuff that was not food. This special gift of the farmer's machine has evidently important bearings on the question of profit.

Weeds.

Though this notion of agricultural plant as a food creator is real and sound, good, and profitable, it is not big enough for our purpose here; it does not grip all the sources of profit and loss, for weeds also are plants, and weeds are not regarded as food producers—rather the reverse—since they sadly interfere with the crop plants. They are the Boers of agriculture, to be denounced, and upon them war to the death has to be waged; but, as you all know, it is one thing to wage war, and quite another to come off with the laurel wreath victorious. And so it is with weeds. Unless one is very knowing and specially cunning there is often indeed little hope of victory for the farmer, since many weeds are so insinuating and so insidious in their way, so intermingled with the food-producing crop that there is little chance of getting at them by ordinary means. Here science comes in to help, and the scientist studies the life history of the weed, and finds out the sources of its weakness and the sources of its strength. In this way the scientific man makes out a plan of campaign for the farmer in his war against the weeds, and may even go the length of providing them with forms of lyddite suitable for weed destruction. The form of lyddite I refer to is fired off not from a gun, but from a spraying machine, and is composed of blue stone, or it may be of copper as specially aimed at and very potent against such weeds as charlock.

Parasitic Fungi.

There is another distinct set of plants which the farmer classes I know not how. If he is of a superstitous turn he associates them with witchcraft and the power of the evil eye, for it seems to him that in a single night they lay his whole crop low, *e.g.*, potato disease. Here again, science can step in and find out whether the witches are responsible or not for the disaster. The finding of science is that the cause of such disaster is very frequently an attack, not by a witch, but by a peculiar kind of plant called technically parasitic fungus. As before, science delivers into the hand of the farmer means more or less efficacious for preventing attack. Such a means is in the famous Bordeaux mixture, composed of compounds of copper and of lime.

Soil Germs.

I come now to another, and the last class of plants that claims our attention—a class that has most important bearings on the question of profit. These plants of which I am now going to speak the farmer knows not in themselves, and, so far as he is a farmer and a business man, he cannot be expected to know them, that he wisely hands over to the scientist. As regards their effect, however, that is quite another matter. The effects I refer to are not at all strange or rare, rather, I might say, they are as familiar as the daily bread which he eats, and they are, indeed, on the tip of his tongue as often as bread itself. They are on his tongue tip every time he speaks the words fertile soil or fertility, for fertile is the farmer's name for the slump effect on his soil of the plant class I am now dealing with. In exactly the same way that bubonic plague represents in the slump the effect of the germ of bubonic plague, or as the potato disease represents the slump effect of the potato disease fungus, so the fertility of the soil represents the slump effect of the fertility germ. Because I am here on ground still under debate, it is advisable to clearly note the four following points. One is that fertility is a germ-caused effect, so is bubonic plague. A second is that fertility is a desirable and profitable effect, whereas bubonic plague is undesirable and ruinous. A third is that the fertility germ affects the dead only, and gives a semblance of life, or rather a real life to the soil, making it active, quick, and hungry as the farmer puts it. The action of the soil is real action, the quickness real quickness, the hunger real hunger—there is no figure of speech about it whereas the bubonic germ affects the living, making the living inactive and dead. The fourth and the most important point is that the bubonic germ, every life-destroying germ; in fact, all causes of death may be made to play into the clutches of the fertility germ, and through the germ into the hands of the farmer himself, ultimately lining his purse with the yellow gold. For this—that is for the gold—all we have to do is to see to it that the lifeless matter comes into a soil wherein the conditions favour the fertility germ. It is the prerogative and the special duty entrusted to the fertility germ to devour the lifeless, and in so doing to pave the way to a new life—a new life, which if the farmer so wills it and so plans it, is his crop. The fertility germ is thus seen to be the connecting link of a chain extending from the lifeless matter at the one end to the living crop and stock at the other. It follows from what I have been saying that

The Business of the Farmer

so far as fertility of soil is concerned, is to provide and purvey a sufficiency of lifeless matter to keep the fertility germs going at full swing, and further it is his business to see to it so far as in him lies that the conditions which favour the fertility germ are there in his soil. Then the soil yields that full and large crop which fertile land alone can yield. I care not how favourable the season, full crop the farmer cannot have, and cannot expect to have, unless the fertility germ is satisfied, and unless the conditions favourable to the display of the mighty powers of the fertility germs are fulfilled. Two important questions have to be answered here:—(1) Is it the case that the farmer provides and purveys the dead matter of which I have been speaking? The question almost answers itself. Does the farmer apply dung? *i.e.*, dead matter. Does the farmer allow and want to allow dead roots and pits of plant to be in his land? Does the farmer want humus, in short? He does, for there is profit in it. (2) Is it the case that the farmer caters for the fertility germ? That amounts to asking whether the farmer tills his land and limes it. If he does, he caters for the fertility germ. Tillage, I grant, has further objects, and so also has liming, but the great object of tillage operations and lime applications is to make soil a favourable and sanitary habitation for the fertility germs. Some of you may suppose that I am using many words to tell the farmer of to-day what experience had taught his grandfather and his great-grandfather, viz., that lime and dung applications, with proper tillage and good seasons, make land fertile. Well, I grant that is nearly all, but not *quite* all, for have I not said in addition that the fertility germ is the cause of it all, is the reason of all these effects? No one can maintain that his grandfather knew that fertility germs existed, much less that germ life in the soil was the cause and source of fertility. Here I would point out the

Exact Difference between Science and Practice,

and the exact value of the application of science to practice. It is this:—Practice and business deal with effects; science goes behind business and finds out the causes of the given effects, and when it finds them, hands them over to the practical man, who tries them, and knows them to be true or false by the one infallible test of profit and of loss. If the science put into practice yields profit it is true science, if it brings forth loss it is not science at all, but a mere shadow without substance; and if science is anything, it is substantial and profitable in its application. Knowledge of the cause of anything is a distinct and decided gain, for when we know the cause of a thing we can reason more correctly, plan more correctly, and practise more correctly. And what is to reason more correctly in your business, to plan more correctly in your business, to practice more correctly in your business—what is it, I ask, but to be more successful and to make more profit? A ship, a good ship, the best ship, without a compass to guide by, a rudder to steer by, is certainly inferior, is a much less workable and much less profitable concern than the same ship with rudder and compass. The rudder and compass for large crops is the fertility germ. For the germ we dung and for the germ we lime, and by casting our dung and lime to the germ we reap a larger and more profitable crop. Shakespeare clearly perceived and as clearly expressed the effects of these soil germs in his well-known lines:—

> Imperial Cæsar, dead and turned to clay,
> Might stop a hole to keep the wind away

If Shakespeare had been a mere scientific bore to the rich business man he might have done this version:—

> Imperial Cæsar, dead and turned to clay
> Might stop a hole to keep the wind away,
> Or feed a turnip.

With a view to profit, then, the kinds of plants to be kept in view are four:—(1) food producers, (2) weeds, (3) parasitic fungi, (4) germs.

The Crop Plants.

I come now to the middle part of the thread laid down—viz., to the crop plants themselves. I would here point out that a crop plant is a special machine for a special purpose. This statement involves two important questions bearing on profit:—(1) What is the purpose in view? (2) What is the best machine for that purpose? (3) How is the best machine to be secured? The purpose of crops in agriculture is threefold: (1) Food production; (2) tobacco and drug production; (3) clothing and bedding. What plants are grown for these purposes is determined above everything by the nature of the country, its climate, and its circumstances, especially by its means of intercourse and cost of labour. We in our sea-girt island, with its moist and temperate climate, are restricted chiefly and in a general way to the production of food and bedding for stock—our circumstances do not as a rule suit for fine and dainty crops requiring shelter, warmth, dryness, and expensive labour, but rather our climate is suitable for coarse and hardy plants—grasses, clovers, roots, and hardy cereals. The agricultural returns show that these are the staple crops of British agriculture. The next question about crops—viz., What is the best machine for the purpose in view? means to us what are the best grasses, clovers, roots, and corns?

The Best Grasses for the Farmer

are assuredly those that give largest yield of nutritive and palatable herbage and hay; in short, those that yield most profitably. It is often assumed that Nature looks after this largeness of yield in the case of grasses, but not in the case of cereals or of roots, nor of corn. This statement is indisputable—a statement of fact. Grass land is often left to Nature, as if Nature had a special eye to filling a farmer's purse. Here science and the colleges of science have something to do, something to prove by experiment, something to teach and to say to the farmer who wishes more profit—and who does not? Seeing it can show him that natural grass can be made more profitable by suitable manuring, it can teach some agriculturists, but not all (for some already know it), that they are not sufficiently lavish in their use of the best large grasses, and that oftttimes they are too lavish by far in their use of perennial ryegrass. With regard to corn, it has been claimed that within the last few years improved and more profitable varieties have come into our hands. Whether these varieties are or are not more profitable than those hitherto with us is again a matter to be tested by experiment. Who is to make these experiments in the farmers' interests? The sellers? Oh, no! The farmer? Well, if he does he must neglect his business more or less, and neglect of business usually means loss of money. It is for science and the colleges to test and try such matters, and that is one part of the work which our college is at present doing. The third question is,

"How are the Best Crops to be Secured?"

and this is largely a seed question. The value of a crop depends much on the quality of the seed used. The great quality of the seed is its power of growth. Now, power of growth—or germination of seed—is a thing that can be measured approximately, not by the practical farmer, for his business is to grow crops, not to test seed. Who, then, is to measure the germ-power of seed offered for sale? As well as who is to weigh a lump of butter offered for sale. The seller, of course. The buyer of seed ought to see to it that the seller has, in fact, measured the germ-power of the seed offered for sale; the buyer ought to have a guarantee of the germ-power from the seller, and ought to be provided with ways and means for testing the accuracy of the guarantee. This testing of seed is assuredly a matter to be taken up by colleges, and the services of the staff of an agricultural college ought to be placed at the disposal of agriculturists for the purposes of seed-testing and for advising regarding seeds. I am quite decidedly of opinion that in the case of grass and clover seeds, at any rate, a guarantee of germ and purity should be compulsory by law, as is the case with manures. Then here is the further question of change of seed; but what I cannot enter into, for time passes. I hasten now to the third and last topic, to the end of the thread which I had down at the beginning, namely,

The Profit.

I must say this, that profit from crop-growing must be an increasing and increasable quantity if agricultural pursuits are to remain a business. To stand still is to go back, for experience shows us that as civilisation advances, as the relations of life become more complex, competition increases, and increased competition necessitates more skill, compelling us to incorporate in our practice the results got by specialists—necessitates more skill, forcing us to introduce and to apply more science to our practice—to this end,
